

1807.

Merlinus Liberatus.

A N

ALMANACK

For the Year of our Redemption,
1807,

Being the 3d after *Bissextile*, or *Leap-Year* ;
And from the Creation of the World, according
to the best History, 5754,

And the 118th of our Deliverance by *K. William*

From Popery and Arbitrary Government ;

But the 112th from the

Horrid, Popish, Jacobite Plot.

Wherein are contained all Things fitting and useful for such a Work ; as
an Ephemeris of the daily Motions of the Planets, with their various
Congurations, Aspects, Conjunctions ; Lunations, Eclipses, Astronomical,
Astrological, Meteorological Observations, the rising and setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and daily Equation of Clocks ; Length and Break,
Increase and Decrease of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes ; a Chronology ; Remarks on the Divisions of the
Heavens, with Judgments of the Eclipses and Seasons, handled according
to the Rules of the Ptolomean Astrology, with many other
Things relating to the Truth of Astrology.

Calculated for the Meridian of LONDON.

By JOHN PARTRIDGE.

Chill Frosts and Snow do usher in the Year,
Then line thy Stomach with good Ale and Beer;
For Galen and Hippocrates doth hold,
They're good Preservatives against the Cold.

February with cold Weather still doth nip us,
 Then warm thy Blood with drinking Aristippus;
 There's no Delight like to the Charms of the Bottle,
 They're beyond the Precepts of great Aristotle.

Physicians say that Physic now is good,
 To take a Purge, a Vomit, or let Blood;
 But if thy Body sound and healthful be,
 No Physic take, if thou'lt be rul'd by me.

Kings reign by Conquests, Choice, or Right of Birth,
 Soldiers get Fame, and Grandees share the Earth;
 But Wit's a Prize so rare, that there appears
 Scarce one *Mæcenas* in a Thousand Years.

10

May hath XXXI Days.

Both Field and Hedge-rows now affordeth Posies,
 And where Wars are, there will be bloody Noses.
 What-mortal Tongue can now the Praises utter,
 That do belong unto red Sage and Butter.

Observations.

Many are the ferious debates and consultations of the present times; and various news arrives daily of the actions and resolutions of foreign princes.
 News arrives from the South and also the Eastern parts.

- 4 The Rebellion began - 1745
- 6 Hen. II. died 1189
- Edw. VI. died 1553
- Sir T. Moore be-headed - 1535
- 7 Edw. I. died 1307
- 9 Czar Peter murdered - 1762
- 13 Peace of Utrecht - 1713
- 17 Cape Breton taken - 1745
- 24 Gibraltar taken 1704
- 29 Spanish Armada defeated - 1588

16 August hath XXXI Days.

Now AUGUST brings the welcome Harvest on,
 And may it be safe ended and well done;
 Now load your Stacks with Corn! now fill your Barns!
 In Winter these may keep you free from Harms.

Africa's Balance now doth weigh the Light,
 Giving an equal Share to Day and Night;
 The chirping Birds begin to cease their Notes,
 And Trees to put on their Autumnal Coats.

Now if thy Pockets do no Money lack,
 Feed on good Meat, and drink the sprightly Sack;
 Better than play at Cards and Dice, and lose,
 And after bring thy Neck into a Noose.

A TABLE of TERMS and RETURNS.

Hilary Term begins *January 23*, ends *February 12*.

Returns or Effoign Days.	Exc.	Ret.	App.	W. D.
In eight Days of <i>St. Hilary</i> , - - <i>January 20</i>	21	22	23	<i>Friday</i> .
In fifteen Days of <i>St. Hilary</i> , - - - - <i>27</i>	28	29	30	<i>Friday</i> .
On the Morrow of the Purif. of bl. <i>V. M. Feb. 3</i>	4	5	6	<i>Friday</i> .
In eight Days of the Purif. of bl. <i>V. Mary</i> , 9	10	11	12	<i>Thursd.</i>

Easter Term begins *April 15*, ends *May 11*.

In 15 Days of <i>Easter</i> , - - - - <i>April 12</i>	13	14	15	<i>Wednes</i>
From the Day of <i>Easter</i> in 3 Weeks, <i>April 19</i>	20	21	22	<i>Wednes</i> .
From the Day of <i>Easter</i> in 1 Month, - - <i>26</i>	27	28	29	<i>Wednes</i> .
From the Day of <i>Easter</i> in 5 Weeks, <i>May 3</i>	4	5	6	<i>Wednes</i> .
On the Morrow of the <i>Ascension</i> , - - - <i>8</i>	9	10	11	<i>Monday</i>

Trinity Term begins *May 29*, ends *June 17*.

