

VOX STELLARUM:

OR, A LOYAL

A L M A N A C K

For the Year of HUMAN REDEMPTION

1810,

Being the Second after Bissextile or LEAP-YEAR,
And the 50th of the Reign of his present MAJESTY.

IN WHICH ARE CONTAINED

All THINGS fitting for such a WORK; as,

TABLE of TERMS and their RETURNS;

The Full, Changes, and Quarters of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS,
and other fixed Stars of Note; the MOON'S Age, and

TIDE TABLE fitted to the same;

The Rising and Setting of the SUN; the Rising, Southing, and
Setting of the MOON; Mutual Aspects; Monthly Obser-
vations; and many other Things, useful and profitable.

UNTO WHICH ARE ADDED,

Astrological Observations on the Four Quarters of the Year;

A remarkable CHRONOLOGY; the

And other MATTERS both pro-

Observations on the Weather and Weather

And an **HEROGLYPHIC** adapted to

By **FRANCIS MOORE,**

Physician.

LONDON:

Printed for the COMPANY of STATIONERS,

By LAW and GIBERT, St. John's Square, Clerkenwell;

And Sold by **GEORGE GREENHILL**, at their Hall in *Ludgate Street*.

[Price One Shilling and Ten Pence stitched.]

Awake, my slumb'ring Muse, prepare to fly,
 Into the Regions of the spangled Sky,
 To ransack the Cœlestial Spheres above,
 And Tidings bring from Planets, Mars and Jove:
 Then to the Reader make thy Thoughts appear,
 And bid him welcome to this new-born Year.

Rain fallen in Feb. 1808, at London, was about Seven-Tenths of an Inch.
 Rain or Snow, more or less, may be expected about the 10th, 16th, 19th, and 27th of this Month; the Day before or the Day after.

NEW Moon, 4 day, at 2 morn.

lar Times when Rain or Snow may be expected, deduced from my Observations of the Planets, and the Moon's Influence on the Atmosphere, in the different Parts of her Orbit; for the Use of the plain Husbandman, as well as for the more curious Reader.

FIRST Quart. 11 day, at 7 morn.

Now follow my Astrological Observations and Predictions, relating to the Affairs of the World.

FULL Moon, 19 day, at 11 morn.

GOD direct the Councils and Consultations of our *English* Nation, and grant Unity amongst them. There are some good Aspects of the Planets

LAST Quart. 26 day, at 9 night.

this Month. Perhaps some Offers

Venus is a Morning Star till March 15; then an Evening Star till the End of the Year.

And if the Stars for Signs created were,
 Something significant must needs appear.
 From their Configurations, and Aspects,
 We may be sure to feel divers Effects.
 Thus Hermes, in a Square to fiery Mars,
 Blows up a Flame to the ensuing Jars.

Monthly Observations.

Rain fallen at London in April, 1808, was One Inch Six-Tenths.

Rain or Snow, more or less, may be

NEW Moon, 4 day, at 2 morn.
 expected about the 2d, 16th, 22d, and 26th Days of this Month; the Day before or the Day after.

As we have some Male Configurations of the Planets near this Time, so,

FIRST Quart. 11 day, at 11 night.

doubtless, some very considerable Matters will now be warmly decided. The Public Affairs appear with a heavy and sour Disposition; and the Minds and Actions of most Persons are tinged with Malice and Revenge; which will occasion very high Disputes.

FULL Moon, 19 day, at 3 aftern.

Such Matters are now approaching, and will be brought to Light, as the most knowing and intelligent Persons but little dreamed of.

Variety of Affairs are now upon the Anvil. Some German and Italian

LAST Quart. 26 day, at 9 morn.

Princes under great Consternation.

Saturn opposes Mars : But, lo! anon
 From Scorpio retrograde confronts the Sun ;
 Hermes and Chronus in Conjunction greets,
 Whilst he in Gemini bright Phœbus meets.
 Some boisterous Storms may be expected ;
 With Villanies discovered and detected.

Saturn opposes Heav'n's Charioteer,
 The Sun with fiery Mars doth now appear;
 Heat begets Heat, and Flames do Flames create,
 Here's Matter lodg'd for fiery bleeding Fate:
 'Twill stir up Mischief, and will make some rue,
 In Rome, France, Germany, and Britain too.

