

1811

Merlinus Liberatus.

A N

A L M A N A C K

For the Year of our Redemption,

1811,

Being the Third after *Bissextile*, or *Leap-Year*;
And from the Creation of the World, according
to the best History, 5758,

And the 123d of our Deliverance by *K. William*
From Popery and Arbitrary Government ;
But the 133d from the

Horrid, Popish, Jacobite Plot.

Wherein are contained all Things fitting and useful for such a Work ; as
an Ephemeris of the daily Motions of the Planets, with their various
Configurations, Aspects, Conjunctions ; Lunations, Eclipses, Astrono-
mical, Astrological, Meteorological Observations, the rising and setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and daily Equation of Clocks ; Length and Break,
Increase and Decrease of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes ; a Chronology ; Remarks on the Divisions of the
Heavens, with Judgments of the Eclipses and Seasons, handled ac-
cording to the Rules of the Ptolomean Astrology, and many other
Things relating to the Truth of Astrology.

Calculated for the Meridian of LONDON

By **JOHN PARTIDGE**

The New Year does exact from Christians all,
New Praise, new Thanks, and for new Lives does call;
Why then do Pagists on their Saints rely,
And for their Help in every Want apply?

The Councils of Europe are close and intent upon their Designs; it looks as if some Offers were made for restoring a General Peace to the distracted World; and some Meetings and Consultations may have been for that Purpose.

10 Archbishop Laud be-headed 1645
 11 Sir Hans Sloane died 1752
 15 Pondicherry surrendered 1760
 17 Bat. of Falkirk 1746
 20 First Parliam. 1269
 21 Louis XVI. K. of Fr. beh. 1793
 4 A great fire at the Custom-h. 1715
 8 Hen. VIII. died 1547
 31 Guy Faux ex. 1606

To me such Usage seems extremely odd,
 To ask of Saints what none can give but God.
 How many Ave-Marias in a Day,
 Instead of Prayers, do the fond Papists say ?

They think she'll hear and grant what they do ask,
But who dare say She's Pow'r for such a Task?
God only hears, and can alone forgive;
Such as on her depend, Themselves deceive.

The ensuing Summer is likely to prove a very active one. Many busy Brains are at Work, and use their utmost Efforts to do more Mischief. Much Deceit and Knavery amongst the Dealers of the World. Many Lies and much false News spread Abroad.

Confess and Sin, Sin and Confess again,
 And trait a Bull will free them from all Pain.
 No Part of Romish Nonfense is more vain,
 Than their Idolatry in all their Train.

It is a general Maxim, that the Harms and Mischiefs that befall other Men, are the very best Instructors, and they that will not follow their Advice, are not to be accounted the wisest of Men. — Matters now appear formidable, and Things look with a sable Vesture.

- 4 The Rebellion began - 1745
- 6 Hen II. died - 1189
- Edw. VI. died 1553
- Sir T. Moore be-headed - 1535
- 7 Edw. I. died 1307
- 9 Czar Peter murdered - 1762
- 13 Peace of Utrecht - 1713
- 17 Cape Breton taken - 1745
- 24 Gibraltar taken 1704
- 29 Spanish Armada defeated - 1588

16 August hath XXXI Days.

Who made, resemble them: and sure are those
 Who do in senseless Stocks their Hopes repose.
 In pious Cheats perpetually go on,
 Those wicked Sons o'th' Whore of Babylon.

18 September hath XXX Days.

In Tongue unknown, to Stocks they pray and nod,
 Nay, first they make, and then they eat their God;
 And should it seem to suit their selfish View,
 No Doubt they'd make and eat a Devil too.

The Affairs of these Nations are now subject to great Difficulties. Some evil Counsellors detected, and some Public Affairs seem to be under Examination; and some Persons deposed from their Offices and Honours; for great and lofty Things are now or soon will be under Consideration, both at Home and Abroad.

3 Cromwell died 1658
 5 Bp. Bonner died 1569
 8 Geo. III. and Char. wedded 1761
 11 Wm. the Conqueror died 1087
 16 Geo. I. landed 1714
 21 Edw. II. murdered - 1327
 29 Richard II. deposed 1399

20 October hath XXXI Days.

For first the Pope invents a Purgatory,
 You to affright, and to be you of your Glory;
 That being done; again he says, to please ye,
 The well-brib'd Priest will quickly make you easy.

They make a Fire, and swear they've put you in,
That they for Gold may pray you out again.
In ev'ry Popish Town where-e'er you pass,
They'll tease and follow you from Place to Place.

24 December hath XXXI Days.

Begging of you to hire some lazy Priest,
 Masses to say, that Souls may be at Rest;
 For certain Sums, they'll certain Masses say,
 But Nothing's said unless some Fool will pay.

An Explanation of this and the following Table:
 First find the Month on the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Column is the Time of High Water at all the Places above mentioned, by Inspection.—Example, Feb. 6, I find the Moon to be 13 Days old, and over against 13 in the 1st Column I find 9 h. 14 m. in the 2d Column, 11 h. 6 m. in the 3d; which are the Times of High Water at all those Places mentioned above in the 2d and 3d Columns on that Day. *Et sic de ceteris.*

A plain and easy TABLE, shewing the Time of
HIGH WATER.

