Sold, Shared, and Registered.

Where many CAPITAL PRIZES have been

DERBY,

Mr. W. PRITCHARD,

AND AT

No. 11, HOLBORN,

Sir J. BRANSCOMB & Co.

ARE NOW SELLING BY

TICKETS AND SHARES

The above Scheme, with not Three Blanks to a Prize, contains Capital Prize, proportion to any former Lottery, and is superior to any yet offered, in that it gives Holder of the Ticket or Share that may be the First-drawn Prize above £15 either First or Second Day (not being included in the Numbers above,) 500 more Chance the Prizes from £20,000 to £15.

IMPORTANT ADVANTAGE.

In addition to the above, Lords of the Treasury have permitted the Contractors to *a donneur* to the Holder of the First-drawn Prize above £15 on the First Day of Five Hundred whole Tickets, No. 5,001 to 5,250, No. 13,001 to 13,250; and the First-drawn Prize above £15 on the Second Day, will also receive Five Hundred Tickets, No. 8,001 to 8,250, No. 15,001 to 15,205. The Tickets will be sealed up, by three or more Managers and Directors, and deposited in the Bank of England delivered to the Holder of the Fortunate Prizes directly after the present State Lot done drawing.

SHARES are likewise entitled to a proportion of the above BENEFITS.

DAYS

Merlinus Liberatus.

A N

ALMANACK

For the Year of our Redemption,
1809,

Being the First after *Bissextile*, or *Leap-Year* ;
And from the Creation of the World, according
to the best History, 5756,

And the 120th of our Deliverance by K. William
From Popery and Arbitrary Government ;
But the 114th from the
Horrid, Popish, Jacobite Plot.

Wherein are contained all Things fitting and useful for such a Work ; as
an Ephemeris of the daily Motions of the Planets, with their various
Configurations, Aspects, Conjunctions ; Lunations, Eclipses, Astrono-
mical, Astrological, Meteorological Observations, the rising and setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and daily Equation of Clocks ; Length and Break,
Increase and Decrease of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes ; a Chronology ; Remarks on the Distances of the
Heavens, with Judgments of the Eclipses and Seasons, handled ac-
cording to the Rules of the Ptolomean Astrology, and many other
Things relating to the Truth of Astrology.

Calculated for the Meridian of **LONDON.**

By **JOHN PARTRIDGE.**

— *Etiam Mortuus loquitur.*

L O N D O N.

Printed for the **COMPANY of STATIONERS.**

By **WILLIAM THORNE**, Red Lion Court, Fleet Street.

And Sold by **GEORGE GREENHILL**, at their Hall, *Ludgate Street.*

[Price stitched One Shilling and Ten Pence.]

If thou be Sick, and Help wouldst have
The Counsel of the Learned crave;
If thou have Health,—to keep thee so,
Fly Idleness, as deadly Foe.

Now wholesome Baths thou may'st frequent;
 Let Blood also, and not repent:
 These be good Means thee to defend
 From Grievs, the which on thee attend.

Rise early now this Month of May,
 And walk the Fields that be so gay :
 From Surfeiting see thou refrain,
 For soon it will procure thee Pain.

22 November hath XXX Days.

If Rheums do now molest thy Head,
 It is not ill to sweat in Bed:
 Feed on good Meats, if Stomach serve,
 Else seek for that which doth preserve.

On the Morrow of the <i>Ascension</i> , - - - <i>12</i>	13	14	15	Monday

Trinity Term begins *June 2*, ends *June 21*.

On the Morrow of the holy <i>Trinity</i> , <i>May 29</i>	30	31	1 st	Friday.
In eight Days of the holy <i>Trinity</i> , <i>June 4</i>	5	6	7	Wednes.
In fifteen Days of the holy <i>Trinity</i> - - - <i>11</i>	12	13	14	Wednes.
From the holy <i>Trinity</i> in 3 Weeks, - - - <i>18</i>	19	20	21	Wednes.

Michaelmas Term begins *Nov. 6*, ends *Nov. 28*.

On the Morrow of <i>All Souls</i> , - - - <i>Nov. 3</i>	4	5	6	Mond.
On the Morrow of <i>St. Martin</i> , - - - - <i>12</i>	13	14	15	Wednes.
In eight Days of <i>St. Martin</i> , - - - - <i>18</i>	19	20	21	Tuesd.
In fifteen Days of <i>St. Martin</i> , - - - - <i>25</i>	26	27	28	Tuesd.

