

# VOX STELLARUM;

OR,

A LOYAL

# A L M A N A C K

FOR THE YEAR OF HUMAN REDEMPTION

## 1830,

BEING THE SECOND AFTER BISSEXTILE; AND THE  
ELEVENTH OF THE REIGN OF HIS PRESENT MAJESTY:

CONTAINING,

AMONGST A GREAT VARIETY OF USEFUL MATTER,

THE RISING AND SETTING OF THE SUN AND MOON  
THE MOON'S CHANGES, SOUTHING, AND AGE;

THE RISING, SOUTHING, AND SETTING OF THE SEVEN STARS;  
THE RISING AND SETTING OF THE PLANETS; THE ELEMENTS  
OF THEIR ORBITS; OCCULTATIONS; MUTUAL ASPECTS, ETC.

AND

*A correct Tide Table,*

ALSO,

A TABLE OF TERMS AND THEIR RETURNS

AND A USEFUL CHRONOLOGY OF EVENTS.

TO WHICH ARE ADDED,

ACCOUNT OF THE ECLIPSES,

WITH ASTROLOGICAL OBSERVATIONS ON THE FOUR QUARTERS  
OF THE YEAR; AND AN ANNUAL  
HIEROGLYPHIC ADAPTED TO THE TIMES.

By FRANCIS MOORE, PHYSICIAN

LONDON:

PRINTED FOR THE COMPANY OF STATIONERS

By J. L. Cox, Great Queen Street, Lincoln's-Inn Fields;

AND SOLD BY GEORGE GREENHILL, AT THEIR HALL,  
LUDGATE STREET.

PRICE TWO SHILLINGS AND THREE-PENCE STITCHED.

AWAKE, my slumbering Muse! prepare to fly  
 Into the regions of the spangled sky;  
 To ransack the celestial spheres above,  
 And tidings bring from Saturn, Mars, and Jove:  
 Then to the Reader make thy thoughts appear,  
 And bid him welcome to this new-born Year.

**FIRST QUAR. 2d. 2h. 34m. morn.**

*THE depth of Rain which fell at Epping, in Jan. 1828, was 3.728 Inches; and at Penzance, for the same period, 7.455 Inches.*

We may expect Rain or Snow on  
**FULL MOON, 9d. 3h. 32m. morn.**

or about the 3d, 8th, 11th, 15th, 19th, and 30th of this Month.

ACCORDING to my usual practice, for some years past, I have again given the Depth of Rain for each Month, in

**LAST QUAR. 17d. 4h. 3m. morn.**

inches and decimals of an inch, for two places in this Country, as it was accurately taken, and correctly registered during the year 1828.

In the present instance, I have se-

**NEW MOON, 24d. 4h. 54m. aftern.**

lected *Epping*, in *Essex*, and *Penzance*, near the Land's End, in *Cornwall*, which is distant from the former place nearly 300 miles.

**FIRST QU. 31d 10h. 47m. morn.**

4 FEBRUARY XXVIII. Days.

WERE Peace or War left in our power to chuse,  
Which of the two to take, and which refuse,  
Amongst ourselves we scarcely should agree,  
One party cries, " A lasting peace for me ;"  
Another says, " A hearty brush of War  
" Makes trade revive, and money plentier far."

FROM Youth to Age, quite thro' our Life complete,  
 We're fool'd by Hope, and yet we love the cheat ;  
 We hope to-morrow to be free from ill,  
 To-morrow's come, we hope to-morrow still ;  
 We wish and stare, and this is all our scope,  
 And each new day new vigour adds to Hope.

MONTHLY OBSERVATIONS.

**FIRST QUAR. 1d. 8h. 2m. aftern.**

*The depth of Rain which fell at Epping, in March 1828, was .684 of an Inch; and at Penzance, for the same period, 3.445 Inches.*

Rain, Snow, or Sleet, may be looked for on or about the 7th, 10th, 12th, 23d, 27th, and 31st of this Month.

**FULL MOON, 9d. 1h. 31m. aftern.**

give Error fair scope, and she will strangle herself. The time is not very remote when the Apocalyptic vision will become a reality, and men will shout—*Babylon the Great, aye, and*

**LAST QUAR. 17 d. 5h. 36m. aftern.**

*Babylon the Little, are fallen, are fallen!*

Look to the south-east parts of Europe, and mark what is going on there. The staff of Mahomet will soon be broken to shivers: and while many

**NEW MOON, 24d. 2h. 44m. aftern.**

men prefer being deceived, Truth moves on; yea, and all her foes shall fall, never to rise again. Coming nearer home, the *Hungarians* and *Hanoverians*

**FIRST QUAR. 31d. 6h. 58m. morn.**

OLD Chronos now does with much craft display,  
 At fiery Mars, a treacherous converse ray :  
 Some Men impatient are, and want to see  
 What the event of such dire aspects be :  
 Some great design in hand,—*England*, beware !  
 I fear great storms too, and distemper'd air.

MONTHLY OBSERVATIONS.

*The depth of Rain which fell at Ep-  
ping, in 1828, was 2.605 Inches; and  
at Penzance, for the same period, 7.5  
Inches.*

Rain may be expected on or about  
the 1st, 8th, 13th, 16th, 19th, and  
30th days of this Month.

**FULL MOON, 8d. 7h. 29m. morn.**

rians may expect mutations. Let them  
listen to the shaking of the spears in  
*Schneller's* invisible army: and the  
rattling of the wheels of chariots pre-  
pared in the Congress of Frankfort.

**LAST QUAR. 16d. 6h. 49m. morn.**

The yellow eagle is not yet the Al-  
mighty's banner; nor has the chlorotic  
horse yet lost his paly dun; nor are the  
Jews of Britain yet as free, politically,

**NEW MOON, 22d. 11h. 27m. after.**  
as the Roman Catholics. But they  
shall be, and that ere three more  
golden harvests are gathered in. Then  
shall men see whether Papistical de-  
lusions, and Israelitish ceremonials,  
are more admired by Protestants of

**FIRST QUAR. 29d. 7h. 54m. after.**

good

BUT lo! my Muse, what busy actions here,  
 Bold Mars in square to Phœbus doth appear.  
 Saturn oppos'd to Jove with seeming hate,  
 And busy Hermes acts with much deceit.  
 Tumultuous strife and discord are portended,  
 And great debates arise, not quickly ended.

MONTHLY OBSERVATIONS.

The depth of Rain which fell at Ex-  
ping, in July 1828, was 5.571 Inches ;  
and at Penzance, for the same period,  
4.55 Inches.

Rain on the 9th, 11th, 21st, 24th,

**FULL MOON, 6d. 2h. 24m. morn.**

and 31st days of this Month. Be par-  
ticular in observing the tendency of  
the mercurial column about the middle  
of the Month.

**LAST QUAR. 13d. 3h. 36m. morn.**

by death, which will not allow her to  
stay with him ; the latter seems to be  
the case here.

The *Turks* and *Russians*, by their  
hostile proceedings, will, ere this time,

**NEW MOON, 20d. oh. 14m. morn.**

have brought themselves into a pretty  
muddle ; their finances are in such a  
state as to prevent these semi-barba-  
rians from going to those lengths of  
devastation and bloodshed, which

**FIRST QUAR. 27d. 8h. 36m. aftern.**

they otherwise would do, had they  
the means for moving large bodies  
of men to distant points, with less  
sacrifice,

THE Planets now in opposition be,  
 Great consultations of a high degree :  
 Wise Mariners provide against a storm ;  
 By early prudence, they prevent much harm :  
 I fear the influence of some cruel star,  
 To me it seems as if a Holy War.

The depth of Rain which fell at Ep-  
 ping, in August 1828, was 3.663 Inches;  
 and at Penzance, for the same period,

FULL MOON, 4d. 0h. 57m. aftern.

4.575 Inches.

Rain on or near the 1st, 3d, 6th,  
 12th, 18th, 27th, and 29th of this  
 Month.

Frequently consult the Barometer,

LAST QUAR, 11d. 8h. 8m. morn

and also the external Thermometer, as  
 a simultaneous rising of the two in-  
 struments indicates fair weather, at  
 this season of the year.

NEW MOON, 18d. 1h. 53m. morn.

sacrifice, on their own parts, in the  
 munitions of war. No people, in what  
 may be called the civilized world, have  
 been guilty of such brutal and dis-  
 gusting barbarity as the *Turks* and  
*Russians*; nor is it easy to say which  
 stands highest in the scale of infamy.

FIRST QUAR, 26d. 2h. 3m. aftern.

The fractur'd skull, the visage ghastly grim,  
 The mangled body, and the writhing limb;  
 The madness of despair, the dying groan,  
 Give mirth, to savage monsters only known.

Writers

18 SEPTEMBER XXX Days.

SEE, how the rip'ning Fruits the gardens crown,  
 Imbibe the Sun, and make his light their own ;  
 See the sweet Brooks in silver mazes creep,  
 Enrich the meadows, and supply the deep ;  
 While from their weeping urns the Fountains flow,  
 And vital moisture, where they pass, bestow.

The depth of Rain which fell at Ep-  
**FULL MOON, 2d. 10h. 38m. after.**  
 ping, in September 1828, was 3'321  
 Inches; and at Penzance, for the same  
 period, 3'045 Inches.  
 Rain about the 7th, 12th, 22d, 25th,  
 and 29th of this Month.

**LAST QUAR. 9d. 1h. 58m. aftern.**  
 Writers on Judicial Astrology have  
 always laid great stress on the ill effects  
 of Eclipses; now there will be one of  
 the Sun in August, within the Sign  
 allotted to the Papal dominions, and  
 it may suffice to say, in the spirit of  
 these Sages:

**NEW MOON, 17d. 2h. 28m. morn.**  
 The Sun's Eclipse this Month denotes  
 great ire,  
 And furious Mars contributes to the fire:  
 It great confusion shows to Leo's son;  
 'Tis Rome's subversion, sure the Pope's  
 undone! [Leo's sign  
 From hence we've nought to fear, for

**FIRST QUAR. 25d. 6h. 52m. morn.**  
 Does favour England's horoscope by  
 trine.  
 The various configurations of the  
 Planets in this, and the following  
 month, foretel no less variety in the  
 actions

As *Egypt* does not on the clouds rely,  
 But to the *Nile* owes more than to the sky ;  
 So what our Clime, or what our Earth, denies,  
 Our ever-constant friend, the Sea, supplies :  
 The taste of hot *Arabian* spice we know,  
 Free from the scorching sun that makes it so.

actions and endeavours of men of a  
 superior degree, in most parts of Chris-  
 tendom: we may also expect to hear  
 much discontent and repining amongst

**NEW MOON, 16d. 7h. 31m. aftern.**  
 those that make the loudest profes-  
 sions of religion. Beware of whitened  
 sepulchres!

