

VOX STELLARUM:

OR, A LOYAL

A L M A N A C K

For the Year of HUMAN REDEMPTION

1807,

Being the Third after LEAF-YEAR,

And the 47th of the Reign of his present MAJESTY.

IN WHICH ARE CONTAINED

All THINGS fitting for such a WORK; as,

T A B L E of TERMS and their RETURNS;

The Full, Changes, and Quarters of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS,
and other fixed Stars of Note; the MOON'S Age, and

T A B L E of

The Rising and Setting of the SUN; the Rising and Setting of the MOON; Mutual Aspects; Monthly Observations; and many other Things, useful and profitable.

UNTO WHICH ARE ADDED,

A remarkable CHRONOLOGY; the ECLIPSES;

And other MATTERS both profitable and curious.

Observations on the Weather and Weather Glasses, Rain, &c.

And an HIEROGLYPHIC adapted to the TIMES.

By **FRANCIS MOORE** Physician.

Printed for the COMPANY of STATIONERS,

By D. Bye and H. Law, St. John's Square, Clerkenwell;

And sold by **GEORGE GREENHILL**, at their Hall in *Ludgate Street*.

[Price One Shilling and Ten Pence stitched.]

Come rouse, my Muse, and dictate to my Pen;
That I may tell how Things will be, and when;
When starry Fate Man's Hurt will less conspire,
When War, that Plague of Nations, will retire;
I wish its Rage might cease, and that my Pen
Could PEACE proclaim to Mortals once again.

LAST Quart. 1 day, at 7 morn.
Rain fallen in Jan. 1805, at London, was one Inch and six-tenths. This Month was in general cold and moist.

Rain or Snow, more or less, may be

NEW Moon, 8 day, at 8 at night
 expected about the 2d, 8th, 24th, and 30th Days of this Month, the Day before or the Day after, that is, within the short Space of three Days.

COURTEOUS READER,
 You here, as usual, have the Depth

FIRST Quart. 16 day, at 12 night
 of Rain as it fell in each Month at London, carefully taken by a proper Pluviometer, or Rain-Gage. It is the Height it would have risen to, had it fallen and stagnated on an even Surface, and had it not been made less by Evaporation,

FULL Moon, 24 day, at 3 morn.
 or some other Means. I also have given under the same, as usual, some particular Days (or at least within 24 Hours before or after that Day), when I expect Rain or Snow, more or less.

LAST Quart. 30 day, at 5 aftern.

What Hopes have we the Noise of War shall cease?
 What Hopes have we for the Approach of PEACE?
 Such Hopes as may to EUROPE once restore,
 It's Freedom lost, and not long Time before:
 Such Hopes as may the Tyrant's Fall presage,
 And the confederate Forces yet engage.

This is the Sense we of his Honour have,
 For to be false, with him, is to be brave;
 'Tis fit therefore to arm against Surprize,
 And trust our own and not another's Eyes;
 The Work is done, we in our Station stand,
 And make no *Peace*, but with our *Sword* in Hand.

Monthly Observations.

Rain fallen in June, 1805, at London, was three Inches and six-tenths. This was a cold and rainy Month, the Wind being pretty much North and North east.

NEW Moon, 6 day, at 5 morn.

Rain, more or less, may be expected about the 6th, 16th, 20th, and 25th Days of this Month; the Day before or Day after.

Some eminent Person, either Ecclesiastic

FIRST Quart. 13 day, at 4 morn. or legal, now or near this Time, leaves his Employment, or stoops to the grave. Preparations are making, both at home and abroad, for Sea Affairs. New Leagues, Articles, Councils, now in

FULL Moon, 20 day, at 3 morn.

Prosecution, take up much Time before they be brought to a final Determination — Many are the serious Debates and Consultations of these present Times; and various News arrives daily of the Actions and Resolutions of Foreign Princes and Powers.

LAST Quart. 28 day, at 1 morn.

Matters

The *British* Fleets in Triumphs ride the Seas,
Thro' all the Oceans range where'er we please;
The proud but coward *French* we sometimes fright,
And sometimes with our fiery Balls them smite;
Their Men of War, close in Our Harbours lie,
Their Glory's wounded, and their Honours die.

many yet settled; the People in general are full of Fears and Complaints, and we may expect to hear of some eminent Actions upon the Theatre of the World. The Spirit of Division is let loose amongst the pious Sons of Rome, and hath been

LAST Quart. 27 day, at 6 aftern.

so for some Time; and indeed the Stars are as little favourable to them as to the Turks.

New

Go on brave gen'rous Souls, go without Fear,
 Your God for you in Battle will appear;
 The Day's your own, for God is in the Cause,
 Chastise the Slaves, who will obey no Laws:
 The Greatness of our sacred King proclaim;
 Display the Glory of his mighty Name.

