

1806.

Merlinus Liberatus.

AN

ALMANACK

For the Year of our Redemption,
1806,

Being the 2d after *Bissexile*, or *Leap-Year* ;
And from the Creation of the World, according
to the best History, 5753,

And the 117th of our Deliverance by K. William

From Popery and Arbitrary Government ;

But the 111th from the

Horrid, Popish, Jacobite Plot.

Wherein are contained all Things fitting and useful for such a Work ; as
an Ephemeris of the daily Motions of the Planets, with their various
Configurations, Aspects, Conjunctions ; Lunations, Eclipses, Astrono-
mical, Astrological, Meteorological Observations, the rising and setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and daily Equation of Clocks ; Length and Break,
Increase and Decrease of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes ; a Chronology ; Remarks on the Divisions of the
Heavens, with Judgments of the Eclipses and Seasons, handled ac-
cording to the Rules of the Ptolomean Astrology, and many other
Things relating to the Truth of Astrology.

Calculated for the Meridian of **LONDON**

By JOHN PARTRIDGE.

— *Eriam Mortuus loquitur.*

L O N D O N.

Printed for the **COMPANY of STATIONERS.**

By **WILLIAM THORNE**, Red Lion Court, Fleet Street.

And Sold by **GEORGE GREENHILL**, at their Hall, *Ludgate Street.*

[Price stitched One Shilling and Ten Pence.]

2 January hath XXXI Days.

Old Janus bids thee keep thy Body warm,
 And with good Diet thy Diseases charm;
 Drink wholesome Wines, and keep in Exercise
 Thy Body now, if thou'd be counted wise.

Be sure bleed not, unless Occasion urge,
 Be wary how thou vomit, sweat, or purge;
 Beware also of vain Excess or Riot.
 Be sure observe a seasonable Diet.

VENUS will be an Evening Star till March 14; and then a Morning Star for the rest of the Year.

6 March hath XXXI Days.

March comes in blustering, like a Lion bold,
 And ushers in the Spring with Wet and Cold;
 But like a Lamb he mildly makes his Exit;
 Leaving good Weather.—'Tis my ipse dixit.

To bathe, to bleed, to purge, is not debar'd,
 If that the golden Mean be well observ'd;
 Should one be done in careless wise, full soon
 Death's Harbinger, instead of Health, may come.

Observations.

This month enters with an δ of \sphericalangle and δ , which are of a malevolent tendency. They will stir up broils and contentions in the courts of princes And where armies are on foot I should not wonder if we hear of a battle. The *English* soldiers are in high spirits, and do not fear their enemies.

- 1 Dryden died 1700
- 4 Hen. VI. murdered 1471
- 14 Anne Boleyn beheaded 1504
- 17 D of Marlborough died 1722
- Prince of Wales born 1768
- 19 Battle of La Hogue 1692
- 27 J. Calvin died 1554

Go hunt the Hare, the tim'rous Buck pursue,
 Bid Idleness and fullen Sloth adieu;
 The careful Man, that doth intend to thrive,
 Will, like the Bee, bring Honey to the Hive.

Observations.

The actions of many countries and kingdoms are acts beyond former times; and a sad storm of war and desolation is falling upon some of them near at hand. *Great Britain*, I hope, stands firm, and fears not her most implacable enemies.

- 4 The Rebellion began - 1745
- 6 Hen II. died 1189
- Edw. VI. died 1553
- Sir F Moore be-headed - 1535
- 7 Edw I. died 1307
- 9 Czar Peter murdered - 1762
- 13 Peace of Utrecht - 1713
- 17 Cape Breton taken - 1745
- 24 Gibraltar taken 1704
- 29 Spanish Armada defeated - 1588

16 August hath XXXI Days.

Use Wine and Women in a temperate Sort,
 Left (in this Month) thou be full sorry for't;
 Use slender Diet, cooling Drinks embrace,
 If long on Earth thou mean to have a Place.

20 October hath XXXI Days.

October shakes the lofty Tree, and pulls
 The Paunches of your lazy, lecherous Gulls;
 He that hath Spirit in him now should sport
 Abroad in the Country; but at home, at Court.