N. B. No Sittings in *Westminster-Hall* on the 20 of *February*, *Ascension Day*, and *Midsummer Day*.

The Exchequer opens Eight Days before any Term begins, except *Trinity*, before which it opens but Four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

OXFORD and CAMBRIDGE TERMS.

OXFORD TERMS.

Lent Term - begins *January 14*, - - - ends *March 25*.
 Easter Term - begins *April 12*, - - - ends *May 18*.
 Trinity Term - begins *May 31*, - - - ends *July 15*.
 Michaelmas Term begins *October 10*, - - - ends *Dec. 17*.
 The Act is *July 10*.

CAMBRIDGE TERMS.

Lent Term - - begins *January 13*, - - - ends *March 24*.
 Easter Term - - begins *April 12*, - - - ends *July 7*.
 Michaelmas Term begins *October 10*, - - - ends *Dec. 16*.
 The Commencement will be *July 4*.

A Table of the Moon's Age for every Day throughout this Year, whereby, with the Help of the next General Tide Table, the Times of High Water at all the Places mentioned above it are shewn by Inspection.

An Explanation of this and the following Table:

First find the Month on the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Column is the Time of High Water at all the Places above mentioned, by Inspection. — Example, Feb. 27, I find the Moon to be 13 Days old, and over against 13 in the 1st Column I find 9 h. 14 m. in the 2d Column, 11 h. 6 m. in the 3d; which are the Times of High Water at all those Places mentioned above in the 2d and 3d Columns on that Day. *Et sic de ceteris.*

N. B. In the Calendar Part you will find the Planets Southing inserted to several Days in each Month; and by this Table you may easily find their Rising and Setting: First, find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting, but subtracted the Rising.

OF THE
ECLIPSES
OF THE
SUN and MOON,

That will happen this Year, 1809.

In the Course of this Year there will be Four Eclipses, namely, Two of the SUN, and Two of the MOON; they happen in the following Order.

THE first of these Eclipses is a central and annular one of the Sun, upon *Friday* the 14th of April in the Evening, but so late as not to be visible with us; for the Ecliptical Conjunction does not happen until 57 min. past 7 o'Clock. This Eclipse will be central on the Meridian, at 36 min. past our 8 o'Clock, in 74 deg. of North Latitude, and 128 deg. 53 min. of West Longitude from London; which Place falls in the Icy Sea, within the Arctic Circle.—This Eclipse will be seen in Hudson's Bay, in North America, and on the Eastern Coast of Asia; and along the Track of central Appearance and Parts adjacent, instead of an astonishing gloomy Darkness, the Spectators will be entertained with a splendid Annulus or Ring of Light, encompassing the Moon's dark Body on every Side.

The second Eclipse is a partial one of the Moon, upon *Saturday* the 29th of April, at Night, and if Clouds interpose not it will be visible with us. At the Beginning, the Moon will be vertical or directly over Head, in 13 deg. 49 min. of South Latitude, and in 12 deg. 53 min. of East Longitude from London; which Place falls on the Western Coast of the Kingdom of Benguela in Africa; the Climate of this Part of Africa is very pernicious to Europeans. At the Middle of this Lunar Eclipse, the Moon will be vertical in 14 deg. 2 min. South Latitude, and in 8 deg. 45 min. West Longitude from London, which Place falls a little to the North-West of the Island of St. Helena, in the Atlantic Ocean, which Island belongs to the English

East India Company.—At the End of this Eclipse, the Moon will be vertical in 14 deg. 16 min. of South Latitude, in 30 deg. 20 min. of West Longitude from London, which Place falls near the Eastern Coast of South America, near to the Brazils. From this Statement of Particulars it appears, that the Beginning of this Lunar Eclipse will be visible in the Bay of Bengal, and to all the Islands in the Indian Sea; but the Moon will set eclipsed in the aforesaid Bay, before the Time of the greatest Obscuration, and also about that Time in the Island of Ceylon.—The Moon will rise eclipsed, soon after the Beginning, in the Island of Jamaica, and also at the Island of Hispaniola, in the West Indies.—Hence it also appears, that this Eclipse will be visible to all South America, a small Part of the Eastern Coast excepted; to all Africa, and to the Island of Madagascar.—The Beginning of this Eclipse will not be visible in North America, except at the Island of Newfoundland, but the Moon rises eclipsed, more or less, in all those Parts.—The whole of this Eclipse will be visible to all the Caribbee Islands in the West Indies, and also in the Island called Sandwich Land, situated in the great Southern Pacific Ocean.—In this our Island of Great Britain, it may be expected to happen according to the following Type and Calculation.