Monthly Observations.

NEW Moon, 2 day, at 7 morn.

Rain fallen in September, 1805, at London, was one Inch and six-tenths. This was a fine seasonable Month. The Barometer was very high on the 29th Day.

FIRST Quart. 8 day, at 11 night.

Rain, more or less, may be expected about the 3d, 16th, 27th, and 30th Days of this Month, the Day before or Day after.

South, is full of Revenge and Fury. This is likely enough to be a Time of

FULL Moon, 16 day, at 9 night

much Action, tending to both Violence and Villainy. The Conjunction of Saturn and Mars in Scorpio, which happens this Month, considered with other Mal-Aspects, we may I think conclude, that the work of Peace is not yet com-

LAST Quart. 24 day, at 11 night

pleted; for here seem to be fresh Mischiefs contrived by some base Schemes of our most inveterate Enemies. Some Distempers and Mortality among Men and Cattle will be very rife about this Time.

There

'Twas in this Month brave NELSON struck the Blow,
That hurl'd full Vengeance on the GALLIC Foe;
Oh what a gath'ring Storm of Slaughter spread!
In all their Ships how crouded lay the Dead!
The *English* lost no Ships! That GOD who gave
Us former Triumphs, certainly will Save.

Monthly Observations.

Rain fallen in November, 1805, at London, was nine-tenths of an Inch. Not much Rain this Month; and on the 15th the Barometer was remarkably high, greater than ever I remember it at Royston, which is in Lat. 52 Degrees.

FIRST Quart. 7 day, at 4 morn.

Rain or Snow, more or less, may be expected about the 6th, 15th, and 29th Days of this Month; the Day before or Day-after.

FULL Moon, 15 day, at 8 morn.

The States of Holland seem amazed, (notwithstanding their new King), and to suffer some Impediments, or Hindrances in their Affairs; France puffed up with some former Successes, becomes very troublesome to her Neighbours. Some great Project in Hand, but defeat-

LAST Quart. 22 day, at 7 at night

ed or destroyed: false News and scandalous Pamphlets appear in all Parts of the Town and Country.

NEW Moon, 29 day, at 12 at noon.

Some

Thus One Year more is drawing to an End ;
 May Happiness our Church and State attend :
 With Unity may Heav'n our Councils bless,
 Our Fleets and Armies with desir'd Success :
 And may all Blessings centre and combine
 In Great King GEORGE and his Illustr'ous Line.

George	2	1727 June 11	33 4 14	47 Oct. 25	Westminster
George	3	1760 Oct. 25	Crowned Sept. 22, 1761.		Vivat Rex.

* Ireland united to these Kingdoms, Jan. 1801.

BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III. June 4, 1738	Duke of Cambridge, Feb. 24, 1774
Prince of Wales, Aug. 12, 1762	Princess Mary, April 25, - 1776
Duke of York, August 16, 1763	Princess Sophia, Nov. 3, - 1777
Duke of Clarence, Aug. 21, 1765	Princess Amelia, Aug. 7, - 1783
Ds. of Wirtemberg, Sept. 29, 1766	Queen Charlotte, May 19, 1744
Duke of Kent, Nov. 2, - 1767	Duchess of Brunswic, Aug. 11, 1737
Prs. Augusta Sophia, Nov. 8, 1763	Princess of Wales, May 17, 1768
Prs. Elizabeth, May 22, - 1770	Duchess of York, May 7, 1767
Duke of Cumberland, June 5, 1771	Prs. Charlotte of Wales, Jan. 7, 1796
Duke of Saxe, Jan. 27, - 1773	

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
France	Napoleon	Aug. 15, 1769	Dec. 15, 1799
Russia	Alexander	Dec. 23, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Peter and Mary	Dec. 17, 1734	Feb. 24, 1777
Prussia	Frederic Wm. III.	Aug. 3, 1770	Nov. 16, 1797
Denmark & Norway	Christian VII.	Jan. 29, 1749	Jan. 14, 1766
Sweden	Gustavus IV.	Nov. 1, 1778	Mar. 29, 1792
Germany	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Papedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Selim III.	July 17, 1761	April 7, 1789

The FULL WEIGHT of the Coins, with the LEAST WEIGHT allowed to pass of the Gold Coin.

GOLD		SILVER.	
Wt. allowed.	Full Wt.		Full Wt.
dwt. gr.	dwt. gr.		dwt. gr.
Guinea - - 5 8	5 9 ³ / ₉	A Crown - - -	19 8 ¹ / ₆
Half Guinea - 2 16	2 16 ⁶ / ₈	Half Crown - - -	9 16 ⁸ / ₃
Seven Shillings 1 19	1 19 ⁴ / ₈	Shilling - - - -	3 20 ² / ₃
		Six Pence - - - -	1 22 ¹ / ₃

According to the above Proportions it appears, that the Value of a lb. of Silver is 62s. or 3l. 2s. and of a lb. of Gold is 44½ Guineas, or 46l. 14s. 6d. Also that the oz. of Silver is 5s. 2d. and the oz. of Gold 3l. 17s. 10½d. So that the value of the standard Gold is 15 times that of the Silver, and 1-14th more.

