At ROBINSON'S Shop on the Long Row you'll find  
Books of every description to polish the mind;  
Here Pious Divines and sedate Politicians,  
Wits; Lovers of Fun, and defining Logicians,  
The Lawyer, Historian, and searcher for Wonders,  
Retailers of Jest, and of Irishmen's Blunders,  
The garreteer Poet who woos the fair Muses,  
And starves o'er productions another peruses;  
The fault finding Critic, the gay lounging Beau,  
And Misses who want the last Fashions to know,  
May all at this SHOP find delight and enjoyment,  
Whilst I derive profit as well as employment  
Here's the *Prayer Book* for age, *Glees, & Duets* for Songsters,  
With *Locke* for the Sages, and *Tom Thumb* for youngsters,  
With *Bibles*, and *Testaments*, *Copy Books*, *Spellings*,  
And all other *School Books*, at one, two, or three shillings.  
Here's fine *Writing Paper*, *Royal*, *Demy*, and *Post*,  
And *Foolscap*, which most of us buy to our cost:  
Here's *Hot-pressed Gilt Edged*, for Polite Billet Doux,  
Where the love stricken youth may his passion disclose.  
Here are *Quills*, *Pens* and *Penknives*, *Inkstands* and *Pencases*,  
*Wax*, *Wafers*, and *Rubber*, to clean dirty places.  
Here are *Pocket Books*, *Almanucks* crowded with wonder,  
Eclipses foretold—Hail and Rain—Snow and Thunder;  
When and how Kings will quarrel, and Armies shall fight,  
And if sometimes wrong—yet pray who's always right?  
With *Maps*, of each Country and *Charts* of each Shore,  
Where the learned Geographer attempts to explore,  
The Mountain the Ark rested on at the Flood,  
Where Nineyah flourished and Babylon stood,  
The Countries where Bruce saw his marvellous sights,  
And Baron Munchausen performed his exploits.  
Here *Cards* you will find too of every complexion;  
To puzzle the young, and plain Cards for direction;  
Cards for message designed—or polite invitations,  
Or Ladies to leave on their Perambulations;  
Whilst others the Stamp of Taxation display,  
And Kings, Queens, and Knaves, shine in splendid array.  
Here *Medicines* you'll meet with of various descriptions  
*Elixers*, and *Cordials*, with learned prescriptions,  
*Pills*, *Draughts*, *Drops*, and *Lotions*, with *Cephalic Snuff*.  
Which ne'er fail to cure if you take but enough;  
Here's a cure for the Spavin, the Murrain and Rot,  
And for madness in Lap-dogs without being shot,  
Here are *Oils*, *Bulls*; and *Blisters*, with strong *Iron glue*,  
Which shall make broken Tea Cups, as sound as when new.  
On *Lives*, *Houses*, *Hay Ricks*, Insurance I take,  
And *Catalogues Print*, should you happen to break;  
When still anxious to do the last act for my Friends,  
Sell for you by *Auction*, and so my Bill ends.

# JANUARY XXXI Days.

WHAT though Heaven's influence do Mortals threat  
 With an unwholesome and contagious Air,  
 The most benevolent doth ENGLAND treat,  
 As if Heaven had of us a special Care ;  
 And can divert, or alleviate at least,  
 That mortal Plague that threatens Man and Beast.

Monthly Observations.

RAIN fallen in January, 1816, at

FIRST Quar. 3 day, at 9 morn.

London, was 0,733 Inches.

Rain or Snow, the quantity more or less, may be expected about the 3d, 8th, 16th, and 26th Days of this Month, the Day before or the Day after; that is, within the short space of three Days.

FULL Moon, 11 day, at 12 morn.

COURTEOUS READER,

AT the Top of these Pages, I have given you the Quantity or Depth of Rain fallen in each Month of the Year 1816, as it fell at and in the

LAST Quar. 19 day, at 10 morn.

Neighbourhood of London, taken by a proper Rain Gauge: and is what the fallen Rain would have risen to, had it stagnated on an even surface of the Earth, and had not been made less by Evaporation, or other means. It

NEW Moon, 26 day, at 1 morn.

is put down in Inches, and decimal Parts of an Inch.

Under the Depth of Rain fallen at London, as above, are given from particular

## 4 FEBRUARY XXVIII Days.

To what the thoughtful *Saturn* close design'd,  
 The rash and wrathful *Star* gives Fire and Flame,  
 Their natures contrary are closely join'd,  
 Both inimical unto human frame;  
 Like Fire and Water meeting, disagree,  
 Break through the bonds of Nature's harmony.

the Alterations of the Weather. This Almanack, and a good *Weather Glass*, should always be classed together, as it is the only Instrument, as an Instrument, that ever was found out,

VENUS is a Morning Star till October 9; then an Evening Star to the end of the year.

## MARCH XXXI Days.

In this Month they bluster, Winds are high  
 And boisterous, with a disturbed Air;  
 The friendly Stars do sometimes clear the Sky,  
 And contribute to make the Weather fair;  
 And Ceres with their Influences bless,  
 And clothe her with a comely verdant Dress.

Rain fallen in March, 1816, at London, was 0,425 Inches.

FIRST Quar. 3 day, at 9 night.

Rain or Snow, more or less, about the 3d, 12th, 15th, and 26th Days of this Month; the Day before or the Day after.

to consult the weather by, and must

FULL Moon, 11 day, at 11 night.

be very useful, especially in Hay-time and Harvest, for every Grazier, and Farmer to consult in getting in his Hay, and gathering in his Corn; and in some Seasons would be Pounds 2 in his way, this if properly attended to. Many People are apt to hang

LAST Quar. 19 day, at 5 morn.

their Weather Glasses too high, which is very wrong, as they cannot observe the motions of the Quicksilver up and down so well, which is the chief

NEW Moon, 25 day, at 11 night.

thing to be minded. With those I make and sell, I give printed Rules to understand them by, for it requires previous use and knowledge to judge the Weather by them, as to Rain and Fair Weather, &c.

The Motion of the nimble *Mercury*,  
 And his Aspects to the superior Train,  
 Doth oft spread Clouds that darken all the Sky,  
 Yet some Complaint there is for want of Rain ;  
 The Weather's coasting at the latter End,  
 The well-fill'd Clouds the Farmer doth befriend.

Rain fallen in April, 1816, at

**FIRST Quar. 2 day, at 4 aftern.**

London, was 1,020 Inches.  
 Rain or Snow, more or less, may be expected about the 1st, 10th, 14th, and 27th Days of this Month; the Day before or the Day after, namely, within the Compass of three Days.