22 November hath XXX Days.

Now let the Master of the Kitchen be
 The Doctor, to refresh thy Heart with Joy;
 Good Diet: does thy Body far more Good,
 Than the most choice Apothecarian Drug.

♊ ♌ ♀ are Barren	♄ ♀ ♀ Bicorporeal

A TABLE of TERMS and RETURNS.

Hilary Term begins *January 23*, ends *February 12*.

Returns or Essoign Days.	Exc.	Ret.	App.	W. D.
In eight Days of <i>St. Hilary</i> , - - <i>January 20</i>	21	22	23	<i>Thursd.</i>
In fifteen Days of <i>St. Hilary</i> , - - - - <i>27</i>	28	29	30	<i>Thursd.</i>
On the Morrow of the Purif. of bl. <i>V. M. Feb. 3</i>	4	5	6	<i>Thursd.</i>
In eight Days of the Purif. of bl. <i>V. Mary</i> , 9	10	11	12	<i>Wednesf.</i>

Easter Term begins *April 23*, ends *May 19*.

In 15 Days of <i>Easter</i> , - - - - <i>April 20</i>	21	22	23	<i>Wednesf.</i>
From the Day of <i>Easter</i> in 3 Weeks, <i>April 27</i>	28	29	30	<i>Wednesf.</i>
From the Day of <i>Easter</i> in 1 Month, <i>May 4</i>	5	6	7	<i>Wednesf.</i>
From the Day of <i>Easter</i> in 5 Weeks, - 11	12	13	14	<i>Wednesf.</i>
On the Morrow of the <i>Ascension</i> , - - - 16	17	18	19	<i>Monday</i>

Trinity Term begins *June 6*, ends *June 25*.

On the Morrow of the holy <i>Trinity</i> , <i>June 2</i>	3	4	6	<i>Friday.</i>
In eight Days of the holy <i>Trinity</i> , 8	9	10	11	<i>Wednesf.</i>
In fifteen Days of the holy <i>Trinity</i> - - 15	16	17	18	<i>Wednesf.</i>
From the holy <i>Trinity</i> in 3 Weeks, - 22	23	24	25	<i>Wednesf.</i>

Michaelmas Term begins *Nov. 6*, ends *Nov. 28*.

On the Morrow of <i>All Souls</i> , - - - <i>Nov. 3</i>	4	5	6	<i>Thursd.</i>
On the Morrow of <i>St. Martin</i> , - - - - 12	13	14	15	<i>Saturd.</i>
In eight Days of <i>St. Martin</i> , - - - - 18	19	20	21	<i>Friday.</i>
In fifteen Days of <i>St. Martin</i> , - - - - 25	26	27	28	<i>Friday.</i>

N. B. No Sittings in *Westminster-Hall* on the 2d of *February*, *Ascension Day*, and *Midsummer Day*.

The Exchequer opens Eight Days before any Term begins, except *Trinity*, before which it opens but Four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

OXFORD and CAMBRIDGE TERMS.

OXFORD TERMS.

Lent Term - begins <i>January 14</i> , - - ends <i>March 29</i> .
Easter Term - begins <i>April 16</i> , - - ends <i>May 22</i> .
Trinity Term - begins <i>June 4</i> , - - ends <i>July 19</i> .
Michaelmas Term begins <i>October 10</i> , - - ends <i>Dec. 17</i> .

The Act is *July 14*.

CAMBRIDGE TERMS.

Lent Term - - begins <i>January 13</i> , - - ends <i>March 28</i> .
Easter Term - - begins <i>April 16</i> , - - ends <i>July 4</i> .
Michaelmas Term begins <i>October 10</i> , - - ends <i>Dec. 16</i> .

The Commencement will be *July 1*.

A plain and easy TABLE, shewing the Time of HIGH WATER.

NOTE, That the Moon's Age being taken notice of in the Table, you have the Time of HIGH WATER at all the under-named Places.

N. B. In the Calendar Part you will find the Planets Southing inferted to several Days in each Month; and by this Table you may easily find their Rising and Setting: First, find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting, but subtracted the Rising.

A Compendious Chronology of the most principal Epochas and Æras, with their Beginnings, reduced and fixed to the Years of the Julian Period, the Creation of the World, and to the Years before and after Christ.