A plain and easy TABLE, shewing the Time of HIGH-WATER.

NOTE, That the Moon's Age being taken notice of in the Table, you have the Time of HIGH WATER at all the under-named Places.

Beachey, Candado, Dover Pier, Dunkirk, Coast of Flanders, Kentish Knock, Leith, Portsmouth, and the Spits, Queenborough, Southampton, and Isle of Wight.

Blacknels, Calais and Dover, Downs, Gravelend, Half-tide, North-Cape before Cocquit, Romney, Scilly, and Thanet.

Amsterdam, Dord, Calcoijn, Groin, Hartlepool, Ireland in the Westward, London, Robin Hood's Bay, Rotterdam, Tinemouth, and Whitby.

Dartmouth, Falmouth, Guernsey, Humber, Lizard, St. Maloes, Newcattle, Ramsey, Severn-mouth, Scilly, Spurn, and Torbay.

Antwerp, Boston, St. David's-Holms of Bristol, Hull, Lundy, Lynn Half-tide, St. Paul's, Plymouth, Salcom without Uffiant, Waterford.

Aldborough, Bristol, Falmouth, and Foy, Foulness, Lime, Sidmouth in the Channel, Start before St. Nicholas, Weymouth.

Caen, Calais Road, Coves, Dover, the Frith, South-Foreland, Harwich, St. Helen's, Normandy, and Picardy, Yarmouth Road.

Beachy, and the Isle of Wight, Caskets in the Channels, Combay, Dublin, Hague, Peter-Port, St. Magnus's Sound.

15	30	10	50	12	42	2	0	4	42	5	20	6	45	10	0	8	45

NOTE. That the Moon's Age being observed in the first Column, you find the Time of High Water at all the Places above-mentioned, in the respective Column of Numbers immediately below them. Thus, when the Moon is 1 or 16 Days old, it is High Water at Beachy, Candado, Dover, &c. at 38 Minutes past 11 o'Clock. And so of the rest. As to the Moon's Age, you find it in the 6th Column on every left-hand Page of the Calendar.

A TABLE of the Equation of Time for regulating Clocks and Watches for 1807. *Note*, *fa.* Clock too fast, that is, your Clock, to be set right, must be so much faster than the Sun Dial. *fl.* Clock too slow, that is, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table. For Example, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Minutes 49 Seconds faster than a Sun Dial; therefore I set it so much faster accordingly. And so of the rest. Twelve o'Clock is the best Time to set a Clock or a Watch by a Dial.

Note, A Sun Dial shews Solar or Apparent Time, but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

A TABLE of the Rising, Southing, and Setting of the Pleiades, or Seven Stars, for every 5th Day in the Year, of excellent Use to find the Hour of the Night.

1797	Dutch Fleet defeated by Viscount Duncan	10
1798	French Fleet defeated near Egypt by Lord Nelson	9
1801	A general Peace	6
1801	The Planet Piazzi discovered	6
1802	The Planet Olbers discovered	5
1803	War with France renewed	4
1804	The Planet Harding discovered	3

AN ACCOUNT
OF THE
ECLIPSES of the SUN and MOON,
AND OTHER
APPEARANCES IN THE HEAVENS,
In the Year 1807.

CALCULATED FROM VERY CORRECT ASTRONOMICAL
TABLES,

*Founded on the latest Observations, according to the
Newtonian Theory;*

And agreeing with the HEAVENS to a surprising Exactness.

THE Two great Lamps of Heaven, viz. the SUN and MOON will, this Year, afford four Eclipses, each Luminary two; these will happen in the following Order:

