

Merlinus Liberatus.

BEING AN

ALMANACK

For the Year of our Redemption,

1765.

Being the first year after *Bissextile*, or *Leap-Year*.

And from the Creation of the World, according to the best History, 5714.

And the 73d of our Deliverance by *K. William* from Popery, and Arbitrary Government.

But the 69th from the

Horrid, Popish, High-Church, Jacobite Plot.

Wherein is contained all Things fitting and useful for such a Work; as an Ephemeris of the Daily Motions of the Planets, with their various Configurations, Aspects, Conjunctions, Lunations, Eclipses, Astronomical, Astrological, & Meteorological Observations, the Rising and Setting of the Sun; Moon, Planets, and fixed Stars, illustrated with Tables of the Tides; Terms, and Daily Equation of Clocks, Length and Break, Increase and Decrease, of Days, Semidiurnal and Seminocturnal Arches for several Latitudes, a Chronology, Remarks on the Divisions of the Heavens, with an Essay to find out the Giver of Life, in the Genethiackal part of Astrology. &c. &c. The like not extant. With a particular Judgment of the late solar Eclipse.

To which is prefixed,

The Protestant Remembrances.

Calculated for the Meridian of *London*,

Whose $\left\{ \begin{array}{l} \text{Longitude} \\ \text{Latitude} \end{array} \right\}$ is $\left\{ \begin{array}{l} 24 \\ 51 \end{array} \right\}$ Degrees $\left\{ \begin{array}{l} 20 \\ 32 \end{array} \right\}$ Minutes.

By **JOHN PARTRIDGE**.

— *Etiam Mortuus loquitur.*

LONDON: Printed by *M. REILY*, for the Company of **STATIONERS**.

[Price Stitch'd Nine Pence.]

To the Reader.

COURTEOUS and friendly Reader, I have now once again adventured to offer this my unpolished Piece to public View, advising thee to make good use thereof, and not rashly to censure or misconstrue the Author's real Intentions towards thee, before thou hast judiciously observed how it doth cohere and agree with truth. It may be, some may dislike, because they understand it not; others may censure for lack of Charity, and some (like errant Planets in the Zodiac of their own Opinions) may, viper like, contemn it, because it suits not their Pallats: but none of these do I regard, 'tis only to the judicious I appeal, for whose sake I'll adventure still my naked statue upon the World's Theater, there to be ballanced in the scales of equity, and poiz'd upon the beams of thy Charity, that finding shelter under the Wings of thy Countenance and Protection, from the fury of the envious; it may display forth its beams to all Parts of the Kingdom of Great Brittain, and may extend to the highest Cedar, as well as to the lowest Shrub; instruct it may the ignorant (inform their understandings and reform their Judgments) direct it may the Learned, repel it may the envious, yea reject it will the scornful, and totally disperse the fogs of error, and break the Chains of Ignorance.

But I return again to thee, Courteous Reader, who desires no aversion of the Method, nor dissipation of the Matter, but endeavourest to get benefit by reading, profit by embracing, and contentment by practising, and to such do I commend the placid Fruits of this my annual Labour: a Piece small in Magnitude, but large in Matter, and easy for thy Understanding; yea so useful, so pleasant, and so necessary are the Calculations (be it spoken without the least spark of Ostentation) that it need not be ashamed to appear abroad, not only to the vulgar whose understandings are wrapt up in Obscurity, but may unmask and show its Face in the Sunshine, among the best Proficients, there to abide the touch of their candid Censure and Approbation. In a Word if
any

To the Reader.

any Thing be amiss, I desire thee to correct it, if well to defend, however to accept it and use it, and in so doing thou shalt encourage me still to continue my annual Labour, and mayest expect me upon the Stage next Year God willing; in the interim commending this to thy friendly censure, I rest,

Thine

JOHN PARTRIDGE.