On the Morrow of the holy <i>Trinity</i> , <i>May 25</i>	26	27	29	<i>Friday</i> .
In eight Days of the holy <i>Trinity</i> , 31	1	2	3	<i>Wednes</i> .
In fifteen Days of the holy <i>Trinity</i> - - 7	8	9	10	<i>Wednes</i> .
From the holy <i>Trinity</i> in 3 Weeks, - 14	15	16	17	<i>Wednes</i> .

Michaelmas Term begins *Nov. 6*, ends *Nov. 28*.

On the Morrow of <i>All Souls</i> , - - - <i>Nov. 3</i>	4	5	6	<i>Friday</i> .
On the Morrow of <i>St. Martin</i> , - - - - <i>12</i>	13	14	16	<i>Mond.</i>
In eight Days of <i>St. Martin</i> , - - - - <i>18</i>	19	20	21	<i>Saturd.</i>
In fifteen Days of <i>St. Martin</i> , - - - - <i>25</i>	26	27	28	<i>Saturd.</i>

N. B. No Sittings in *Westminster-Hall* on the 2d of *February*, *Ascension Day*, and *Midsummer Day*.

The Exchequer opens Eight Days before any Term begins, except *Trinity*, before which it opens but Four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

OXFORD and CAMBRIDGE TERMS.

OXFORD TERMS.

Lent Term - begins <i>January 14</i> , - - ends <i>March 21</i> .
Easter Term - begins <i>April 8</i> , - - ends <i>May 14</i> .
Trinity Term - begins <i>May 27</i> , - - ends <i>July 18</i> .
Michaelmas Term begins <i>October 10</i> , - - ends <i>Dec. 17</i> .

The Act is *July 13*.

CAMBRIDGE TERMS.

Lent Term - - begins <i>January 1</i> , - - ends <i>March 20</i> .
Easter Term - - begins <i>April 8</i> , - - ends <i>July 10</i> .
Michaelmas Term begins <i>October 10</i> , - - ends <i>Dec. 16</i> .

The Commencement will be *July 7*.

A Table of the Moon's Age for every Day throughout this Year, whereby, with the Help of the next General Tide Table, the Times of High Water at all the Places mentioned above it are shewn by Inspection.

An Explanation of this and the following Table:

First find the Month on the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Column is the Time of High Water at all the Places above mentioned, by Inspection.—*Example, Feb. 20, I find the Moon to be 13 Days old, and over against 13 in the 1st Column I find 9 h. 14 m. in the 2d Column, 11 h. 6 m. in the 3d; which are the Times of High Water at all those Places mentioned above in the 2d and 3d Columns on that Day. Et sic de cæteris.*

N. B. In the Calendar Part you will find the Planets Southing inserted to several Days in each Month; and by this Table you may easily find their Rising and Setting: First, find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting, but subtracted the Rising.

A Compendious Chronology of the most principal Epochs and Æras, with their Beginnings, reduced and fixed to the Years of the Julian Period, the Creation of the World, and to the Years before and after Christ.

	Julian Period	Anno Mundi	Ante Christ
T HE Creation of the World after the Jews - - -	952	1	3760
The Common Epocha of the Creation	765	1	3950
The same by the Greek Emperors -	787	1	3926
The same in Mr. Bedford's Scripture Chronology - - -	706	1	4007
The same in Bishop Usher's Annals -	710	1	4004
The Deluge, or Noah's Flood -	2362	1657	2351
Porphyrius's Caldaic Epocha - -	2480	1717	2200

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
Russia	Alexander	Dec. 28, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Maria	Dec. 17, 1734	Feb. 24, 1777
Prussia	Fred.-Wm. III.	Aug. 6, 1770	Nov. 16, 1797
Denmark & Norway	Christian VII.	Jan. 29, 1749	Jan. 14, 1766
Sweden	Gustavus IV.	Nov. 1, 1778	Mar. 29, 1792
Germany	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Popedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor-Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Selim III.	July 17, 1761	April 7, 1789
Two Sicilies,	Ferdinand IV.	Jan. 12, 1751	Oct. 6, 1759
France	Napoleon	Aug. 15, 1769	Dec. 15, 1799

The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to pass of the Gold Coin.