	Julian Period	Anno Mund	Ante Christ
T HE Creation of the World after the Jews - - -	952	1	3760
The Common Epocha of the Creation	765	1	3950
The same by the Greek Emperors -	787	1	3926
The same in Mr. Bedford's Scripture Chronology - - -	706	1	4007
The same in Bishop Usher's Annals -	710	1	4004
The Deluge, or Noah's Flood -	2362	1657	2351
Porphyrius's Caldaic Epocha - -	2480	1717	2200
The Assyrian Monarchy by Nimrod -	2665	1960	2048
The Birth of Abraham - - -	2714	2009	1999
Joseph sold into Egypt - - -	2986	2281	1728
The Israelites 400 Years Servitude in Egypt	2819	2114	1894
The Kingdom of Argos founded by Inachus	2857	2152	1856

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
Russia	Alexander	Dec. 28, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Maria	Dec. 17, 1734	Feb. 24, 1777
Prussia	Fred.-Wm. III.	Aug. 6, 1770	Nov. 16, 1797
Denmark & Norway	Christian VII.	Jan. 29, 1749	Jan. 14, 1766
Sweden	Gustavus IV.	Nov. 1, 1778	Mar. 29, 1792
Germany	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Popeedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor-Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Selim III.	July 17, 1761	April 7, 1789
Two Sicilies,	Ferdinand IV.	Jan. 12, 1751	Oct. 6, 1759
France	Napoleon	Aug. 15, 1769	Dec. 15, 1799

The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to pass of the Gold Coin.

Wt. allowed.		Full Wt.		SILVER.		Full Wt.	
GOLD.	dwt. gr.	dwt. gr.		dwt.	gr.	dwt.	gr.
Guinea	- 5 8	5	9 $\frac{3}{8}$	A Crown,	- - - - 19	8	16 $\frac{1}{2}$
Half Guinea,	2 16	2	16 $\frac{6}{8}$	Half Crown,	- - - - 9	16	3 $\frac{1}{2}$
Third of Guin.	1 19	1	19 $\frac{1}{8}$	Shilling,	- - - - 3	20	2 $\frac{5}{8}$
				Six Pence,	- - - - 1	22	1 $\frac{3}{4}$

According to the above proportions it appears, that the value of a *lb.* of silver is 62s. or 3l. 2s. and of a *lb.* of gold is 44 $\frac{1}{2}$ guineas, or 46l. 14s. 6d. Also that the *oz.* of silver is 5s. 2d. and the *oz.* of gold 3l. 17s. 10 $\frac{1}{2}$ d. So that the value of the standard gold is 15 times that of the silver, and 1-14th more.

OF THE
ECLIPSES

That will happen this Year, 1806.

WITHIN the limits of this Year there will happen only Three Eclipses, if my Calculations are right, or nearly so—Two of the *Sun* and One of the *Moon*, and they happen in the following order :

The First is a partial Eclipse of the *Moon* on *Saturday*, the 4th of *January*, at Night, and will be Visible to us, if Clouds interpose not. At the Beginning of this Eclipse, the *Moon* will be vertical, or directly over head, to such as are situated in the North-East Parts of *Bornou*, in the Deserts of *Africa*, under 22 Degrees 17 Minutes of North Latitude, and 21 Degrees 39 Minutes of East Longitude from *London*. *Bornou* is a very extensive Country in the interior Part of *Africa*, where, in our Summer Months, they have intense Heat, violent Rains, attended with dreadful Thunder and Lightening : but during our Winter Months, the Heat is more moderate, and the Air becomes more soft and pleasant, and the Weather more serene. At the middle of this Eclipse, the *Moon* is directly over head, and vertical in 22 Degrees 8 Minutes of North Latitude, in Longitude 1 Degree 6 Minutes East of *London* ; and at the End thereof, the *Moon* will be directly over that Part of the *Atlantic* Ocean, near to *Cape Blanco*, on the Western Coast of *Africa*, in Lat. 21 Deg. 56 Min. North, and 19 Deg. 25 Min. West of *London*, North of the river *Senegal*. It appears from this Statement, that this Lunar Eclipse will be visible quite through *Africa* and *Europe*, all the West Parts of *Asia*, and to the greatest part of *America*, both North and South. To the *Canary* and *Cape Verd* Islands, &c. The time and manner of Appearance, in respect to us in *Great Britain*, is as follows, and it is expected will be nearly found to agree with the Heavens.