Go forth my Book, Great Britain for to View,
Be not ashamed thy Face all Men to shew;
Bid Momus, Zoilus, the two carplings gods,
Thee not to bite, lest they be lashed with Rods.
Inform the mild, reform the ignorant,
Instruct all those, that yet such Lines do want:
Shake off the Viper of ingratitude,
And dissipate the errors of the rude.
The Sun, Moon, Stars, God's glittering Lights, (thy guide)
Which in the Heavens, both Day and Night do glide;
Their Rising, Setting, culminations all,
Are all the Year long, noted as they fall.
Their errant Motions, and their grand Aspects,
Are here inserted with their dire Effects;
The strange Eclipses that were seen last Year,
Are described, as they did all appear.
Consider then, and herein you shall see,
God's wondrous Works, observed fit to be;
Forget them not, prepare against his Day,
Casting thy ugly loathsome sins away.

Table of the Moon's Age for every Day throughout this present Year 1765. Whereby, with the Help of the next general Tide-Table, the Time of High-Water at all the Places above-mentioned in it are shewn by Inspection.

Explanation of this, and the following Table.

First find the Month in the Head of the Table, and the Day in the First Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Columns is the Time of High Water at all the Places above mentioned, by Inspection.

Example. January the first, I find the Moon to be 10 Days old, and over-against 10 in the first Col. I find 11 Hours 00 Min. in the second Col. 9h. 30' in the third, which is the Time of High Water at all those Places mentioned above in the 2d and 3d Columns. *Et sic de caeteris.*

A general Tide Table, shewing the Time of High Water at all the Places herein mentioned, viz.

Portl. Peter-port, Hague, Dubl. Harf. Lambay, Magnus, Sound, Comb without the Casquets, Macnes, Milford, Texel.

A Table of Terms and Returns, for the Year of our Lord 1765.

Hilary Term begins Jan. 23, ends Feb. 12.

Returns or Effoign Days.		Exc.	Ret.	App	W. D.
In eight Days of St <i>Hilary</i> ,	Jan. 20	21	22	23	Wedn.
From the Day of St <i>Hilary</i> in 15 Days,	27	28	29	30	Wedn.
On the morrow of Purif. of bl. V. <i>Mary</i> ,	Feb. 3	4	5	6	Wedn.
In eight Days of the Purif. of bl. V. <i>Mary</i> ,	9	10	11	12	Tuesf.

Easter Term begins April 24, ends May 20

From the Day of <i>Easter</i> in 15 Days,	April 21	22	23	24	Wedn
From the Day of <i>Easter</i> in 3 Weeks,	28	29	30	M	Wedn.
From the Day of <i>Easter</i> in 1 Month,	May 6	7	8	8	Wedn
From the Day of <i>Easter</i> in 5 Weeks,	12	13	14	15	Wedn.
On the morrow after the <i>Ascension</i> ,	17	18	19	20	Mond.

Trinity Term begins June 3, ends June 26.

On the morrow of the holy <i>Trinity</i> ,	June 3	4	5	7	Frid.
In eight Days of the holy <i>Trinity</i> ,	9	10	11	12	Wedn.
From the Day of holy <i>Trinity</i> in 15 Days,	16	17	18	19	Weds.
From the Day of holy <i>Trinity</i> in 3 Weeks,	23	24	25	26	Wedn.

Michaelmas Term begins Nov 6, ends Nov. 28.

On the morrow of <i>All-Souls</i> ,	Nov. 3	4	5	6	Wedn.
On the morrow of St <i>Martin</i> ,	12	13	14	15	Frid.
In eight Days of St <i>Martin</i> ,	18	19	20	21	Thursf
In 15 Days of St <i>Martin</i> ,	25	26	27	28	Thursf

N. B. No Sittings in *Westminster-Hall* on *Ascension-Day*
Midsummer-Day, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term begins,
except *Trinity*, before which it opens but four Days.

Nota, That the first and last Days of every Term, are the
first and last Days of Appearance.

The law (to those that have thought fit to try)
Is a prodigious dear Commodity;
A Ready money Trade, they never score,
The Cause is bad too, when the client's poor:
Consider what you've spent and what you've won,
For he that conquers, is but last undone.

January hath XXXI Days.

M	h	u
D	8	25

A New-years-gift humbly addressed to his most sacred

Majesty King George the third.

Look back old Janus, and sarvey
 From Time's Birth, till this new-born Day:
 All the successful Season bound,
 With Lawrel Wreathes and Trophies crown'd.