<i>April 29th.</i>	<i>London.</i>			<i>York.</i>			<i>Edinburgh.</i>			
	<i>h.</i>	<i>m.</i>	<i>s.</i>	<i>h.</i>	<i>m.</i>	<i>s.</i>	<i>h.</i>	<i>m.</i>	<i>s.</i>	
<i>Beginning</i>	11	5	28	11	1	1	10	52	39	} <i>Night.</i>
<i>Middle -</i>	12	35	30	12	31	3	12	22	41	
<i>Opposition</i>	12	41	3	12	36	36	12	28	14	
<i>End - -</i>	14	5	32	14	1	5	13	52	43	
<i>viz. Sunday</i>	2	5	32	2	1	5	1	52	43	<i>Morning.</i>

Digits eclipsed $10^{\circ} 29' 43''$.

Note.—B the Beginning, E the End, and M the Middle.

The third of these Eclipses is another of the Sun, upon *Monday* the 9th of October, at 43 min. past our 7 in the Morning; but by Reason of the Moon's South Latitude this Eclipse is invisible to us, notwithstanding its falling in the Day Time, and not to us only but even to all Europe.—In the remote Southern Parts of the World this will be a very great Eclipse, for at 17 min. past our 8 o'Clock in the Morning the Sun will be centrally eclipsed on the Meridian, in 55 deg. 45 min East Longitude from London, and in 61 deg. 40 min. South Latitude, which Place falls in the Great South Sea, among firm Fields and Islands of Ice; but whether this Eclipse will prove total or not, I cannot say, for by my Calculations the Diameters of the Sun and Moon are very nearly equal, so that a small Error either Way, will make it either total or annular, but without Continuance.—I expect the Sun will be seen more or less eclipsed in New Holland.

The fourth and last of these Eclipses is another of the Moon, upon *Monday* the 23d Day of October, in the Morning, invisible to us in England, as the Eclipse doth not begin at London until 41 min. past 7 o'Clock. At the Beginning of this Eclipse the Moon will be vertical in 10 deg. 35 min. North Latitude, and in 111 deg. 54 min. of West Longitude from London, which Place falls in the Great South Sea or Pacific Ocean, a little to the West of the Coast of Mexico, or New Spain, in North America.—The Beginning of this Eclipse will be seen at the Azores or Western Islands, and also at the Cape Verd Islands, and even I expect on the Western Coast of Ireland.—At the Time of the greatest Obscuration (which will be about 10 Digits)

Digits) the Moon is vertical or directly over Head at Midnight, in Latitude 10 deg. 50 min. North, and 134 deg. 35 min. West Longitude from London, which Place falls in the same great Pacific Ocean; and at this Time the Moon will set eclipsed at Cape Horn, and on the Eastern Coast of South America; but the Moon will rise eclipsed on the Coast of New Holland, called New South Wales, a little Time before the greatest Obscuration. At the End of this Eclipse, the Moon will be vertical in 11 deg. 4 min. of North Latitude, and 157 deg. 15 min. West Longitude from London, which Place falls in the same great Pacific Ocean, near upon the Track of Lord Anson, in his Voyage round the World.

This Eclipse will be visible from the Beginning to the End at the Society and Friendly Islands; but the Moon rises eclipsed at the New Hebrides, New Caledonia, and New Zealand, and also at the Island of Japan, and on the Eastern Coast of Asia; the End, moreover, will extend itself to the Philippine Islands, and to the Island of Borneo in the Indian Sea, formerly thought to be the largest Island in the World; but the largest Island hitherto known is the Island of New Holland, in the Great South Sea.

Note.—For the Sake of the Curious, that have proper Telescopes, I here inform them, that on Saturday the 4th Day of March, the Moon will eclipse a notable Star of the first Magnitude, called the Virgin's Spike, visible here, should the Air prove favourable. The Moon's Eastern Edge will take the Star at 20 min. past 10 o'Clock at Night; and the said Star will appear again, or come out from the Western Edge of the Moon, at 45 min. past 10; (app. Time at London) after being hid by the Moon 25 Minutes. *Note,* The Moon's lower Limb will take and leave the Star.