Here

Here follows the Type for *London*, which will nearly agree for all Parts of the *United Kingdoms*, shewing the Track the *Moon* makes in passing through the dark shadow of the *Earth*.

January the 4th at Night, app. Time.

	<i>London.</i>	<i>Oxford.</i>	<i>York.</i>
	h. m.	h. m.	h. m.
Eclipse begins - - -	10 29	10 27	10 25
Middle - - - - -	11 55	11 53	11 51
Ecliptic Opp. - - -	12 1	11 59	11 57
End - - - - -	13 21	13 19	13 16
<i>Viz. Sunday Morning.</i>	1 21	1 19	1 16
Total Duration 2 h. 52 m.	Digits eclipsed 9° 27'.		

The second is a small visible Eclipse of the *Sun*, upon *Monday*, the 16th of *June*, in the Afternoon. Though this Eclipse is but small here with us in *England*, yet it will be a very large Eclipse in the Southern Regions of our *Globe*, for it will be both central and total, which will very much alarm the Beholders, for though the darkness comes gradually on until the first gloomy moment, yet so piercing is the least thread of the *Sun's* Light, that the

the momentary transition, from clear *Sunshine* to gloomy darkness, will give a great shock to Nature even in such persons as expect it; and much more so when it comes upon them unawares, or by surprize.—The following Type represents the Appearance at the middle of the Eclipse at *London*, and will tolerably well serve the whole Kingdom.

The TYPE for LONDON.

V, the Sun's upper Limb. B, where the Eclipse will begin.

At *London*, and the adjacent Parts, the Eclipse will begin at B, at 36 min. past 4. in the Afternoon; the middle will be at 18 min. past 5, when the *Sun* will appear a little more than one-fourth of the *Sun's* diameter eclipsed, as the Type sheweth, and the End will be at 58 min. past 5 o'clock, according to app. time. The Duration will be 1 h. and 22 m. Digits eclipsed $3^{\circ} 28'$

The third and last of these Eclipses, is another of the *Sun*, upon *Wednesday* the 10th of *December*, at 24 min. past our 2 o'clock in the Morning, consequently invisible to us, and not to us only, but even to all *Europe*: but in the Southern Parts of the Globe, it will be a very great Eclipse, even so much, that in 32 deg. 27 min. of South Latitude, and about 144 degrees of East Longitude from *London*,

London, the *Sun* will be centrally eclipsed on the Meridian, or exactly at noon-day; which Place falls on the Eastern Parts of that vast Island, called *New Holland*, which was explored by that great Navigator, Captain *Cook* in 1770, and goes by the Name of *New South Wales*, which Coast was found to be 2,000 miles in length.—This central Eclipse will be visible at *Botany Bay*, and also at Port *Jackson*, situated on the said Coast; the inhabitants there, will be greatly surpris'd at seeing this beautiful central and annular Eclipse (for so it is) at their noon-day, which will appear to the North of them, for so the *Sun* appears always at noon in that Part of the Country, viz. about *Botany Bay* and Port *Jackson*.—This Eclipse will be seen at *New Zealand*, and other Islands in that part of the great Southern Ocean.

N. B. On *Monday, June* the 30th, at 52 min. past 9 at Night, the *Moon* will pass very near the Earth's Shadow, so, that if our Astronomical Tables are not very exact, the *Moon* may suffer an Eclipse; but probably there will be no Eclipse, though we should not wonder if a sort of Duskiness should appear on the *Moon's* lower Limb at the time above mentioned, especially if the *Moon* should be looked at through a Telescope, or a Night Glass, which may be occasioned by the Earth's Atmosphere, and not her real Shadow.

GENETHLIACAL ASTROLOGY.

I Again present my Readers in this Place with Observations on a particular Nativity, with the killing Directions wrought out; as it was calculated and sent to me by an ingenious Correspondent

A SCHEME of the HOROSCOPE at BIRTH.