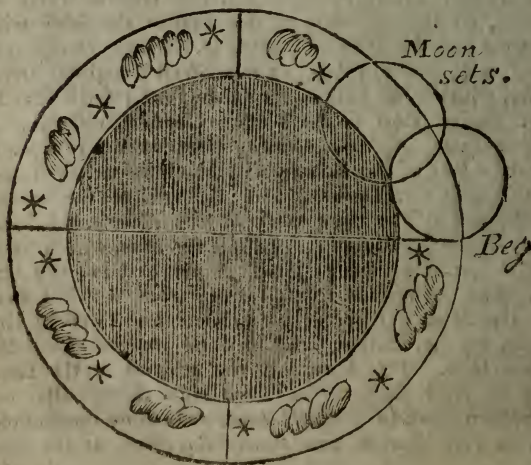

The first is a small Eclipse of the *Moon*, upon *Thursday* the 21st Day of *May*, but invisible to us; for, with respect to *London*, our Metropolis, the Eclipse begins at 9 min. past 4 in the Afternoon; the Middle (or Time of the greatest Obscuration) happens 52 min. past 4; and the Eclipse will be quite over at 35 min. past 5 o'Clock, Solar Time. At the Time of the greatest Obscuration (which is but 1 digit and 45 min.) the *Moon* will be vertical, or directly over their Heads at Midnight, to such Persons as happen at that Time to be sailing a little to the Westward of the Coast of *New Holland*, called *De Witt's Land*, (which he discovered in the Year 1616,) in Latitude 20 deg. 58 min. South, and 106 deg. 52 min. East Longitude from *London*; consequently this Eclipse will be visible to most of the small Islands dispersed in the great *Pacific Ocean*; *New Zealand*, *New Holland*, the whole Extent of its Eastern Coast, even to *Van Dieman's Land*, its most southern Promontory; the Isles of *Sunda*, *Borneo*, *Madagascar*, the *Philippines*, *Japan*, *Yedzo*, and nearly the whole Continent of *Asia*, together with the Eastern Parts of *Africa*, even to the Cape of *Good Hope*.

The Second is a central and annular Eclipse of the SUN, upon *Saturday* the 6th of *June*, at 24 min. past 5 in the Morning; and notwithstanding the *Sun* at that Time is pretty high above our Horizon, yet by reason of the *Moon's* South Latitude, which is also increased by her Parallax, it will be invisible to us. This Eclipse will be central in the Meridian, or precisely at Noon-Day, in 4 deg. 30 min. South Latitude, and 100 deg. East Longitude from *London*; which Place falls on the Western Coast of *Sumatra*, one of the most Western of the *Sunda* Islands, where the Sun (to those who expect it) will make a most beautiful Appearance in the Heavens, forming a very small Ring of Light round the *Moon's* dark Body on every Side; yet it must be a very great Surprise to those Persons, where it comes unawares and unexpectedly, even so, as to give a Shock to human Nature. It will be a very great Eclipse in the Islands of *Borneo* and *Java*, as well as in the Island of *Sumatra*, and, in short, it will be a very great Eclipse throughout the whole *Indian Sea*.

The Third Eclipse this Year is of the lesser Light, namely, the *Moon*, upon *Sunday* the 15th Day of *November*, in the Morning; the Beginning of which will only be visible in the United Kingdom of *Great Britain* and *Ireland*, *France*, *Spain*, *Portugal*, and the Western Parts of *Africa*. At the beginning of this Eclipse the *Moon* will be vertical in the Western Ocean, in Latitude 18 deg. 58 min. North, and 111 deg. 15 min. West Longitude from *London*, which Place falls on the Globe near a small Island, called *Passion Island*, on the Western Coast of *New Mexico*, or *New Spain*, in *North America*; from whence it appears that the whole of this Eclipse will be visible at the *Sandwich* Islands, at *Otaheite*, and the rest of the *Society* Islands, and also at the *Friendly* Islands in the great *South Sea*. At the Middle of this Eclipse the *Moon* will be vertical in Latitude 19 deg. 3 min. North, and 125 deg. 57 min. West Longitude from *London*; from which I find that the *Moon* will set eclipsed about this Time in the *Brazils*, on the Eastern Coast of *South America*, and also at *Cape Horn*. The *Moon* will rise eclipsed at the same Time in *New Zealand*; and soon after the Middle, on the Eastern Coast of *New Holland*; and before the Eclipse ends, at *Port Jackson* and *Botany Bay*; for, at the End
th. reof,

thereof, the *Moon* is vertical in Lat. 19 deg. 9 min. North, and 140 deg. 40 min. West Long. from *London*. From this Statement, it appears that the Whole of this Eclipse will be visible throughout *North America*, the *Island of Cuba*, *Jamaica*, *Hispaniola*, and all the rest of the *West India* *Islands*; and the *Ead* thereof will extend itself as far as the *Islands of Japan* on the *Eastern Coast of Asia*. The true ecliptic Opposition of the *Sun* and *Moon* by my Tables is *November 14th 20 h. 14 m. 1 sec. P. M. Solar Time*. The *Moon's* true Latitude is 47'. 6". N. D. and hourly Motion of *Moon* from *Sun* in her relative Orbit 28'. 18". the *Moon's* horizontal Parallax 55'. 4". and that of the *Sun's* 9".; *Sun's* Semidiameter 16' 12". and that of the *Moon* is 15'. 4".; Angle of the *Moon's* visible Way 5°. 40'. 40"; correct Semidiameter of the *Earth's* Shadow 39'. 56".; and the nearest Approach of the Centres of *Moon* and *Earth's* Shadow, is 46' 52". The following Delineation shows the Beginning of this Eclipse, and Manner of the *Moon's* setting at *London*, and Parts adjacent, and will nearly serve the Whole of our *Island*.