Some Remarks on the COMET that appeared in the Autumn of the Year, 1807.

THIS *Comet* (vulgarly called a Blazing Star) made its first Appearance, or at least was first noticed, towards the End of September, after it had past its Perihelion, and was
 ascending

ascending from the *Sun*.—It performed its apparent Course through the Constellations of the Serpent, Hercules, &c. The last Time I saw this Comet was on the 6th of *December*, at 7 in the Evening, when it was, I found, far advanced above the bright Star in the Harp, and near to a small Star in the Bill of the Swan; the Comet then appeared very small, so that I could not see its Tail, even with a good two-foot Achromatic Telescope.—I was often interrupted in my Observations by cloudy Weather, and that was the Case after the 6th of *December*, for after that I quite lost it. Now as Comets appear only during that little Part of their Course which they describe in the Neighbourhood of the Earth, the rest is performed in the most distant Regions of the Heavens, during which Time they are lost to us; and when a Comet returns we can have no Knowledge of it, but from searching anterior Records of Comets which have appeared before, and comparing their Elements together.—It does not appear that this Comet agrees with any on Record, and was not expected, but came upon us quite unknown; and, indeed, after all that has been said and done by learned Men, to determine the Nature of Comets and their Tails, our Acquaintance with them is still very limited.—As to the Destination or Purpose of Comets, whether they were Worlds formerly inhabited and reduced to Chaos, or whether they are future Worlds not yet brought to a habitable State, or whether they are Masses of combustible Matter made to move periodically round the Sun, for the Conveyance of Heat and Light to remote and dark Regions; or whether they are designed to impregnate the Regions of the Planets with salutary Particles, and make up the Decay or Waste of those elementary Principles; or whether they are formed to bring about Deluges or Conflagrations, or to put a Period to, or produce a Change in other Worlds, is not easy for us to determine.

GENETHLIACAL ASTROLOGY.

The Nativity of an OFFICER in the British Army.

A SCHEME of the HOROSCOPE at BIRTH.

THIS Geniture being of an extraordinary Nature, is, doubtless, worthy the Consideration of every Student in the Science; according to my Opinion the Native will certainly rise in the World far superior to his present Situation in Life. I believe I need not trouble the Reader with my Judgment at large on his Nativity, as by Inspection only it will appear evident, that the Positions and Configurations of the Heavenly Bodies in the Celestial Constitution are of the greatest Importance.—This Native will not only obtain very considerable Riches by the Death of Relations and Friends, but will also be famous and extraordinary in his Generation; (his Sphere of Life considered) the Position of Saturn, Mars, and Jupiter, in Cardinal Signs, indicate his Rise in the World, particularly as Venus, the Sun, Mars, and Saturn are so considerably elevated, and strongly dignified; the Sun in Trine to the Moon, and he near the Lyon's Heart in a Trine Aspect with:

with Mars, are Testimonies of the highest Importance. I believe it would be of little Advantage, if I was to State in this Place the Nature of the Directions at large; as to the Position, according to the Doctrine of ΠΤΟΛΒΜΥ, it exactly agrees with his Rules relative to Prosperity in the latter Part of his Life; and in obtaining some Part of his Property, he will experience a Variety of Difficulties, but it is evident he will defeat and utterly abolish the Schemes of his Enemies, to their Shame, Ignominy, and Disgrace.

I shall now give my Readers the Nativity of one JACK ADAMS, who was a Native of Clerkenwell Parish, London; who was born an Idiot, or so great a Natural, that the Parish not only maintained him, but allowed a Nurse to attend him, to preserve him from Harm.

This *Jack Adams* was born the 3d Day of December, at 11 o'Clock at Night, 1625. Here you see Virgo ascending, and the Planet Saturn posited therein, who afflicts Mercury, Lord of the Ascendant, with a hateful Square; nor is that all the Impediment or Evil which that Planet is afflicted with, who is the Native's Patron; for he

he is also, not only Combust of the Sun, but the Moon is likewise but newly separated, and is still virtually within Orbs of an Opposition of Mercury, Lord of the Ascendant, and that from Angles too, which adds Vigour to the other Malignity; besides, Mercury, Lord of the Ascendant, is posited in the Sign Sagitarius, being weak there in his Detriment; nor is there at any Time, here noted, one Planet dignified except Mars, to lend an assisting Help to soften the Severity of the other malevolent Rays. Here is verified this Aphorism, that those Persons who are so unhappy as to be born when the Planet Mercury shall be either very weak, or much afflicted either by the Moon or other Planets, the Native so born shall be one of very mean Parts, a stark Fool, or an Idiot. Now compare this with the foregoing Horoscope; the said Adams was so great a Natural, as to be obliged to wear long Coats, besides other Marks or Tokens of Stupidity.