265° 38'

This is the Nativity of the late Daughter of a learned Dr. and at his request I have published it here, to shew the verity and truth of Directional Motion; the Celestial Constitution is indeed very remarkable, there being no less than three of the *vital Places* afflicted by Position at the same time, so that we may conclude the Geniture not to be *vital*; the ascendant is afflicted by the Opposition of Mars and body of Saturn, and the Sun is oppressed by the Square of Mars in the Zodiac, and the Moon Hyleg, or Giver of Life, is applying to the mundane square of Mars by converse Motion, and by a direct Motion is applying to the square of Saturn in Mundo; therefore we may infer from the Position before us, that the Life of the Native could not be of long Duration, which you shall presently understand.

The DIRECTIONS.

	Yrs.	Ms.
☽ to the ☐ of ♃ in Mundo, converse Motion	5	2
☽ to the ☐ of ♄ in Mundo, direct direction	8	3
☉ to the square of ♃ in the Zodiac	—	8 9
☽ to the square of ♃ in Mundo, D. D.	10	6

☽ to

☽ to the square of ♀ in Mundo, D. D.	11	4
☽ to the square of ♃ in the Zodiac	—	13 3 Died.
Ascendant to the Body of ♃ in Mundo	13	4
☽ to the Δ of ♂ in the Zodiac	—	14 5

This is the train of directions which I do allow for her death, and is of such influence, that I do affirm they will kill when such positions and directions happen. But perhaps I may be questioned why the Moon to the mundane square of ♃ and ♂, with the Sun to the square of Mars in the Zodiac, did not destroy life long before? To this I answer, I acknowledge those directions were baneful ones, but could not kill, if the doctrine of the great PTOLEMY is to be depended on, as it certainly is in all cases, for the Moon, the giver of Life, was directed soon after to the mundane squares of ♃ and ♀, which broke the train; but when the Moon was directed to the square of ♃, assisted by the ascendant to the body of that malefic, and the Moon to the trine of ♂ in the Zodiac in *Signs of short Ascension*, which is equal to the violence of a square in this Case; the unfortunate Native was then made a sacrifice to death, as there were no saving directions to the giver of life at that Period, but on the contrary, great testimonies of death, from the nature of the directions and positions. I am convinced some persons would not have judged death to have taken possession so sudden in this case, seeing the Moon, the giver of Life, was in a Zodiacal Sextile with Jupiter and Venus; I confess the Moon in the Nativity had been in a Sextile with ♃ and ♀, but was certainly separating from those benevolent Rays, and applying with great rapidity to the violent and destructive aspects of the malefics, without any relief from the benevolents to assist the Hyleg at the time of death. In her last Revolutional Figure, the Moon, who is the giver of Life, was then transiting the opposite place of Saturn in the Radix conjoined with him in the West, and ♃ had returned to his opposite place in the Radix; Jupiter was then posited in ♍, in a violent square of ♂, and ♀ was then returned very near her place in the Radix, and ♂ was transiting the place of the Sun, and his own Radix place; so that considering the fatal directions to the Moon, the giver of Life, in unison with so violent a Revolution, it could be no less than MORTAL. On the day she died,

the

the Moon was with violent fixed Stars, and going to the Opposition of the radical Place of the Sun, δ was conjoined with a square to the Radical Stations of \mathcal{U} and \mathcal{F} ; these things, if observed, are truly wonderful—Thus much for this Nativity.