GOLD.		SILVER.	
Wt. allowed.	Full Wt.	Wt. allowed.	Full Wt.
dwt. gr.	dwt. gr.	dwt. gr.	dwt. gr.
Guinea - 5 8	5 9 ³⁰ / ₈₉	A Crown, - - - - - 19	19 8 ¹⁶ / ₃₁
Half Guinea, 2 16	2 16 ⁶⁴ / ₈₉	Half Crown, - - - - - 9	9 16 ³¹ / ₃₁
Thirdo. Guin. 1 19	1 19 ¹⁷ / ₈₉	Shilling, - - - - - 3	3 20 ²⁸ / ₃₁
		Six Pence, - - - - - 1	1 22 ¹⁴ / ₃₁

According to the above proportions it appears, that the value of a *lb.* of silver is 62s. or 31. 2s. and of a *lb.* of gold is 44¹/₂ guineas, or 461. 14s. 6d. Also that the *oz.* of silver is 5s. 2d. and the *oz.* of gold 31. 17s. 10¹/₂d. So that the value of the standard gold is 15 times that of the silver, and 1-14th more.

Satur. after
 1 excepted.

OF THE
ECLIPSES

That will happen this Year, 1807.

In the Course of this Year there will be Four Eclipses, namely, Two of the Sun, and Two of the Moon; they happen as follow:

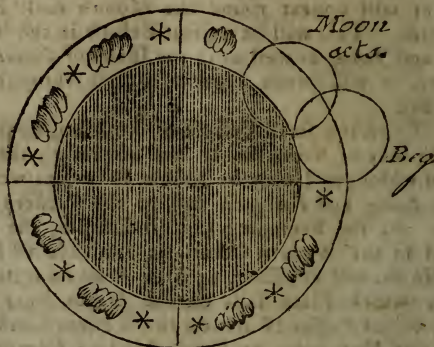

THE first will be a very small Eclipse of the *Moon*, on *Thursday* the 21st of *May*, but invisible to us. The Eclipse begins (with respect to *London*,) at 9 Min. past 4 in the Afternoon; the Middle will be at 52 Min. past 4; and the Eclipse ends at 35 Min. past 5 o'Clock app. Time. Digits eclipsed at the Middle $1^{\circ} 45'$, on the *Moon's* North Limb. At the Time of the greatest Obscuration, the *Moon* will be vertical to such Persons as happen to be sailing a little to the Westward of the Coast of *New Holland*, on that Part called *De Witt's Land*, which was discovered about the Year 1616, in South Latitude 21 Degrees, and 106 Degrees 52 Min. East from *London*. Hence, it appears, that this Eclipse will be visible to most of the small Islands dispersed about the great *Pacific Ocean*; also to *New Zealand*, *New Holland*, the whole Extent of its Eastern Coast, called *New South Wales*, even to *Van Dieman's Land*; also the Islands of *Sunda*, *Borneo*, *Madagascar*, the *Philippines*, *Japan*, *Yedzo*, together with nearly the whole Continent of *Asia*, with the Eastern Parts of *Africa*, even to the Cape of *Good Hope*.

The second is a central and annular Eclipse of the *Sun*, upon *Saturday* the 6th of *June*, at 24 Min. past 5 in the Morning, but by Reason of the *Moon's* South Latitude, it will be invisible to us, notwithstanding the *Sun* is above the Horizon. The *Sun* will be centrally eclipsed in the Meridian in 4 Deg. 30 Min. South Latitude, and 100 Deg. 22 Min. East Longitude from *London*; this Place falls

falls on the Western Coast of the Island of *Sumatra*, one of the most Western of the *Sunda* Islands, where the *Sun* will make a most beautiful Appearance, as a very small Ring of Light will appear round the *Moon's* dark Body on every side. This will be a great Eclipse in the Islands of *Borneo* and *Java*, as well as in the Island of *Sumatra*, and, in short, it will prove a great Eclipse throughout the *Indian Sea*.