**FULL Moon, 10 day, at 1 aftern.**

**HERE** now follow my Monthly Observations relating to the Political Affairs of the World.

In this Month happens a malevo-

**LAST Quar. 17 day, at 11 morn.**

lent Conjunction of Saturn and Mars in ♄, and then a Conjunction of Saturn and Venus, and soon after follows a Conjunction of Mars and Venus; these Configurations of the Planets, seem to imply new Broils

**NEW Moon, 24 day, at 12 noon.**

to arise in the North, and some Misunderstandings between France and Spain. In Italy, and some Parts of Germany, untoward and unchristian Contentions; Seditious Disputes and Contentions about Religion; but, alas!

Sol's Lustre hid by day by *Saturn* sly,  
 Both wanderers and fixed too by night,  
 Behind the Clouds that darken do the Sky,  
 And seem to rob Dame *Flora* of her Right;  
 But milder Influences at the last,  
 Do make amends for *Saturn's* churlish Blast.

Monthly Observations.

Rain fallen in July, 1816, at London, was 2,789 Inches; this was a very wet cold Month for the season.

Rain (more or less) about the 2d, 16th, 24th, or 30th Days of this Month; the Day before or the Day

**FULL Moon, 7 day, at 3 aftern.**

will discover, and the Actors meet a just reward.

The Aspects of this Month are mostly benevolent, and of a healing

**EAST Quar. 14 day, at 7 morn.**

nature, and Mundane Affairs seem now to take a better turn, than in some of the preceding Months. Good News arrives from Foreign Parts, and Trade now does eminently flourish among our British Merchants

**NEW Moon, 22 day, at 6 morn.**

and Tradesmen, to the great Joy and Satisfaction of every good Englishman.

Some parts of France and Germany perplexed, some Officer of State removed by death or otherwise. May England be happy, and continue in

**FIRST Quar. 30 day, at 6 morn.**

The various Aspects of this Month declare,  
 A fickle Season makes the Farmer fear,  
 Oft changing, and a much disturbed Air;  
 Now cloudy, on a sudden hot and clear:  
 At the Month's End, you'll find their fiery Beams  
 Will clear the Air by violent Extremes.

18 SEPTEMBER XXX Days.

Th' erratick pleasant Influences bring  
 Forth latter Harvest, seasonable weather,  
 Their Rays do fructify the latter Spring,  
 And joys the forward Seedsman altogether ;  
 Whilst we the Fruits of Heaven's all-bounteous hand  
 Enjoy, let's not our own Mercies withstand.

## 22 NOVEMBER XXX Days.

And you, Religious Souls, that burn in Zeal,  
 Indulge not any Faction to Excess,  
 But labour to preserve the Commonweal  
 In perfect Peace, all Outrage to suppress ;  
 And as in Duty bound, apply God's Word,  
 Lay not your Hands unto the unholied Sword.

seem to be taken off, and People ge-  
 nerally inclined to obedience to their  
 Superiors. Faxit Deus.

It is frequent for the little Shrub  
 to contend with the lofty Cedar, but  
 rarely with that success that David

**NEW Moon, 17 day, at 6 even:**

had in his encounter with Goliath.

This Mouth hath no hostile, but  
 friendly and pacific rays, some  
 glimmering Hopes of bettering our  
 Misfortunes, and converting our  
 Fears into more peaceful and blessed

**FIRST Quar. 24 day, at 1 aftern.**

Days, for the Configurations of the  
 Planets this Month are of good Im-  
 port to *Great Britain*, intimating a  
 good Understanding between Prince  
 and People, that they shall be in a  
 good State, and shall enjoy Justice  
 and Security.

## 24 DECEMBER XXXI Days.

If Sickness thy Inhabitants invade,  
Do thou not murmur, know 'tis from God's Hand;  
Although our Troubles do impede thy Trade,  
The Judgments of the Lord who can withstand?  
In th' midst of which his Mercies he'll extend,  
And turn all to our Welfare in THE END.

Upon the TWELVE SIGNS.

- ♈ The Head and Face the RAM doth always rule:
- ♉ The Neck and Throat are govern'd by the BULL.
- ♊ O'er the Arms and Shoulders still the TWINS preside:
- ♋ Breast, Stomach, Ribs, the crooked CRAB doth guide.
- ♌ The noble LION rules the Back and Heart:
- ♍ The bashful VIRGIN claims the Belly Part.
- ♎ The Reins and Loins the equal BALANCE weigh:
- ♏ The SCORPION o'er the Secret Parts doth sway.
- ♐ The curious ARCHER doth the Thighs affect:
- ♑ So doth the GOAT our bended Knees protect.
- ♒ The Legs unto AQUARIUS' Lot do fall:
- ♓ The FISH our active Feet their Portion call.

## Common Notes for the Year 1819.

Lunar Cycle, or Golden Numb. 15	Lent begins - - - Feb. 24.
Epact - - - - - 4	EASTER DAY - - - Apr. 11.
Dominical Letter - - - C.	Rogation Sunday - - May 16.
Cycle of the Sun - - - 8	Ascension Day - - May 20.
Sundays after EPIPHANY - 4	WHIT SUNDAY - - May 30.
Number of Direction - - - 21	Sundays after TRINITY - - 24.
SEPTUAGESIMA Sunday Feb. 7	ADVENT Sunday - - Nov. 28.

## A TABLE of Terms and Returns for the Year 1819.

Hilary Term *begins* January 23, *ends* February 12.

RETURNS, or ESSOIGN Days. | Ex. | Re. | Ap. | W. D.

In eight Days of St. Hilary - - - Jan. 20	21	22	23	Saturday.
In fifteen Days of St. Hilary - - - 27	28	29	30	Saturday.
On the Mor. of the Purif. of the Bl. V. M. Feb. 3	4	5	6	Saturday.
In eight Days of the Purif. of the Bl. V. M. 9	10	11	12	Friday.

Easter Term *begins* April 23, *ends* May 24.

In fifteen Days of Easter - - - April 25	26	27	28	Wednesd.
From Easter Day in three Weeks - May 2	3	4	5	Wednesd.
From Easter Day in one Month - - - 9	10	11	12	Wednesd.
From Easter Day in Five Weeks - - - 16	17	18	19	Wednesd.
On the Mor. of the Ascen. of our Lord, - 21	22	23	24	Monday.

Trinity Term *begins* June 11, *ends* June 30.

On the Morrow of the Holy Trinity June 7	8	9	11	Friday.
In eight Days of the Holy Trinity - 13	14	15	16	Wednesd.
In fifteen Days of the Holy Trinity - 20	21	22	23	Wednesd.
From the Day of Holy Trin. in 3 Weeks - 27	28	29	30	Wednesd.

Michaelmas Term *begins* Nov. 6, *ends* Nov. 29.

On the Morrow of All Souls - - Nov. 3	4	5	6	Saturday.
On the Morrow of St. Martin - - - 12	13	14	15	Monday.
In eight Days of St. Martin - - - 18	19	20	22	Monday.
In fifteen Days of St. Martin - - - 25	26	27	29	Monday.

N. B.—No Sittings in Westminster Hall on the Second of February, Ascension Day, and Midsummer Day.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

*Note*, The *first* and *last* Days of every Term are the *first* and *last* Days of Appearance.