Judicium Astrologicum, pro Anno 1809.

Or an Astrological Judgement upon the Four Quarterly Ingresses of the present Year; and First, of the Brumal Ingress, or Winter Quarter.

THE Winter Quarter begins on Wednesday, the 21st Day of December, 1808, at 51 min. past 10 at Night; at which Time 18 deg. of Virgo are ascending in the East, and 14 deg. of Gemini are on the Meridian. In looking over the Figure, I find the Planet Mars in ♃, in the Ascendant; the Planet Saturn in the 3d House, and just leaving the Sign Scorpio; the Sun we find also Angular in the 4th and nearly in a square Aspect of Jupiter; the Moon posited in the 6th, in ♋, and applying to a square Aspect of Saturn, and next applies to a ♀ of Jupiter. These are the principal Configurations of the Planets at this Brumal Ingress; and they are no vain Terms of a haubling Art, but are mysterious Schematisms of a secret Force and Power towards the Alterations in this sublunary World. especially the Air, and those great Issues that depend thereon, according to the Nature of the Influence, and the influence d. By the Configurations of the Planets at this Time, it seems that the Face

of Affairs are very hush and private in most of the Courts of Europe; and indeed, these Powers are, as heretofore, much divided amongst themselves, so that each Power will be seeking its own Interest rather than the common good; and this has been too much the Case with the Northern Powers. The Configurations of the Planets at this Ingress will have an unpleasant Influence on the Affairs of Holland, Prussia, also Denmark, Russia, and Sweden; the People of Germany, Portugal, and Spain, together with Dalmatia, Greece, and some other Places near Hand, are also in a murmuring Mood. A revolutionising Spirit is also fomenting amongst the Inhabitants of Rome, Naples, and other Places; hence, the Triple-crowned Impostor of the former, and the Throne of the Ottoman Tyrant, will, ere long, be in a tottering Condition. Since I wrote my last Almanack, a splendid Comet has made a visible Appearance in our System; and all Authors who have treated on the final Causes agree, that they bode great Changes and Vicissitudes in States and Kingdoms; never yet, I believe, did any Comet appear, but it was the Messenger of some Evil. They often imply the Death of Princes, Wars, Inundations, and Earthquakes.

THE SPRING QUARTER,

Or, The Sun's Transit through ♈, ♉, and ♐:

THIS Quarter commences on Monday the 20th Day of March, at 14 min. past Twelve at Night; when the 4th deg. of ♌ culminates, and the 6th deg. of ♈ ascends; and the Moon having just past a Conjunction of Venus, and is next applying to an 8 of the Planet Saturn, who is retrograde on the Cusp of the Ascendant. In this Vernal Ingress, I find the Planet Mars posted in the 10th, Retrograde, and in ♌, his Detriment, therefore but weak in the Figure. These, with the other Configurations of the Planets at this Time, shew that some great Changes are still approaching various States and Kingdoms, and amongst the rest, the Kingdoms of Spain and Portugal; the two great Props of, and Supporters of Papal Power and Superstition, must give Way to a better Faith and a more rational Religion; the Powers of Italy, &c. are in the

greatest Distress, and they will find none that can effectually relieve them; the different Powers in the North, and in Germany, are in the same Situation; and as to America, they must take Care of French Councils and French Politics. During the Years 1807 and 1808, different Powers made Peace with France, as I expected some of the Powers would, from the Face of the Heavens; but Great Britain kept at a Distance, and continued the wide-wasting War! Now if the Foundation for a GENERAL PEACE has not been laid, or begun to be laid before this Time, I am doubtful that this will not be the Year when PEACE will wave her Olive Branch over the whole World. Indeed, there will be Discords, Bloodshed, and Revolutions in the Northern Parts of Europe, as well as in other Places; but there is a Hand unseen, which brings Good out of Evil; and private Calamities shall at last produce a public Good. The Stars denote some more than ordinary Matter and Action now or nearly ready to be ushered into the World; some pious Cheat, or fraudulent Action, under specious Pretences, breaks out about this Time, or before the End of the next Quarter.