The Third is a small Eclipse of the *Moon*, upon *Sunday* the 15th Day of *November*, in the Morning; the Beginning of which will only be visible to us, as well as in *France*, *Spain*, and *Portugal*, and to the Western Parts of *Africa*. At the Beginning of this Eclipse, the *Moon* is vertical in the Western Ocean, in Latitude 18 Deg. 58 Min. North, and 111 Deg. 15 Min. West Longitude from *London*, which Place falls on the Globe near a small Island, called *Passion* Island, on the Western Coast of *New Mexico*, or *New Spain*, in *North America*; from whence it appears that the Whole of this Eclipse will be visible at the *Sandwich* Islands, at *Otaheite*, and the rest of the *Society* Islands, and also at the *Friendly* Islands, in the great *South Sea*. At the Middle of this Eclipse the *Moon* will be vertical in 19 Deg. 3 Min. North Latitude, and in 125 Deg. 57 Min. West Longitude from *London*; from which I find that the *Moon* will set eclipsed about this Time in the *Brazils* on the Eastern Coast of *South America*, also at *Cape Horn*. The *Moon* rises eclipsed at the same Time in *New Zealand*, and soon after on the Eastern Coast of *New Holland*; and, before the Eclipse is over, at *Port Jackson* and *Botany Bay*; for, at the End thereof, the *Moon* is vertical in Latitude 19 Deg. 9 Min. North, and 140 Deg. 40 Min. West from *London*. From this Statement, it appears, that the Whole of this Eclipse will be visible throughout *North America*, together with the Islands of *Cuba*, *Jamaica*, *Hispaniola*, and all the rest of the *West India* Islands; and the End of this Eclipse will be seen as far as the Islands of *Japan* on the Eastern Coast of *Asia*. The true ecliptic Opposition of the *Sun* and *Moon*, by my Tables, is *November* 14th, 20 H. 14 Min. P. M. ap. Time. The *Moon's* true Latitude is 47'. 6". N. D. The Horizontal Parallax of the *Moon* is 55'. 4". and that of the *Sun* 9".

The following Type, or Delineation, shews the Beginning of this Eclipse, and Manner of the *Moon's* setting, which, though for *London*, will serve the whole Kingdom.

November 15th, in the Morning, app. Time.

	<i>London.</i>	<i>Oxford.</i>	<i>York.</i>
	h. m.	h. m.	h. m.
Eclipse begins - - -	7 23	7 18	7 19
Moon sets - - - - -	7 42	—	—
Middle - - - - -	8 24	8 19	8 20
Eclipse ends - - - -	9 25	9 20	9 21

Total Duration 2 h. 2 m. 4 f.

Digits eclipsed $3^{\circ} 14'$ at the Middle.

The Fourth and last of these Eclipses, is a visible one of the *Sun*, if the Air proves clear; it happens on *Advent Sunday, November* the 29th, about Noon. In the Southern Parts of the Earth, this will prove a very large Eclipse (though very small with us), central, but whether total or not, I cannot say; for, by my Tables, the Diameters of the *Sun* and *Moon* are about equal, but I rather expect it will be annular, though without continuance.

The following Type is a Representation of this Eclipse, as it is expected to appear at *London*, and Parts adjacent, and will, in a great Measure, serve the whole Kingdom at large.

At *London*, and Parts adjacent, the Eclipse will begin at 42 Min. past 10 o'Clock in the Morning; the Middle will be at 37 Min. past 11, when the *Sun* will appear about a Quarter eclipsed, or 3 Digits; and the Eclipse will end at 31 Min. past 12 o'Clock at Noon, according to ap. Time. The Duration of this Eclipse will be 1 Hour and 49 Min.

Note.—It will be Six Years before there will be another Eclipse of the *Sun*, and Two Years before there will be one of the *Moon*, visible in these Parts.

I find Mr. *Andrews* observed the Eclipse of the *Moon*, July the 11th, 1805, to end exactly at *Royston*, at 54 Min. past 10 o'Clock, app. Time. He could not observe any more by Reason of Clouds, the Weather being very unfavourable there most of the Time. The Calculation of it agreed very near.

GENETHLIACAL ASTROLOGY.

ASTROLOGY is the most transcendant of all Sciences, both because it teacheth of Things celestial, and also of future; the Knowledge whereof is not only divine, but most profitable and useful: *Jacob* told his Sons, the 12 Patriarchs, that he had read in the Tables of Heaven, whatsoever should befall them and their Children. This Knowledge in the Language of the Heavens, or Stars, is

properly the Science of **ASTROLOGY**; which, for its Antiquity, Worth, and Purity, observe the Words of the learned *Gerson*, in the Preface to his *Trilogium Astro-Theologizata*, viz. *Propterea non est hoc negandum de Astrologia Adam, &c. sequentibus revelatam theologia non abnegat.* I therefore again present my Readers in this Place, as usual, with the Observations on a remarkable **Nativity**, communicated to me by my old Friend, Mr. *John Worsdale*, of *Donington*, near *Boston*, in *Lincolnshire*; who informs me, that he has just published the **Nativity** of *Napoleon Bonaparte*, Emperor of *France*, with the Calculation and judgment in full.