## KINGS and QUEENS, from the CONQUEST.

KINGS Names.	Began their Reign.	Reigned Y. M. D.	Since their Reign.	Buried at
W. Conq.	1066 Oct. 14	20 10 26	732 Sept. 9	Caen, Norm.
W. Rufus	1087 Sept. 9	12 10 24	719 Aug. 2	Winchester
Henry 1	1100 Aug. 2	35 3 29	684 Dec. 1	Reading
Stephen	1135 Dec. 1	18 10 24	665 Oct. 25	Faversham

## The SAXON Line restored.

Henry 2	1154 Oct. 25	34 8 11	630 July 6	Fontevrault
Richard 1	1189 July 6	9 9 0	620 Apr. 6	Fontevrault
John	1199 Apr. 6	17 6 13	603 Oct. 19	Worcester
Henry 3	1216 Oct. 19	56 0 28	547 Nov. 16	Westminster
Edward 1	1272 Nov. 16	34 7 21	512 July 7	Westminster
Edward 2	1307 July 7	19 6 18	492 Jan. 25	Gloucester
Edward 3	1327 Jan. 25	50 4 27	442 June 21	Westminster
Richard 2	1377 June 21	22 3 8	420 Sept. 29	Westminster

## The Line of LANCASTER.

Henry 4	1399 Sept. 29	13 5 20	406 Mar. 20	Canterbury
Henry 5	1413 Mar. 20	9 5 11	397 Aug. 31	Westminster
Henry 6	1422 Aug. 31	38 6 4	358 Mar. 4	Windsor

## The Line of YORK.

Edward 4	1461 Mar. 4	22 1 5	336 April 9	Windsor
Edward 5	1483 Apr. 9	0 2 13	336 June 22	Unknown
Richard 3	1483 June 22	2 2 0	334 Aug. 22	Leicester

## The FAMILIES United.

Henry 7	1485 Aug. 22	23 8 0	310 Apr. 22	Westminster
Henry 8	1509 Apr. 22	37 9 6	272 Jan. 28	Windsor
Edward 6	1547 Jan. 28	6 5 8	266 July 6	Westminster
Q. Mary	1553 July 6	5 4 11	261 Nov. 17	Westminster
Q. Elizabeth	1558 Nov. 17	44 4 7	216 Mar. 24	Westminster

## The UNION of the Two Crowns.

James 1	1603 Mar. 24	22 0 3	194 Mar. 27	Westminster
Charles 1	1625 Mar. 27	23 10 3	170 Jan. 30	Windsor
Charles 2	1649 Jan. 30	36 0 7	134 Feb. 6	Westminster
James 2	1685 Feb. 6	4 0 7	130 Feb. 13	Paris
Will. & Mar.	1689 Feb. 13	13 0 23	117 Mar. 8	Westminster

## The UNION of the Two Kingdoms.\*

Q. Anne	1702 Mar. 8	12 4 24	105 Aug. 1	Westminster
George 1	1714 Aug. 1	12 10 10	92 June 11	Hanover
George 2	1727 June 11	33 4 14	59 Oct. 25	Westminster
GEORGE III.	1760 Oct. 25	Crowned Sept. 22, 1761. <i>Vivat Rex.</i>		

\* IRELAND united to these Kingdoms, Jan. 1801.

BIRTH-DAYS of The ROYAL FAMILY.

KING GEORGE III. 4 June 1738—Q. CHARLOTTE - 19 May 1744

Pr. of Wales (Regent) 12 Aug. 1762	Princess Mary, <i>m.</i> - 25 April 1776
Duke of York, <i>m.</i> - 16 Aug. 1763	Princess Sophia - - 3 Nov. 1777
D. of Clarence, <i>m.</i> 21 Aug. 1765	Princess of Wales 17 May 1768
Q. of Wirtemberg 29 Sept. 1766	Duchess of York - 7 May 1767
Duke of Kent, <i>m.</i> - 2 Nov. 1767	
Prs. Augusta Sophia 8 Nov. 1768	Prs. Charlotte of Wales, <i>b.</i> 7 Jan. 1796 ; <i>m.</i> 2 May 1816 ; <i>died</i> in childbed 6 Nov. 1817, leaving only her consort Prince Leopold of Cobourg.
Prs. Elizabeth, <i>m.</i> 22 May 1770	
D. of Cumberland, <i>m.</i> 5 June 1771	
Duke of Sussex - - 27 Jan. 1773	
D. of Cambridge, <i>m.</i> 24 Feb. 1774

NOTE.—That the Moon's Age being observed in the first Column, you find the Time of HIGH WATER at all the Places above mentioned, in the respective Column of Numbers immediately below them. Thus, when the Moon is One, or Sixteen, Days old, it is HIGH WATER at Beachy, Candado, Dover, &c. at 26 Minutes past 12 o'Clock. And so of the rest.—As to the MOON'S AGE, you find it in the Sixth Column on every left-hand Page of the CALENDAR.

A TABLE of the EQUATION of TIME, for regulating Clocks and Watches, for 1819.—*Note*, fa. Clock too fast; that is, your Clock, to be set right, must be so much faster than the Sun Dial.—slo. Clock too slow; that is, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table :—*For Example*, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Min. 42 Seconds faster than a Sun Dial; therefore I set it so much faster accordingly. And so of the rest. Twelve o'Clock is the best Time to set a Clock or a Watch by a Dial.

*Note*.—A Sun Dial shows Solar or Apparent Time; but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

A TABLE of the Rising, Southing, and Setting of the PLEIADES, or SEVEN STARS, for every 5th Day in the Year; of excellent Use to find the Hour of the Night.

Month & Days.	Rise h m	South h m	Sets h m	Month & Days	Rise h m	South h m	Sets h m

## Chronology

## OF MANY REMARKABLE OCCURRENCES.

Years of  
Christ.

Years since.