The ♂ of ♂ to ♀, forebodes no good  
 to the *Spanish* and *Portuguese* nations;  
 these countries, now groaning under  
 the most degrading tyranny, are likely,  
**FIRST QUAR. 24d. 10h. 20m. aftern**

ere long, to become the theatres of  
 fresh calamities, imprisonments, con-  
 fiscations, and other cruel proceedings  
 towards those who wish for a more  
 rational

**FULL MOON, 31d. 5h. 18m. aftern.**

STAY, wand'ring Muse! and recollect awhile,  
 The angry Fates of late begin to smile:  
 Something is acting for the public good;  
 And those dispers'd, which once the same withstood.  
 This seems a month of gen'rous pleasing action,  
 Which to the people's hearts gives satisfaction.

THE grand presages of this Month do call  
 Some great ones to be mindful of their fall:  
 Heaven will no bribes receive, but, what is just,  
 Give man reward according to his trust.  
 Mark who the Traitor is, behold his fate!  
 Under his Prince's wrath, the People's hate.

The depth of Rain which fell at Epping, in Dec. 1828, was 2.539 Inches; and at Penzance for the same period, 6.225 Inches.

Rain, sleet or snow, about the 1st, 6th, 11th, 14th, 19th and 23d of this  
**LAST QUAR.** 7d. 3h. 16m. morn. Month.

On taking the amount of the preceding monthly accounts of Rain, I find that there fell at Epping, in the period of 1828, a vertical depth of  
**NEW MOON,** 15d. 8h. 19m. morn. 28.733, inches, or 134 gallons on the square yard; and at Penzance, for the same time, 53.615 inches, or 251 gallons on the above area.

These are the depths at which the  
**FIRST QU.** 22d. 10h. 42m. aftern. water would have stood at the end of the year on the surface of the ground in these places, had it not been dissipated by evaporation, absorption, and other causes more immediately appertaining to locality.

**FULL MOON,** 29d. 2h. 2m. aftern.

COMMON NOTES for the Year 1830.

Lunar Cycle, or Golden Number - 7	Lent begins - - - - - Feb. 24
Epact - - - - - 6	EASTER DAY - - - - - April 11
Dominical Letter - - - - - C.	Rogation Sunday - - - - - May 16
Cycle of the Sun - - - - - 19	Ascension Day - - - - - May 20
EPIPHANY - - - - - Jan. 6	WHIT SUNDAY - - - - - May 30
Sundays after Epiphany - - - - (four)	TRINITY SUNDAY - - - - - June 6
Number of Direction - - - - 21	Sundays aft. Trin. - - - (twenty-four)
SEPTUAGESIMA Sunday - - - - Feb. 7	ADVENT SUNDAY - - - - Nov. 28

TABLE of TERMS and RETURNS for the Year 1830.

HILARY TERM begins Jan. 23; ends Feb. 12.		Ex.	Re.	Ap.	W. D.
RETURNS, or ESSOIGN DAYS.					
In eight Days of St. Hilary - - - Jan. 20	21	22	23	Saturday.	
In fifteen Days of St. Hilary - - - 27	28	29	30	Saturday.	
On the Mor. of the Purif. of the Bl. V. M. Feb. 3	4	5	6	Saturday.	
In eight Days of the Purif. of the Bl. V. M. 9	10	11	12	Friday.	
EASTER TERM begins April 28; ends May 24.					
In fifteen Days of Easter - - - - Apr. 25	26	27	28	Wednesd.	
From Easter Day in three Weeks - May 2	3	4	5	Wednesd.	
From Easter Day in one Month - - - 9	10	11	12	Wednesd.	
From Easter Day in five Weeks - - - 16	17	18	19	Wednesd.	
On the Mor. of the Ascen. of our Lord - 21	22	23	24	Monday.	
TRINITY TERM begins June 11; ends June 30.					
On the Morrow of the Holy Trinity - June 7	8	9	11	Friday.	
In eight Days of the Holy Trinity - - 13	14	15	16	Wednesd.	
In fifteen Days of the Holy Trinity - - 20	21	22	23	Wednesd.	
From the Day of H. Trin. in 3 Weeks - 27	28	29	30	Wednesd.	
MICHAELMAS TERM begins Nov. 6; ends Nov. 29.					
On the Morrow of All Souls - - - Nov. 3	4	5	6	Saturday.	
On the Morrow of St. Martin - - - 12	13	14	15	Monday.	
In eight Days of St. Martin - - - 18	19	20	22	Monday.	
In fifteen Days of St. Martin - - - 25	26	27	29	Monday.	

N. B. No Sittings in Westminster Hall on the Second of February, Ascension Day, and Midsummer Day.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note. The first and last Days of every Term are the first and last Days of Appearance.

\*\* " An Act for further facilitating the despatch of business in the Court of King's Bench," was passed in the 2d session Geo. IV. cap. 16.

TABLE of AMOUNTS of £. 1. £. 1. 10., £. 2, £. 2. 10., and £. 5, deposited Half-yearly, to accumulate at 3 per Cent, Compound Interest, from Birth or intervening Ages, until 21 Years of Age, or 14 Years of Age, respectively.

9	2	28 12 8	42 19 0	57 5 4	71 11 8	143 3 4					
10	3	25 16 9	38 15 1	51 13 6	64 11 10	129 3 9					
11	4	23 2 6	34 13 8	46 4 11	57 16 1	115 12 2					
12	5	20 9 9	30 14 8	40 19 7	51 4 6	102 8 11					
13	6	17 18 7	26 17 11	35 17 2	44 16 6	89 13 0					
14	7	15 9 0	23 3 6	30 18 0	38 12 6	77 5 1					
16	9	10 14 0	16 1 1	21 8 1	26 15 1	53 10 3					
18	11	6 5 11	9 8 11	12 11 10	15 14 10	31 9 8					

These columns will serve to compute the amount of money lodged in Savings' Banks, where the interest is now about 3 per cent, and the accumulation half-yearly. The amount is not subject to the contingency of life, but belongs to the depositor if the child die before 14, or 21, the age at which it is intended to draw out the money.

EXAMPLE 1. Suppose a father begins to deposit 1s. per week, or 26s. per half-year, when his child is 2 years old, to what will it amount when the child is 21? Opposite the age 2, in col. 1, stands £. 50. 14. 5. under £. 1. half-yearly.

Hence, to - - - £. 50 14 5  
 Add its fourth - - - 12 13 7, because 5s. = one-fourth of 1l.  
 Add one-fifth of this - 2 10 9, because 1s. = one-fifth of 5s.

The sum - - £. 65 18 9, is the amount required.

EXAMPLE 2. Suppose £. 3 is deposited half-yearly, from the birth of a boy, to what will it amount at 14, when he is to be put out apprentice? Opposite birth, in col. 2, stands £. 51. 14. 5. under the half-yearly deposit of £. 1. 10. Twice this amount, viz. £. 103. 8. 10. will be the sum accumulated in this case.

EXAMPLE 3. Suppose when a boy is 6 years old, his father begins to deposit £. 7. 10. in half a year, to accumulate until he is 21; to what will it then amount? Against the age 6, in col. 1, under £. 2. 10. half-yearly, stands the sum of £. 93. 16. 11. Therefore, since three times £. 2. 10. are £. 7. 10. three times £. 93. 16. 11. or £. 281. 10. 9. is the amount required.

EXAMPLE 4. How much must be deposited half-yearly for three children, of 2, 7, and 12 years of age respectively, that each may have £. 200 on becoming 21 years old? £. 1. deposited half-yearly from 2 years old, will produce £. 50. 14. 5. The same from 7 years, will produce £. 34. 9. 8. The same from 12 years, £. 20. 9. 9. Therefore, as £. 50. 14. : £. 200 :: £. 1 : £. 3. 18. 10. half-yearly deposit for child two years old.

As £. 34. 9. 8. : £. 200. :: £. 1 : £. 5. 14. half-yearly deposit for child 7 years old.

As £. 20. 9. 9. : £. 200 :: £. 1 : £. 9. 15. 3. half-yearly deposit for child 12 years old.

Sums actually deposited. { £. 3. 18. 10. × 38 = £. 149. 15. 8. in 19 years.  
 £. 5. 14. 0. × 28 = £. 159. 12. 0. in 14 years.  
 £. 9. 15. 3. × 18 = £. 175. 14. 6. in 9 years.

Thus clearly showing the advantage of beginning early.

NOTE. — That the Moon's Age being observed in the first Column, you find the Time of HIGH WATER at all the Places above mentioned, in the respective Column of Numbers immediately below them. Thus, when the Moon is *One*, or *Sixteen* Days old, it is HIGH WATER at Candado, Dunkirk, Leith, &c. at 26 Minutes past 12 o'Clock. And so of the rest. The time usually correct within half an hour — As to the MOON'S AGE, you find it in the Sixth Column on every left-hand Page of the CALENDAR.

A TABLE of the EQUATION of TIME, for regulating Clocks and Watches, for 1830. — *Note*, fa. Clock too fast; *that is*, your Clock to be set right, must be so much faster than the Sun Dial. — slo. Clock too slow; *that is*, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table: — *For Example*, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Min. 50 Seconds faster than a Sun Dial; *therefore* I set it so much *faster* accordingly. And so of the rest. Twelve o'clock is the best Time to set a Clock or Watch by a Dial.

*Note*. — A Sun Dial shows Solar or Apparent Time; but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

THE following TABLE exhibits at one view the principal ELEMENTS of the PLANETARY SYSTEM.

	Mer.	Venus	Earth	Mars	Vesta	Juno	Ceres	Pallas	Jupiter	Saturn	Geor.	Sun
	♃	♀	♁	♂	♁	♁	♁	♀	♃	♄	♁	☉
Mean dist. from Sun, Earth's dist. being 10	4	7	10	15	24	27	28	28	52	95	192

Of which time they retrograde during days	22	42	-	70	83	99	99	99	120	135	151	
Arcs which they retrograde	12°	16°	-	18°	13°	12°	12°	12°	9°	6°	4°	
Velocity per one second in miles	30	23	19	15	13	12	11	11	8	6	4	
Greatest and least apparent diameter	11" 5" 57" 10"	-	-	26" 5"	-	-	-	-	40" 26" 18" 15"	18" 15" 4"		

THE mean diameter of the Earth is about 7,930 miles, and its mean distance from the Sun about 95 millions of miles. Hence, and from the proportional diameters and distances given in the Table, those of any of the planets may be readily found. The diameter of the Moon is about 2,160 miles, and her mean distance from the Earth nearly 240 thousand miles. JUPITER has four moons or satellites, SATURN has seven, and the GEORGIAN, URANUS, or *Herschel's* planet, has six. *Jupiter's satellites* are of great utility in finding the longitudes of places by their eclipses: they likewise exhibit some curious phenomena with regard to light. SATURN is surrounded by a double ring, which usually presents a most interesting appearance when seen through a telescope. Remark also, I. The orbit of each planet is an ellipse, (not differing greatly, however, from a circle,) of which the Sun occupies one of the foci. II. The areas described about the Sun, by the radius vector of the planet, are proportional to the times employed in describing them. III. The squares of the times of the sidereal revolutions of the planets are to each other as the cubes of the mean distances. Similar laws obtain with respect to the satellites and their primaries.