A SCHEME of the HOROSCOPE at BIRTH.

The KILLING DIRECTIONS.

	Arch.		Time.		
	d.	m.	y.	m.	Death.
Ascendant to the Semiquartile of ♃ in Mundo	4	40	5	1	Death.
Ascendant to the Sesquiquadrant of ♃ in Mundo	5	29	6	0	

I have inserted this Geniture for the Inspection and Pleasure of those who are willing to adhere to the Doctrine of the great and immortal **PTOLEMY**, as the certain Foundation in delivering Judgment on Life and Death, and other Concerns of the greatest Importance. This Native's Birth was very correctly taken by a Clock kept exactly to true Time for the Purpose, and is that which is given in the

Figure. The Nativity was delivered to many Students in this Science, who all agreed (being guided by the erroneous Precepts of *Argel* and *Morinus*) that the Native would live until the Ascendant came to the Opposition of the Luminaries, which they judged would destroy Life. In the mean Time, while this Native was living, its Nativity was communicated to me, for my Opinion relative to the Time of Death, &c. but concerning the Period of Dissolution, being guided by *PROLEMY*'s Rules and Precepts, I judged that the mortal Directions were, the Ascendant, Hyleg, to the Mundane Semiquartile of *Saturn*, and Sefquiquadrate of *Mars* in Mundo. These Directions I was of Opinion, would shew their Effects about the Age of Five Years and nearly Two Months; and the Truth is, as many can testify, that the Native died at the Age of Five Years, and little more than One Month; I must, consequently, confess there are other Directions of a malefic Nature, and influence to Vital Significators about the same Time, which assisted the former, and made those Directions to the Giver of Life, more certain in their killing Power; but as Things of this Nature are so obvious to every attentive Observer, I do not think proper to spend Time to demonstrate them here, for it is certain that the Ascendant is Hyleg in the Figure, which I believe none can deny, notwithstanding the Position of *Jupiter* in the Mid-heaven; but that Planet, though in an Aphetical Place, yet he is by no means qualified to exercise the Hylegiacal Dignity in that Position. I well know you will ask, why I depend so much on the Power and Influence of Semiquartiles and Semiquadrates, in Cases of Life and Death? To this I answer, that Directions of the Hyleg of such Denomination and Power, are in all Cases sufficiently powerful to destroy Life, when the Rays of the Benevolents do not counteract their malignant Influence, or fall in the killing Train to oppose their Violence and Fury; I have at this Time, many Nativities very truly corrected by Accidents, in which the same Directions, as those above mentioned, have proved mortal; and in all similar Cases, you may solely rely on their Power to give Death when directed to the Giver of Life, as in this Case; indeed, they are doubtless equal in Violence to a Square, and I believe, in some Cases they

they exceed a Quartile in Fury; but I do not say that these Aspects, or even Bodies, and Oppositions, have Power to destroy Life, when the Rays of *Jupiter* or *Venus* fall in among them; no, certainly not, for I do assert from the Authority of the great *Ptolemy*, that the most violent Directions of the Giver of Life to *Saturn*, or *Mars*, or to *both at once*, are not in *all Cases* qualified to destroy Life. But these Things I have mentioned before, therefore, I presume, I need not trouble the Reader with more than is necessary on the Subject; for whatsoever I may say on this Department of the Science, my Depositions will have but small Effect with those who adhere to the Rules of *Argel* and *Morinus*, &c. &c.

Astrological Observations for the Year 1807.