1066	WILLIAM (the Norman) conquered England	- -	753
1116	First Parliament of Lords and Commons	- -	703
1185	Ireland conquered by the English	- -	634
1299	Windmills invented	- -	520
1302	The Mariner's Compass invented	- -	517
1304	Edward I. reduced Scotland	- -	515
1330	Gunpowder discovered by a Priest	- -	489
1369	Wickliff first began the Reformation	- -	450
1441	Printing invented by a German	- -	378
1492	Columbus discovered America	- -	327
1521	Engraving on Wood invented by Albert Durer	- -	298
1535	Cannon first used	- -	284
1584	Virginia discovered by Sir Walter Raleigh	- -	235
1590	Telescopes invented by Jansen, a Dutchman	- -	229
1603	A great Plague in London; died 56,570	- -	216
1605	The Popish Gunpowder Plot, November 5	- -	214
1608	Milton the Poet born; died 1674	- -	211
1610	Jupiter's Satellites first discovered	- -	209
1611	New Translation of the Bible	- -	208
1614	New River brought to London by Sir Hugh Myddleton	-	205
1616	Shakspeare the Poet died	- -	203
1625	A great Plague in London; died 34,517	- -	194
1632	A great Fire on London Bridge, Feb. 11	- -	187
1634	Old Parr died, aged 152: he lived in Ten Reigns	- -	185
1641	The cruel Irish Massacre, began October 23	- -	178
1642	Sir Is. Newton born, Dec. 25.—Edgehill & Brentf. Fight	-	177
1649	King Charles I. beheaded, Jan. 30	- -	170
1653	Oliver Cromwell made Protector, Dec. 12	- -	166
1655	George Fox, the first of the Quakers	- -	164
1658	Spring Pocket Watches invented by Dr. Hook	- -	161
1658	Oliver Cromwell died, Sept. 3	- -	161
1660	King Charles II. restored, May 29	- -	159
1662	The Royal Society instituted	- -	157
1665	A great Plague in London, whereof died 68,586	- -	154
1666	The lamentable Burning of London, Sept. 2	- -	153
1667	Peace with Holland, France, and Denmark	- -	152
1668	Peace proclaimed with Spain, Feb. 12	- -	151
1669	The Royal Exchange (built 1667) first opened, Sept. 28	-	150
1670	The Prince of Orange arrived at Whitehall	- -	149
1670	Henry Jenkins died, aged 169	- -	149
1672	War declared against the Dutch	- -	147
1672	Halfpence and Farthings first coined, Aug. 16	- -	147
1674	Peace with Holland proclaimed, Feb. 28	- -	145
1677	Prince of Orange married to the Princess Mary	- -	142
1678	The Popish Plot discovered	- -	141
1679	The Habeas-Corpus Act passed	- -	140
1680	A great Comet appeared in December	- -	139
1682	Another great Comet appeared	- -	137

1683	Penny Post Office (now Twopenny Post) established	-	136
1684	A great Frost, that held 13 Weeks	-	135
1685	The Duke of Monmouth beheaded, July 15	-	134
1688	The seven Bishops sent to the Tower, June 8	-	131
1688	Prince of Orange landed at Torbay, Nov. 4	-	131
1688	King James II. abdicated, Dec. 12	-	131
1689	King William and Queen Mary crowned, April 11	-	130
1692	Port Royal swallowed up by an Earthquake	-	127
1692	A great Earthquake in England, Sept. 8	-	127
1693	Bank of Eng. established.—Hackney Coaches first licensed	126	
1703	A terrible high Wind, Nov. 26 and 27	-	116
1704	Gibraltar taken by Sir George Rooke	-	115
1707	England and Scotland united, May 1	-	112
1708	The Pretender attempted to invade Great Britain	-	111
1713	Peace with France proclaimed, May 5	-	106
1715	A total Eclipse of the Sun, April 22	-	104
1715	The Rebellion in Scotland and Lancashire	-	104
1716	A great Frost; a Fair on the Thames	-	103
1718	The first Appearance of the Northern Lights	-	101
1719	A great fiery Meteor, March 19, at 8 at Night	-	100
1727	The great Sir Isaac Newton died, March 20	-	92
1727	An Earthquake in several Parts of England	-	92
1739	A hard Frost for 9 Weeks, began December 24	-	80
1744	Anson completed his Voyage round the World	-	75
1744	A great Comet appeared in Jan. and Feb.	-	75
1745	A Rebellion in Scotland	-	74
1746	The Scotch Rebels defeated at Culloden, April 16	-	73
1748	A general Peace concluded, October 7	-	71
1750	Westminster Bridge finished, cost £. 389,500	-	69
1750	Earthquakes in London, Feb. 8, and March 8	-	69
1752	The Style and Calendar altered, September 2	-	67
1755	Lisbon destroyed by an Earthquake	-	64
1756	War declared against France	-	63
1758	A large Comet appeared, foretold by Dr. Halley	-	61
1762	A great Fall of Snow for 18 Days together, in Feb.	-	57
1763	A general Peace proclaimed, March 22	-	56
1764	A great Eclipse of the Sun, Apr. 1	-	55
1765	Otaheite in the South Seas discovered	-	54
1765	General Warrants declared illegal	-	54
1770	Blackfriars Bridge finished, cost £. 152,840	-	49
1772	The Swedes forced to resign their Liberties to the King	47	
1773	War declared against North America, August 23	-	44
1776	The Americans declare themselves Independent	-	43
1778	War against France.—1779, D <sup>o</sup> Spain.—1780, D <sup>o</sup> Holland.		
1781	Georgium Sidus discovered by Herschel	-	38
1783	A general Peace.—Fiery Meteor passed over Eng. Aug. 18.	36	
1785	A great Frost for 16 Weeks	-	34
1789	D <sup>o</sup> for 3 Months.—France revolutionized	-	30
1792	France a Republic,—King of Sweden shot by Ankerstrom	27	
1793	King and Queen of France guillotined	-	26
1799	Buonaparte appointed First Consul of French Republic	-	20
1801	Ireland united to England.—A general Peace	-	18

- 1801-2-4, The Planets *Piazzi*, *Olbers*, and *Harding*, discovered.
- 1803 War with France renewed - - - - - 16
- 1804 Buonaparte made Emperor - - - - - 15
- 1805 Battle of Trafalgar, and glorious Death of Nelson - 14
- 1806 Joseph and Louis Buonaparte Kings of Naples and Holland.
- 1807 Copenhagen taken by the English; Treaty of Tilsit; The Portuguese Government emigrated to the Brazils; Louis 18. arrived in England.—Olbers' Second New Planet discovered.
- 1808 Chas. 4. of Spain abdicates in favour of his Son Ferd. 7; Joseph Buonaparte made King of Spain; Rome united to French Empire.
- 1809 Buonaparte repudiated his Wife; King of Sweden dethroned.
- 1810 Bernadotte elected Crown Prince of Sweden; Buonaparte married Maria Louisa of Austria; Holland annexed to France.
- 1811 A great Comet appeared in September, October and November.
- 1812 H. R. H. The Prince Regent assumed his full powers.—War between France and Russia; Battle of Borodino; Moscow burnt; Retreat and Destruction of the French Army.
- 1813 America declared War against Great Britain; Alliance of England, Russia, Prussia, Austria, and Sweden, against France; Battle of Leipsic; British Troops, under Wellington, entered France; Counter Revolution in Holland; The Prince of Orange recalled.
- 1814 Severe Frost; Fair on the Thames (February); Allied Armies invaded France; Peace between Gr. Britain and Denmark; Murat King of Naples joined the Allies; Battle of Montmartre, and Capitulation of Paris; Buonaparte abdicated; Recal of the Bourbons; Louis 18. made his public entry into London, and three days after embarked; Ferdinand 7. returned to Spain; Buonaparte conveyed to Elba; Definitive Treaty signed at Paris; Emp. of Russia, King of Prussia, &c. visited the Court of London; Peace proclaimed, Royal Procession to St. Paul's, Centenary Jubilee, &c. in the Metropolis; Charles 13. of Sweden assumed the Crown of Norway; Congress assembled at Vienna; Hanover raised to a Kingdom; The Pope reinstated; Inquisition revived; Order of Jesuits restored; The Pope again forced to flee; Peace between Gr. Britain and America.
- 1815 Conspiracy in France; Return of Buonaparte, and Departure of Louis 18; Murat defeated and dethroned; Restorat. of Ferdinand King of Naples, and of Pius VII.; Battle of *Waterloo*; Surrender of Paris to the Allies; Return of Louis 18. to his Capital; *Buonaparte* resigned himself to the English, and afterwards exiled to St. Helena.
- 1816 Vauxhall Bridge completed
- 1817 February; New Coinage of Silver issued.  
 — of Gold, Sovereigns and half Sovereigns; 20 s. & 10 s. D<sup>o</sup>.  
 — June 18. The Strand or Waterloo Bridge opened.
1818. Ap. 1. The Arctic expedition sailed.  
 — India: Definitive Treaty of peace with Holkar & Scindia, by Marquis of Hastings.

