VENUS is a Morning Star till August 3; then an Evening Star till the End of the Year.

6 March hath XXXI Days.

But yet I hope few Enemies thou'lt find,  
 For Mome is dead, and Zoilus is blind;  
 Then cheerfully before thy Friends appear,  
 And humbly seave them during all the Year.

8 April hath XXX Days.

Speak bold and plain, use honest Terms of Art,  
 From it I charge thee never to depart;  
 To Sects and Sex thou needs no more to say,  
 But only to encourage them each Day.

Observations.

*Finis coronat opus.*  
 Many are the benevolent configurations now about to take place, from whence we conclude that the grand endeavours of our superiors and rulers, tend either to a pacification or a qualification.  
 A great lady meets with some affront.

To ev'ry Sect be very courteous, kind;  
 Which is the Way for many Friends to find,  
 For to the Author can no Profit rise,  
 To gain one Friend and get two Enemies.

Observations.

On the 2d, 3d, 4th. and 5th day of this month, O. S. or the 14th, 15th, 16th, and 17th, according to the new, 1666, was the famous City of London burnt by those vile incendiaries the Papists. Let us abhor and detest Popery, and all such vile miscreants and wicked doings.

- 3 Cromwell died 1658
- 5 Bp. Bonner died 1569
- 8 Geo. III. and Char. wedded 1761
- 11 Wm. the Conqueror died 1087
- 16 Geo. I. landed 1714
- 21 Edw. II. murdered - 1327
- 29 Richard II. deposed - 1399

20 October hath XXXI Days.

22 November hath XXX Days.

Then may a Blessing soon on thee descend,  
 From God above, who is thy only Friend,  
 To guide thee thro' this mournful Vale of Tears,  
 Where little else but Trouble here appears.

N. B. In the Calendar Part you will find the Planets Southing inferted to several Days in each Month; and by this Table you may easily find their Rising and Setting: First, find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting, but subtracted the Rising.

A Compendious Chronology of the most principal Epochs and Æras, with their Beginnings, reduced and fixed to the Years of the Julian Period, the Creation of the World, and to the Years before and after Christ.

## ROYAL FAMILY, &amp;c.

## BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III. June 4, 1738	Duke of Suffex, Jan. 27, 1773
Prince of Wales, Aug. 12, 1752	Duke of Cambridge, Feb. 24, 1774
Duke of York, Aug. 16, 1763	Princess Mary, April 25, - 1776
Duke of Clarence, Aug. 21, 1765	Princess Sophia, Nov. 3, - 1777
Ds. of Wirtemberg Sept. 29, 1766	Princess Amelia, Aug. 7, - 1783
Duke of Kent, Nov. 2, - 1767	Queen Charlotte, May 19, 1744
Prs Augusta Sophia, Nov. 8, 1768	Princesses of Wales, May 17, 1768
Prs. Elizabeth, May 22, - 1770	Pr. Charl. of Wales, Jan. 7, 1796
Duke of Cumberland, June 5, 1771	Dfs. of Brunswick, Aug. 11, 1737

## SOVEREIGNS of EUROPE, their Accession, &amp;c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
Russia	Alexander	Dec. 28, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Maria	Dec. 17, 1734	Feb. 24, 1777
Prussia	Fred. - Wm. III.	Aug. 6, 1770	Nov. 16, 1797
Denmark & Norway	Christian VII.	Jan. 29, 1749	Jan. 14, 1766
Sweden	Gustavus IV.	Nov. 1, 1778	Mar. 29, 1792
Germany	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Popedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Mustapha IV.	Sept. 7, 1779	May 29, 1807
Two Sicilies,	Ferdinand IV.	Jan. 12, 1751	Oct. 6, 1759
France	Napoleon	Aug. 15, 1769	Dec. 15, 1799

## The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to pass of the Gold Coin.

GOLD.	Wt. allowed.		Full Wt.		SILVER.	Full Wt.	
	dwt.	gr.	dwt.	gr.		dwt.	gr.
Guinea	5	8	5	$9\frac{3}{8}$	A Crown,	-	19 $8\frac{1}{2}$
Half Guinea,	2	16	2	$16\frac{6}{8}$	Half Crown,	-	9 $16\frac{3}{4}$
Third of Guin.	1	19	1	$19\frac{1}{8}$	Shilling,	-	3 $20\frac{2}{3}$
					Six Pence,	-	1 $22\frac{1}{4}$