THE WINTER QUARTER,

Or, *The Sun's Transit through ♋, ♎, and ♏.*

THIS Quarter begins when the Sun enters *Capricorn*, or the Southern Tropic, making our Shortest Days and Longest Nights; this takes Place on *Monday* the 22d Day of *December*, 1806, at 5 Min. past 11 o'Clock in the Morning; at which Time we have 28 Deg. of ♎ ascending in the East, and 17 Deg. of ♄ on the Southern Angle. All the Planets at this Time are above the Earth, the *Moon* excepted, for she is in the 2d House, near the Cusp of the 3d, in 19 Deg. of ♄, ab 8 ½ et Δ of ♃ et Δ of *Mars*; and *Mars* is located in the 7th or Western Angle, in 17 Deg. of ♋; the Planet ♃ is in the 8th House, in 8 Deg. of ♎; the two inferior Planets, ♀ and ☿, are in Conjunction, in the 10th House, or Southern Angle, ♀ in 28 Deg. of ♄ and ☿ in the 25th Deg. of the same; the *Sun* on the Cusp of the 11th House, but posited in the 10th, and lastly, the Planet *Jupiter* is in 15 Deg. of ♋, posited in the 11th House;—thus are the Planets displayed in the Heavens at this Ingress.—In looking over this Figure, and ruminating over the Positions and Connections of the Planetary Orbs, I make no doubt but that there

will

will be during this Quarter, many eminent Councils and Consultations held, and that in almost all the Courts in *Europe*, upon the Subject of *War* and *Peace*, and change of Hands, and other Alterations on the Continent of *Europe*; and it also seems that some great Designs will now, or in the Spring, be set on Foot by the different Powers; namely, *England*, *Prussia*, *Holland*, *France*, and *Spain*, with some Parts of *Germany*; also the Northern Powers, such as *Sweden*, *Russia*, and *Denmark*, will be included in these Designs and Consultations;—and it also seems to me, that they will be carried on and prosecuted with great Ardour and Resolution—but as to the Particulars, Time must develope them; for indeed no human Sagacity can at present, penetrate into the Designs of the different Powers on the Continent—But it seems by the Planetary Positions, that the *French* Government is wonderfully employed, and I fear with too much Success on the *European* Continent; but at Sea, with all their Shipping they can muster, they will not succeed; so that the Threats and Menaces of our revengeful Enemies, will be only like a Gust of Wind, that roared and died away. The Emperor of *Germany* has of late suffered much, and is still likely to meet with Troubles and Vexations, but yet that Noble House will stand, and not be destroyed. The *Turkish* Empire seems also to be trembling with the most fearful Forebodings, and *Spain* is also trembling about her Possessions in the Western World.—And also the United States of *America* will this Year be much agitated by Broils and other Troubles, if not the Yellow Fever also—but this is not all, they must take Care of *French* Councils and *French* Counsellors. But to come home to our own Country, there it seems the People are much discontented, concerning heavy Taxes and other Imposts laid upon them.

THE SPRING QUARTER,

Or, *The Sun's Transit through* ♈, ♄, and ♀.

THIS Quarter commences when the *Sun* enters the Equinoctial Sign *Aries*, when our Days and Nights become equal; this takes Place on *Saturday*, *March* the 21st, at 36 Min. past 12 at Noon—when 10 Deg. of ♈ will be upon the Medium Cœli, and 3 of ♄, will be on the Ascendant.

Ascendant. The *Moon* I find will be in 26 Deg. of Ω , posited in the 2d House, departing from a Trine Aspect of ♃ , and also the same of ♀ , and next applying to a Conj. as seen from the Earth, of *Mars* in *Virgo*; and what is also worthy of Remark, the two inferior Planets, *Venus* and *Mercury*, are in Conjunction in the Mid-heaven, as we find them to be at the Winter Ingress. The Planets in the Figure are as follows, viz. the *Moon* in the 2d, as I observed before; *Mars* is also in the 2d House, in 7 Deg. of ♄ , on the Cusp of the third, retrograde, as seen from the Earth; the Planet *Saturn* is in the fourth, in 10 Deg. of ♄ , and retrograde also; the Planet *Jupiter* is in the 7th, in 5 Deg. of ♃ ; *Venus* and *Mercury* in ♁ , in the 10th, ♀ in 20 Deg. and ♃ in 18 Deg. the *Sun* first entering *Aries*. Thus the Heavens are displayed at this Time, and its Forebodings are not much different from the Winter Quarter; many unpleasant Things are turning up in *Europe*, and by some of the Aspects at this Vernal Ingress, it appears that Negotiations are going forward, tending to restore Peace and Tranquillity, yet there are other Aspects of a rugged Nature, which seem to imply, that the Lust of Ambition, and the Rage of Revenge will continue to obstruct this so desirable a Blessing—and this Spirit will distract many Parts of *Europe*, as well as our own Nation, by the restless Ambition of NAPOLEON the French Emperor. And it also appears, that this will be a very busy Year, for some are like to fall under heavy Troubles, Losses and Crosses, by high Demands, and hasty and rash Proceedings—and this is likely to be the Case in the Western World, as well as many Parts of *Europe*. Mens' Minds are still in great Ferment, their Passions run high, and will, I fear, not be easily reduced to Reason; though indeed, the late Sextile Aspect of JUPITER and SATURN, intimated at least some Mitigation; and that, in order to check the prevalent perverse Disposition of Mankind, some worthy Man or Men, might arise, to interpose, and do their utmost Endeavours to calm these unruly Passions, and allay if possible, the Heats and Animosities of the Times, in order to reconcile contending Parties in War and Bloodshed; but I doubt they will not be able wholly to do this, as appears by the Square Aspect
of