ROYAL MARRIAGES:

- Ap. 7. The princess Elizabeth to the prince Hesse Homburg.  
 — — The duke of Cambridge to the princess of Hesse Cassel.  
 — July 11. The duke of Kent to the princess of Leiningen.  
 — — The d. of Clarence to the princess of Saxe Meiningen.

An Account of the Eclipses,  
And other Appearances in the Heavens,  
IN THE YEAR  
1819;

Calculated from New Astronomical Tables,  
*Founded on the System of Gravitation of the great*

SIR ISAAC NEWTON;

Which Tables agree with the Heavens to a wonderful  
degree of Exactness.

**I**N the course of this Year, the SUN and MOON will be Four times Eclipsed, each Luminary twice, but none of these Defects will be visible in our Hemisphere.

The FIRST of these Eclipses, is a great total one of the MOON, and will happen on *Saturday*, the 10th day of *April*; the middle time of it will be at 6 min. past our One o'Clock in the Afternoon; therefore it must of course be invisible to us, and not to us only, but to all the surrounding neighbouring Nations and Kingdoms of *Europe*; for that part of the world where the *Moon* will be Vertical at the time of the middle, lieth 163 degrees and 31 minutes East from *London*, under 7 degrees and 30 minutes of South Latitude; consequently it will be visible to all the Southern Parts of the world, where the *Moon* is up, even quite to the South Pole itself; it will be visible in *New Zealand*, *New Holland*, and to all the little Islands scattered and dispersed almost quite throughout the great Pacific Ocean, even as far as the Coast of *California*, upon the western Borders of North America, where the *Moon* will be seen to set eclipsed: It also will be visible to the *Sandwich* Islands in the North Pacific Ocean, discovered by Captain Cook in his last voyage; at one of which, named by the Natives *Owhyhee*, he was killed, Feb. 14th 1779; it also will be visible to the Society Islands, the Friendly Islands, the Island of Borneo, together with the Philipian Islands, the Ladrone Islands, and also those of Japan; but the *Moon* will rise eclipsed in China, and in the Bay of Bengal; the end will extend itself into the Indian Sea, almost as far as the Deserts of Arabia. This great Eclipse will begin at 14 min. past our 11 o'Clock in the Forenoon, and will end at 57 min. past our Two in

the Afternoon; Digits eclipsed at middle,  $21^{\circ} 7'$ , from the North side of the Earth's Shadow. The total Darkness will continue 1 h. 42 min.

The SECOND is a small Eclipse of the SUN, upon *Saturday* the 24th day of *April*, at 48 min. past our 11 o'Clock in the Forenoon; the *Moon* at this time having great North Latitude, so that it will not be visible to us, or even to any Part of *Europe*, though it happens with us near the middle of the Day. The *Moon* passes North of the SUN.

The THIRD is another very small Eclipse of the SUN, upon *Sunday*, the 19th day of *September*, at 52 min. past our Twelve at Noon; yet notwithstanding, this Eclipse, like the former, will be invisible to us, and to all *Europe*, for the same reason as the last, the *Moon's* great North Latitude at the time of the Eclipse. The *Moon* passes North of the Sun in this Eclipse also.

The FOURTH and last, is another Total Eclipse of the MOON, upon *Sunday, October* the Third; the middle time of this Eclipse, will be at 24 min. past our 3 o'Clock in the Afternoon; consequently it must be invisible to us. At the time of the middle of this Eclipse, the *Moon* will be vertical, in 129 deg. 5 min. of East Longitude from London, under 3 deg. 39 min. of North Latitude, which Place falls on the Globe near the Pelew Islands, in the North Pacific Ocean. Hence it appears from this statement, that this Eclipse, like the former one of the *Moon*, will be visible in *New Zealand, New Holland*, and along its Eastern Coast, called New South Wales, where our Convicts are often sent to: it will be visible also in New Britain, New Guinea, the Isles of Japan, together with the Philippian Isles, those of Borneo, Sunda, and Sumatra, and Java; it also will be visible quite throughout the East Indies, and most Part of Asia, and those Isles pertaining to the Indian and Eastern Seas, even to the Island of Madagascar, where the *Moon* will rise Eclipsed; but the *Moon* will set Eclipsed at the Sandwich Islands, and also at the Society Islands; but the whole Eclipse will be visible at the Friendly Islands, at the new Hebrides, New Caledonia, and Queen Charlotte's Islands. The *Moon* will be seen to rise Eclipsed in the Eastern Parts of Africa, and also in Arabia, Persia, &c. and as far as the Caspian Sea; also in Siberia, in the Eastern Parts of Russia, and as far to the West as Poland, where the *Moon* will be seen to rise before the Eclipse be over.

This Eclipse begins with respect to us, at 36 min. past One in the Afternoon; and will not end until 12 min. past our Five o'Clock. Digits eclipsed at the middle  $19^{\circ} 3'$  from the South side of the Earth's Shadow. Duration of total Darkness will be 1 h. 36 min.

*Other Appearances in the Heavens.*

1. THAT beautiful Planet JUPITER, is now fast returning from the Southern Signs, and is coming forward for the Northern Signs, where he will appear more conspicuous to behold; and more so when he comes to an opposition of the *Sun*, which will be this Year on the 5th of *August*, as he then will be nearer the Earth, and will appear bigger to us, and shine with greater lustre: therefore during the Months of *August* and *September*, will be the best time for viewing his belt-like appearances, and the configurations of his four Moons or Satellites; but it will require a good Telescope to do it to the best advantage.