THE SUMMER QUARTER,

Or, the Sun's Transit through φ , Ω , and μ .

THE Summer Quarter begins on Wednesday, the 21st Day of June, at 56 min. past 9 o'Clock at Night; when the first deg. of \uparrow will be on the Cusp of the Medium Cœli; and the 29th deg. of \wp will be on the Ascendant; there is at this Ingress, only Saturn, Mars, and the Moon above the Earth, the rest of the Planets are below. The Planets Jupiter and Mercury are in a Zodiacal Square, and the Planet Mars in φ , hastening to an ϑ of Υ in Aries, the reputed Ascendant of England; the Moon is applying to a ζ of Mars, and ϑ of Jupiter, and Square of Mercury in Cancer, Tropical and Equinoctial Signs. The Configurations and Aspects are of a sanguine and malignant Nature, implying great Calamities to Mankind, as Commotions, Wars, Seditions, Subversions of Kingdoms and States, Alterations of Laws, Customs, &c. both in Church and State. Revolutions are still going on, Popery and Superstition give Way, and

Men begin to think more rationally about Religion and Civil Governments. The Flames of Discontents and Murmurs about the Loss of Trade, and other Afflictions, which will spread far and wide, even into America; but that Government will act with great Caution and Prudence, even towards us, as well as towards some other Governments which I could name. The infallible Pontiff of Rome, the Pope I mean, is at his Wit's End, he both fears and feels his impending Fate; his Power daily declines. Oh, England, England, be grateful for all the Mercies of a gracious God bestowed upon Thee; for great they are in sparing his Judgments, repeating his Warnings, and giving us Time to Repent of our Crimes.

THE AUTUMNAL QUARTER,

Or, The Sun's Transit through ♌, ♍, and ♎.

WHICH makes its Entrance this Year on Saturday, the 23d Day of September, at 49 min. past 11 o'Clock in the Forenoon, at which Time we have 27 deg. of Virgo culminant, and the first deg. of ♎ upon the Horoscope. The Sun and Mercury are Angular in the 10th, Venus declining to the West on the Cusp of the 9th, the Planet Saturn just leaving the Sign Scorpio, and posited in the 12th, and Mars in ♎, Angular in the Ascendant. The Moon and Jupiter are under the Earth. The $\text{D ab } \square \text{ } \delta \text{ et ad } \Delta \text{ } \text{h}$. The Positions and Configurations of the Planets at this Ingress, especially the late δ of Saturn and Mars, denote Strife and Discord amongst all Degrees of Men; but more especially amongst Kings, Princes, Senators, and those at the Helm of Affairs, giving Disturbance and Fatigue to their Councils and Deliberations, with Loss and Detriment to Persons of high Rank, with Removals and Disgrace to those in Trust, &c. Various Intelligence arrives from different Parts of the World, and many Nations are now consulting their future Happiness. Tertian Agues, Fevers, and other Acute Diseases will be very Rife during this Quarter.

ere many CAPITAL PRIZES have been Sold, Shared, and Registered.

DERBY, R. W. PRITCHARD'S,

AND AT

Sir J. BRANSCOMB & Co. No. 11, HOLBORN,

ARE NOW SELLING BY

TICKETS AND SHARES

ve Scheme, with not Three Blanks to a Prize, contains Capital Prizes equal in to any former Lottery, and is superior to any yet offered, in that it gives the Hol- Ticket or Share that may be the First-drawn Prize above £15 either on the First Day (not being included in the Number above,) 500 more Chances for all the Pri- £20,000 to £51.

IMPORTANT ADVANTAGE.

SHARES are likewise entitled to a proportion of the above BENEFITS.

tion to the above, the Lords of the Treasury have permitted the Contractors to *donneur* to the Holder of the First-drawn Prize above £15 on the First Day of Five Hundred whole Tickets, No. 5,001 to 5,250, No. 13,001 to 13,250; and the the First-drawn Prize above £15 on the Second Day, will also receive Five Hundred Tickets, No. 8,001 to 8,250, No. 15,001 to 15,250. The Tickets will be sealed up, by three or more Managers and Directors, and deposited in the Bank of England, referred to the Holder of the Fortunate Prizes directly after the present State Lottery drawing.

TICKETS,		£200,000