## Chronology

## OF REMARKABLE OCCURRENCES.

<i>Years of Christ.</i>		<i>Years since.</i>
1066	WILLIAM (the Norman) conquered England	764
1116	First Parliament of Lords and Commons	714
1185	Ireland conquered by the English	645
1304	Edward I. reduced Scotland	526
1369	Wickliff first began the Reformation	461
1492	Columbus discovered America	338
1584	Virginia discovered by Sir Walter Raleigh	246
1603	A great Plague in London; died 56,570	227
1605	The Popish Gunpowder Plot, November 5	225
1610	Jupiter's Satellites first discovered	220
1611	New Translation of the Bible	219
1614	New River brought to London by Sir Hugh Myddleton	216
1616	Shakspeare the Poet died	214
1625	A great Plague in London; died 34,517	205
1632	A great Fire on London Bridge, Feb. 11	198
1649	King Charles I. beheaded, Jan. 30	181
1653	Oliver Cromwell made Protector, Dec. 12	177
1655	George Fox, the first of the Quakers	175
1658	Oliver Cromwell died, Sept. 3	172
1660	King Charles II. restored, May 29	170
1662	The Royal Society instituted	168
1666	The lamentable Burning of London, Sept. 2	164
1669	The Royal Exchange (built 1667) first opened, Sept. 28	161
1670	The Prince of Orange arrived at Whitehall	160
1672	Halfpence and Farthings first coined, Aug. 16	158
1677	Prince of Orange married to the Princess Mary	153
1678	The Popish Plot discovered	152
1679	The Habeas Corpus Act passed	151
1688	The seven Bishops sent to the Tower, June 8	142
1688	Prince of Orange landed at Torbay, Nov. 4	142
1688	King James II. abdicated, Dec. 12	142
1689	King William and Queen Mary crowned, April 11	141
1693	Bank of Eng. established. — Hackney Coaches first licensed	137
1704	Gibraltar taken by Sir George Rooke	126
1707	England and Scotland united, May 1	123
1727	The great Sir Isaac Newton died, March 20	103
1727	An Earthquake in several parts of England	103
1731	The use of the Latin language and of the ancient court-hand in writing, abolished as to legal proceedings, 4 Geo. II.	99
1745	A Rebellion in Scotland	85
1746	The Scotch Rebels defeated at Culloden, April 16	84
1750	Westminster Bridge finished, cost 389,500 <i>l.</i>	80
1752	The Style and Calendar altered, Sept. 2	78
1755	Lisbon destroyed by an Earthquake	75
1765	Otaheite discovered. — General Warrants declared illegal	65
1770	Blackfriar's Bridge finished, cost 152,840 <i>l.</i>	60
1775	War declared against North America, August 23	55

1776	The Americans declare themselves Independent	- -	54
1778	War against France.—1779, D <sup>o</sup> Spain.—1780, D <sup>o</sup> Holland.		
1783	A general Peace.—Fiery Meteor passed over Eng. Aug. 18.		47
1784	Establishment of Mail Coaches	- - - -	46
1792	France a Republic.—King of Sweden shot by Ankerstrom		38
1793	King and Queen of France guillotined	- - - -	37
1797	Ireland invaded by the French	- - - -	33
1799	Buonaparte appointed First Consul of French Republic		31
1801	Ireland united to England.—A general Peace	- -	29
1801-2-4,	The Planets <i>Ceres</i> , <i>Pallas</i> , and <i>Juno</i> , discovered.		
1803	War with France renewed	- - - -	27
1804	Buonaparte made Emperor	- - - -	26
1805	Battle of Trafalgar, and glorious death of Nelson	-	25
1807	Copenhagen taken by the English; Treaty of Tilsit; the Portuguese Government emigrated to the Brazils	- -	23
—	Abolition of the Slave Trade	- - - -	23
1812	The Prince Regent assumed his full powers.—War between France and Russia; Battle of Borodino; Moscow burnt	-	18
1813	America decl. War ag. G. Britain; Alliance of England, &c. ag. France; Revolution in Holland; Prince of Orange recalled		17
1814	Severe Frost; Allied Armies invaded France; Capitulation of Paris; Buonaparte abdicated, and conveyed to Elba; Definitive Treaty signed at Paris; Emperor of Russia, King of Prussia, &c. visited London; Peace proclaimed; Centenary Jubilee, &c.	- -	16
1815	Conspiracy in France; Return of Buonaparte; Murat defeated, dethroned and shot; BATTLE OF WATERLOO; Surrender of Paris to the Allies; Return of Louis XVIII.; Buonaparte exiled to St. Helena; where, on May 5, 1821, he died.		
—	New Mint erected	- - - -	15
1816	Vauxhall Bridge, and Waterloo Bridge, opened	- -	14
1819	March 25, Southwark Bridge opened	- - - -	11
1820	Jan. 23, <i>Died.</i> ] The Duke of Kent, aged 52; & } both buried 29, GEORGE III. aged 82 - - - } at Windsor		10
—	Feb. 23, A conspiracy to assassinate His Majesty's Ministers discovered; and Thistlewood and others executed	- -	10
—	Aug. 1, Regent's Canal opened	- - - -	10
1821	The One and Two Pound Notes withdrawn from circulation, and Gold Sovereigns of 20s. and Half Sov. 10s. value issued		9
—	July 19, KING GEORGE IV. crowned; visits Ireland; Hanover; and, in 1822, Scotland.		
1825	South American Independence established	- -	5
—	Independence of Hayti acknowledged by France	-	5
—	June, First stone of the new London Bridge laid	-	5
1826	June, General Election for 2d Parliament of GEO. IV.		4
1827	Jan. 5, Duke of York died, aged 63; buried at Windsor		3
—	Oct. Egyptian Fleet destroyed at Navarino	- -	3
1828	June, War between Russia and the Porte	- -	2
—	Oct. 6, <i>Died.</i> ] Queen (Dowager) of Wirtemberg, aged 62		2
1829	April 13, Catholic Relief Bill passed		
—	Sept. 23, New Post Office opened.		

AN ACCOUNT OF  
THE ECLIPSES OF THE SUN AND MOON,

*And other Appearances in the Heavens, in the Year 1830; the result of Calculations from the most correct and approved Data. Founded on the Universal Law of Gravitation.*

I FIND by careful computation that there will be *six* ECLIPSES within the period of the present year; *four* of which will be of the SUN, and *two* of the MOON; and *one* of the latter luminary will be visible in this country.

The *First* of these appearances will be a small *Solar* defect, on *Shrove Tuesday, February* the 23d, in the morning, and though the moon has northern latitude, yet the time of  $\phi$  and the short duration of the Eclipse, preclude the possibility of its being visible with us.— This Eclipse begins for the Earth generally at 37m. after 3, in latitude  $46^{\circ} 10'$  N. longitude  $46^{\circ} 27'$  E. and ends at 3m. after 6, in latitude  $75^{\circ} 3'$  N. longitude  $137^{\circ} 56'$  E.; but the greatest obscuration will fall in latitude  $71^{\circ} 19'$  N. longitude  $49^{\circ}$  E., where the Sun will be 3 digits  $46'$  eclipsed on his upper limb, when rising in that part of the globe.— Although this Eclipse will be principally confined to the more northern parts of the earth, yet in the early part of its progress it will nearly extend to the city of *Astracan*, on the banks of the *Volga*, and to the shore of the *Caspian Sea*. It will also be visible to *Western Tartary*, to *Siberia*, *Nova Zembla*, and the *Arctic Sea*.

The *Second* Eclipse that will happen this year will be a *total* one of the MOON on *Tuesday, March* 9th, but *invisible* to *Great Britain* and *Ireland*. It will begin at 34m. 57s. after 11 in the morning; the Moon will be totally immersed in the Earth's shadow at 39m. 57s. after 12, and her eastern limb begins to emerge from the same at 23m. 30s. after 2; but the Eclipse will not be finally over till 28m. 30s. after 3 that afternoon. The greatest obscuration is 20 digits 9 seconds. At the beginning, the Moon will be vertical over the *Pacific Ocean* about 4 degrees and a half north of the equator, in longitude  $174^{\circ} 16'$  west, and at the end about 3 degrees

south-east of *Mindanao*, one of the *Philippines*; consequently the fore part only of this Eclipse will be visible to *Mexico*, the *Missouri Territory*, and the *Peninsula of California*; and on the contrary, the latter part only will be seen in *Russia*, *Persia*, *Arabia*, *Madagascar*, and the N. E. extremities of *Asia*; but from about longitude  $95^{\circ}$  to  $219^{\circ}$ , that is, from  $95^{\circ}$  east to  $141^{\circ}$  west, it will be visible during the whole time of its continuance; comprehending in this extent the greater portion of *Asia* and the *Asiatic Isles*; for instance, *Siberia*, *China*, *Great Tibet*, the islands of *New Guinea*, *Borneo*, *Sumatra*, &c. &c. likewise *Australia*, *New Zealand*, the *Sandwich* and *Friendly Isles*, &c. The Moon will rise to *North Cape*, *St. Petersburg*, *Moscow*, *Antioch*, *Damascus*, and *Jerusalem*, shortly after the Eclipse is over.

The *Third* is a small *invisible* Eclipse of the SUN, on *Wednesday, March 24th*, in the afternoon. The Moon having great austral latitude at the time, this partial Eclipse will be but of limited extent. It begins at 2m. after 1, in latitude  $73^{\circ} 16' S.$  longitude  $100^{\circ} 54' W.$  which falls near that point where Captain Cook reached the highest southern latitude amidst firm fields and vast mountains of ice. The *penumbra* now extending itself over the *Antarctic Ocean*, and as far as *Cape Horn*, *South Shetland*, *Powell's Group*, and some other small islands in this part of the globe, it will leave the Earth at 2m. after 4, a few degrees eastward of the *Cape of Good Hope*, in latitude  $37^{\circ} 25'$ , longitude  $28^{\circ} 31'$  east. The greatest obscuration will happen at 32m. after 2, in latitude  $72^{\circ} S.$  longitude  $47^{\circ} 46' E.$  where the Sun will be 6 digits and 13' eclipsed. At *Cape Town* the obscuration will be  $1^d 12'$ ; this takes place about an hour before the Sun sets at that place.

The *Fourth* is another small *Solar* defect, on *Wednesday, August 18th*, near noon, which, however, will only be visible over the inhospitable regions of the Southern Pole, and where greatest the obscuration will not be more than a digit and a half in breadth. This Eclipse entered upon the Earth, at the North Pole, about 600 years ago, and is now making its exit at the opposite Pole; after which it will not return again for some Thousand years!

The *Fifth* is a large Total Eclipse of the MOON, on *September 2d*, at night, and will be *visible* to the *United*

*Kingdom of Great Britain* during the whole time of its continuance. This Eclipse happens at a very convenient time for observation; for it begins at 8h. 49m. 47s. and the Moon becomes totally immersed in the Earth's shadow at 9h. 47m. 51s. and continues so till 11h. 28m. 2s. when her eastern limb will again exhibit the reflected light of the Sun; but the Eclipse will not be over till 12h. 26m. 6s. The greatest obscuration takes place at 10h. 37m. 57s. when the digits eclipsed will be  $21^{\circ} 33' 25''$  from the northern side of the Earth's shadow. — The first impression made by the Earth's *umbra* upon the limb of the Moon will be at  $75^{\circ} 18' 44''$  to the left hand of the lowest point, and the last at  $66^{\circ} 46' 30''$  to the right of the same, agreeably to the following TYPE for *Greenwich*. — The nearest approach of the centres of the Moon and Earth's shadow will be  $2' 14''$  in arc.