I shall now mention the NATIVITY of a person born near my habitation, on the 8th of September 1791, at 20 min. past 12 at Noon. I shall not give a list of the directions in this Geniture, because this is the only *Estimate Time*, and not the corrected; indeed, he has had no particular accidents happened at present to rectify his Figure, though I am of opinion it is not far from the truth, and though he will receive checks to his advancement, yet, I am confident, he will overcome every obstacle in his way to DIGNITY, GRANDEUR, and Reputation, according to the sphere of his life; in fine, the Positions, &c. being of such magnitude and importance, it is my wish that every student in the Sydereal Science would investigate the same with proper attention, as I am clearly of opinion the native will rise to something great and eminent in the world; and the time it may rationally be expected, will be from the effects of the Moon and Mid-heaven to the bodies of Jupiter and Mercury, and the seventh to the mundane Sextile of Mars, and Trine of the Moon in Mundo, and the Mid-heaven to the Sextile of δ in the World, and mundane Trine of the Moon. Indeed, I am firmly of opinion I never saw such a Position as this is, in all the course of my Practice; and *Time*, the FATHER of TRUTH, may bring to light the verity of this judgement. Now in all cases where a violent train of directions concur to the giver of Life, without the assistance of the Benevolents, death will certainly take place, and the first violent direction in the killing train that the Hyleg meets with indicates the true time of death, and those that follow forebode the quality of the disease, as you may see in the directions belonging to the foregoing Nativity. But if a violent train of directions concur to the giver of Life, and the Rays of Jupiter and Venus fall in amongst them to break the force of their fury, then, consequently, the Native will recover and live. I have noted this subject of importance in this place, that those who are students herein may not predict death from unfounded authority. I have

have lately seen the Sun Hyleg in the Mid-heaven pass the Zodiacal Parallel of Mars and Body of Mars, and yet the Native experienced no illness, or misfortune, which I know some would think very extraordinary; but the original course is from the Sun's being directed at the same time to the mundane Trine of Jupiter, and kept parallel of ♄, which in all cases will certainly save life, let the motions of the directions be either direct or converse, &c. These things have taken place in the nativity of NAPOLEON BONAPARTE, where we have great testimonies and aggravations of a *Violent death*, according to the rules of the great PTOLEMY; but I shall decline speaking further on this nativity, as I may probably publish it in a work by itself. See my last, for a sketch of *Bonaparte's* nativity, fitted to the place where he was born in the Island of *Corfica*.

Astrological Observations for the Year 1806.

THE WINTER QUARTER,

Or, *The Sun's Transit through ♄, ♁, and ♀.*

THIS Quarter begins at the Time the Sun enters the Tropical Sign *Capricorn*, which is as far as he can go to the *South*; hence our shortest Days and longest Nights; this takes place on *Sunday* the 22d of *December*, 1805, at 14 min. past 5 in the Morning; at which time we have 25 deg. of ♍, ascending in the East, and 17 deg. of ♁ on the Meridian, and the Planets will be displayed in the Heavens as follows.—The *Moon* ab 6 ♂ et ad 6 ♄ et ☐ ♃—all the Planets at this time are under the Earth, except ♃, who is posited in the 11th House, in 27 deg. of ♁, and ♃ is in the 1st House in 20 deg. of ♄—the *Sun* with *Mars*, *Mercury* and the *Moon*, are located in the 2d House, in ♄—*Venus* is in the 3d in 17 deg. of ♁—The configurations signify some strong occurrences to be upon the Anvil of State; many eminent Councils and great Consultations will be secretly carried on in the Cabinets of all the Courts in *Europe* during this Quarter, but the Effects will not be so conspicuous now, as in a few months hence.—The *European* Powers are very much divided amongst themselves, each Power seeking more his own Interest than the welfare of the Common Weal.—

The

The *French* Government seem to be very active both with their Sword, and in their Councils; in a word, I fear that a Peace is not just at hand, but broils and contentions are yet on foot, with respect to *Holland, France, Spain, Italy*, and Places in the Mediterranean Sea, without mentioning our Possessions in both the Indies. The Northern Powers will be more active in the Spring and Summer Months; at present we know but little of their determinations, they are consulting ways and means for bringing about a general Peace in *Europe*—for the *Sextile* Aspect of the two superiors, *Saturn* and *Jupiter*, takes place in this Quarter, which I hope will pave the way for such an event, at least I make no doubt but its influence will incline Kings and Potentates very much that way. I doubt there will be heavy complaints amongst the people in general, on account of heavy expences and dullness of Trade.