	18 3 43	8 17	0 41	strange incredulous Reports, purposely
	19 3 43	8 17	1 43	contrived to affright and disturb the
	20 3 43	8 17	2 42	People.
	21 3 43	8 17	3 39	We in England have two Sorts of
	22 3 43	8 17	4 32	People amongst us; one of them grum-
	23 3 43	8 17	5 23	LAST Quart, 23 day, at 11 night,
G	3 43	8 17	6 12	ble without a Cause, and the other
	25 3 42	8 17	6 59	hope without Ground, and how to
	26 3 43	8 17	7 47	cure them is a Work too hard for
	27 3 44	8 16	8 34	me. I give a Word of Advice, let
	28 3 44	8 16	9 21	every serious, honest-hearted Sub-
	29 3 44	8 16	10 9	ject be careful of his own Health,
	30 3 45	8 15	10 57	since Health of Body, and Tranquil-

But now the Scene is chang'd from what is past,
 This Month's Aspects prove milder than the last.
 And now a Martial Favourite to the Crown,
 For his brave Actions, meets with high Renown.
 The Weather's various, yet we need not wonder,
 (Mars in Cancer stands) if it should Thunder.

But lo! my Muse, what busy Actions here!
 Saturn in Square to Phœbus doth appear.
 Mars in Square to Jove, with seeming Hate,
 And busy Hermes acts with much Deceit.
 Tumultuous Strife and Discord is portended,
 And great Debates arise, not quickly ended.

Upon the TWELVE SIGNS.

- ♈ The Head and Face the RAM doth always rule :
- ♉ The Neck and Throat are govern'd by the BULL.
- ♊ O'er the Arms and Shoulders still the TWINS preside :
- ♋ Breast, Stomach, Ribs, the crooked CRAB doth guide.
- ♌ The noble LION rules the Back and Heart :
- ♍ The bashful VIRGEN claims the Belly Part.
- ♎ The Reins and Loins the equal BALANCE weigh :
- ♏ The SCORPION O'er the Secret Parts doth sway.
- ♐ The curious ARCHER doth the Thighs affect :
- ♑ So doth the GOAT our bended Knees protect.
- ♒ The Legs unto AQUARIUS' Lot do fall :
- ♓ The FISH our active Feet their Portion call.

Common Notes for the Year 1810.

Lunar Cycle, or Golden Numb.	6	Lent begins	- - -	Mar. 7
Epact - - - - -	25	Easter Day	- - -	April 22
Dominical Letter - - -	G	Rogation Sunday	- -	May 27
Cycle of the Sun - - -	27	Ascension Day	- -	May 31
Sundays after Epiphany - -	6	Whit Sunday	- - -	June 10
Number of Direction - -	32	Sundays after Trinity	- -	23
Septuagesima Sunday	Feb. 18	Advent Sunday	- -	Dec. 2

A TABLE of Terms and Returns for the Year 1810.

Hilary Term begins Jan. 23, ends Feb. 12.

Returns, or Essoign Days.		Ex.	Ret.	Ap.	W. D.
In eight Days of St. Hilary	Jan. 20	21	22	23	Tuesday.
In fifteen Days of St. Hilary	- - 27	28	29	30	Tuesday.
On the Mor. of the Purif. of the Bl. V. M.	Feb. 3	4	5	6	Tuesday.
In eight Days of the Purif. of the Bl. V. M.	9	10	11	12	Monday.

Easter Term begins May 9, ends June 4.

In fifteen Days of Easter	May 6	7	8	9	Wednesday.
From Easter Day in three Weeks	- - 13	14	15	16	Wednesday.
From Easter Day in one Month	- - 20	21	22	23	Wednesday.
From Easter Day in five Weeks	- - 27	28	29	30	Wednesday.
On the Mor. of the Ascen.	June 1	2	3	4	Monday.

Trinity Term begins June 22, ends July 11.

On the Morrow of the Holy Trinity	June 18	19	20	22	Friday.
In eight Days of the Holy Trinity	24	25	26	27	Wednesday.
In fifteen Days of the Holy Trinity	July 1	2	3	4	Wednesday.
From the Day of Holy Trin. in 3 Weeks	8	9	10	11	Wednesday.

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the Morrow of All Souls	Nov. 3	4	5	6	Tuesday.
On the Morrow of St. Martin	- - 12	13	14	15	Thurs.
In eight Days of St. Martin	- - 18	19	20	21	Wednesday.
In fifteen Days of St. Martin	- - 25	26	27	28	Wednesday.

N. B. No Sittings in Westminster Hall on the Second of February, Ascension Day, and Midsummer Day.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, The first and last Days of every Term are the first and last Days of Appearance.

KINGS and QUEENS from the CONQUEST.

George 3	1760 Oct. 25	Crowned Sept. 22, 1761.		Vivat Rex.

* Ireland united to these Kingdoms, Jan. 1801.

BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III. June 4, 1738	Duke of Suffex, Jan. 27, - 1773
Queen Charlotte, May 19, 1744	Duke of Cambridge, Feb. 24, 1774
Prince of Wales, Aug. 12, 1762	Princess Mary, April 25, - 1776
Duke of York, August 16, 1763	Princess Sophia, Nov. 3, - 1777
Duke of Clarence, Aug. 21, 1765	Princess Amelia, Aug. 7, - 1783
Ds. of Wirtemberg, Sept. 29, 1766	Duchess of Brunfwic, Aug. 11, 1737
Duke of Kent, Nov. 2, - 1767	Princess of Wales, May 17, 1768
Prs. Augusta Sophia, Nov. 8, 1768	Duchess of York, May 7, 1767
Prs. Elizabeth, May 22, - 1770	Prs. Charlotte of Wales, Jan. 7, 1796
Duke of Cumberland, June 5, 1771	

SOVEREIGNS OF EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
France, &c.	Napoleon	Aug. 15, 1769	Dec. 15, 1799
Russia	Alexander	Dec. 23, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Mary	Dec. 17, 1734	Feb. 24, 1777
Prussia	Frederic Wm. III.	Aug. 3, 1770	Nov. 16, 1797
Denmark & Norway	Frederic VI.	Jan. 27, 1768	Mar. 13, 1808
Sweden	Charles XIII.		June 6, 1809
Austria	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Popedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Mustapha	Sept. 7, 1779	May 29, 1807

The FULL WEIGHT of the Coins, with the LEAST WEIGHT allowed to pass of the Gold Coin.

GOLD		SILVER.	
Wt. allowed.	Full Wt.		Full Wt.
dwt. gr.	dwt gr.		dwt. gr.
Guinea - - 5 8	5 9 $\frac{3}{8}$ $\frac{2}{8}$	A Crown - - -	19 8 $\frac{1}{3}$ $\frac{1}{3}$
Half Guinea - 2 16	2 16 $\frac{0}{8}$ $\frac{4}{8}$	Half Crown - - -	9 16 $\frac{3}{3}$ $\frac{1}{3}$
Seven Shillings 1 19	1 19 $\frac{1}{8}$ $\frac{3}{8}$	Shilling - - -	3 20 $\frac{2}{3}$ $\frac{1}{3}$
		Six Pence - - -	1 22 $\frac{1}{3}$ $\frac{1}{3}$

According to the above Proportions it appears, that the Value of a lb. of Silver is 62s. or 31. 2s. and of a lb. of Gold is 44½ Guineas, or 46l. 14s. 6d. Also that the oz. of Silver is 5s. 2d. and the oz. of Gold 3l. 17s. 10½d. So that the value of the standard Gold is 15 times that of the Silver, and 1-14th more.

A plain and easy TABLE, shewing the Time of HIGH WATER.

NOTE, That the Moon's Age being taken notice of in the Table, you have the Time of HIGH WATER at all the under-named Places.

Days	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15		
1	16	11	38	1	30	2	48	5	35	6	8	7	33	10	48	9	3
2	17	12	26	2	18	3	36	6	18	6	56	8	21	11	36	9	5

6	21	3	38	5	30	6	48	9	30	10	8	11	33	2	48	1	3
7	22	4	26	6	18	7	36	10	18	10	56	12	21	3	36	2	5
8	23	5	14	7	6	8	24	11	6	11	44	1	9	4	24	3	3
9	24	6	2	7	54	9	12	11	54	12	32	1	57	5	12	3	5
10	25	6	50	8	42	10	0	12	42	1	20	2	45	6	0	4	4
11	26	7	38	9	30	10	48	1	30	2	8	3	33	6	48	5	3
12	27	8	26	10	18	11	36	2	18	2	56	4	21	7	36	6	2
13	28	9	14	11	6	12	24	3	6	3	44	5	9	8	24	7	9
14	29	10	2	11	54	1	12	3	54	4	32	5	57	9	12	7	5
15	30	10	50	12	42	2	0	4	42	5	20	6	45	10	0	8	4

Beachy, Candado, Dover, &c. 38 Minutes past 11 o'Clock. Antwerp, Iboton, St. David's Holms of Brittol, Hull, Lundy, Lynn Half-tide, St. Paul's, Plymouth, Salcom without Uffant, Waterford. Aldborough, Brittol, Falmouth, and Foy, Foulnets, Lyme, Sidmouth in the Channel, Start before St. Nicholas, Weymouth. Caen, Calais Road, Cowes, Dover, the Frith, South-Forland, Harwich, St. Helen's, Nonnandy, and Picardy, Yarmouth Road. Beachy, and the Isle of Wight, Calkeits in the Channels, Combay, Dublin, Hague, Peter-Pori, St. Martin's Sound.

NOTE. That the Moon's Age being observed in the first Column, you find the Time of High Water at all the Places above-mentioned, in the respective Column of Numbers immediately below them. Thus, when the Moon is 1 or 16 Days old, it is High Water at Beachy, Candado, Dover, &c. at 38 Minutes past 11 o'Clock. And so of the rest. As to the Moon's Age, you find it in the 6th Column on every left hand Page of the Calendar.