This delineation, as respects the circle of azimuth, may, without any very perceptible error, serve the whole kingdom. At *Greenwich* the Moon will, from the effects of her parallax, appear a few minutes of a degree south of the fixed star  $\lambda$  during the Eclipse, and to lower latitudes this  $\sigma$  will prove an occultation at the time when the Moon is immersed in the shadow of the Earth. The nearest approach of the Moon's northern limb to the star, as seen from the Royal Observatory, will be  $9' 54''$ ; this happens at  $9^h 24^m 24^s$ , or  $23^m 27^s$  before she is totally obscured.

This Eclipse will not be visible to the *Isles of Japan*, the eastern parts of *New Guinea* and *Australia*, nor to

any portion of *Van Diemen's Land*, the Moon setting to these parts of the globe a few minutes before the Eclipse begins; but to the middle of *Australia*, and to most of the *Philippine Isles*, a partial obscuration is expected to be visible; and to *Borneo*, and the western coast of *Australia*, the Eclipse will be visible to the time of its greatest obscuration. To *Malacca* and *Sumatra* the Moon will be above the horizon, to the end of total darkness; but to the Island of *Ceylon*, and the coast of *Coromandel*, the Moon will not set till the end of the Eclipse. To a great portion of the habitable world, this Eclipse will be wholly visible; for instance, *Europe* and *Africa*, the western regions of *Asia*, and the most eastern coast of *South America*. Further, to *Patagonia*, the *Caribbee Isles*, and *Newfoundland*, the Moon will not rise till she is totally immersed in the Earth's shadow; nor will she rise to *New Brunswick*, *Nova Scotia*, *St. Domingo*, *Jamaica*, and *Fernandes*, till after the middle of the Eclipse; nor to the towns of *Quebec*, *Philadelphia*, *Washington*, the *Havannah*, or to the *Bay of Honduras*, and the *Gallipago Isles*, till the Moon's eastern limb has again become illuminated by the solar rays; and the Eclipse will be quite over before she rises to *Lake Superior*, *New Orleans* and the *Bay of Campeche*.

The *Sixth* and last of the Eclipses that will happen this year is another small one of the SUN, on *September 17th*, early in the morning. The Moon then has northern latitude, yet this Eclipse will be *invisible* to us, as the Sun is under our horizon during the whole time the *penumbra* is upon the Earth. — This Eclipse begins at 0h. 38m. near the eastern extremity of *Nova Zembla*, latitude  $76^{\circ} 4'$ , longitude  $70^{\circ} 24'$  east; hence, passing over the *Pole*, and the northern parts of *Siberia*, at 2h. 13m. it arrives at the point of its greatest obscuration, which falls near *Bank's Island*, latitude  $72^{\circ} 4'$  N. longitude  $115^{\circ} 24'$  west, where the Sun will be  $4^{\circ} 43' 41''$  obscured. The *penumbra* now extending itself over the seas of *Anadir*, and *Kamtschatka*, and at the same time reaching the *Northern Archipelago*, it very quickly enters the *Pacific Ocean*, where at 3h. 48m. in latitude  $40^{\circ} 43'$  N. longitude  $144^{\circ} 51'$  W. it becomes a tangent to these waters, and is no more seen.

AN ACCOUNT OF THE MOST  
REMARKABLE LUNAR OCCULTATIONS, APPULSES,  
*And other Celestial Configurations that may be expected to  
happen within the period of the present Year.*

IT is well known to those who are at all acquainted with the process of Astronomical computations, that much labour and difficulty attend such as relate to our Satellite; not solely from the irregularity of her orbicular motion, but from the effects of her parallax, as viewed from the surface, and not the centre of the earth's spheroid. These circumstances, therefore, add much to the trouble and intricacy of the calculations that are necessary for determining the times, &c. of the various interesting *phenomena* which I am about to record for the sake of my Astronomical readers.

THE *first* of these appearances that claims our attention at present, is an Occultation of that noted fixed star of the first magnitude, called *Aldebaran*, or the Bull's Eye; it takes place early in the morning of *January 6th*, when the Moon is approaching the western horizon, and will be visible here, should the air be clear at the time. The *Immersion*, or disappearance of the star behind the dark part of the Moon at I, will be at 3h. 37m. 26s. and its *Emersion* or re-appearance at E, at 4h. 27m. 59s. agreeably to the annexed delineation. — The Moon sets that morning 22 m. after the occultation is over.

On *March 28th*, at night, the Moon again comes to a conjunction with *Aldebaran*; but it will not prove an Occultation at Greenwich, for the nearest distance of the Moon's northern limb from the star will be  $5' 53''$ : this takes place at 10h. 53m. 28s.; the Moon sets about 30m. after this orbital  $\odot$ .

On *July 16th*, at noon, the Moon may again be expected to hide *Aldebaran* from our view: the star will be seen to

disappear behind the light part o. the Moon at I,  $2^{\circ} 20'$  to the left of the highest point  $v$  of the Moon's limb, at 11h. 50m. 26s.; and will re-appear at E,  $94^{\circ} 34'$  from the said point, at 12h. 37m. 41s.; the star having been hid by the Moon 47m. 15s. The relative path of the star is concave to the Moon's centre. Though this occultation happens in the day-time, yet it may be accurately observed with a telescope. Moon's bearing nearly W.S.W. elevation about  $39\frac{1}{2}$  degrees; she does not set on that day until 4h. 23m. P.M.

On the morning of the 6th of *October*, the Moon will be seen rapidly approaching *Aldebaran*, till 6h. 59m. 26s. when, according to my numbers, her northern limb will be only  $12''\cdot 5$  south of the star, as seen from the *Royal Observatory*. So that at a few miles distant, in a direction which diminishes the Moon's parallactic depression, this  $\odot$  will prove an occultation; for instance, in *Hampshire*, *Dorsetshire*, *Devonshire*, and *Cornwall*, the star will, consequently, be hid by the northern part of the Moon's disc. As a confirmation of which, I have been at the trouble of making a computation for one place within the limits above mentioned, *viz. Plymouth*, where the appearance may be expected to take place agreeably to the following

Type; the star disappearing at I, behind the enlightened limb of the Moon  $22^{\circ} 25'$  from her vertex, and re-appearing at E,  $66^{\circ} 26'$  from the same; both to the right of a vertical circle passing through the Moon's centre. The time of the *Immersion* will be at 6h. 27m. 59s. and that of the *Emersion* at 6h. 52m. 38s. according to the meridian of *Plymouth*. As this is in many respects an interesting  $\odot$ , it is, for that reason, to be hoped it may claim the attention of Astronomers, who (should the air be clear at the time) will be able to make such observations on the same, as may ultimately prove of use in a geodetical point of view, and help to settle the actual relation of the Earth's axes.

The next Occultation worthy of notice is one of the Planet *Venus*, on the 15th of *October*, in the morning, soon after the Moon has risen. If the air be clear, the phenomenon will be found to agree with the Type annexed, and the following times for Greenwich and places near. The *central Immersion* of the planet will take place near I, on the illuminated part of the disc,  $19^{\circ} 13'$  from the Moon's lower limb, at 5h. 0m. 15s.; and after the planet has described a chord of  $78^{\circ} 27' 36''$ , it will re-appear near E,  $97^{\circ} 8'$  from the said point, at 5h. 43m. 18s. The Moon's centre rises the same morning at 4h. 58m. 49s. and the planet at 5h. 0m. 14s. apparent time. The horizontal parallax of ♀  $5'' \cdot 37$  and her semi-diameter  $4'' \cdot 9$ . *Immersion* of planet's centre, 4h. 46m. 14s. mean time: *Emersion*, 5h. 29m. 17s.

The Sixth and last of these *phenomena* which deserves notice, is another Occultation of *Aldebaran*, on *November* 30th, in the morning, when the disappearance of the star will take place at the point I,  $24^{\circ} 36'$  from the highest part of the Moon's limb *v*, and the star may be expected to re-appear at E,  $117^{\circ} 37'$  from the same, as shown in the accompanying Type.

The time of *Immersion* will be at 3h. 39m. 25s. and that of *Emersion* at 4h. 36m. 57s. The relative path of the star, as respects the spectator, will be concave to the Moon's centre.

*Note.* — The calculations relative to the preceding Eclipses, Occultations, &c. have been made for the Latitude and Longitude of the Royal Observatory, and the instants are given in apparent time according to that meridian, when not otherwise expressed.

I shall now give such information to my astronomical readers, as may enable them to know when the Planetary Bodies are in the most advantageous situations for optical examinations. And to begin with *MERCURY*, I observe

that this planet may be seen soon after sunset, on or about *January 27th, May 21st, and September 17th*; again a little before sunrise on *March 10th, July 9th, and October 28th*. In the months of *January and February*, VENUS will be so situated as to afford many opportunities, in an evening, for observing her lunated form, as well as other *phenomena* relating to this beautiful star. Again, in the mornings of *April and May*, the same observations may be repeated with the like success; but after this time she will gradually become too distant from the Earth to be at all interesting with telescopes of moderate powers. Nevertheless, she will be a striking object in the heavens, on mornings, during the summer months. At her inferior  $\oslash$  on the 7th *March*, she will be rather more than  $8^{\circ} 32'$  north of the Sun's upper limb; attaining to her greatest latitude about noon of the following day. The *maximum* of brightness is on *February 1st, and April 13th*.

The best time for observing MARS will be in *August, September, and October*. This planet will be a very conspicuous object in the heavens about the middle of *September*, for it will be in  $\oslash$  to the Sun on the 19th of that month.

It will be proper to observe JUPITER in *June, July, and August*, when much information respecting his belts, and the eclipses of his satellites, may be obtained. Jupiter will appear very near the star  $1 \nu \uparrow$ , on the morning of *February 20*, and again on the 27th *July*, about midnight. He will be in  $\oslash$  to the Sun on *July 5th*.

SATURN will be in  $\oslash$  with the Earth, or  $\oslash$  to the Sun, on the 4th of *February*, when the *Minor* axis of his ring will be to the *Major* nearly as 1 to 4; and by the end of the year, the ratio will be nearly as 1 to 6.7; so that now it is rapidly closing, as viewed from the Earth. This planet will be in  $\oslash$  with *Venus* on the 13th of *September*, about 6 in the morning, when the former will be  $15'$  north of the latter: they rise together a few minutes after 3 o'clock. If Saturn be observed with a good telescope and a sharp eye, during the evenings in *January, February, and March*, his appearance will well repay the young astronomer for his trouble.

URANUS will be in opposition to the Sun on the 1st of *August*, in  $8^{\circ} 28'$  of  $\approx$ . This planet is still creeping

along the southern signs, and will continue to do so for some years yet to come. If the old men there live as many years as they do with us, they must beat Methuselah hollow in "length of days!" On *May 15th*, this planet is stationary near the star  $\zeta$  in *Capricorn*.