2. The Planet SATURN, which is but a dull Star, is also now fast returning into the Northern Signs, where he will appear to more advantage, and more beautiful to behold, as he will be nearer to us and to the Earth, especially during the Months of *September*, *October*, and *November*, for on the 21st of *September* he comes to an Opposition of the *Sun*, and may be seen at all times of the Night, when the air is clear, to see his wonderful Ring, which to our view, is now becoming more open. To see this Planet well requires a good Telescope, much more so than for Jupiter.

*The Calendar explained.*

AS it may be useful to many of my Readers, I shall here, in a brief manner, explain the Calendar part of this Almanack, which contains a multitude of Particulars necessary to be known, to conduct the Gentleman, the Scholar, the Physician, the Tradesman, or my rural Readers, with certainty and satisfaction through the Solar Revolution. For however meanly some sort of People may think or talk of a performance of this nature, I can assure them, that an Almanack hath this Advantage of all other sorts of writings, namely, to be read at least one whole year, the subject requires it, and the domestic leisure, and necessary occasions of every man of business call for it. First then,

THE Left-hand Pages contain eight Columns; the first is the Days of the Month; the second the Days of the

Week; the third Column contains the Fasts and Festivals of the Church of England, the Terms, and other remarkable Days, with other useful Particulars; the fourth Column gives you every Day the place of the *Sun* in the ecliptic, in degrees, together with the Sign the *Sun* is in; the fifth Column shews you the Dominion of the *Moon*, every day, in Man's body, passing under the Twelve Zodiacal Constellations, called the Moon's Signs; the sixth Column, shews you the Moon's Age for every Day; the seventh Column contains the Times of the Moon's Rising from Full to Change, and the Times of her Setting from Change to Full, which are all the Risings and Settings of the *Moon*, that are necessary to be known; the first figures are the Hours and the last the Minutes. The Eighth and last Column contains the Planets Mutual Aspects as seen from the Earth, and variation of the Air.—THE body of the Right-hand Pages contain five Columns; the first the Day of the Month; the second the Times of the Sun's Rising for every Day; the third contains the Sun's Setting for the same; the first figures are the Hours and the other the Minutes. The fourth Column contains the exact Times when the *Moon* is full South, or upon the Meridian, on any Day or Night throughout the Year, of excellent use in shewing the Times of High Water, and Hour of the Night; the first figures are the Hours, and the next the Minutes after those hours. The fifth Column contains the Monthly Observations, and the exact Times of the New, Full, and Quarters of the Moon. At the Top of this Page are set down the time when the *Moon* comes to a Conjunction of any of the Planets

*N.B.* Easter-Day being fixed on the 22d of March 1818, was perfectly right, notwithstanding the ignorance of some People to the contrary.

---

*Upon the MOON, especially the HARVEST MOON, as an addition to my Discourse on the same in my Almanack for 1817, pages 39 & 40.*

THE *Moon*, as it is the most beautiful object in Nature, so it is the most useful and necessary part of the Creation; by her Influence, all Vegetables and Animals are preserved from certain Destruction; her Motion regulates our Time and Tides, and her Light alleviates the disconsolate Darkness of our winter Nights, by restoring in part the Blessings of the absent Luminary; and though but small in bulk, if compared to the other Stars, yet does she

reflect more Light to us, than all these Stars put together; she not only softens the Melancholy of the Night, but is a true Satellite placed near the Dwelling of Mankind, and an active Sentinel in many successive Posts to give fresh Signals and Notice from each.

But, amongst the vast variety of uses which the *Moon* is of to Mankind in general, there is no circumstance of her Motion or Influence that so much affects the honest Countryman and labouring Farmer, as the manner of her rising after the Full in the time of Harvest, so very nearly at the same Hour for several Nights together; at which they much admire, and distinguish that Full Moon by the Name of the *Harvest Moon*, piously supposing it to be so ordered by the beneficent Disposer of all things for their particular Use and Service, at that time when the continuance of their Labour is so very necessary, and of the greatest consequence to all Mankind.

That nothing like such a natural Protraction of the Day happens at any other Season of the Year, any Person may be satisfied by observing the times of the Moon's rising immediately after every other Full Moon in the Year, as they are exactly noted down in the several Months in the Calendar part of this Almanack; where we see that at some Seasons of the Year, especially about the time of the Spring Equinox (when no ordinary Labour is so necessary in the Field after Sunset) there will be found more than an hour difference in the times of its rising on any two Nights, and, on the 3d Night after the Full Moon, it will not rise in less than three hours or more after Sunset; for instance, on *March* the 11th in the Evening there is a Full Moon, the Sun sets that Evening at 44 min. after 5; on the third Day after, viz. *March* the 14th, the Moon does not rise till 10 m. after 9 at Night, which is 3 hours 26 min. after Sunset, on the 3d Night after the Full Moon; whereas, after the Full Moon in the Month of *August*, there will be no more than 10 or 15 min. difference in the time of her rising on any two Nights, or it will not be full half one Hour in the time of its rising after the Sun is set on the 3d Night after the Full Moon; and it will be much the same in the Month of *September*, the Harvest being often protracted into that Month. Although the causes of these different appearances are natural, and can be accounted for; yet we ought to look upon these seasonable and useful adjustments of the Moon's Motions, as the Design of Divine Providence, and

worthy of our Admiration to observe the Purposes of infinite Wisdom and Goodness, in Favour of Mankind. The *Harvest Moons* affording the less light, has been for the last Nine years, ending about the year 1815; and the *Harvest Moons* affording the greater light, will fall out in the next Ten years, even to the year 1825; there is always an Harvest Moon, but only in these years, it will be more conspicuous.

*Note.* The Lunar Orbit is now so circumstanced, as to cause the *Moon* to go farther North, and also farther South, than what the *Sun* can do, which is owing to the Lunar Nodes (which makes a revolution in 19 years) being at this time near the Equinoctial points.

The surface of the *Moon* is greatly diversified with inequalities, which through a good achromatic Telescope, have the appearance of hills and valleys, land and water, and is a beautiful object to behold, especially when she is 9 or 10 days old, or even all the time from the New to the Full Moon, which may be viewed every Evening when the Air is clear.

### *Judicium Astrologicum, pro Anno 1819.*

*Vox Calorum, Vox Dei: The Voice of the Heavens is the Voice of God.—He speaks in all the Changes of the Seasons, and of the Times.—Gen. i. and Ps. viii. & xix.*

To the COURTEOUS READER.