A TABLE of the Equation of Time for regulating Clocks and Watches for 1810. *Note*, *fa.* Clock too fast, that is, your Clock, to be set right, must be so much faster than the Sun Dial. *fl.* Clock too slow, that is, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table. For Example, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Minutes 48 Seconds faster than a Sun Dial; therefore I set it so much faster accordingly. And so of the rest. Twelve o'Clock is the best Time to set a Clock or a Watch by a Dial.

Note, A Sun Dial shews Solar or Apparent Time, but a Clock, &c. should be set to Equal or Mean Time, as the Table directs; to go true.

A TABLE of the Rising, Southing, and Setting of the Pleiades, or Seven Stars, for every 5th Day in the Year, of excellent Use to find the Hour of the Night.

AN ACCOUNT OF THE
ECLIPSES of the SUN and MOON,

And other Appearances in the Heavens,

In the Year 1810.

CALCULATED FROM NEW AND IMPROVED SOLAR
AND LUNAR TABLES,

Founded on the Newtonian System of Gravitation,

And agreeing with Observations to a surprising Exactness.

WITHIN the Limits of this Year, there will be only two Eclipses, and they both of the SUN; none of the MOON can happen this Year, for the following Reason, in the Words of the great Kepler, *Novilunia duo centralibus propinqua; Ergo, Circumstantia Plenilunia illibata Eclipsis Lunæ toto Anno nullo;* for which Reason also, such Solar Eclipses are seldom visible with us here in ENGLAND, although the SUN should be above the Horizon, and shone ever so bright.

The first of these Eclipses will be on *Wednesday*, the 4th day of *April*, at 37 min. past One o'Clock in the Morning; consequently, must be invisible to us on that Account only; but in the great South Pacific Ocean, where it is visible, it will be a very great Eclipse, central and annular, the Sun's Diameter being 32' 0", and the Moon's not more than 31' 28" of a degree. In 154 deg. 41 min. of East Longitude from *London*, and under 11 deg. 20 min. of North Latitude, the SUN will be centrally Eclipsed precisely at Noon Day, when a small bright Circle of Light will appear round the MOON's dark Body, on every Side, which is at 41 min. past our 1 o'Clock in the Morning; therefore, I find that this Eclipse will be visible (more or less in Quantity and Duration) at the *Sandwich Islands*, the *Friendly Islands*, the *New Hebrides*, *New Caledonia*, the Northern Coast of *New Holland*, *New Ireland*, *New Guinea*, the *Ladron Islands*, and as far North

as the Island of *Japan*; and Westward to the *Philippine Islands*, and I expect as far as the Island of *Borneo*, and the other small Islands thereabout.

The Second of these Eclipses will be on *Friday*, the 28th Day of *September*, at 46 min. past 4 o'Clock in the Afternoon; but notwithstanding the *Sun* is not then Set, it will be invisible to us, by reason of the *Moon's* true Latitude being South, and that also increased by her Parallax in Latitude, will depress the visible Place of her Centre more than is the Space taken up by the Semi-diameters of the *Sun* and *Moon*. This, like the former, will be a very great Eclipse in the Southern Parts of the Globe; for in that large Kingdom *PERU*, in *South America*, the *Sun* will be centrally Eclipsed and Annular; and the Ring of Light round the *Moon*, will be broader than in the last Eclipse; as the apparent Diameter of the *Sun* is 1 min. 30 sec. more than that of the *Moon*. This Appearance will be precisely at their 12 o'Clock at Noon, under 6 deg. 7 min. South Latitude, and 72 deg. 19 min. of West Longitude from *London*; and this is at 49 min. past our 4 o'Clock in the Afternoon; consequently, this Eclipse will be visible in a partial Manner (more or less) to the greatest Part of *South America*; it will also extend itself to the Island of *Jamaica*, to the Island of *Hispaniola*, called by some *St. Domingo*, and all the Rest of the West India Islands.

Other Appearances in the Heavens.

An Eclipse is a fleeting Disappearance of a luminous Body, caused by the Interposition of some opaque or dark Body; and as the Planets are suspended one above another in unequal and concentric Orbits, which cut each other in opposite Points, they also may at certain Times, two or more of them, meet in the same visual Ray, whereby the inferior Star or Planet will, by Density, deprive us for a while of the Sight of the Superior. Hence it is evident, that besides the Eclipses of the Luminaries properly so called, the other Planets, and also the fixed Stars, are subject to Eclipses. The most remarkable that will be visible to us, of this Sort, in the present Year, as

eclipsed by the *Moon*, are the following. The first then of these Eclipses, or rather Occultations, which I shall notice, is of the Planet *JUPITER*, on *Thursday, Feb. 8th*, in the Evening. The *Moon* will be seen approaching this fine Star for some Time, before the Immersion takes Place, when the Eastern dark Edge of the *Moon* will take *Jupiter* at 4 min. past 8 o'Clock, as at I, in the annexed Type; and *Jupiter* will again emerge from behind the

bright Edge of the *Moon*, as at E, at 46 min. past 8, as in the Type; after being hid 36 minutes. This will make a beautiful Appearance through a good Achromatic Telescope, (should the Air be clear) as all *Jupiter's* Satellites will be visible, two of them to the Left, and the

other two to the Right Hand of *Jupiter*; but they will appear in an oblique Direction from the Spectator.