Of the Four new Planets, VESTA, JUNO, PALLAS, and CERES.

Below are given the times at which these Planets pass the meridian of *Greenwich*, their declinations, &c. when at, and near, their several oppositions to the Sun.

*Note*: ALL the superior Planets are in opposition this year!

		Southing.			Declination.		
		h.	m.	s.			
1830:	Vesta.	Aft.	Midn.		South.		
Oct. - 6	- -	0	27	50	4°	46' 50"	This planet will be in the constellation <i>Cetus</i> ; and on the 7th passes the meridian with $\theta$ , 4° 11' 12" north of the said star.

*Judicium Astrologicum, pro Anno, 1830.*

*VOX CÆLORUM, VOX DEI: The Voice of the Heavens is the Voice of God.—He speaketh in all the Changes of the Seasons, and of the Times.*

## COURTEOUS READER,

IN the early ages of this terrestrial Planet, men of superior talents were happily employed in observing the order of nature, and in discovering truths useful to themselves and others. By slow degrees and repeated observations, the general laws of the natural world were investigated; the sciences were created and matured, and man was transformed from a state of brutal ignorance into that of a social and intelligent being. Whoever reads the imperfect histories that are come down to us, of the first discoveries and progress of the sciences; whoever considers with what repeated trials, patient exertions, and long continued observations, they have been gradually advanced to their present perfection, will not fail to catch some admiration for those transcendent geniuses who have illuminated the dark ages of the world. A watch, a telescope, an almanac, a geographical map, and a chronological table, are in fact important instruments of science, the result of the accumulated observations and skill of the greatest men in many successive ages of the world.

EVEN HIEROGLYPHICS, which many of the would-be-thought-wise men of the present day, affect to despise, have been studied and revered from the remotest antiquity. If *Hermes Trismegistus* was not their inventor, he first introduced them into the theology of his times; and since then they have served to excite inquiry and communicate instruction to people of all ages and countries, whether polished or rude. While Hieroglyphics in part conceal the truth, they in part reveal the truth; and, as *Clemens Alexandrinus* remarked in his *Stromata*, every one regards a lion as the hieroglyphic of strength and fortitude, a horse of liberty, an ox of agriculture, a sphinx of subtilty, a lamb of innocence, &c. If *Matthew Lœnsberg*, in his *Norman Astrologer*, published annually, takes as his hieroglyphic, in one year, a sword run through the moon, in another Leo suspended on a protruded spear: if the Egyptians depicted an eclipse by the symbol of the moon in a boat, with a crocodile gnawing at the disc: if the Hindoos represent beginnings of events by heads of men and animals, bold beginnings by horns, endings by legs and feet, and feeble endings by an old man lying prostrate: if a serpent with a baboon's head and a goat's feet has a meaning which always pays for deciphering, and serpents denote either subtilty, or poison, or immense duration, or creeping policy, or what not; why are they to be

despised who aim by their accompaniments to explore their signification? Why should not inquirers rather imitate the patient zeal of the learned author of *PALIBOTHA*, who, in his elaborate work on the tenets of the Boodhists, devotes more than forty pages to Serpent worship? But, want of room forbids my discussing these points fully. I therefore present my Annual *HIEROGLYPHIC*. Its interpretation is in the womb of Time.

AN ASTROLOGICAL Judgment of the Four Quarters of the Year 1830, from the Influx and Influences of the PLANETARY ORBS, with respect to the Affairs of the World. And First—

Of the WINTER QUARTER, called the *Brumal Ingress*.

ACCORDING to the Astronomical division of the Year into Quarters, I find that this will begin on *Tuesday* the 22d day of *December*, 1829, at 19m. 3s. after 1 o'clock in the morning. At this time, the 14th degree of  $\cap$  is on the eastern angle, and the 18th degree of  $\text{♋}$  the southern. The  $\text{♃}$  and  $\text{♄}$  are in the succedent house of wealth; the  $\text{♁}$  with  $\text{♃}$  and  $\text{♄}$  are transiting the cadent house of the northern angle;  $\text{♁}$  and  $\text{♄}$  are approaching the *Innum Cæli*, and  $\text{♁}$  the *Medium Cæli*. The most important aspects at this ingress are the conjunctions of  $\text{♁}$  and  $\text{♄}$ ,  $\text{♁}$   $\text{♃}$ , and that of  $\text{♃}$  and  $\text{♄}$ ; squares of  $\text{♃}$   $\text{♄}$ ,  $\text{♃}$   $\text{♁}$ ,  $\text{♄}$   $\text{♁}$ , and a partile  $\text{♄}$  of  $\text{♁}$  and  $\text{♄}$ .

But now to proceed, in unriddling the mysteries of nature, as far as art directs, from the above positions of the heavenly Bodies at this time: the first thing I observe is  $\text{♁}$  lady of the ascendant, in the 4th house in square to *Luna* in the 2d. From these, according to the canons of Astrology, much detriment is threat-

ened to adventurous merchants, and those who sail westward, by storms, &c.

These positions likewise, with the  $\odot$  of  $\ominus$  and  $\Upsilon$ , show much contention amongst churchmen, about some obscure matters, managed by different judgments, interests, and opinions; it is probable it will not at present go beyond a mere paper conflict; but after a few years, narrow-minded men will feed on the *hierapicra* of angry polemics.

The times seem still pregnant with matters of great moment, especially in the German and Ecclesiastical states, and the minds of men will be much occupied with mundane affairs. The conciliatory measures which have lately been adopted by His Majesty's ministers, in favour of His Roman Catholic subjects, will give uneasiness to some scrupulous consciences; while others think it will give to *Ireland* that peaceful repose, to which she has been a stranger for ages. See my observations, under this Quarter, in my last year's Almanack.

*Of the VERNAL, or SPRING Quarter.*

The WINTER's past, the tempests fly,  
Soft gales breathe gently through the sky;  
The lark, sweet warbler! on the wing,  
Salutes the gay return of SPRING;

which begins this Year, according to the meridian of *Greenwich*, on *Sunday*, the 21st day of *March*, at 2h. 32m. 14s. in the morning; when the face of the Heavens will be as represented in the following SCHEME, called the Grand Radix of the Year's Revolution

*SCHEMA CÆLI ingressu Solis in Arietis.*

My readers will not fail to observe, that all the planets, excepting  $\text{h}_2$ , are located in the first and second houses, which he claims as his prerogative. Planets situated in angles of a figure, whether essentially dignified or not, are considered potent; though some authors who have written on this subject are not much to be depended upon. But unless I swerve from the rules of art, I must declare that the affairs of most nations incline as yet to a pacific disposition; and that persons in honourable posts shall augment their fortunes, while the commonalty will have less cause to complain than they have had. There are likely to be many notable marriages this Quarter; and private weddings, though closely celebrated, will be much talked of. Stolen waters are sweet, and stolen wives are often thought sweeter; but bitterness may follow after, as has been frequently the case.

Notwithstanding what I have hinted above, of the amicable disposition of the planets, and of our friendly concurrence at home, I must not omit to remark, that at the end of *April*,  $\text{h}_2$  will be in  $\text{♁}$  to  $\text{♂}$ , and about the same time  $\text{♀}$  flings a quartile ray to both these planets; we have therefore great reason to expect some martial stroke will be given at no very great distance from us. Cast a watchful eye upon Poland, and the Confederacy of the Rhine.

---

#### *Of the ESTIVAL, or SUMMER Quarter.*

AT this Ingress of the Sun into *Cancer*, we have *Jupiter* lord of the ascendant, and of the *Medium Cæli*; which, from the most accurate computations, takes place on *Monday, June 21st*, at 50m. 9s. after 11 o'clock at night; when  $\text{♀}$  will be found in the 2d house,  $\text{♁}$  the 3d,  $\text{☉}$  the 4th,  $\text{♃}$  the 5th,  $\text{h}_2$  the 6th,  $\text{♃}$  the 10th,  $\text{♁}$  and  $\text{♂}$  in the 12th, forming the following zodiacal aspects, *viz.*  $\times$  of  $\text{♃}$   $\text{♀}$ ,  $\text{♀}$   $\text{♂}$ ,  $\text{♂}$   $\text{♃}$ ;  $\square$  of  $\text{♀}$  to  $\text{h}_2$  and  $\text{♁}$ ;  $\triangle$   $\text{♃}$   $\text{♀}$   $\text{♃}$ ;  $\text{♁}$   $\text{♃}$  and  $\text{h}_2$   $\text{♁}$ .

There are also *five* oppositions of planets in one month of this quarter.

From the above stellar positions, we may expect to hear of some eminent mutations, state meetings, conventions, and changes in the municipal laws of some neighbouring nations, which will be effected with much heat and vigour; and some crowned heads will be greatly distressed. An eminent Divine is likely to be caught in the snares of the little winged boy. You have heard of the fox and the goose, but here you will see them both in one: the wily fox, before detection; the silly, plucked goose, after he is found out.

#### *Of the AUTUMN Quarter.*

ACCORDING to the Sun's apparent motion in the *Ecliptic*, I find that this Quarter will begin on *Thursday, September the 23d*, at 51m. 24s. after 1 in the afternoon; when the 25th degree of  $\text{♁}$  cuts the eastern horoscope, and the first point of  $\text{♎}$  the southern angle.

The aspects at this Ingress are very few, and those of minor signification; but it is rather singular that at this, as at the last, we have a  $\Delta$  of  $\Upsilon$  &  $\text{♀}$ :—a loving ray, truly!

I have long been in possession of the predictions of *J. Adam Müller*, called in Baden the Maisbach prophet, and find them in many respects as interesting and complete as those of Nostradamus. The world in general knows how favourable a reception he experienced in 1808 from the late Emperor Alexander and the King of Prussia, and how auspicious a change took place in political affairs, so soon as those monarchs credited his predictions, and acted upon his advice. Among his unfulfilled announcements are these: That many of the German States will change places: That armies from the west and from the north will cleave the threefold lily, or, in other words, will divide France, into four portions; that her monarchs will give way, the old to the young, the young to the younger, and the younger to him who will be monarch but is no monarch: That in the east of Europe there will be a struggle between two monstrous females, one a heathen Christian, the other a Turk; that each shall conquer the other, and that then they shall unite in bearing a large book scented with the richest perfumes and surmounted with a massy golden crown; that this book shall be universally read, when Britain knows and keeps her true place, and after a year of universal opposition. Müller, who was ignorant of astronomy, looked for this *universal opposition* on earth, whereas he should have sought it in the sky. He would then have known that his predictions pointed to something subsequent to the present year, 1830; for in this year, as I have already shown, ALL THE SUPERIOR PLANETS, including the new ones, will be in opposition. Watch, then Courteous Reader, the unfolding of events, and endeavour to decipher honest Adam Müller's half-written concluding words: BERA—BEAE—BONA—BE—!!