4		○		△		8	14 29	11 15	7 4	Many actions or publick concerns having had a beginning in January may have effects, or conclusion in this; the designs of malapert spirits, are to cast aspersions upon their princes actions and honours; and to divide the nobles and gentry of nations, and bring them into factions. Plenty of intelligence seemingly good for England, doth now or near this time arrive. We hope it may be for the great comfort and satisfaction of his present majesty. We hope the merchants may expect good returns from Portugal, and those adjacent parts, that kingdom seems in good condition.

March hath XXXI Days.

I'll it be round with glories spread,
Then with it crown our GEORGE's head ;
That we the ensuing year may call
One great continued festival :
Fresh joyes in varied formes apply,
To each distinct captivity.

Observations.

Dispute not things in different too warmly.
Rebelles motus in potestatem redigendi.
On the 5th of this Month 1722, was born the Princess of Hesse.
 Great Britain's Friends are from the shades drawn out,
 Though we dont understand what they're about.
 Friendship is good if it firm and true appear,
 Which if once broke the effects will prove severe.
On the 19th Day of this Month 1749, was born the hopeful Princess Louisa Anne.
On the 25th Day of this Month in the year 1739, was born the hopeful Prince Edward Augustus, 2d Son of her Royal Highness the Princess Dowager of Wales, now Duke of York.

April hath XXX Days.

Season his cares by day with nights,
 Crown'd with all conjugal delights ;
 May the choice beauties that enflame,
 His royal breast be still the same.
 - And still think them such, since more
 Thou canst not give from nature's store.

June hath XXX Days.

Let his strong Vertues overcome
 And bring him bloodless Trophies home;
 Strew all the Pavements where he treads,
 With Loyal Hearts, or Rebel's Heads;
 But by front, open thou no more
 In his blest Reign the Temple Door.

August hath XXXI Days.

From his prophane Altars, we
 Turn to adore thy Deity ;
 He only can wild Lust provoke,
 Thou, those impurer Flames canst choke.
 And where he scatters looser fires,
 Thou turn't them into chaste Desires.

1	19	12	10	19		8	5 49	Morn.	rise	As for the Con- figurations of this Month, they are not many nor very material, though their Influences are mostly friendly to the generality of Mankind, & seems to put a stop to the Disturbances that seem'd to be a foot in the last Month The 11th of this Month, 1737 was born the hope- ful Prin. Augusta, first Daughter of her Roy. Highness the Princess Dow- ager of Wales. We may hope still for the best; England receives good Intelligence from remote Parts & Things appear in a good & peaceable Order, relating to the Affairs of this Kingdom.

September hath XXX Days.

his Kingdom knows no Rule but this,
 Whatever pleaseth, lawful is ;
 Thy sacred Love shews us the Path
 Of Modesty and constant Faith,
 Which makes the rude Male satisfied.
 With one fair Female by his Side.

Observations.
 On the 2d, 3d, 4th and 5th Days of this Month Old Stile, or the 13th, 14th, 15th & 16th according to the New, 1666, was the glorious City of London burnt by those vile Incendiaries the Papists; therefore let the Remembrance of that memorable Year of our Lord, being graven in indelible Characters on the Hearts of Posterity, to make them abhor & detest Popery, and all such vile Popish Incendiaries. Let it remain a Monument of Gratitude to God, of Caution to England, and Protestants in general, & Shame to Rome.

December hath XXXI Days.

So shalt thou with thy pregnant fire,
 The Water, Earth, and Air inspire.
 Thus he that brought you to the Throne
 May still protect you as his own.
 Pray God no Tempest may molest,
 Nor Sorrow enter in your Breast.

N B. In the Kalendar Part you will find the Planets Southing inserted to several Days in each Month; and by this Table you may easily find their Rising and Setting: First find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting; but subtracted the Rising.

PARTRIDGE, 1765.

Of the Eclipses for the Year, 1765.

TH E R E will be six Eclipses to the Inhabitants of this Globe, four of the Sun, and two of the Moon, they will happen in the following order.

The first is an invisible Eclipse of the Sun, on February the 19th, at 11 at Night.

The second is of the Moon, on March the 7th, at 1 o'Clock in the Afternoon, and therefore invisible.