*My Friends and Countrymen!*

**BY** a Divine Providence, we have arrived to another Year, the Year 1819, which it is to be hoped may also prove propitious unto us, both in a Political and Moral sense; for when we look back into the various revolutions of rolling Years, and the mutations from time to time that have taken place, not only in the different parts of this Terrestrial Globe, but in the manners of its Inhabitants also; when we examine the History of the late Revolutions on the Continent of *Europe*; not to mention the concurrence of the Celestial agents, or the effects of Planetary positions, the most incredulous in Starry Predictions, must acknowledge that the grand Projector of the whole, in whose hands are all events, and whose providential eye is over all his works, has one great end in view; and however dark and mysterious his dispensa-

tions may appear to the narrow limits of human capacity, yet has he appointed a time when the whole shall be accomplished for the benefit of all Mankind. We find in this our Age, Philosophy, both natural and moral, not only shining upon us, but dawning upon the darkest corners of the Creation; to soften their manners, remove their prejudices, and by driving away the clouds of ignorance from their benighted senses, enlighten their understandings to the worship of the One true God. My Hieroglyphic of 1817, represented *Britannia* in Tears, with grief and sorrow, which during that year, was too much verified in the loss of a Princess, who was in the prospect of a crown, and of long years of connubial felicity, and was the hope and pride of the *British Nation*, who has passed away like a shadow, and nothing now remains on Earth, but a sad remembrance and regret. Well might *Britannia* be in Tears! I again present my readers with another HIEROGLYPHIC, alluding to these present Times, which is left to time and the curious to construe.

*Note.*—My last Hieroglyphic represented (amongst other things) a Field of Corn, with Reapers, and Carters at work, &c. signifying some good Seasons of Harvest, which I hope may be abundantly verified; to have Peace and Plenty, is by far a better subject for us, than War and Bloodshed, which we have had sad experience of for some years past.

AN ASTROLOGICAL Judgment on the Four Quarters of the Year 1819, from the Influx and Influences of the PLANETS, with respect to the Affairs of the World. First then—

Of the WINTER QUARTER, called the *Brumal Ingress*.

I BEGIN the New Year with this Quarter, as it all falls therein, excepting a few days. This Winter Quarter then takes place when the *Sun* enters the Tropic of *Capricorn*, which he will do, by my Calculations, made from very accurate Solar Tables, on *Tuesday* the 22d day of *December* 1818, at 17 minutes past 9 o'clock in the Morning; at which time 17 degrees of *Capricorn* is ascending in the East, and the 22d degree of *Scorpio* is on the Meridian, where the *Sun* appears at Noon-day; at this time the *Moon* is in an exact Zodiacal Square aspect of *Jupiter*, and hastening to the same aspect of *Mercury*, and Sextile of *Mars*; the *Sun* and *Venus* have both just risen, and the *Moon* is going down in the Western Quarter; *Jupiter* and *Mercury* are posited in the Eastern angle of the Horoscope; the Planet *Saturn* is lower down under the Earth, posited in the 2d House, having just passed a Sextile aspect of *Jupiter*; but the Planet *Mars* is in the 11th and has lately passed a Square aspect of *Saturn*; the *Moon* occupies the 8th House in *Libra*, near the cusp of the 9th: thus were the Planets distributed in the Heavens at the time of this Ingress. From the configurations of the Planets this Quarter, I may venture to give my judgment, that it will be attended with great Councils and Consultations, and especially more so towards the Spring, which I have reason to hope will be to the satisfaction of the People in general, though they still will have their fears and anxieties about many things. Our great burden of taxes still remains upon us, on which account there will be murmuring and repinings among many, some also for want of trade, and some for losses and misfortunes, some for want of employment, and the like, which our over large Farms have been greatly the cause of, to the ruin of many—for in some Villages where there used to be three or four Farms, there is now but one Farm; one man holds almost all the land in the Parish, to the ruin of all the rest!! and I doubt it is still a growing evil, to the distress of the People at large—this is the bane and ruin of old *England*!! But to return, I have reasons to

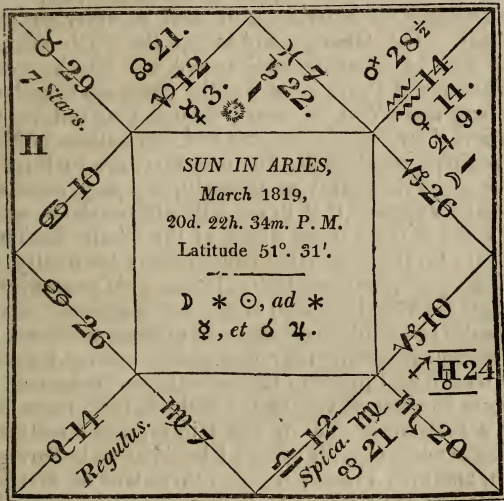

conjecture, from the aforesaid influences of the Planets, that the actions and designs now on foot, both in our own Nation, as well as in diverse parts of *Europe*, will be carried on and prosecuted with great secrecy, and no less prudence, by the most political and wise Senators thereof; but time must produce the particulars. I have some hopes that our own Nation will begin to flourish, and Trade and Commerce improve, as this Quarter is attended with many friendly aspects of the Planets amongst themselves, so that we may hope well, since there are no bad influences now depending over us. The *Turks* during the ensuing Year may be a little troublesome to their neighbours for a time, as also will the Corsairs of *Tunis*, and *Algiers*, but a check will be put upon them, as it concerns all the Powers of *Europe* so to do, and to keep them under. I hope *London*, and other Places will be preserved during this Year from the fatal effects of the Small-Pox, which is like to be very rife in some Places, especially in *London*, where I am sorry to find above a Thousand died last Year by that fatal distemper, through the prejudices of the common People against the Cow-Pox Inoculation, which is one of the greatest of all human discoveries for the benefit of Mankind, and is now successfully adopted by all enlightened Nations of the Earth. The Small-Pox formerly destroyed every Year, about forty thousand Inhabitants of this Kingdom, even in *London* alone, nearly three thousand Individuals have been annually cut off by this single disease; therefore I cannot help recommending to the People of *England*, in the strongest manner, the Cow-Pox Inoculation, called the Vaccine Inoculation, as the best and safest mode of preventing so dreadful a scourge of the Human Race. It has now been proved for some years, and its effects have been rather beneficial than injurious to the Human Constitution, which is not always the case with respect to the Small Pox. There are many well-authenticated instances upon records, of Persons who were affected with the casual Cow-Pox in their Youth, to whom the Small Pox could never afterwards be communicated either by Inoculation or Contagion; and who lived to an advanced old age, in the most perfect Health, and perfectly secure from the Small-Pox Infection. It would be a patriotic duty in all Clergymen, to conclude the ceremony of Baptism, with strongly recommending Vaccination. However, by these means,

the Population of *England* has greatly increased of late Years, and I find in other Countries the same.

*Of the Vernal, or Spring Quarter.*

The following is the SCHEME of the Grand Radix of the Year's Revolution, or the SUN'S Return into ARIES, 1819.

*Schema Cæli ingressu Solis in Ariete.*

WHERE is the Secr, where doth that wise Man dwell?  
That from Heaven's ordinances can foretel,  
Their Rule and their Dominion here below,  
Their rough or peaceful Influx to foreshow,  
Long have we been under their angry Beams,  
And felt their fatal Influence to extremes.  
Why may we not then, from their better Rays,  
More peaceful Times expect, and happier Days?