A Type of the *Moon's* Passage through a Portion of the *Earth's* dark Shadow,

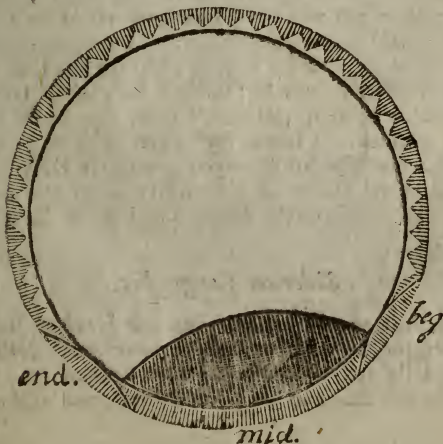

Nov. 15th, in the Morning, app. Time.

	London.	Lincoln.	York.	Edinburgh.
	h. m. f.	h. m. f.	h. m. f.	h. m. f.

End - - -	9 24 52	9 23 12	9 20 21	9 12 3

Total Duration 2h. 2m. 4s.

Digits eclipsed $3^{\circ} 14'. 19''$. at the Middle.

The last Eclipse which happens this Year, is an Eclipse of the SUN, upon *Advent Sunday*, the 29th Day of *November*, and visible here, should the Air prove favourable. In the Southern Parts of the Earth, this will be a very large Eclipse, central; but whether it will prove total, I will not be positive; for, by my Calculations, the *Sun* and *Moon's* Diameters are about equal, so that a very small Error either Way will make it either total or annular, though without Continuance. The following Type is a Representation of this Eclipse, as it is expected to appear at *London*, and Parts adjacent, and may, in a great Measure, serve the Kingdom at large.—*v.* The *Sun's* Vertex, or upper Limb.

In these, our Northern Parts of the Globe, this will prove but a very small Eclipse, by Reason of the *Moon's* parallax in Latitude depressing her so very far to the Southward; for though the *Moon's* true Latitude, at the Time of the visible Conjunction, is $30^{\circ}. 33''$. North, yet by her Parallax, her visible Latitude will be about $24^{\circ}. 28''$. South, which causes the Eclipse to be small with us.

At *London* (and nearly so at *Cambridge* and *Royston*) the *Moon* will be observed to make the first Impression on the *Sun's* Limb, at 119° . from his Vertex, on the right Hand, as the Type sheweth; and the Eclipse begins at 42 min. past 10 o'Clock in the Morning; the Middle of the Eclipse will be at 37 min. past 11, when the *Sun* will appear nearly one Quarter eclipsed; the *Moon* quits the *Sun*, and the Eclipse will end at 31 min. past 12, according to solar or apparent Time.

The Duration of this Eclipse will be 1 hour 49 min.—Digits eclipsed at *London*, $2^{\circ}. 59'. 25''$.

Note.—It will be Six Years before there will be another Eclipse of the *Sun*, and Two Years before there will be one of the *Moon*, visible in ENGLAND.

At the Time of the late total Eclipse of the *Moon*, July 11th, 1805, the Weather was rather unfavourable, but the Clouds began to separate about 9 at Night, so that I saw the *Moon*, just as she was emerging out of total Darkness, but could not observe the exact Time; it afterwards became more clear, and I exactly observed the End of the Eclipse to be at ROYSTON (which is only $8''$ in Time East of *London*) at 54 min. past 10 o'Clock, app. T. or 59 min. past 10 o'Clock. I found my Type of it to be exactly right, and my Time of it proved so also. A Duskiness was observed on the *Moon's* Limb for a Minute or two after the Eclipse was ended, or the *Moon's* quitting the *Earth's* dark Shadow.

Siderum Congressus.

THIS Year affords but little on this Head of Information, yet for the Sake of such as have good Telescopes, and are delighted with this Kind of Speculation, I here mention a few that may be worth Notice, and visible here.

1. On *Saturday* the 21st of *February* in the Morning, the *Moon* will eclipse a small Star in *Cancer*, which is of the 4th Magnitude; at *London*, the Immerſion will take Place at 16 min. paſt 2 o'Clock; and the Emerſion will be at 8 min. after 3, app. Time.

2. On *Thursday*, *April* the 16th, in the Evening, the *Moon* eclipses the ſame Star again, when the Immerſion will be at *London*, at 49 min. paſt 7 o'Clock; and the Emerſion will be at 9 o'Clock exactly, according to app. Time.