According to the above proportions it appears, that the value of a *lb.* of silver is 62s. or 3l. 2s. and of a *lb.* of gold is 44½ guineas, or 46l. 14s. 6d. Also that the *oz.* of silver is 5s. 2d. and the *oz.* of gold 3l. 17s. 10½d. So that the value of the standard gold is 15 times that of the silver, and 1-14th more.

OF THE  
ECLIPSES

That will happen this Year, 1808.

*In the Course of this Year there will be Five Eclipses, namely, Two of the Moon, and Three of the Sun; they happen in the following Order :*

**T**HE first is a great total Eclipse of the *Moon*, on *Tuesday* the 10th of May, in the Morning, but it is invisible both to us and all Europe; by reason the *Moon* is set long before the Eclipse begins, which will not take Place until 55 Min. past our 5 o'Clock, at which Time the *Moon* will be vertical to that Part of the Pacific Ocean, in 17 Deg. 32 Min. of South Latitude, and in 89 Deg. 29 Min. of West Longitude from *London*; and the Middle of this Eclipse will be at 40 Min. past 7; at which Time the *Moon* will be vertical in 17 Deg. 45 Min. of South Latitude, and 115 Deg. 18 Min. West Longitude from *London*; and the whole Eclipse ends at 26 Min. past our 9 o'Clock, app. Time, by the Meridian of *London*; at this Time the *Moon* will be vertical in 17 Deg. 57 Min. of South Latitude, and in 140 Deg. 27 Min. of West Longitude from *London*, which Place falls on the Globe near some of the Society Islands, in the Great South Sea, or Pacific Ocean. From this Statement it appears, that the whole of this Eclipse will be visible to the whole Continent of both North and South America, (a small Part of the Eastern Coast of South America, about the Brasils excepted) and to all the West India Islands; as well as to the Sandwich Islands, the Society Islands, the Friendly Islands, and the Islands of New Zealand, in the great South Sea. The Beginning of this Eclipse will be seen at the Western Islands, called the Azores, as also at the Cape Verd Islands, as well as on the most Western Coast of Africa.

Africa. The End of this Eclipse will extend itself to the Islands called the New Hebrides in the Pacific Ocean, and also to the Eastern Coast of New Holland, called New South Wales, and to Van Dieman's Land, the most Southern Extent thereof.

Here follows a Calculation of this Eclipse, for *Bridge-Town* in *Barbadoes*, and for *Port Royal* in *Jamaica*, and for *Boston* in *New England*, according to app. Time.

May 10th.	Bridge-Town		Port Royal.		Boston.		Morning.
	h.	m.	h.	m.	h.	m.	
Eclipse beg.	2	1	12	49	1	13	
Total Dark. b.	3	0	1	47	2	12	
Middle - -	3	46	2	34	2	58	
Total D. ends	4	33	3	21	3	45	
Eclipse Ends	5	32	4	19	4	44	

Digits eclipsed 18°. 48'.

The Second is an Eclipse of the *Sun*, upon *Wednesday* the 25th of *May*, at 19 Min. past our 11 o'Clock in the Forenoon; yet notwithstanding its being near Mid Day, it will be invisible to us, and even to all Europe; the *Moon* having at that Time great South Latitude, is the Reason thereof. It is only visible in the unknown Southern Parts of the Earth, and even there it will be but a very small Eclipse.

The Third, is also another Eclipse of the *Sun*, upon *Wednesday* the 19th of *October*, near our 5 o'Clock in the Afternoon; yet though the Sun is then not quite set, nothing of it will be seen in these Parts, nor in any Part of Europe; the *Moon* having at this Time great South Latitude also; therefore what is seen of it will be in the unknown Southern Parts of the Earth, and even there very small.