THE SPRING QUARTER,

Or, *The Sun's Transit through ♈, ♉, and ♊:*

THIS vernal Quarter begins when the *Sun* enters the Equinoctial Point of *Aries*, making our Days and Nights equal, and indeed there is an equality at that time of the Days and Nights all over the World.—This takes place on *Friday* the 21st of *March*, at 44 min. past 6 in the Morning, when 10 deg. of *Capricorn* culminate, and the 25th degree of *Aries* ascend; *Mars*, almatore thereof, is in ♄ with ♀ in the 11th in ♋, located therein. The *Moon* is departing from the ♄ of ♀ in ♈, and ☐ of ♃ in ♉, on the cusp of the 10th, and applying to a Zodiacal ☉ of ♁, on the Western Angle. Some Princes and their Councils will be busy this Quarter in carrying on private Negotiations, ambassadors or agents, will be at work for this purpose; so that I am in hopes some of the Powers on the Continent of *Europe* are very much inclined to bring about a reconciliation between the powers at war, if it can be done.—I think *Russia* and *Prussia* seem to be concerned, and the whole kingdom of *England* is looking up for, and desiring Peace, if it could be brought

brought about, to the honour and safety of the Nation; but by the positions of this Quarter, I have my fears, for both the Luminaries are afflicted by the maleficks,—which denotes infelicity to mankind in general; for it is a received maxim in Astrology, that when the *Sun* is afflicted by *Mars* at an Ingress, as in the vernal Figure, many grandees are disturbed by wars, duels, controversies, fevers, and a train of martial distempers. Likewise at an Ingress when the *Moon* is afflicted by *Saturn*, the common people are molested and suffer by wars, tumults and commotions, together with want of employment and dulness of Trade.—Yet I do not see that we have any thing to fear from the threats of our invading enemies, for the people of *England*, to a man, will vigorously oppose the invading foe, should any attempt be made, and that with good success; for we have only to read the words of ancient Prophecies, wherein are foretold the destruction of our natural and hereditary enemy the *French*. The judgments denounced therein against them are so plainly delivered, that they require not the least comment upon them, to convince the most illiterate that the *French* shall be made desolate, or receive such a check that we shall have nothing to fear from them, should they attempt to assail our shores.

THE SUMMER QUARTER,

Or, the *Sun's* Transit through ϖ , Ω , and \cap .

THIS Festival Quarter begins when the *Sun* first enters the Tropic of *Cancer*, making our Days the longest, which takes place this Year, on *Sunday*, the 22d of *June*, at 30 min. past 4 in the Morning, when 6 deg. of κ will be on the Mid-heaven, and the 10th degree of ϖ will occupy the ascendant.—The *Moon*, lady of the ascendant, is posited in the 4th and lower Angle, and has lately passed the *Trine* Aspect of \mathcal{U} , and next applies to a *Trine* Aspect of ♀ , and \square of ♃ . The ♁ of the \odot and \mathcal{U} , from Tropical Signs, at this Ingress, will probably foment clashings and contradictions in the councils of great men in states and kingdoms, one faction opposing another,

another, and every one driving at their own private interest, to the prejudice of the public. Yet the configuration of the Planets at this Ingress are in general of an amicable Nature, the ♄ of the ☉ and ♃ excepted, therefore these harmonious Positions will doubtless have their good effects, in infilling into the Minds of Men, a tendency to amity and concord; which shews amongst other things, that the Olive-branch is approaching, though it may be but very slowly.

THE AUTUMNAL QUARTER,

Or, *The Sun's Transit through ♎ , ♏ , and ♐ .*

THIS Quarter commences when the *Sun* enters the Equinoctial Sign *Libra*, causing an equality in the Day and Nights as in the Spring. This takes place this Year on *Tuesday*, the 23d of *September*, at 14 min. past 6 at Night, when 3 deg. of ♄ are upon the Mid-heaven, and 8 deg. of ♍ , possess the Oriental Angle.—The *Moon* ab ♄ ♄ , ad Δ $\frac{1}{2}$ et \ast ♃ .—The Face of the Heavens at this Ingress do much participate in nature and quality, and will have effects agreeable to what we have before asserted in our judgment on the two last preceding Quarters, to which we refer our Readers.

And now, my Book, farewell! thy Journey take
Throughout *Great-Britain*, and thy Present make;
To all thy Friends be kind, and let them see
What from the Stars is here declared by thee.

Once more, be gone, I say; now take thy Fate,
And serve thy Friends, till thou art out of Date;
To Protestants, and all true *English* Men,
My Service give, God bless them all. *Amen.*