The third is of the Sun, on March the 21st, at 1 in the Afternoon, but invisible also.

The fourth is a small Eclipse of the Sun, on the 16th of August, at 4 in the Afternoon; and because it is so small, for in the most northern parts of *Europe*, as at *Moscow* in *Russia*, *St Peterburg*, and at *Stockholm* in *Swedenland*, where it is the most visible, there are scarcely 2 digits eclipsed; therefore I shall not trouble myself or my readers with any thing more about it.

The fifth is of the Moon, on the 30th of August, at 4 in the Afternoon, and invisible also.

The sixth is of the Sun, on September 15th, at 5 in the Morning, and invisible also: thus much for this Year's Eclipses.

But as I said in my last Years Almanack, that the general effects of the solar Eclipse, which was on the 1st Day of April 1764, would be apparent in the Years 1765 and 1766, I shall according to my promise, give you a more particular Judgment of that Eclipse. Now according to the precepts of Astrology, great Damages do environ and befall such Persons, especially as are signified by Sol; and we all know he represents no mean ones, but Men in Authority, as Kings, Princes, Governours of eminent Places, &c. As he was then darkned and eclipsed near to his Exaltation, near the Culmen Cæli, and greatest summity of his Altitude, so astrologically may we deduce this Conjecture; *viz.* that it presageth to them an Adumbration and Eclipsing of their Honours and Dignities, even in that point of Time, when they are in their height of Honour, and it likewise seems to prenote that
a Company

a Company of cunning and subtle pharisaical Hypocrites, shall arise in Sheep's Cloathing, who by their insinuating and crafty wiles, shall bewitch the ignorant, and deceive the very Elect too, were it possible; if Authority in Time do not supplant them. Such I say must come, and never more likely than now. Our blessed Saviour himself, forewarns us of them, in *Matth. xxiv. 23, 24. Mark xiii. 21. Tunc, si quis vobis dixerit, ecce, hic Christus, aut hic, ne credatis, excitabuntur enim pseudo Christi, et pseudo prophetæ, et edent signa magna & miracula, ita ut seducant (ut fieri possit) etiam electos.* Certainly we may gather from many Places of holy writ, that these are the very Times there spoken of, which will infallibly come to pass; yet I verily believe that after these things are fulfilled, there shall immediately succeed a Golden Age, wherein the diverse Forms of religious and politic Government shall be changed, and made conformably to the will of God; but lest I should digress, I must turn into the way again, and speak more particularly of this famous Eclipse. *Sol cum laborare, says my Author, vivus fuerit in denaris secundo arietis, regum carcerem, et mærorem, aut mortis periculum, arborumque fructiferarum corruptionem, ac terne nascentium, putredinem:* When the Sun shall suffer Eclipse in the second face of Aries, it portends imprisonment and grief to some King, or peril of his death, also Corruption of Fruit Trees and rottenness of Things, growing upon the Face of the Earth. *Fiunt in mundo multa incommoda, quando erit in uno mense, utriusque Luminaris Eclipsis præcipuè in his locis quibus est significatio eorum specialis: Hermes in centiloqui 53 enunciato:* In the World many evils will happen, when in one Month there shall be an Eclipse of both Luminaries, chiefly in those Places subject to the signs they are in; we had then both Luminaries eclipsed in one Month, and both visible too, and therefore it's much to be fear'd we shall, 'ere their Effects determine, see fresh troubles and divisions, and great differences in Opinions; Neighbour still murmuring against Neighbour, and Brother against Brother, *et quid non*; generally we may guess in a natural way, that great Calamities are hereby threatned to most Countries of *Europe*, by Sickneses, Famines or Depopulations, which 'ere many Years pass are like to waste