3. On *Thursday*, the 18th of *June*, in the Morning, the *Moon* eclipses the Star *Delta* in *Scorpio*, which is of the 3^d Magnitude. At *London*, the Immerſion will be at 15 min. paſt 1; and the Emerſion at 8 min. after 2 o'Clock, ſolar Time.

4. On *Wednesday*, the 19th of *Auguſt*, the new *Georgian* Planet will be in Conjunction of the Planet *Mars*, as ſeen from the Earth, when *Mars* will appear about 56 min. more to the South. They may be ſeen before they ſet that Evening.

5. On *Sunday* Morning, *October* the 25th, the *Moon* eclipses another Star in *Cancer*, of the 4th Magnitude; the Immerſion at *London* will be at 23 min. paſt 2 that Morning, and the Emerſion will be at 23 min. paſt 3 o'Clock, ſolar Time.

Note.—The beautiful Planet *VENUS* will gild our Evenings with her refulgent Beams, by making a pretty Appearance in the Weſt after the *Sun* is ſet, eſpecially from the End of *May* to the End of *Auguſt*, as ſhe will ſhine late at Night, and particularly ſo in the Months of *June* and *July*.

METEOROLOGICAL OBSERVATIONS, &c.

With Remarks on the Weather in 1805.

UNDER the Depth of *RAIN* fallen at *London*, in the Year 1805, given at the Top of the right Hand Page of every Month, I have pointed out the Time when there is a great Probability of *Rain* or *Snow* (more or leſs) within the ſhort Compaſs of three Days, according to my Rules and Obſervations; and though this Change in the State

State of the Air may sometimes take Place a Day or two sooner or later, and perhaps even sometimes miss (from some unknown Causes operating at the Time,) yet nevertheless, within this small Limit, my Predictions on this Head have mostly been wonderfully verified, notwithstanding the great Difficulty of the Subject, especially in this Island of ours; therefore worthy, I think, of some Notice. Now these particular Times of an Alteration in the Atmosphere for either *Rain* or *Snow*, with the Weather mentioned in the Columns of each Month, make up my general Judgment of the Weather for that Month; but after all, let me advise the industrious *Crafter* and *Farmer*, to study the Use of a good BAROMETER, that is well adjusted, and not fixed too high for his Observation; and let him be particular about it at all Times of the Year, as well as just in *Hay-time* and *Harvest*, so that he may clearly understand its Indications, lest perhaps, when he most wants its Aid, he may give a wrong Judgment, as sometimes has been the Case with those not very well versed in these Instruments; but with those portable Weather Glasses I make and sell I give particular Rules and Directions, whereby the most ignorant may soon understand them, which, in some Seasons, may be Pounds in a *Farmer's* Way, as I have noticed for more than forty Years. I cannot too much warn my Countrymen against bad Instruments of this Kind; they cannot be too cautious about them, therefore purchase from the very best Hands. But to return:—The Year 1805 was pretty uniform as to its Temperature, with respect to Heat and Moisture, yet, of its 22 Inches of Rain that fell, above 9 Inches and a half of it fell in the three Summer Months of *June*, *July*, and *August*; it was a very growing Time, but the Harvest was rather late, yet very productive in most Parts of the Kingdom; but though late, it was well got in; the *Quick-silver* in the *Barometer* standing very high for the most part, especially in the Months of *July*, *August*, *September*, and Part of *October*, which indicated fine Weather, and I think I never knew the *Barometer* higher than it was once this Year; namely, about the Middle of *November*. In looking over my Journal kept at *Roxton*, in *Hertfordshire*, I find the hottest Day to be the 12th of *August*, and the coldest the 13th of *December*, in this Year of 1805.

Judicium Astrologicum pro Anno 1807.

Vox Cælorum, Vox Dei. The Voice of the Heavens is the Voice of God.—He speaks in all the Changes of the Seasons, and of the Times.

COURTEOUS READER,

IN my two last Almanacks, I applied the 25th and 26th Verses of the 21st Chapter of *St. Luke*, as applicable to the present Times; for indeed the Tempest which has been, and is still let loose on the World, is truly dreadful, as its Ravages seem to threaten all *Europe* with general Ruin and Desolation; but terrific, however, as it appears, we have this Consolation, that its Powers are not without Limits, nor its Course lawless; for it is the Servant of Infinite Wisdom, and is governed by that God who governs the World; yet nevertheless, *be ye wise now therefore, O ye Kings, and be instructed ye Judges and Inhabitants of the Earth*, and let the Shocks occasioned by Wars and Rumours of Wars, and the Changes and Dissolution of States and Kingdoms, rouse you from the Lethargy into which ye are fallen, and into which we are all apt to fall during the ordinary Course of Events. Adversity is the best Instructor of both Nations and Individuals, in true Wisdom; for whilst Vice, Irreligion, and Impiety, are so prevalent throughout the Nation, and but few, comparatively considered, are living according to the Precepts of God, it cannot be expected that he will pass over our Transgressions, and not visit this Country with a Scourge, when He ariseth to chastise the Nations of the Earth; but on the other Hand, ye poor, afflicted, and distressed, who go Mourning all your Days for the Wickedness and Abominations of the Land, and tremble at the Judgments of God, which are abroad in the Earth;—the *Scriptures* abound with much Consolation to raise your drooping Spirits; and though the horrid Din of Arms, and the Thunders and Ravages of War, may disturb your Peace and Comfort in this World, yet ye shall find sweet Repose, even amidst contending Elements, the Wreck of Nations, and the Crash of Worlds; for God is in the Tempest directing the Storm: and though the Contest is tremendous and destructive, yet ere long, I trust, that God, by the BRITISH Nation, will yet give
universal