# R. COLLINSON,

*Printer, Bookseller, Bookbinder, Stationer. Paper  
Hanger, and Dealer in Patent Medicines,*

**WEST-GATE, MANSFIELD,**

RESPECTFULLY announces to his Friends and the Public, that a general assortment of superior and splendidly embellished annual Publications for the ensuing year are received; comprising book and sheet Almanacks, Ladies' and Gentlemen's Pocket-books; Court Calendars; House-keeping & Farmer's Account-books; new Music, Country Dances, &c.

**Books.**—Bibles, Testaments, and Common Prayers, Cotterill's Watts's and Wesley's Psalms and Hymns, plain and elegantly bound. A valuable selection of Books in every department of useful and polite literature; elementary School Books of all kinds, in the English, French, Latin, and Italian Languages; also, an extensive collection of Juvenile Publications of instruction and amusement.

**Periodicals.** Magazines, Reviews, and Monthly Publications received on the first day of every month, also a weekly parcel is usually received from London, by which, new and weekly Publications of every description are expeditiously procured. London and Provincial Newspapers regularly supplied; ADVERTISEMENTS inserted in any of the above Periodicals and Newspapers.

**Stationery.** Superfine thick, middle, and thin Post Papers, plain, gilt, and black edged, and black bordered for letters and notes; laid and wove Foolscap, Pot, Copy, and Brief Papers of all kinds; japan and common black and red Ink; superfine red, black, and coloured Sealing Wax and Wafers; Pens and Quills, Palmer's portable and long Pens; Message Cards, plain, gilt, black edged, and embossed; Ledgers, Day-Books, &c. of all kinds, ruled and bound to any pattern; Copy and Account Books, Slip Copies, Slates and Slate Pencils, &c.; Writing Parchments; Best Mogul and common Playing Cards with coloured and plain backs; Toy Cards; Paper Cases, Portfolios, Guard Books, &c.

**Drawing Materials.** Whatman's superfine Drawing Papers, all sizes; Turnbull's best London Drawing Boards white and tinted; Ackermann's and Newman's superfine Colours, in boxes and single cakes; Brookman's Pencils; Dobb's Chalk Pencils; Poonah Brushes, Velvet Scrubs, and Pallettes; Camel-hair Pencils; Indian Ink and Rubber; coloured Tissue Paper and tinted Letter and Note Paper; gold and coloured Papers, Borders, and Ornaments of all kinds, for Ladies' fancy work; Screens and Screen Handles. Drawings let out to Copy.

**Music.** Musical Instruments of all kinds, from the best Makers; Violin and Violoncello Strings, Bassoon, Clarinet, and Hautboy Reeds; Violin Bows, Bridges, Pegs, &c.; New Music, Music Paper, Books, &c.

**Printing.** Auctioneers' Catalogues, Club and Association Rules, Address Cards, Bill Heads, &c. neatly and correctly executed.

**Binding.** Books plain or elegantly bound in Calf, Morocco, &c.

**Upholdstery.** Paper Hangings and Borders in great variety, of the newest patterns; Rooms Papered on the shortest Notice; superfine Brussels, Kidderminster, and Venetian Carpets, Hearth Rugs; Floor Cloths, Table Covers, Door Mats, Skin Rugs, and Matting of various widths; Goose and Poultry Feathers of the best quality, double stoved and dressed, warranted free from smell and fit for immediate use.

# Norwich Union Fire & Life Office.

R. COLLINSON, AGENT for *Mansfield* and Vicinity.

## Committee for the Mansfield District.

Thomas Hallowes, Esq. | Henry Hollins, Esq. | Mr. Robert Watson.  
 James Heygate, Esq. | Francis Wakefield, Esq. | Mr. Joseph Hurt, &c.

*Reduced Rates of Insurance, 5 Cent.*

Common, 1s. 0d.—Hazardous, 2s. 6d.—Double Hazardous, 4s. 6d.

The great object of this Society is to unite the whole Kingdom upon a safe and equitable principle of insurance; and it is provided by the Constitution of the Society that the Insured shall be free from all responsibility, and to guarantee the engagements of the Office a fund of £550,000 has been subscribed.

Losses by Lightning, or by Fires occasioned by Lightning, will be made good.

The Public opinion of the principles and conduct of this Establishment may be inferred from the fact, that it now ranks in extent of business, the second Fire Office in the United Kingdom. In the MANSFIELD District alone above 400 Policies have been issued, and near £300,000 insured.

## Life Department. PATRONS.

The Duke of Beaufort. | The Right Hon. Earl Craven,  
 Sir J. Wrottesley, Bart. | Sir Joseph Scott, Bart. &c. &c.

Amidst the various improvements which have taken place within the last century, none have been attended with greater advantages than the establishment of Offices, for Life Insurance; which, affording a means of providing for the widow and the orphan, the aged and the infirm, are calculated to support the best interests of that valuable class of men whose talents and industry enable them to support their families in respectability during their own lives, but who have not the means of leaving an independency to their relatives. The utility of it will be, in some degree, illustrated by the following examples.

A person twenty eight years of age may, by an annual payment of £27s. 9d. insure £100, payable to his executors at his decease; or for £23. 17s. 6d. may secure £1000, and thus, at a moderate yearly expense, preserve his family from distress.

For every £100 deposited in this Institution, persons of the age of

Males	50	will receive.	7	10	10	Females	6	15	2	} Annually, until their decease
—	60	.....	6	14	18	.....	8	11	10	
—	70	.....	14	9	0	.....	12	14	10

With a progressive Duty of £1 for every 1080 words.

# The Gardener's Calendar.

**January.** Sow radishes, carrots, and Spinnage, if open weather; also small salading. Prepare dung for hot-beds. Sow Sandwich beans hot-spur and dwarf marrow-fat peas. If mild weather, plant cabbage plants.

**February.** Transplant fruit-trees. Sow, on hot-beds, cauliflower seeds. Plant cabbages to succeed those of November. Sow spinnage and lettuces. Sow celery in warm borders. Sow carrots, parsnips, & beets; also cabbage for August and September. Sow savoy Seed

**March.** Sow raddishes, spinage, and salad, also onions and leeks for the main crop. Plant Jerusalem artichokes and potatoes. Sow stocks and hardy annuals. Graft apples, pears, &c. Plant beans and peas, Fork asparagus. Sow cucumbers, turnips, and celery.

**April.** Sow early kidney beans, also savoy and cabbage, for a late crop. Plant potatoes, also cauliflowers for good. Thin wall-fruit when double the size of a pea. Shade and shelter choice flowers in bloom. Remove useless shoots from vines, peaches, apricots, &c.

**May.** Sow spinnage, kidney beans for a full crop, and turnips and carrots for August. Thin and weed onion-beds. Sow brocoli for Christmas. Thin fruit-trees. Take up bulbous roots past blowing. Sow savoys and celery for Christmas. Sow cauliflower for October and November, and brocoli for Spring. Endive sown now will not run.

**June.** Transplant celery for blanching. Thin carrots, parsnips, and onions. Sow marrow-fat peas and hotspur beans for Michaelmas, also a full crop of turnips for Winter. Gather herbs for drying. Prick out brocoli sown in May. Sow lettuce seed. Transplant endive for blanching. Prick out cole-plants and cauliflowers. Lay carnations, &c.

**July.** Plant out a full crop of winter cabbages and savoys. Bring out tricolours, coxcombs, and balsams from frames. Trench celery for winter. Repair asparagus beds. Sow turnip-rooted radish, also onions for March; carrots for April; and spinage for winter. Trim your vines.

**August.** Sow Welch onions for winter. Take up onions, garlic, & shalots. Continue to sow cresses and mustard. Take succers from young artichoke plants. Sow early cabbage seed. Hoe turnips and clip hedges. Clear vines of useless shoots. Divide flower roots.

**September.** Transplant cauliflower & endive. Prepare the dung to make mushroom-beds. Slip and plant out flower roots. Continue to sow small salading. Transplant flowering shrubs and carnation layers. Plant anemonies, ranunculuses, hyacinths, and tulips.

**October.** Dress beds of sweet herbs. Transplant lettuce for winter use. Plant out early cabbages. Dress asparagus beds. Sow peas and beans for an early crop. Plant cuttings of honey-suckles, laurels, and suckers of roses, lilacs, &c. Strawberry beds may still be made.

**November.** Sow salading under frames. Plant beans & sow early peas. Prune and nail vines, apricots, peaches, &c. Take up parsnips, carrots, and potatoes. Weed spring onions. All bulbous-rooted flowers should now be planted. Make hot-beds to raise asparagus.

**December.** Sow carrot seed and lettuce twice this month, in a warm border. Sow radishes for spring use, and cover them in severe weather. Prune all sorts of wall-trees. Keep the frost and wet from mushrooms. Transplant shrubs in open weather. Protect choice flowers from frost.

**Dr. JAMES'S**

## FEVER POWDER AND ANALEPTIC PILLS.

THE Fever Powder is allowed to be the most valuable discovery ever made in the science of medicine, and is administered with equal success in Fever, Measles, St. Anthony's Fire, Pleurisy, Sore Throat, Rheumatism, &c. When given freely, upon the first attack of Fever, it gives decided relief in a few hours, and generally effects a cure. In Colds or Catarrhs, partaking more or less of inflammation, it is found invariably to shorten their duration, and to prevent their terminating in Pulmonary Affections. In Packets, at 2s. 9d. & 24s.

The Analeptic Pills, from their influence in exciting the natural secretions, are an excellent alterative remedy in Chronic Diseases, Rheumatism, Habitual Febrile and Gouty Affections, Indigestion, Bilious and other complaints of the Stomach and Bowels. They are mild in their operation; do not require the least restraint or confinement to the patient; and, as a general Family Medicine, they have no superior. In Boxes, at 4s. 6d. and 24s.

R. G. G. JAMES thinks it necessary to inform the public that Messrs. Newbery, *the late Agents* of his grandfather, his father, and himself, are now vending articles *of their own composition*, under the name of Dr. James; and that he has appointed, in their stead, as Sole Agents, *Messrs. Butler*, Chemists, London, Edinburgh, and Dublin.

*Observe the Signature of R. G. G. JAMES, on the Label.*

## CHING'S PATENT WORM LOZENGES.

THE more usual symptoms of Worms are Fits, Pains in the Stomach, Side and Head, Loss of Appetite, and pale, languid, and emaciated Appearance in the patient. The extraordinary efficacy of these Lozenges in all such complaints, as well as in obstructions in the bowels, and every disorder where opening or cleansing physic is required, is so universally known, and has been publicly acknowledged by so many persons of distinction and rank in society, that it is unnecessary here to enlarge on their peculiar virtues. In Boxes, at 1s. 1½d. and 2s. 9d.

## DIXON'S ANTIBILIOUS PILLS.

As a mild and effectual remedy for all those disorders which originate in a morbid action of the liver and biliary organs, namely Indigestion, Loss of Appetite, Head-ache, Heartburn, Flatulencies, Spasms, Costiveness, Affections of the Liver, &c. these Pills (*which do not contain Mercury in any shape*) have met with more general approval than any other medicine whatever. They unite every recommendation of mild operation with successful effect; and require no restraint or confinement whatever during their use. In tropical climates, where the consequences of redundant and vitiated bile are so prevalent and alarming, they are an invaluable and efficient protection. They are likewise peculiarly calculated to correct disorders arising from excesses of the table, to restore the tone of the stomach, and remove most complaints occasioned by irregularity of the bowels. In Boxes, at 2s. 9d., 4s. 6d., 11s., and 22s.