waste and consume many of its Inhabitants, if God in mercy prevent not. *Inter potentissimos hujus mundi principes, ruptis fœderibus, capitales inimicitiae nascentur*, says my Author. The learned Astrologers in all Ages, as Ptolemy, Junſtine, Leovitius, Origanus, Maginus, &c. have observed notable Events to succeed great Eclipses, and Leovitius writing upon the like Eclipse, *O Reges principes et magnates*, (saith he) *potissimum sub V ☿ ☽ ☿ ☿, vos præ nimio æstu sudabitis*, &c. Whether the Events was answerable or no in his Times let others judge; this is certain that this Eclipse was more famous, than that which besel in his Time, for it was a great Eclipse, and in the sign regent of England the north and east Part, Germany, France, Sweedland, Denmark, Scotland, Holland and Zealand, Portugal, Cilicia and Galicia, &c. and ascending thro' the 10th House called of Astrologers, *Domus Magnatum*, &c. *et Cælum, Mars solus habet*, why then may not this Eclipse forshew also *rariſſimos, ingentes atque improvisis Effectus*, wonderful great and unexpected Effects to come in the near succeeding Times, and of this our own Experience may inform us, if we will but with an impartial Eye consider the remarkable great Eclipses of the Sun that have happened in this Century, even in our own Times: I will tell you when they were, *viz.* the first in April 1715, the second in May 1724, the third in February 1737, the fourth in July 1748, and your own Reading or Knowledge may inform you, what were the Effects they produced, which I think might forewarn and forearm us too; a very few Years will produce wonders, but what they will be in particular; *nulli Mortalium fati perspectum judico*, I think no mortal Man can foresee, and so I conclude my Discourse with the first Aphorism of Ptolemy. *A te et a scientiâ*, from thyself and science, for its impossible that the Artist should foresee the particular Idea of Things; neither can sense perceive a particular, but a general Notion of the sensible matter, whereby he ought in these Things to use conjecture, for none but one inspired can predict particulars, and so much for these Eclipses.

*Take I th' Conclusion what I've more to say,
 If all were right none woud their trust betray.*

Ambitious

PARTRIDGE, 1765.

*Ambitious pride is heard, and easy found,
Which often proves the reason of war's ground.
Would this with other anxious Humours cease,
Then there's no doubt the world would be at Peace.
Te commendet moderatio.*

A Continuation of the Genethliacal Astrology from my last.

I Verily concluded that either the Sun or Moon must be givers of Life, and that the rays of the malefic Stars must be the abscissors or destroyers of Life : but how or by what measure of directions must be my Business now to enquire into ; and in so doing I shall dissent wholly from the method now practised ; for I affirm that all the Stars from the time of the nativity in their own certain peculiar motions and in good order, are moved as well in the Zodiac as in the World, from the same moment of time ; yet in a just proportion of their motions. As for Example, Jupiter in the nativity of a certain Person is in $4^{\circ} 3'$ in Cancer in the following days, from the day and hour of the nativity he will be removed as much under the the Primum Mobile, as in his own diurnal motion. In like manner they will make them meeting as well as the promissors, therefore it is without reason to constitute any Planet as we please immoveable, either in the Zodiack or the World, when really it is moved thro' the situation of these places as well one as another. For all proportions which are found to predict accidents, are either very false or repugnant to reason ; it is in vain to direct the Ascendent to the Stars, or the Planets to him, when those lines which are brought to the division are imaginary and operate nothing at all, except there be some body of equal distance with another, and their presence may be delayed, to receive the Aspect of another luminous Body, that may give power to this to transmit its Light even to us. Hence there is no directions of the Houses really, though they may seem apparent in our directions, because the Ascendent is directed, not because the space of Life may be known
from

from itself or something else, but in division of time forward, in respect of the Sun's course or of the diurnal motion; but also these directions of the Medium Cæli and others of the Planets are taken away both in respect of the Equator and the Zodiac, according to true and natural motion, and as the Stars are every where really moved, and from these rules all Aspects of every sort are known.