Note.—The Planet *Jupiter* is a large stupendous Globe, of Ninety-four Thousand Miles in Diameter, and is undoubtedly an Habitable World, or else, to what Purpose are his several Seasons, his four Moons, but for the Use of his Inhabitants, his Nights and Days, his Winters and Summers, his New and Full Moons? All which by our Telescopes, we see and know he hath; but our little Earth is not quite Eight Thousand Miles in Diameter; a Globe certainly very small, when compared to that of *Jupiter*.

The next Occultation worthy of Notice, is a visible

Transit of the *Moon* over a fixed Star of the first Magnitude, called *Aldebaran*, and happens on *Tuesday, the 18th of September*, at Night. The bright Edge of the *Moon* first takes the Star, and the Immersion takes Place at 4 min. past 10 o'Clock,

as at I, in the annexed Type thereof. This Star will be obscured from Sight for 55 minutes, and then comes out from behind the dark Edge of the *Moon*, at 59 min. past 10, as at E, in the Type.

On *Friday, December* the 21st, in the Morning, soon after the *Moon* rises, she eclipses the Planet *Mars*; they will rise together, about 2 min. past 2 o'Clock, and *Mars* will immerse behind the bright Edge of the *Moon*, near her upper Horn, at 6 min. past 2; as the annexed Type sheweth at I; and *Mars* will appear again from behind the *Moon's* dark Edge, as at E, 36 min. past 2 o'Clock; after being hid 30 min.

Note.—The Times of these Occultations are calculated and adapted to the Latitude and Meridian of *London*, as are also the Delineations of them; and at small Distances from *London*, as at *Cambridge* and *Oxford*, there will not be much Difference.

I wish it fair, that Artists may descry
These various Stars eclipsed, to verify
Their Calculations; if it chance to rain,
Or if 'tis Cloudy, then we watch in vain.

METEOROLOGICAL OBSERVATIONS, &c.

Relating to the Year 1808; with Remarks on the Barometer, or Weather Glass.

THE distinguishing Feature of the Year 1808, is for a remarkably hot and dry *July*; a Month in which we generally expect warm Weather; but in this Year, the Heat was rather uncommon for this Climate, even so, that on *Wednesday*, the 13th, (which may very well be called the Hot *Wednesday*) it was so excessively hot, that divers Persons died, or were in great Danger of Death; and several Horses on the Road dropped down and died the same Day; and for several Days then about, it was as hot

hot as in the Island of *Jamaica* in the West Indies, which is not common in this Country, especially for so many Days together. In this Year also, we had a very backward Spring; the Month of *January* was very cold and frosty, throughout; and *February* much the same, with a very deep Snow on the 12th, which lay for some Time; the Barometer was remarkably high on the 25th Day. *March* in general was very cold, yet dry, and proved a good Seed-time; the Wind was mostly East and North East, the Barometer standing very high. In *April*, the Barometer kept pretty high and steady, but with a warmer Atmosphere, yet there was a sharp Frost on the 1st, 2d, and 20th Days. The Month of *May* was very fine, the Barometer generally pretty high. Thunder on the 7th, 18th, and 22d Days. The Month of *June* also proved fine; much Rain on the 9th and 23d. On the 15th of *July*, a great Tempest, with Thunder and Lightning, in *Gloucestershire*, *Dorsetshire*, *Somersetshire*, and *Wiltshire*; the Thermometer with me, in the Shade within Doors, was on the 12th at Noon, at 81 deg. the 13th at 88 deg. and on the 14th at 87 degrees, according to Fahrenheit's Scale: so great a Heat has not, I believe, been felt in this Country since the Year 1779. The Month of *August* was in general fine for the Harvest, yet the great Heat of *July*, with the Rain that followed on the 28th, &c. of that Month, brought on a Mildew, so that the Wheat Crops, proved not so good in Quality as the Harvest before. The Barometer stood pretty high most of the Month. In *September* and *October* much Rain fell, so that these two Months had as much Rain as the five preceding Months taken together. *November* was more dry, and in *December* there was not much Rain; but on the 21st much Snow fell, which made the Roads impassable for some Days. The coldest Day in 1808 was the 22d of *January*, and the hottest was *July* the 13th, as I have before noticed. My BAROMETERS are made portable, and can be sent very safely to any Part of the Kingdom.