The Fourth is another great and Total Eclipse of the *Moon*, on *Thursday* the 3d of *November*, between our 8 and 9 o'Clock in the Morning. The Beginning of this Eclipse will only be visible to us, as it will be to the Western Parts of France, to the Kingdom of Spain and Portugal, and the most Western Parts of Africa; the Forepart of this Eclipse will be visible to the Western Islands, to the Canary Islands, and also to the Cape Verd Islands.— By my Calculations, I find that the Moon at the Beginning

ning of this Eclipse, is vertical in 14 Deg. 58 Min. of North Latitude, 98 Deg. 55 Min. of West Longitude from *London*, which Place falls near the Western Coast of Mexico or New Spain; and at the middle Time of this Eclipse, the Moon is vertical in Latitude 15 Deg. 12 Min. North, and in 127 Deg. 15 Min. West from *London*, which Place falls in the Great Pacific Ocean; and at the End of the Eclipse, the Moon will be vertical; the Latitude 15 Deg. 28 Min. North, and 155 Deg. 10 Min. of West Longitude from *London*, which Place falls not far from the Island of Owyhee, one of the Sandwich Islands. From these Particulars, I find that this Eclipse will be visible from the Beginning to the End thereof, to the whole American Continent, and to all the West India Islands, the Eastern Parts of South America, and the Caribbee Islands excepted. This Eclipse, like the former one of the Moon, will be visible at the Sandwich Islands, the Society Islands, and the Friendly Islands; the End of this Eclipse will be seen as far as the New Hebrides, the Eastern Parts of New Holland, and to the Island of New Zealand, in the great South Seas; it also will extend itself Northward, to the Islands of Japan, and the Eastern Parts of Asia, and even to 15 Deg. beyond the Pole itself.

The Type for LONDON.

With

With us in *England*, the Time and Manner of Appearance may be expected to agree with the foregoing Type, and following Times.—I have here also given the Time of this Eclipse at Port Royal in Jamaica, and Boston in New England, in North America.—N. B. The *Moon* sets at *London* and Parts adjacent, at 18 Min. past 7 o'Clock, about 8 Digits eclipsed, agreeably to the foregoing Type.

Nov. 3, 1808.	London.			Port Royal.			Boston.			Morn. app. Time.
	h.	m.	s.	h.	m.	s.	h.	m.	s.	
Eclipse beg.	6	32	0	1	24	58	1	49	31	
Total Dark b.	7	39	20	2	32	18	2	56	51	
Middle - -	8	28	40	3	21	38	3	46	11	
Total D. ends	9	18	0	4	10	58	4	35	31	
End of Eclipse	10	25	20	5	18	18	5	42	51	

Digits eclipsed at the Middle, 18°. 9'. from North Side of the Earth's Shadow.

The fifth and last of these Eclipses, is another small one of the *Sun*; it happens upon *Friday* the 18th of *November*, about our 3 o'Clock in the Morning; therefore invisible to us and all Europe. At the Time of the true Ecliptic Conjunction, the *Moon's* true Latitude is 1°. 13'. North, therefore it must be but a very small Eclipse where greatest; this Conjunction happens in 25°. 38'. of the Celestial Sign *Scorpio*.

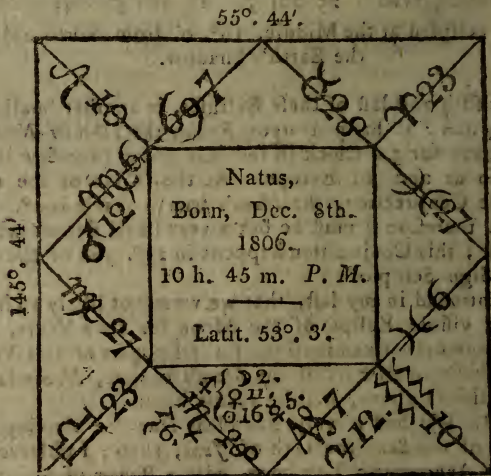

I mentioned in my last, that we were not likely to have another visible Eclipse of the *Moon* for Two Years, but upon more strict Examination of the Eclipses of this Year, I find that a small Part of the *Moon's* Eclipse, *November* 3, as mentioned above, will be visible here.