universal Peace to the World, especially to afflicted *Europe*; therefore lift up your Heads with Joy, for your Redemption seems to be drawing nigh.—See my Almanack for 1798, P. 43.

I shall now, as usual, present my Readers with a remarkable *Hieroglyphic*, alluding to these wonderful Times.—I shall omit the deciphering of the Characters, as they relate to a View of Mundane Affairs, but leave them to Time and the Curious to construe.

*Observations on the Four Quarters of the Year,
deduced from the Influx and Influences of
the PLANETS, operating therein.
Of the Winter Quarter.*

THE Winter Quarter begins when the *Sun*, in his Annual Circuit, first touches the Southern *Tropic*, called *Capricorn*, which this Year that Luminary will do, on *Monday*, the 22d of *December*, 1806, at 5 min. past 11 in the Forenoon, when 17 deg. of ♄ will be upon the Medium Cali, and 28 deg. of ♀ on the Horoscope, or Ascendant. All the Planets at this Ingress I find are above the Earth, except the

the *Moon*, who is in the 2d House, défluxing from a Zodiacal 8 of ♁ , and Δ of ♃ , and Δ of *Mars*.—In turning my Eyes over this Chart of the Heavens, and ruminating over the Positions, Connections, and Communications of the planetary Orbs, I have no doubt but that there will be in this Quarter, many eminent Councils and Consultations held, in most of the Courts of *Europe*, on the Subject of NEGOCIATION and PEACE, and Change of Hands, and of Alterations in Kingdoms and States,—and that some great Designs and Actions are now on Foot, or at least soon will be, in *England, Prussia, Holland, France, Germany* and *Spain*. The Northern Powers, such as *Sweden, Russia* and *Denmark*, will also be included in these Consultations and Designs ;—and I say, that they are likely to be carried on and prosecuted with great Resolution and Vigour,—but Time must produce the Particulars, for at present, many Things seem to be enveloped in Darknèss, that no Human Sagacity can at present penetrate into the Designs of the different Powers on the Continent. But it seems to me, that the *French* Government is wonderfully busy, and I fear with too much Success by Land, but not by Sea; even with all the *Dutch* Shipping to boot,—so that, ere long, the Vaunts and Menaces of our most vengeful Foe, will pass off, like a Gust of Wind, that roared and died away.—The *Emperor* of *Germany* has of late, and is still like to suffer Vexations and Troubles; yet that noble House will remain, it will not be destroyed. *Spain* seems also to be trembling with the most fearful Fore-bodings, especially about her Possessions in the Western World.—The United States of *America*; yes, I say, the United States of *America*, will be much agitated by Broils and Discontents—I say, they must take Care of *French* Counsels. I used to warn *Holland*, but *Holland*, it seems, could not help herself; the United States of *America* can, if they take some Precaution and Warning in due Time. But to come nearer Home, into our own Country, there seems to be a considerable Discontent among the People, or at least soon will be, concerning Taxes, and other heavy Burthens and Imposts.

Of the Vernal, or Spring Quarter.

THIS Quarter commences the 21st Day of *March*, at 36 min. past 12 at Noon, when 10 deg. of γ will be on

the Mid-heaven, and 3 deg. of the Regal Sign *Leo*, will be upon the Ascendant.—The *Moon*, I find, will be in 26 deg. of Ω departing from a *Trine Aspect* of \S , and also the same of *Venus*, and also applying to a *Conjunction* as seen from the Earth, of *Mars* in *Virgo*; and what is rather remarkable, the two inferior Planets, *Venus* and *Mercury*, are in *Conjunction*, in the South Angle of the Heavens, just as they were at the Commencement of the Winter Quarter; now in the Equinoctial Sign φ , but before in the Sign \uparrow .—The rest of the Planets are poited as the following Scheme sheweth.