Judicium Astrologicum pro Anno 1810.

Vox Cælorum, Vox Dei. The Voice of the Heavens is the Voice of God.—He speaks in all the Changes of the Seasons, and of the Times.

COURTEOUS READER,

THE late splendid Comet, in an Astrological Sense, manifested unto the World most wonderful Effects, and sad Actions carried on, and that with much Intrigue and Deceit. It pronounced unto the Inhabitants of the Earth, Troubles, Sorrows, and Tribulations; many sad and lamentable Conflicts, and Battles both by Sea and Land, together with Inundations, &c. This Comet was the *Prodromus*, or Forerunner of the Downfall of some Tyrannical Governments, together with the Superstition and Pride of *Rome*; yet it must be painful to the Feelings of a Briton, to see his avowed Enemy making such vast Strides upon the Continent of *Europe*, and accumulating such a vast Portion of Political Strength; yet on the other Hand, he cannot but be delighted in the Amelioration of the Condition of those People who have long groaned under a Yoke the most cruel and superstitious that ever was imposed upon Man; but when the Light of Science shall bless the *Spanish* and other Nations, the Light of Reformation may be expected soon to follow. In the Time of MARTIN LUTHER, the Nations were, on the whole, in a worse Condition; but Literature was the Pioneer of Truth, and Knowledge gave the first great Shock to the Throne of Bigotry and Superstition, both in *France* and other Countries.

Give Men once the Light of Science, together with Religious and Civil Liberty, and Revelation and Truth will soon follow. It loves the broad Day, and when Men are once suffered to behold it, they are speedily attracted by its Charms, and willingly submit to its Dominion. May we not, therefore, be justified in considering the present Power of *France*, as the appointed Instrument of Punishment to the corrupt Part of the Christian World, and of Discipline and Trial to all the rest?

I again

I again present my Readers with another HIEROGLYPHIC, alluding to these wonderful Times.

HAD the Courtesy of the present Times deserved it at my Hands, I would have given an Explanation of all the Hieroglyphics of all my former Almanacks, which perfectly represented the present Condition of the *English* and other Nations. You who read these Lines must know I do no new Thing; I do herein but imitate the Ancients, who, so often as they resolved to conceal their Intentions from prophane Hands, used Hieroglyphics, Images, &c. The Egyptian Priests were herein excellent, and their Judgment commendable; our Saviour also himself commendeth, Ne detur sacrum Canibus. If Providence shall assign me a quiet Life, and prolong my Years, I may then, perhaps, leave unto the Sons of Art the several Changes of every Kingdom in *Europe*.

My HIEROGLYPHIC for the last Year represented (beside some other Events) the Battle of CORUNNA, a Sea Port of *Spain*, and the Burial of General Moore, a famous English Commander, who lost his Life in that Battle. And that for 1808, shewing the marching of
 Armies,

Armies, with an Officer (General and King) with the word PAX over his Head; this was fulfilled in the Events of that Year, and Buonaparte offering Peace to England, yet marching his Armies into Spain, &c.

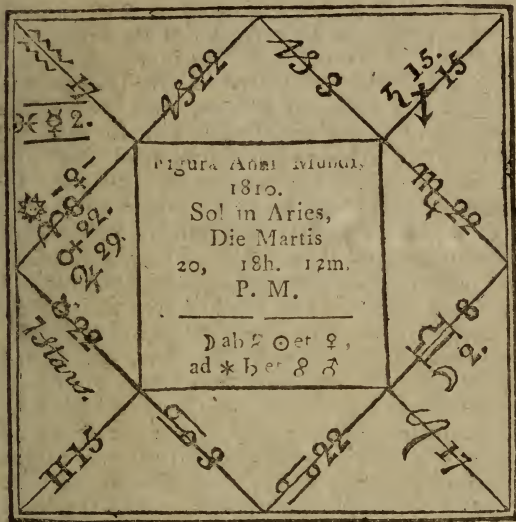

Observations on the Four Quarters of the Year, deduced from the Influx and Influences of the Planets, and the late Comet, operating therein.

Of the Brumal Ingress, or Winter Quarter.