N. B. We had a very fine clear Day for viewing the Eclipse of the *Sun*, the 16th of *June*, 1806; I observed it with an Achromatic Telescope, with a Power of about 50 Times; and after adjusting the Clock by the Meridian Line, observed the Eclipse to begin at 4<sup>h</sup>. 39'. 10". P. M. and to end at 5<sup>h</sup>. 57'. 40". according to app. Time, Digits eclipsed about 3°. 20'. My Calculations and Type of it agreed very near.

## GENETHLIACAL ASTROLOGY.

THE Noble and Divine Science, *ASTROLOGY*, hath often had many Adversaries, but its Adversaries have been such as are ignorant in the very Rudiments of that Art which they would contemn, (though they may have done laudable Things in other Parts of Learning) so consequently their weak Batteries are not like to prevail against it.—I shall go on in my usual Way, and give another Example worth taking Notice of. I therefore present my Readers in this Place, with Observations on a curious Geniture, comprising the Time and Quality of Death, &c:

## A SCHEME of the HOROSCOPE at BIRTH.

## THE DIRECTIONS.

	<i>Arch.</i>	
Ascendant to the $\square$ of $\text{♃}$ in Mundo	4 19	<i>Three Years and Ten Months.</i>
Ascendant to the $\odot$ of $\text{♃}$ in Mundo	6 8	
Ascendant to the $\Delta$ of $\text{♃}$ in Mundo	6 14	
$\odot$ to $\square$ of $\text{♃}$ in Mundo, C. D.	9 20	
Ascendant to $\square$ of $\text{♀}$ in Mundo	14 6	
Ascendant to $\star$ of $\text{♃}$ in Mundo	14 20	
$\text{♃}$ to the $\odot$ of $\odot$ in Mundo	14 40	
Ascendant to $\square$ of $\odot$ in Mundo	19 8	

This is one of the weakest Genitures I ever saw, and therefore it would be in vain to notice it any further than what the Position alone indicates; for in the Figure of Birth we find all the Planets under the Earth afflicting each other by violent Rays, neither is there any Planet dignified in the Celestial Figure worthy of Notice. Now, in this Nativity, we find Mars in the Ascendant, but though this is the Case, he most certainly cannot claim the Aphetical Dignity, though he is in an Hylegiacal Place, because he does not possess those Dignities, &c. laid down by Ptolemy to entitle him to the Power, neither is the Part of Fortune qualified to be selected as Giver of Life in this Geniture, as any one may observe by calculating it according to *Ptolemy's* Doctrine, therefore it is evident the Ascendant is the true Apheta in this Nativity, and must be directed for Death, its Time, and Quality, &c.

In the Figure of Birth, we find the two Lights of the World posited in the *Inimū Cœli*, greatly afflicted by the Zodiacal and Mundane Square of Mars, who is in the Ascendant, and in a Square to Venus also, both in *Zodiaco* and *Mundo*, and as Venus is combust of the Sun, it is evident she cannot render any Relief to the Native in this Case; for she is in a Mundane parallel with Saturn, and so is the Sun, just separating from the same violent Ray; the Moon is posited among violent fixed Stars, and Angular, therefore the whole Position, duly considered, is very Evil and Malevolent; neither can the Mundane Trine of Jupiter save the Native from Death, as the Nativity is so weak in a general Way considered; and, therefore I judge the Native's Dissolution will take Place when the Ascendant comes to the Mundane Square of the Moon, followed by the Body of Mars, though it is evident from the Rules of Ptolemy, that if the Significators of Children in the Genitures of the Native's Parents, are so posited as not to give vital Children, then consequently Death will take Place in less than a Year from the Time of Birth, for we frequently observe, that Children die by Position, and often we observe also that no Directions are to be found, for many that die within the Year; so that the  
Violence

Violence of the Position affects the Child so long as it lives.

I shall now present you with the NATIVITY of the great and learned Dr. FRAN. BARNARD, who was well acquainted with this Sort of Learning, and also with the Directions which proved the *Atropos* to his Life: the Figure follows, corrected by himself, and was undoubtedly carefully done.

I shall not trouble you with any Judgement on the Scheme in general, but leave that to the Curious, and only give you the Train of Directions for his Death, viz.