## Real Effervescing Cheltenham Salts,

*Made from the Waters of Mr. Thompson's Montpellier Spas at Cheltenham.*

THE public are respectfully informed that these Salts are the only genuine production of the Cheltenham Spa Waters, a fact which is well known to every person who has visited Cheltenham. They contain, according to the Analysis of Sir Humphrey Davy, and Messrs. Brande and Parkes, all the Chalybeate and other essential properties of the Spa Waters at Cheltenham.

These Salts possess an effervescing principle, and in this respect differ only from the Cheltenham Salts hitherto sold to the public.

The Real Cheltenham Salts in Crystals and Efflorescence, as well as the above, are to be had of the Sole Agents, Messrs. Butler, Chemists, Cheapside, corner of St. Paul's, London; Sackville-street, Dublin; and Princes-street, Edinburgh.

*Caution.*—In future the above Cheltenham Salts cannot be genuine unless the Government Stamp with the words "Butler, Cheapside," is attached to them.

## Butler's Vegetable Tooth Powder.

THIS Dentifrice has so long been an appendage of every toilet of rank and fashion, that it is almost unnecessary to offer any further recommendation of it. Being composed of vegetables, without the mixture of any mineral or pernicious ingredient whatever, it is free from the usual objection against the use of other Dentifrices. Its detensive power is just sufficient to annihilate those destructive particles which adhere to the gums, and the interstices of the teeth; healing injuries in the former, and promoting a new Enamel (where it has been injured or corroded) on the latter. It likewise imparts a firmness and healthy redness to the Gums; and, if used regularly, will preserve the Teeth in a sound state even to old age. In Boxes, at 2s. 9d.

## ACIDULATED CAYENNE LOZENGES.

THESE Lozenges are particularly recommended for habitual Sore Throats, relaxation of the Uvula, enlargement of the Tonsils, and that description of Hoarseness which arises from relaxation of the membranes of the Throat, and the parts contiguous.

The Cayenne Lozenge has been found of great utility to such persons as are frequently in the habit of speaking in Public; they may therefore advantageously be used in the Senate, at the Bar, and in the Pulpit, and the highest testimony in the Musical World has been advanced in their favour, especially in those cases, where, from the constant use of the voice, or the influence of a humid atmosphere, the membranes have become relaxed, and diminished in their tone. In Boxes, at 2s. and 4s. 6d.

## Morris's Brunswick CORN Plaister.

THIS Plaister prepared from a Recipe belonging to her late Majesty, is an excellent remedy for eradicating Corns, and giving relief to those who have hard fleshy substances at the bottom of their feet, without the least pain or inconvenience, and will prove a very useful family plaister for fresh Wounds and Scalds, likewise for Bunions. In Boxes at 1s. 1½d. and 2s. 9d.

## MARSHALL'S UNIVERSAL CERATE.

THIS Cerate will be found most efficacious in every kind of Wound, Sore, Scald, Burn, Bruises, Eruption, Ulcers of every denomination, especially in Sore and Ulcerated Legs, which have been healed in so rapid a manner, that a new method of cure has been established by this useful preparation; Sore Breasts, Inflammation of the Eyes, &c. Scorbutic and Cancerous Humours, Erysipelas or St. Anthony's Fire, Ring Worm, Sore Throats, Gangrene or Mortification, Chops, Chilblains, &c. In Boxes, at 1s 1½d. and 2s. 9d.

## **HICKMAN'S PILLS, FOR GRAVEL, STONE, LUMBAGO, &c.**

THESE Pills are allowed to be the most successful preparation for effectually removing, and preventing the future recurrence of, all those Disorders which arise from an Imperfect action of the Urinary Organs; as Gravel and Stone, Lumbago, Pains in the Back and Loins, and Suppression of Urine. Composed of the most innocent ingredients, they relieve the suffering patient from the excruciating tortures of those diseases without any violence or injury to the constitution, and require no confinement or restraint of diet during their use. It is one of the oldest Public Medicines extant; and its peculiar virtues and efficacy have uniformly maintained the highest reputation. In Boxes, at 2s. 9d. and 11s.

## **FOTHERGILL'S FEMALE PILLS.**

THESE Pills have been in public estimation for a very considerable time, and are particularly recommended in general debility of the Constitution, also as a safe and excellent remedy in those periodical irregularities which Females of delicate and languid circulation, more especially the younger part, are liable to; they tend to strengthen the organs of the Stomach, correct bad Digestion, remove Nervous Giddiness, Head-ache, &c. and as a Family Medicine will be found generally useful. In Boxes, at 1s. 1½d. and 2s. 9d.

## **Power's ALOPECIAN, or Fox Ointment, FOR RING-WORM OR SCALD HEAD.**

THE Alopecian Complaint, or Falling off of the Hair, is thus designated by the Proprietor or Inventor of this infallible remedy, from the Ring-Worm in the human species so nearly resembling a complaint in Foxes, which occasions their hair to fall off in the same manner. The inventor of this preparation has for the last ten years cured several hundreds of persons gratuitously, until the demands have become so numerous, that he feels it a duty he owes to himself, his family, and the afflicted, to give it publicity. Letters of thanks, for the cure of several respectable persons, are placed in the hands of Messrs. Butler, and may be seen on application. In Pots, at 2s. 9d.

## **FOTHERGILL'S NERVOUS DROPS.**

TO those who are afflicted with Nervous disorders and their various distressing affections, as Oppression of Spirits, Head-aches, Loss of Appetite, Indigestion, Spasms, Tremors, Fainting Fits, and Debility or Relaxation of the System it is confidently recommended to have recourse to the above Medicine, by which they are assured of obtaining immediate relief, and by a due perseverance in it, agreeably to the directions given, the complete re-establishment of their health. In Bottles, at 4s. 6d., 11s., and 22s.

## **BUTLER'S PECTORAL ELIXIR.**

EXPERIENCE during a very long period has incontestably proved the superior efficacy of this Medicine in all cases of Cold, Coughs, and Asthmatic Affections. By promoting gentle expectoration it very shortly relieves the patient of a slight or recent Cold, and a few doses are generally sufficient to remove those which neglect has rendered more confirmed and obstinate, and which are accompanied with Cough, Spitting of Blood, and other serious symptoms. Its peculiar balsamic powers tend to heal soreness and allay the irritation of the lungs, in cases of Cough; and in Asthmatic Affections, it assists and gives freedom to the breath. In Bottles, at 1s. 1½d. and 2s. 9d.

## **PERRY'S ESSENCE, FOR THE TOOTH AND EAR-ACHE.**

THIS Medicine has received the sanction and support of the most distinguished personages in the kingdom, together with the united testimony of the first Physicians in Europe, and numerous favourable comments in highly respectable Medical Journals, where it has been declared to be the "best thing ever discovered for the Tooth-ache and Ear-ache." It instantaneously relieves the most excruciating pain, preserves the teeth sound and firm, prevents further decay, effectually cures the Scurvy in the Gums, fastens loose teeth, and renders them firm and serviceable to the latest period, and effectually prevents the Tooth-ache. In Bottles, at 1s. 1½d. and 2s. 9d.

## **BUTLER'S CAJEPUT OPODELDOC.**

CAJEPUT Oil, which is the basis of this Opodeldoc, has been long highly esteemed on the Continent as a remedy for Chronic Rheumatism, Spasmodic Affections, Chilblains, Palsy, Stiffness and enlargement of the Joints, Sprains, Bruises, and Deafness: and the experience of late years in England, proves that it merits the high character given of it by the most eminent in the profession, in those obstinate complaints. Being combined in the form of Opodeldoc, it is rendered more penetrating, and consequently much more efficacious as an external application. Rubbed upon the skin, by means of flannel or the warm hand, it allays morbid irritation of the nerves, invigorates the absorbents, and accelerates the circulation. In Bottles, at 1s. 1½d. & 2s. 9d.

## **FLUID EXTRACT of SARSAPARILLA.**

IN this Preparation are concentrated all the Medicinal Properties of the Sarsaparilla Root, even to a perfect saturation of the menstruum with which it is prepared. To such persons therefore, who, from various causes, would experience great inconvenience, or with whom it would be utterly impossible to prepare the Decoction, the Fluid Extract, which possesses the advantages of portability and of keeping in any climate, will be found a most desirable mode of employing this much esteemed Medicine.

The diseases in which it has proved most beneficial are those of the skin, such as Scorbutic Affections, Eruptive Diseases, Secondary symptoms, &c. arising from a diseased state of the system at large. It is taken in Water, rendering it of the same strength as the Decoction. In Bottles at 4s. 6d., 7s. 6d., and 20s.

## **ANTACID LOZENGES OF QUININE.**

*For relieving Heartburn, Flatulence, Indigestion, Gouty Affections,  
and giving tone to the Stomach.*

OF all the recent discoveries in Vegetable Chemistry, none has been received by the Faculty with more satisfaction than that produced by the French Chemists from Peruvian Bark.

The Sulphate of Quinine is found to possess all the tonic and febrifuge properties of the Peruvian Bark, in a concentrated state, deprived of the extractive and resinous matter. It is thus evident, that in debilitated Stomachs, arising from whatever cause, no medicine can be more desirable.

In the formula from which these Lozenges are prepared, the Sulphate of Quinine forms the principal ingredient; but, that the effects may be more adapted to the object for which they are intended, it is combined in such proportions with mild Absorbents, Antacids, and agreeable Aromatics, so as to render them applicable to every stomach labouring under loss of tone. In Boxes, at 2s. and 4s. 6d.

1830.

The following

**VALUABLE FAMILY MEDICINES**

(Warranted Genuine) may be had of

**R. Collinson, Mansfield.**

**Dicey & Co's True Daffy's Elixir.**

**T**HIS most excellent Family Medicine is prepared from the purest drugs and spirits that can be procured, and has been attended with the happiest success in the cure of the gravel, stone, fluxes, spasms, pains in the breast, &c. ; but in the most painful fits of the cholic, and in all complaints of the stomach and bowels, it is unquestionably superior to every other Medicine in the World!—Spurious sorts of a very inferior quality, are, however, offered for sale in almost every town; and, as effectual relief is only to be expected by those who use the *Genuine Medicine*, purchasers are cautioned not to rely merely upon the glass bottle bearing the name of *Dicey & Co.* as there are unprincipled people who buy up the empty bottles, for the purpose of filling them with their own *counterfeit preparations*, and which are thus imposed upon the public as the *True Daffy's Elixir*: the only certain criterion is to examine whether the stamp label, which is pasted over the cork, has the words "DICEY & Co." printed therein; and to observe that the bill of directions is signed *W. Sutton & Co. late Dicey and Sutton.*" Price 2s. the bottle; a larger size at 2s. 9d. each.