THE Winter Quarter begins when the Sun touches the first Scruple of the Tropical Sign Capricorn, and that will be on Friday, the 22d of December, 1809, at 38 min. past 4 o'Clock in the Morning; at which Time 7 Degrees of Virgo culminate, and 18 Degrees of Scorpio ascending in the East. The ☽ ab 8 ☉ et ad ☐ of ♃, from the 2d, 5th, and 9th Houses of the Figure of the Heavens set to that Time. The Planets are all under the Horizon, except the Moon, which was shining in the South-West Quarter, having just past an Opposition of the Sun, and fast approaching to a Zodiacal Square Aspect of the Planet Jupiter, from Tropical and Equinoctial Signs; but this is not all, the Planet Mars is located in the 3d, departing from a Sextile Aspect of the Planet Saturn, and before the End of January, will be in a Square Aspect of that Planet; and this will be repeated again about the 11th of March following. These Configurations will principally influence this Quarter; yet they may extend for some months after; and this I would have my Readers always to bear in Mind; and that is, when I treat of the different Quarters of the Year, as well as the different Months, I by no Means mean to confine what I say solely to that Quarter or that Month, for Planetary Influences may act, and often do act, at a Distance from that Time, and the Events signified thereby may fall out sooner or later. But to return, I therefore say, these Positions of the Planets (with other Things taken into Consideration) shew much Strife and Debates, with perverse and

and mischievous Proceedings, amongst Kings, Princes, Dukes, Lords, and Senators, about Rights, Privileges, War, Peace, &c. as has been customary for several Years back; and therefore, after a Year of much Fighting and Bloodshed, between the contending Powers of the Earth, the Political Affairs of the World stand as much as ever unsettled, and in as much uncertain Posture. That Revolutionizing Spirit, that has been working in most Countries, is still active. *Germany, Spain, and Portugal*, and other Parts of *Europe*, which I could name, feel Tumults and Warlike Noises, with a great falling away of the People, with Treachery and Deceit. A certain EMPEROR will throw down and root out the *Roman Antichrist* with all her Members—for War, horrid War! is still the Language of the Celestial Premonitors. I see in the East, the *Turkish Empire* evidently decaying; the Luxury of their Sultans occasions their being often deposed; their Divisions by many Sects, and the factious Dispositions of their Janisaries, do evidently weaken their once mighty Power, as well as their frequent Defeats which they have received in our Age; which will not cease until the whole *Turkish Empire* is divided and nearly destroyed. The Sceptre and Diadem will, I fear, be laid down, or taken away from the House of *Austria*; that illustrious House seems to be decaying; yet after some sharp Fighting, a Negotiation takes place. *Bohemia* will also feel great Tumults. In the North, the *Swedes* have had an amazing Revolution, and are still projecting another; the *Russians* are in Distress, and almost ruined by *French* Councils; there has been, or will be, great Actions to do there. The poor *Danes* also are in a restless Situation; and indeed, the whole of *Europe* will experience Broils and Devastations; and, I am sorry to say, *England* is not free from Troubles and the Fate of war.

*A Scheme of the Grand Radix of the Year's Revolution, or
the SUN'S INGRESS into ARIES, 1810.*

Of the Vernal, or Spring Quarter.

The *Sun* was, with Propriety, called by the Ancients the Heart of Heaven; for as the Action of the corporeal Heart gives Life and Motion to all the innumerable Ramifications of the Human Frame, so does the *Sun's* vivifying Power operate through all the Mundane System. When the Heart ceases to palpitate, Animal Life is at an End; and, if the *Sun* should cease to diffuse his Light and Heat, Darkness and Confusion would be the Consequence. To this glorious Luminary, the exhaustless Fountain of universal Light and Life, we chiefly owe the Variation of the Seasons. He now begins to display his genial Influence; for, the 21st of *March*, at 12 min. past 6 in the Morning, he enters the Equinoxial Sign *Aries*; at that Time 3 Degrees of ♈ will culminate, and 8 Degrees of *Aries* will ascend the Eastern Horizon; when

when the Face of the Heavens are as represented in the above Scheme.

The ♃ ab ☉ et ♀; ad * ♃ et ☿♂; and Cardinal Signs possess the Four Angles of the Figure, with a Conjunction of *Jupiter* and *Mars* in the Ascendant, in *Aries*, the reputed Ascendant of the *English* Nation. This is a very untoward Position, when we consider the Opposition of *Saturn* and *Mars*, so soon to follow; *Mars* being also in a human Sign; the *Moon* also being in an Opposition of the *Sun* from Equinoctial Signs. Hence, we must not flatter ourselves, that this will be a Time of Cessation from Troubles; some farther Undertakings will be first attempted, and many Alterations in States and Kingdoms remain yet to be brought about, before that desirable Time comes. The God of War still brandishing his Sword in Earnest: Here Wranglings, Strife, and Contention; there Robberies, Murders, and outrageous Proceedings; in this Place, Rebellions, Massacres, and Devastations; nor can we, who have always been accounted subject to *Aries*, expect to come off Scot-free; and should we take in those Countries subject to Quadratic Signs, according to the usual Method, we shall, by so doing, extend our Threats into various Countries out of *Europe*, and perhaps in so doing, not far exceed our Bounds: But amidst all these Threats, I am bold to say, the Fleets of ENGLAND will not this Year be conquered at Sea; for they will ride Triumphant to all Parts of the Globe; but yet, for all this, let us not at all Times be too confident, for the Battle is not always to the Strong, nor the Race to the Swift—yet, I still say, ENGLAND has nothing to fear from her implacable Enemies the *French*, if she is but just and true to herself, and that in every Sense of the Word. But on the other Hand, the *French* Emperor NAPOLEON BUONAPARTE, though he has been pressed hard on every Side, and involved by the warlike surrounding Powers into many Difficulties, still seems determined to brave all his Opponents! The *French* will in the general succeed, either by Fighting or Negotiating, or both, upon the Continent of *Europe*, until their great Head drops into the Grave, which according to his Nativity, I rather expect may be by a violent death; however, he will not live to be very aged.