☉ ad □ ♃ in Zod. - -	67	2	68	5	1697
☉ ad Par. ♃ Mot. Rapt.	68	33	69	11	1698
☉ ad Par. ♃ in Zod. -	68	35	69	11	1698
☉ ad □ ♃ in Mundo.	73	36			

The Truth is, he died on the 9th of *February*, 1698, being Sixty-nine Years and Five Months Old.

*Judicium*

*Judicium Astrologicum, pro Anno 1808.*

*Or an Astrological Judgement upon the Four Quarterly Ingresses of the present Year; and First of the Brumal Ingress, or Winter Quarter.*

WHICH begins on *Tuesday* the 22d Day of *December*, at 3 Min. past 5 in the Evening, 1807, when the 28th Degree of *Cancer* arises in the East, and the first Degree of *Aries* possesses the culminating Angle. At this Ingress we find the Planet *Mars* Lord of the House of Honour, and in a *Sextile* Aspect of the Planet *Saturn*—all the Planets are *sub Terra*, except *Jupiter*, who is on the Cusp of the 8th House, and in a  $\square$  Aspect of  $\text{♃}$  and  $\text{♄}$ , and in a *Sextile* of *Mercury*; this we find in the 4th or lower Angle of the Figure in  $\triangle$ , applying to the *Sextile* of  $\text{♄}$ , and *Trine* of *Jupiter*, and *Square* of *Mars*, who is posited on the Cusp of the 7th, or Western Angle, within 27 Degrees of the SUN. This Quarter will be spent in very eminent Consultations in the Courts of Princes, Kings, and Emperors, and with great Secrecy and Precaution.—Perhaps some Preliminaries for some intended Treaty will be on the Anvil of State, for the Settlement of PEACE and TRANQUILLITY; but though I am apprehensive, we must wait somewhat longer before we find the great Work of Pacification thoroughly compleated, this Quarter will, in all probability, be very much taken up with Propositions of that Nature, and doubtless they will in some Measure have their Effect, but there are a great many Points to settle before we can expect an honourable Peace; for the approaching  $\square$  of  $\text{♃}$  and  $\text{♄}$  on the 1st of *February*, implies Misery and Calamities to befall the generality of Mankind in several Parts of the World, especially *Europe*, which I do not wish to aggravate. At the Time of this Ingress, there is one Thing worthy of Notice, and that is the Position of the Planet *Mars*, the proper Significator of *Britain*, for being in his Exaltation, he is strong in an Astrological Sense; the Import of which is, that *Britain's* Governor and Government are above and  
beyond

beyond the Machinations of their most malignant Enemies; therefore have nothing to fear from them, whatever we may have respecting a Negotiation for Peace.

Things do appear most strangely in the World;  
Some Nations rise, and some are overhurl'd.

### THE SPRING QUARTER,

Or, *The Sun's Transit through ♈, ♉, and ♐.*

**T**HIS Quarter commences on *Sunday* the 20th of *March*, at 25 Min. past 6 o'Clock in the Afternoon, when 6 Deg. of  $\varrho$  is on the Mid-heaven, and 5 Deg. of  $\triangle$  are ascending in the East—all the Planets are under the Earth, except *Mars*, who is strong in his own Domal Dignities, in *Aries*, on the Cusp of the 7th House, or Western Angle, and here within 23 Deg. of the *Sun*.—The *Moon* is in the 4th or lower Angle of the Figure, defluxing from a *Square* of *Mars*, and *Sextile* of *Saturn*.—This *Ingress* intimates great Ambiguity in Mundane Affairs, especially amongst the different Powers of *Europe*; so that whatever may be signified by the Planets at this Time, will not at present be brought to Light, for one while we seem to be flattered with the Prospect of Tranquillity and serene Days, and at another quite the contrary. The approaching  $\delta$  of  $\text{♃}$  and  $\delta$ , *May* the 15th, may be looked upon as a very malignant Aspect, as we often find it attended with great Alterations of States and Kingdoms, Empires, and Dominion in the World, with Strife and Discord; and will, I doubt, greatly influence this and the next Quarter; but on the other Hand, we have some Reason to Hope that the Influence of this malevolent Aspect will be mitigated, or of no long Continuance, for in the Course of this Year there falls out two friendly Trine Aspects of the grand Superiors, JUPITER and SATURN, which will incline to a better Understanding, in the Courts of Princes, Kings, and Emperors, so that there is, notwithstanding, very great Hopes of an approaching Tranquillity, Amity, and Concord, to the general Satisfaction of Mankind, so that a PEACE may possibly ensue; though I am satisfied that the