Again the direction of the Moon itself is against Reason and natural motion, to which they attribute 1 deg. of Longitude, under the Primum Mobile for every Year, as they give to the Sun himself. Without doubt the Moon sometimes goes 14 deg. more or less in any Day, in the same space of Time that the Sun goes about 1 degree; how therefore shall we believe this direction. But these things are to be found out and concluded to the agreement of these Events, but seeing they are generally false, they have made infinite other causes, till they have found some things to answer their Prognostics; that which is most ridiculous, they have cut off Life by some square or opposition of the malefics to the Ascendent or Medium Cæli, or even from some other Planet although not malefic; but of the directions which are called secondary by *Placidus de Titis* (seeing they are rather primary and the only) have been something explained, not found out by his most ingenious wit, seeing they have remained from all Antiquity, and Julius Firmicus had a glimpse of them, as may be perceiv'd by the geniture of Lolianus, for he writes that the benefits of Jupiter do sometimes fail in former Parts, because from this in the third (to wit from the nativity) the Moon being in Leo and full of Light, dashed against the rays of Mars by opposition, and he explains this in another place more clearly, and in like manner Origanus in his Nat. Astron. Memb. 4. chap. ii. treats of the same, therefore it is no wonder if we have so few of them, seeing that *consumit omnia tempus*, and so no more at this Time.

*A friendly caution here take from my Pen,
Beware of some prevaricating Men.
Cavendi Opportunitas non est omissenda.*

Judicium

PARTRIDGE, 1765.

*Judicium Astrologicum, pro Anno 1765,
Being an Astrological Judgment for the Year 1765.*

I. *Of the Winter Quarter,*

WHICH begins on Friday the 21st Day of December 1764. at 36 minutes past 6 in the Morning apparent Time, when 10 degrees of Libra culminates, and 10 degrees of Sagittary ascends; the Sun in the ascendent in sextile to Mars in the 3d, and the Moon in the 12th; going from the square of Mars, and applying to the Body of the Sun, and Mercury is hastning to a square of Jupiter, and Saturn and Venus have lately been in opposition from Taurus and Scorpio, being fixed signs; these are the Aspects, my judgment from them is, that the general Affairs of Nations, the common People or subjects of many Princes in transmarine Parts generally dissatisfied, their Princes much impoverished, many considerations or secret consultations are on foot how to meliorate their miserable Condition, but no perfect expedient can as yet be found out, or yet any sensible agreement in the resolution of those, who strongly endeavour by all art and industry to reconcile Differences, or to give conclusion to the lamentable afflictions of many Parts of *Europe*, and her distressed Inhabitants. Oh happy England, be thankful for thy Plenty for thy present Peace, for all the mercies of a gracious God bestowed upon thee; pray for his Majesty's long life and Reign. Few or not many of our animadversions belong to us this Year, and so we would be generally understood. As for the Inclination of the Weather, there being no strong configurations to the contrary, it is for the most part signified by Venus and the Moon, their Application, to the superiour and inferior Planets. Venus for the most part signifies moist Weather, Rain, Snow, sleety Weather, and not harmful to Mankind.

*What now's debated and is brought along,
Some think is right but others say is wrong.
Some now are placed in the Chair of state,
And for a Time seem very fortunate.*

Honour

P A R T R I D G E, 1765.

*Honour and riches prove to some a snare,
Only for want of Honesty and care.
Justitia exaltat gentem, probro autem est,
Nationibus peccatum. Proverbs 14, v. 31.*

II. *The Spring Quarter.*

THIS pleasant Quarter commences on Wednesday March 20, at 27 minutes past 8 in the Morning, apparent Time; when 10 degrees of Gemini ascend, and 5 degrees of Aquarius culminate. At this ingress we find Venus Mercury and the Moon in the 11th, in trine to Jove, the Sun near to the cusp of the 12th, and Saturn and Mars conjoined in Taurus, an earthly sign in the 12th, also the Moon by Separation and Application is conjoined with them all; therefore it is a very active ingress; Jupiter is in square to the great Conjunction in Aries, and the great solar Eclipse was in the degree of the same Conjunction. And it has been diligently observed by the learned in all Ages, that great conjunctions in Cardinal Signs never pass over without prodigious Effects, and I am of Opinion, that its Effects are in being, and will not be extirpated for many Years to come, being reiterated by the late famous solar Eclipse. Many and considerable are the Transactions in different Parts of the World, and many politick Heads are now at Work; and it looks something like a new War breaking out, which we have little or nothing to do with. There will be found (I fear) cross Doings in the World, *viz.* in some Country's remote from us, being now concerting what Measures to take. 'Tis to be fear'd some of the Grandees will exert their Powers to do mischief, where it will be of little use to themselves, but God is many ways favourable to us of Great Britain, but more particularly to the Merchants and trading Men of the Nation, who seem to be in a flourishing and prosperous Condition, yet the Conjunction of the two Infortunes seems to overthwart some of their Designs; I shall further observe from the Figure of the ingress in general, that we are likely to enjoy our Habitations in a peaceable and friendly Order, except as I said before, our Difference in our Opinions disturb our Peace; for many are the Enemies of our Church: yet I hope neither Rome nor Geneva, nor both together, will ever be able to prevail against her. She is a Medium between two Extreams, being neither guilty of the superstition of the one, nor the savenly indecent behaviour of the other; she is built on such a Rock, that the Gates of Hell can never prevail against her, so to conclude,