**DICEY'S ORIGINAL AND THE ONLY GENUINE**

**DR. BATEMAN'S PECTORAL DROPS,**

In bottles at 1s. 1½d. each, duty included.

In all colds, coughs, agues, fevers, rheumatisms, cholic, pains in the breast, limbs, and joints, and in most cases where colds are the origin, no Medicine has ever been used with greater success, or held in higher estimation, than the *Genuine Bateman's Drops*; it is necessary, however, to observe, that there are various *imitations* of this excellent Medicine, by different pretenders, all of them utter strangers to the true preparation. Of such, as you value your Health, beware—and be careful to ask for "*The Original and Only True Dr. Bateman's Drops*," which have the words "DICEY & Co." printed in the stamp affixed over the cork: and observe that the bill of directions is signed "*W. Sutton & Co. late Dicey and Sutton.*"—\* All others are counterfeit.

**DICEY'S**

**ANDERSON'S TRUE SCOTS' PILLS,**

So well known and approved for their efficacy in bilious, flatulent, and stomach complaints in general.—Ask particularly for *DICEY'S Anderson's Scots' Pills*, and observe that the words "DICEY & Co." are in the stamp. Price 1s. 1½d. the box.

**SQUIRE'S ORIGINAL GRAND ELIXIR,**

Which speedily removes all fresh colds, with their attending symptoms, coughs, asthmas, defluxions, &c.; all violent pains and soreness of the stomach, proceeding from cold and coughing; and is extremely efficacious in easing rheumatic pains in the limbs or joints. It renders the functions of the body regular, removing all kinds of obstructions, as wind, suffocating vapours, violent head-aches, twitching of the nerves, tremblings, faintings, &c. Price 2s. the bottle.

**CLINTON'S SNUFF**  
**FOR DISORDERS OF THE HEAD AND EYES,**  
**And Clinton's Oil for Deafness,**

The efficacy of which is too well known to require fresh Testimonials.

The composition of CLINTON'S SNUFF, which has been found by thousands to be the most effectual Remedy for removing Pains in the Head, if ever so violent, relieving Giddiness, Defluxions from the Eyes, Deafness, &c. is entirely and purely of a vegetable nature, and contains no dangerous ingredient, nor any of a mercurial or mineral nature. And the OIL, by the use of which Deafness, arising from most causes, will be cured or relieved, is equally mild in its operation and ingredients, and will never be found to exasperate where it fails to cure. The Oil is sold in vials, and the Snuff in packets, containing 6 papers, at 2s. 9d. each, duty included.

*HEMORRHOIDS, or PILES, relieved in a few hours, by*  
**Wingate's Pills.**

These Pills are allowed by the Faculty to be the most effectual and safe medicine ever offered to the public. The Proprietress has for many years experienced their efficacy in private life, and has never in a single instance known them to fail. They will cure every species of Piles, in the more advanced, as well as incipient stage of the complaint, more promptly and permanently, than any other medicine yet discovered. Instances occur daily of cures in cases of from ten to twenty years standing, where all other medical means have failed. They are composed of the most innocent ingredients, and in many cases, one Pill has been found sufficient. They require no restraint or confinement whatever during their use. In Boxes at 1s. 1½d. each.

**DR. RADCLIFFE'S ELIXIR,**

The most salutary medicine that can be made use of as a general sweetener of the blood, and for all eruptions, whether contracted by too free living, surfeits, or proceeding from scurvy, or from humours after the measles, small-pox, &c. Price 1s. 1½d. the bottle.

**DR. HOOPER'S PILLS.**

Each Box has a Stamp with the name of "*Dr. John Hooper,*" the Patentee, engraven on it; and if there is no such Name on the Stamp, the Public may be assured it is a counterfeit. Price 1s. 1½d. the box.

**THE ONLY**

**GENUINE BETTON'S BRITISH OIL.**

Price 1s. 9d. the bottle.

ELIZABETH MELLER (late Betton,) daughter, and only legal living representative of the late Mr. Thomas Betton, Proprietor of the above valuable Medicine, begs leave to caution the Public against purchasing a spurious preparation, which is sold as *Betton's British Oil* by several dealers in Patent Medicines, at thirteence halfpenny a bottle: E. Meller assures the public, that *she alone* is in possession of the materials to make the real, true, and genuine British Oil invented by her late Father, and ever since justly and universally esteemed for its great efficacy in bruises, inflammations, green and other wounds, burns, scalds, &c. And such is the expence of the true Preparation, that it cannot be sold for less than 1s. 9d. the bottle, including the stamp duty, 3d.—She requests that purchasers will observe particularly that the words "*Dacey & Co.*" are printed in the stamp affixed over the cork; and that the Bill of Directions is signed "*W. Sutton & Co. late Dacey and*" No. 10, *Bay Church Yard*. All others are counterfeit.

## ESSENCE OF PELLITORY ROOT, FOR THE TOOTH ACH,

Is confidently recommended as a most efficacious remedy in that tormenting disease, and with the assurance that it will be no ways injurious to the Teeth or Gums. In bottles at 1s. 1½d. each.

### THE BATH

## STOMACHIC OR DIGESTIVE PILLS,

*Composed of the Extract of Turkey Rhubarb, Ginger, & Ipecacuanha.*

These Pills, which are made from the prescription of a Physician in extensive practice in Bath, have been in use some years, and found particularly efficacious for promoting digestion, strengthening the stomach, correcting acidity, preventing or removing head-ache, giddiness, and other nervous affections, arising from a costive habit, or debilitated stomach, &c. In boxes at 2s. 9d.

## MAC HAN'S ANTI-RHEUMATIC DROPS,

A sovereign remedy for Acute and Chronic Rheumatism—Price 3s. 9d.

## MAC HAN'S ASTHMATIC DROPS,

A most excellent Remedy for Coughs, Asthmas, Consumptions, and all Disorders arising from Cold, or obstructed Perspiration. Price 1s. 1½d.

## MAC HAN'S CHYMICAL LINIMENT,

Universally esteemed the best Specific ever discovered for Bruises, Cuts, Chilblains, Sprains, External Rheumatism, &c. being so extremely useful that every Family should constantly have it in the house. Price 1s. 1½d.

## Bennett's Lotion for Burns and Scalds.

From the number of lives which this Lotion has saved by its early application after accidents occasioned by the clothes of children catching fire, Mr. B. recommends every family to provide themselves with a bottle to have ready for use, as it requires to be applied immediately after the accident to have the desired effect; but when applied in time, it is an effectual cure. Price 2s. 9d.

*That valuable Ointment, called*

## THE POOR MAN'S FRIEND :

Also the *PILULÆ ANTI-SCROPHULE*, prepared by *Dr. Roberts*, Bridport.

The Ointment will be found a specific for wounds, burns, chilblains, and eruptions of every description; also for sore and inflamed eyes.—Sold in pots at 1s. 1½d. and 2s. 9d.

The *Pilulæ Anti-Scrophule*, one of the best family medicines ever offered to the public, for all Impurities of the Blood, is sold in boxes of 1s. 1½d.—2s. 9d.—10s. 6d. and family boxes, 22s.

## SKELLETT'S ANTIBILIOUS PILLS.

This Medicine, as a specific for Bile, is recommended by testimonials as numerous as they are respectable. It was the invention of Mr. Skellett, late Surgeon to the Westminster Hospital, and is now prepared by his widow: it removes all obstructions in the viscera, pains in the head, &c. and has long been patronised by the Officers of the Army and Navy as peculiarly efficacious, particularly in the East and West Indies. To those who indulge in the luxuries of the table, or suffer from intemperance, it will prove most valuable, as it entirely removes all pains induced by excesses. It is so mild in its operation, that it may be given at all ages, without interfering with usual avocations, neither requiring restriction in diet or confinement.

## LAMING'S

**EFFERVESCING CHELTENHAM SALTS**, without taste  
A tea-spoonful mixed with water, forms an agreeable aperient draught,  
used by the Physicians of London instead of other salts and antibilious pills.

Testimonials to caution the Public against several Counterfeits.

"To the Bilious we cannot recommend a better thing than Laming's Salts." *Literary Gazette*.—"The invention is by Mr. Laming, an intelligent and scientific Surgeon." *Journal of Literature & Science*.—"Mr. Laming's Salts are pleasant as Soda Water." *Sphynx*.—"Mr. Laming has contrived an excellent substitute for Seidlitz Powders." *London Medical Journal*.—"Mr. Laming's Salts will supersede all other aperients." *New Times*.—"Mr. Laming's Salts should be possessed by every Housekeeper; they have advantages over every other domestic medicine." *Stockport Advertiser*.—Sold in Bottles at 2s. 9d.; 4s. 6d. and 10s. 6d.

## THE BAUME DE VIE.

During half a century, this medicine has never failed to invigorate the digestive organs when languid; to retard their excess when in a state of increased irritability; and to invariably modify them to the standard of health. Its efficacy is no less conspicuous in various anomalous diseases arising from *excessive indulgence*, from the abuse of *Mercury*, and every wanton waste of constitutional *strength*. As an application in Wounds, Mortifications, and every species of Ulcer, its utility is daily evinced.—In fine, it probably has never been equalled, certainly never surpassed, by any preparation hitherto presented to the public. Price 3s. 6d.

## Rymer's Cardiac & Nervous Tincture,

*The only safe and effectual Remedy for Disorders of the HEAD,  
STOMACH, &c. viz.*

1. Head-ache, confusion, and giddiness. 2. Indigestion, loss of appetite, bilious crudities and retchings, yellowness of the eyes and skin, spasms, heartburn, hiccup, and costiveness. 3. For the Gout in the stomach and head. 4. For all such affections of the nervous system as are attended with depression of spirits, paralytic and apoplectic dispositions, prostration of strength, timidity, tremors, starting, palpitations, and faintings. For bracing and strengthening the whole system in states of relaxation and debility, &c. &c. In bottles at 4s. 6d.—9s.—17s. & 33s.

*Of whom may also be had,*

## Wainwright's Staffordshire Cordial,

Which has been given with unprecedented success in the most dangerous stages of the following diseases in Horses, viz. the *Sleeping or Raging Staggers, Gripes, Fret, Colds, Coughs, Looseness, Fevers*, and all disorders originating in colds, or from grazing in marshy wet meadows, or after severe exercise in Racing, Hunting, working in coaches, chaises, waggons, hard-riding, &c. and is universally acknowledged to be the greatest restorative to exhausted nature, and the most valuable horse medicine ever known. Price 2s 6d. the bottle.

Mr. NEWMAN, of the Green Man Inn, Barnet, one of the principal Posting Houses on the Great North Road, has authorised the Proprietor to inform the public, that he has used the above Medicine for several years among his own Horses with such complete success, that he feels himself warranted in recommending it to the notice of post and stage coach masters, carriers, horse-dealers, farmers, and all others who employ a number of Horses, as the most valuable remedy of the kind he ever met with.

## Atkins's Composition for destroying Rats

Which is allowed to be the most efficacious thing ever yet discovered for speedily extirpating those pernicious vermin, Rats and Mice, from barns, granaries, stables, mills, malt-houses, granaries, &c. Price