the Heavens shew only the Natures and Inclinations of Men, not positive Conclusions.—The Emperor of *Russia*, by his manly Efforts, and friendly Interference on the Part of *Great Britain*, will have the Honour of contributing toward that desirable Object, which is the earnest Wish of Thousands; for blessed are the Peace-makers, and cursed are the unjust War-makers.

### THE SUMMER QUARTER,

Or, the Sun's Transit through  $\varpi$ ,  $\Omega$ , and  $\mathfrak{m}$ .

**T**HIS pleasant Quarter begins this Year, on *Tuesday*, the 21st of *June*, at 7 Min. past 4 o'Clock in the Afternoon, when the beginning of  $\mathfrak{m}$  is culminating, and the 13th Deg. of  $\mathfrak{m}$  was ascending in the East; the Planet  $\mathfrak{h}$  on the Cusp of the Ascendant, but retrograde;  $\mathfrak{u}$  in the 4th House, in a Zodiacal  $\Delta$  Aspect of  $\mathfrak{h}$ ;  $\delta$ ,  $\mathfrak{z}$ , and the  $\odot$  in the 8th;  $\mathfrak{y}$  in the 9th; and the *Moon* in the 7th disposed of by  $\mathfrak{y}$ , and next applying to a  $\odot$  of  $\delta$  and  $\mathfrak{z}$ , and a  $\square$  of  $\mathfrak{u}$ . The Planets at this Ingress are all above the Earth, *Jupiter* and *Saturn* excepted, though *Saturn* is just rising on the Eastern Angle; the Positions of the Erraticks are inclined to be pacific; I wish they may have the desired Effect on the Minds of Men;—Conventions and Councils seem to be held in Earnest, and divers Schemes of Accommodation are handed about; Embassies and Couriers pass and re-pass, in order to settle Matters between the Powers now at War; but yet, nevertheless, I have my Doubts, it may be only a short Truce they may accomplish; I fear the Sword will not yet be completely sheathed.—For all this, the Time is near at Hand, when the towering Pride and airy Madness of a neighbouring Nation will have a great Check, such as he never before had, which may have already been done; by which means the *French* will be brought to better Reason.—If the War continues, the *Russians*, &c. are still promised Success.

THE

---

 THE AUTUMNAL QUARTER,

Or, *The Sun's Transit through ♎, ♍, and ♋.*

THIS Quarter takes its Beginning at the Time the *Sun* enters the Autumnal Equinox, *Libra*, which this Year happens upon *Friday* the 23d Day of *September*, at One Minute past 6 o'Clock in the Morning, when the 2d Degree of ♎ is upon the Medium Cœli, and 9 Degrees of ♍ possess the ascending Cusp; the *Moon* in ♍, located in the 3d House, in a direct Δ to ♋, retrograde in the 7th House, and next applying to the □ of *Mars*, and ♂ with ♌.—At this Ingress there are some inauspicious Configurations, besides some rugged Aspects of the Planets during this Quarter; such as a □ of ♌ and ♂, and an ♂ of ♋ and ♂; hence we may expect to hear of great Discontents and Murmuring amongst the common People, with Robberies, Thefts, Plundering, and the like—besides some Impediments in Public Affairs:

'Tis GOD that guides the Motion of the Stars,  
 In Mercy gives us Peace, in Judgment Wars;  
 Baffles the Politician's grand Design,  
 Their crafty Projects oit doth undermine:  
 To his Rebuke great Conquerors do bow,  
 It is his Hand above Rules all Below.—  
 Let's meekly to his Dictates bend our Will,  
 Let his sweet Influence be our Guide still.

FINIS.