*Come let us all unite, and let my Muse now sing,
To pray God keep the Church, and bless the King.*

III. *The*

III. *The Summer Quarter,*

WHICH begins at such Time as the Sun mounts the Cælestial Crab or sign Cancer, which this Year is on the 21st of June, at 51 minutes past 6 in the Morning, when 14 degrees of Aries is on the Mid-heaven, and 6 degrees of Leo ascending, with Saturn and Mercury and the Sun and Venus in the 11th, Jupiter and Mars upon the cusp of the 12th, the Moon on the Ascendent applying to the sextile of Mercury; and thus are the Heavens posited at this ingress. This Quarter produces much Variety in the Aspects of the Planets, as may be seen by the Ephemeris itself, among the rest three Eclipses, two of the Sun, and one of the Moon, (though one only scarce visible to us) and upon these Considerations some very remarkable Occurrences should be carried on throughout *Europe* at least, and of notable Remark, and from whence we may observe, how whirling and unstable, are the pinacles and battlements of the most potent Empires, and how slippery is the top of fickle Fortune. 'Tis a great Pity to see the Curtain drawn between just deserving Persons and Preferment, and we may daily verify by our own Experience, that those who have been bad enough by their unworthy and dishonest Actions, even their own infelicity has precipitated their Fates; and sometimes again those that have acted their Parts with much Integrity, even their own Merits, have been their ruin; most Men are industrious to promote their own Interest and Advantage, and some use their Wealth as Anglers do their Fish, to bait their Hooks to catch more. 'Tis Almighty God only that is the common Friend as well as the Father of all Men.

*Good Men from Vice, for love of Virtue run,
But fear alone makes bad Men Vice to shun.*

IV. *Of the Autumnal Quarter.*

WHICH commences on Sunday the 22d. of September at 20 minutes past 8 at Night, when 7 degrees of Gemini is on the eastern finitor, and 3 degrees of Aquarius culminates; Jupiter in the 4th, Saturn on the cusp of the Ascendent, and the Moon in the 9th going from a square of the Sun, to the square of Mercury and trine of Mars; thus are the Stars posited at this ingress, and more passive than any of the rest, which makes me say, that now no great Matters may be expected, or nothing but what we have already experimented; the Course of this World is full of Change, and let our Course of Life be what it will, many of us may expect

P A R T R I D G E, 1765.

expect misery Enough. I advise all People to forbear expressing their dissatisfaction in any Point, or meddling with Matters out of their Sphere, thereby endangering their Persons, Families and Estates. A wise Man is always more ready to hear than to speak, we read of none that ever were undone by hearing, but thousands by speaking. It is the sweetest revenge to forget an injury. Whoever observes the World, and the Order of it, will find all the Motions in it to be only a vicissitude of falling and rising, nothing extinguished, and even those Things which seem to us to perish, are in truth but changed. The Seasons go, and return, Day and Night follow in their Courses &c.

Si Deus nobiscum, quis contra nos.

The Authors farewell to his Book.

*Farewell poor Book! Time will not for thee Stay,
Thou must be gone, Mount, and ride post away;
Rush boldly on, thro' Bryars, Brakes, and Thorns,
Where mind old Momus, with his corps and scorns,
Don't cant nor wheedle, but be always content
With those that love the King, and Parliament.*

Lands surveyed divided and inclosed, and Maps of the same correctly delineated; also Timber and Polewood surveyed, valued and sold by *Vincent Wing* of *Pickworth* in the County of *Rutland*.