of the two superior Planets, being repeated twice this Year, namely, the 10th of *April*, and the 17th of *August*—and also because the Planet *Mars* has so long a Transit through *Virgo*, a human Sign.—But I must now hasten to the Summer Quarter.

THE SUMMER QUARTER,

Or, *the Sun's Transit through ♋, ♌, and ♍.*

THIS Quarter begins when the *Sun* first enters the Tropic of *Cancer*, which is as far as the *Sun* can go to the North; hence our longest Days and shortest Nights; and this will take Place this Year, on *Monday* the 22d of *June*, at 23 Min. past 10 in the Morning, when 13 Deg. of ♍ ascend in the East, and 8 Deg. of ♌ are on the Mid-heaven. The *Moon* ab 8 of ♄ et Δ of ♂, ad vac. ♁ of ♀. The Planets are distributed as follows, namely, *Mars* in the Ascendant, in 24 Deg. of ♍; *Saturn* is in the 3d House, in 4 Deg. of ♍, and retrograde; the *Moon* is in 5th House, in 28 Deg. of ♄; and *Jupiter* is in the 5th also, but on the Cusp of the 6th in 11 Deg. of ♎; the Planet *Mercury* in the 10th House, in 11 Deg. of ♋; and *Venus* is in the 11th House, in 11 Deg. of ♌; the *Sun* also is in the 10th, approaching the Meridian.

The two superior Planets, *JUPITER* and *SATURN*, are now within Orbs of their Square Aspect from ♎ and ♍, and will go hand-in-hand for many Weeks before they separate; and also, on the 3d of *September*, the Planet *Mars* comes to a Geocentric Conjunction of *Saturn* in ♍—which is also a violent Aspect; these are very rugged Positions, and denote Strife and Discord amongst all Degrees of Men, but more especially amongst Kings, Princes, Senators, and those at the Helm of Affairs; giving Disturbance and Fatigue to their Councils and Deliberations, with Loss and Detriment to Persons of high Rank, with Battles and Bloodshed, and that I fear, both by Sea and Land; if War continues. In a word, they seem to threaten some Country under a despotic Government with a terrible Shock, striking at the very Root of their Laws, both Sacred and Human.

THE

 THE AUTUMNAL QUARTER,

Or, *The Sun's Transit through ♎, ♍, and ♋.*

THIS Quarter begins when the *Sun* enters the Equinoctial Sign *Libra*, causing an Equality of our Days and Nights as in the Spring; and this happens upon *Wednesday*, or rather *Tuesday* Morning, *September* the 24th, at 48 Min. before One o'Clock, when 3 Deg. of ♋ will be upon the Mid-heaven, and 29 Deg. of ♎ are ascending in the East. The *Moon* ad. □ of ♄ et Δ of ♀; all the Planets are now under the Earth, except the *Moon*, and *Jupiter*, *Saturn* and *Mars* are within the Orbs of their Conj. in *Scorpio*. This also will be a very busy Quarter, in which there will be great Rumours of Overtures of Peace being transmitted from Court to Court, in order to deliberate upon Ways and Means to bring it about; and though these Deliberations may not be altogether without due Weight, yet I am afraid those *Halcyon Days* are not so near at Hand as might be wished for, as appears by some untoward Positions of the Planets in this Quarter also; yet some Part of the Structure will be raised, though it may be for a Time unfinished, for there is still a Snake in the Grass; more Briars and Brambles must be (I doubt) encountered with and cut down, before a lasting Peace can be expected, or brought about; but it is hoped that God will over-rule these *Second Causes* for the Good of Mankind.

FINIS.