Several States and petty Princes in *Germany* are still involved in Difficulties, Broils, and Uneasiness, so are they in *Italy*, in *Spain*, *Portugal*, and *Holland*; and a Jealousy subsists between *Russia* and the House of *Austria*; also the *Turkish Empire* is surrounded with Warlike and other Troubles. Our *West India* Islands are very well off, so is *America*; if their Country should be shook to its Centre, it will be by their own internal Broils and Discontents. Thus much for my Judgment upon the Vernal Quarter, which is meant to take in the whole Year as to generals. It is also more than probable, that there will be another Offer for PEACE this Year with the *British Government*.

Of the Estival or Summer Quarter.

This Quarter begins on *Friday*, the 22d of *June*, at 54 min. past 3 in the Morning; when the first Degree of *Cancer* ascends, and 26 Degrees of *Aquarius* are on the Medium Cœli; the *Moon* is in 7 Deg. of ♃, in the 10th House, applying to the Square of *Saturn*, and next to the ☐ of *Mars*; the *Sun* also has but lately past an 8 of ♃, and a Conjunction of *Mars*; all which Positions will very much help on the Effects of former Influences of the *Spring Quarter*, with respect to the Political Affairs of the World. I hope *LONDON*, and other Places, will be preserved this Summer from the fatal Effects of the *SMALL-POX*, which is like to be very Rife. I earnestly recommend to the People of *England*, the *VACCINE INOCULATION*, as the best and safest Mode of preventing that violent Scourge of the Human Race, the *Small-Pox*; for the Idea of doing which, we are much indebted to the Genius and Industry of *Dr. JENNER*. And, it must also be remembered, that though the Inoculation of the *Cow-Pox* is a novel Practice, yet the Disease, in its natural State, has been known for Time immemorial, and its Power of preventing the *Small-Pox* has long been acknowledged, especially in those Districts where it is most accustomed to prevail; and the Voice of the People in those Parts for nearly a Century, have borne Witness to its affording a full Security from the *Small-Pox*; and its Effects also have ever been considered as rather beneficial than injurious to the Human Constitution,
which

which is not always the Case with respect to the *Small-Pox*. But to return, The various States and Kingdoms of *Europe* continue to be much divided, and the *French* as well as the *English* are also very active; for on these two great Governments hang all the Politicks of *Europe*. The *Ottoman Empire* continues to be much distracted, and some new Troubles and Broils are about to rise in the North. Some Overtures for PEACE may now be in Agitation, yet I suspect they will not be ponderous enough to turn the Scale, at least for the present; as every Staté and every Country is so much out of Order. The Weather this Summer is likely to be various, with hasty Showers, attended with Thunder and Lightening, in many Parts of this Kingdom.

Of the Autumnal Quarter.

This Quarter begins on *Sunday*, the 23d of *September*, at 43 min. past 5 in the Afternoon; at which Time 20 Deg. of \times ascend, and 26 Deg. of \ddagger culminate; the *Moon* is in 4 Deg. of Ω , departing from the * of Υ , and next applying to the Δ of H , and \square of φ . The Mutual Aspects near this Ingress are a Square of *Jupiter* and *Mars*, the Square of *Saturn* and *Mars*, which follow soon after. Hence, we may expect to hear of Discontents, Depressions, and Impediments in Public Affairs, with great Complaints as usual; with Murmuring and Repining against Men in Authority, &c. Many Diseases seem to be impending this Quarter, particularly Fevers, with Pains and Infirmities in the Throat and Breast, caused by unwholesome Blasts, turbulent and contagious Air.

CONCLUSION.

What wond'rous Changes, wrought by Heaven's Commands,
And sacred Truth embrac'd in Christian Lands,
(Decrees Eternal, that must come to pass,
Writ in huge Folds of everlasting Brais)

Time presses to reveal.

Whilst all amaz'd, into Fate's secret Womb
Desire to pry, and see the Events to come;
Let the kind Reader due Attention lend;
Our future Labours shall his Wish befriend.

Printed for the COMPANY of STATIONERS,

By Law and Gilbert, St. John's Square, London.