THIS Scheme of the Heavens, like that of the Winter Quarter, forebodes to us, and all *Europe*, some unpleasant Things, for though there appear Negotiations going forward, tending to restore to the groaning World the Blessings of PEACE and TRANQUILLITY; yet, I am afraid, according to the Figure, that the Lust of Ambition, and the Rage for Revenge, will continue to distract and disturb many Parts of *Europe*, as well as our own Nation, by the restless Ambition of the *Emperor of France*.—This, I must tell you, will be a very busy Year, and some

are like to fall under great Troubles, Losses and Crosses, by high Demands, and hasty and rash Proceedings; and this is also likely to be the Case with the Western World, as well as many Parts of *Europe*.—Men's Minds are still in great Ferment, their Passions run high, and will, I fear, not be easily reduced to Reason; though indeed, the late *Sextile* of *Jupiter* and *Saturn*, intimated at least, that in order to check the prevalent perverse Disposition of Mankind, some worthy Man, or Men, would interpose, and do their utmost Endeavours to calm these unruly Passions, and allay, if possible, the Heats and Animosities of the Times, in order to reconcile contending Parties in War and Bloodshed; but, alas, I fear they will not be able, at present, wholly to do this, as appears by the *Squaring* of two superior Planets *Jupiter*, and *Saturn*, during so much of this Year; and likewise the Planet *Mars*' long Position in *Virgo*, a Human Sign.—Indeed, if a Negotiation for *Peace* has not by this Time succeeded, and that under the Influence of the *Sextile* Aspect of *Jupiter* and *Saturn*, I am doubtful of its being concluded before the Autumn of this Year, if then; for the *Square* Aspect of those Planets in this Quarter, and also repeated again in *August*, undoubtedly signifies great Changes and Alterations to happen in the World, with Broils, unfortunate Jars and Discontents, with Discords and treacherous Conspiracies.—The *Raven* made several Progressions, and the *Dove* herself more than one, before she brought in the Olive Branch.

Of the Summer Quarter.

THIS Quarter begins on *Monday*, the 22d Day of *June*, at 23 min. past 10 in the Morning, when 13 deg. of ♄ ascend. and 8 deg. of ♂ are on the Mid-heaven. The *Moon* is in 28 deg. of ♃ , departing from the ♁ of ♁ , and Δ of ♁ , both applying to the *Conjunction* of *Jupiter* in *Aquarius*.—The two weighty Planets, *Jupiter* and *Saturn*, are within Orbs of their *Square* Aspect in the Zodiac, from *Scorpio* and *Aquarius*; in this Situation they, as it were, go Hand in Hand for many Weeks, before they separate far asunder; and on the 3d of *September*, *Mars* comes to a *Conjunction* of *Saturn* in the Sign *Scorpio*. These malevolent Positions, denote Strife and Discord among all Degrees of Men, but more especially among those at the Helm of Affairs; giving Disturbance and

Fatigue

Fatigue to their Counsels and Deliberations, with Loss and Detriment to Persons of high Rank; and if it is War, with Slaughter and Bloodshed, and it may be, both by Sea and Land.—But, oh, thou Eternal Father of the Universe! “let thy Light and thy Truth shine forth,” that Mankind may no longer shed each other’s Blood, and be the sad Victims of Prejudice, Tyranny, and Error! The Moon is leaving the Zodiacal Sign, *Capricorn*, and is about entering *Aquarius*, a fixed Sign, and next applying to a Square Aspect of *Saturn*, and Conjunction of *Jupiter*, which implies, that some great and weighty News arrives from foreign Parts; I wish it may be for the good of *Great Britain* and *Ireland*.—However, we have this Consolation, that the British Fleet is in a good and flourishing Condition, and is also well appointed, so that the very Name strikes a Terror on our Enemies; may we always be Victorious, is, and ought to be, the hearty Prayer of every true-born Englishman.

Of the Autumnal Quarter.

THIS Quarter commences on *Wednesday*, the 23d of *September*, at 12 min. past 12 at Night, or rather on *Thursday* the 24th, at 48 min. before 1 in the Morning, when 3 deg. of φ will be on the Mid-heaven, and 29 deg. of ϵ are ascending in the East.—The Moon ad \square of δ in Δ of ρ . The Configurations of the Planets at this Time, shew it will be a very busy Quarter; so that if the Preliminaries of PEACE have not yet been concluded, or agreed upon, there will now be great Rumours of *Overtures* being transmitted from Court to Court; and in short, I expect the major Part of this Quarter to be taken up and spent in forming Councils and Conventions, to deliberate upon Ways and Means, in order either to bring about, or to extend and consolidate the TERMS of PEACE, AMITY, and CONCORD.—However, at least, it appears from some of the Positions of the Planets in this ingressional Figure, that Part of the Structure will be raised, though it should lie for a Time unfinished; which to effect and bring to a Conclusion, let us implore the All-wise and Omnipotent Disposer of all secondary Causes and Events, to put his helping Hand.