THE Spring or Vernal Quarter begins, according to my Computations, from our best Solar Tables, on *Sunday*, the 21st day of *March*, at 34 minutes past 10 o'clock in the Morning, when the face of the Heavens is as represented in the above Scheme; at which time 7 degrees of ♁ culminate, and 10 degrees of ♀ ascend in the East. By looking over the Figure, I find the *Moon* to be in an

exact Sextile aspect of the *Sun*, and then hastening to a Sextile aspect of *Mercury*, and  $\delta$  of *Jupiter*. These positions of the Planets, shew that the Public Affairs of *Europe*, with respect to us, and the great Powers of the Continent, are in a more quiet and settled posture than they have been for some years past; most of the Princes and Crowned Heads of *Europe* will be inclined still to live in Peace with their Neighbours, although of different opinions; Ambassadors or Agents will be at work to procure new alliances by Marriages, as well as other political methods. This Quarter, and indeed the whole year, as far as may be rationally conjectured, still give hopes of a continuance of Peace in most of the *European* Kingdoms, than any more War to ensue; though I am satisfied the Heavens shew only the natures and inclinations of Men, not positive conclusions, but now they are inclined to Peace and Tranquillity so strongly, we may rationally hope and conclude that Peace will still continue, which I dare say is the earnest desire of the whole Nation in general; for the Planetary Configurations are mostly of a healing nature, denoting Unity, Peace, and Concord, even amongst the People as well as Nations in general; therefore under the salubrious influences of those positions, we may expect prosperity to Traffick and Commerce, together with wealth and profit to the industrious Tradesman. I am sorry to observe, that on the 26th of *April*, there happens a Malevolent  $\delta$  of  $\eta$  and  $\delta$  in  $\times$ , which will affect all Places under that Sign, such I believe will be *Portugal*, *Spain*, and even *France*; it seems there will be divisions and strange oppositions in all their Councils, many discontented Spirits will shew themselves, to the disturbances of those Countries, and perhaps we in *England* may feel a little of the effects of this Conjunction of *Saturn* and *Mars*, some way or other, during this and part of the next Quarter; causing cold and dry diseases, proceeding from melancholy, mixt with tough phlegm, causing obstructions and indigestions in the stomach, &c. besides disturbing the Air, causing Tempests with Thunder and Lightning, in several parts of the Kingdom.

*Of the Estival, or Summer Quarter.*

THIS Quarter begins when the *Sun* enters the Tropical Sign *Cancer*, which takes place this Year on *Tuesday* the 22d day of *June*, at 59 min. past 7 o'clock in the

Morning; at which time, 18 deg. of  $\Omega$  ascends in the East, and the second degree of  $\gamma$  is on the Mid-heaven, or where the *Sun* is at Noon; at this time the *Moon* was hastening to a  $\delta$  of the *Sun*, and also to a square aspect of  $\eta$ ; this Planet and the *Sun*, are at this time forming a square aspect to each other; all the Planets at this Ingress, are above the Earth, excepting *Jupiter*, who is retrograde or moving backwards in *Aquarius*, and on the cusp of the 7th House, in a Trine Aspect of the Planet *Mercury*, who with the *Sun* and *Moon* are in the 11th House; *Mars* and *Venus* are posited in the 10th, and therefore angular; the Planet *Saturn* in the 9th located, and just entering *Aries*, the ascendant of *England*, but soon after  $\eta$  will move backwards into  $\kappa$ , and there will remain to the end of the Year, and longer. These Configurations are of eminent signification to us, the People of *England*, denoting Honour and Prosperity in general, and it seems that the British Government will oppose and defeat all the Schemes and Machinations of their implacable Enemies, whether foreign or domestic; and thou, O *England*, by good conduct and management, shall begin to prosper again; thou and thy impoverished Towns and Cities shall rise again, thrive and improve in Trade and Commerce, and also amongst the Inhabitants themselves, but not all at once, it will be a gradual work of time. We are still under the influence of the conjunction of *Saturn* and *Mars*, which took place the latter end of *April*; this shows the *Turks* may be somewhat alarmed, and some other Powers near hand, one of which may be *France*, as they are not very contented, even in a Religious and Moral sense, for Superstition and Bigotry must give way, even in our own Country, and the Spirit of Liberty spread far and wide; Tyranny and Oppression must also give way for the general benefit of Mankind; this also in some Countries will be a gradual work of time, even in the North as well as in the Southern Parts of the Globe. But to sum up all, the contingencies of this Quarter will in all probability be more salubrious and pleasant than either of the two preceding Quarters, and the produce of the Earth in a degree rich and plenteous.

*Of the Autumnal Quarter.*

INITIATES at such time as the Earth in her annual Perambulation round the *Sun* acquireth the first Point of the

Equinoctial Sign *Aries*; causing the *Sun* to display his salubrious Rays in the very beginning of the other Equinoctial Sign, namely that of *Libra*, bringing the Days and Nights once more to an equality.

THE glorious Lamp of Heaven now hastes away,  
 Time calls, and then there must be no delay;  
 The Earth puts off her lovely Summer's Dress,  
 So swiftly flies all transient Happiness.  
 Nothing is permanent on Earth we find,  
 Most things are fickle, turning with the Wind;  
 Therefore let's all repent, who knows how soon  
 We may be call'd by Death, tho' in our Bloom,  
 Who die in Sin, they no Relief can have,  
 For there is no Repentance in the Grave.

This Ingress happens upon *Thursday* the 23d day of *September*, at 56 min. past 9 o'clock at Night, according to my calculations, made from our best Solar Tables, which are much more correct than they were formerly; at which time 27 degrees of  $\text{♋}$  are upon the Mid-heaven, and the 2d degree of  $\text{♌}$  is on the ascendant; the *Moon*, Lady of the Horoscope, (that is having dignities there,) is applying to a Sextile of *Venus*, and to Trine aspect of the Planet *Saturn*; all the Planets are under the Earth, excepting  $\text{♃}$  and  $\text{♄}$ ; the first of these is retrograde in the upper angle of the Figure, and the latter in the 9th House; *Mars* is posited in the ascendant, *Mercury* and *Venus* are in the lower angle; the *Sun* is located in the 5th, and the *Moon* is posited in the 6th House. These are the Configurations of the Planets at the time of this Ingress, which appears to me to be of a peaceable tendency both to us and most of the Powers of *Europe*, though it seems the *Spaniards* are very much perplexed with Fears and Jealousies, and there seems to be some cause for it; and there is also several Cabals, and some private Negotiations going forward in several of the Courts of *Europe*, yet no signs of War, for there has been enough of that. *Rome* still holds up her Head, but seems to lay aside her Scourge, as it is time she did, for *Popish Cruelty* has borne a great sway in *Europe* a long time; for *England* heretofore has tasted of their tender mercies, and *Ireland* too with a witness, and lately in *France* among the poor Protestants.