NOTE, That the Moon's Age being taken notice of in the Table, you have the Time of HIGH WATER at all the under-named Places.

Beachey, Candado, Dover Pier, Dunkirk, Coast of Flanders, Kentish Knock, Leith, Portsmouth, and the Spits, Queensborough, Southampton, and Isle of Wight.

Blacknefs, Calais and Dover, Downs, Gravend, Half-tide, North-Cape before Coquit, Romney, Scilly, and Thanet.

Amsterdam, Dort, Gascain, Groin, Hartlepool, Ireland in the Westward, London, Robin Hood's Bay, Rotterdam, Tinemouth, and Whitby.

Dartmouth, Falmouth, Guernsey, Humber, Lizard, St. Maloes, Newcastle, Ramfey, Sevenn-mouth, Scilly, Spurn, and Torbay.

Antwerp, Bofton, St. David's Holms of Bristol, Hull, Lundy, Lynn Half-tide, St. Paul's, Plymouth, Salcolm without Ushant, Waterford.

Aldborough, Bristol, Falmouth, and Foy, Foulnefs, Lime, Sidmouth in the Channell, Start before St. Nicholas, Weymouth

Caen, Calais Road, Cowes, Dover, the Fritth, South-Foreland, Harwich, St. Helen's, Normandy and Picardy, Yarmouth Road.

Beachy, and the Isle of Wight, Caskets in the Channels, Combay, Dublin, Hague, Peter Port, St. Magus's Sound.

The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to pass of the Gold Coin.

GOLD.		Full Wt.		SILVER.		Full Wt.	
Wt allowed.	dwt. gr.	dwt. gr.		dwt. gr.		dwt. gr.	
Guinea -	5 8	5 9	$\frac{30}{35}$	A Crown, - - - -	19	8	$\frac{16}{31}$
Half Guinea,	2 16	2 16	$\frac{4}{8}$	Half Crown, - - -	9	16	$\frac{8}{31}$
Third: Guin.	1 19	1 19	$\frac{13}{33}$	Shilling, - - - -	3	20	$\frac{28}{31}$
				Six Pence, - - -	1	22	$\frac{4}{31}$

According to the above proportions it appears, that the value of a *lb.* of silver is 62s. or 31. 2s. and of a *lb.* of gold is 44½ guineas, or 461. 14s. 6d. Also that the *oz.* of silver is 5s. 2d. and the *oz.* of gold 31. 17s. 10½d. So that the value of the standard gold is 15 times that of the silver, and 1-14 more.

ECLIPSES

OF THE

SUN and MOON,

That will happen this Year, 1811.

In the Course of this Year there will be Four Eclipses; namely, Two of the SUN, and Two of the MOON; they will happen in the following Order.

THE first of these Eclipses is a partial one of the *Moon*, on *Sunday, March* the 10th, in the Morning, Part of it will only be visible with us (if the Air prove clear) as the *Moon* will set eclipsed just before the Middle, above 5 digits on her uppermost Limb, as the Type will show. At the Beginning, the *Moon* will be vertical in 3 deg. 56 min. North Latitude, in 78 deg. 21 min. West of *London*; which Place falls in the Bay of *Bonaventura*, which is on the North-West Coast of *Peru*, in *South America*. At the Middle of this Eclipse, the *Moon* will be vertical or directly over Head at Midnight, in 3 deg. 46 min. North Latitude, and 96 deg. 57 min. of West Longitude from *London*; which Place falls on the great Ocean to the West of *Peru*; and, at the End of this Eclipse, the *Moon* will be vertical in 3 deg. 34 min. of North Latitude, in 115 deg. 36 min. of West Longitude from *London*; which Place falls in the same great Ocean, still more West of *Peru*. Hence it appears, that the Beginning of this Eclipse will be visible in Great Britain, France, Spain, and Portugal, and to the Western Parts of Africa, to the Azores, Canary Islands, and to those of Cape Verd. The Middle of this Eclipse will be visible in Ireland, at the Azores, Canary, and Cape Verd Islands. The End of this Eclipse will be seen as far as New Zealand, and the New Hebrides. The whole of this Eclipse, from the Beginning to the End, will be seen in the Sandwich Islands, and also at the Society Islands; to all North and South America, even to near 4 Degrees beyond the North Pole.

The

The Time and Manner of this Eclipse, may be expected nearly to Correspond with the following Calculation and Construction.

	London.			York.			Edinburgh.			
	h.	m.	f.	h.	m.	f.	h.	m.	f.	
Beginning	5	9	45	5	5	18	4	56	56	App. T. Morning.
Ecliptic \oslash	6	18	0	6	13	33	6	5	11	
Moon sets	6	19	0							
Middle -	6	27	0	6	22	33	6	14	11	
End - -	7	44	15	7	39	48	7	31	26	

Digits at the Middle $5^{\circ} 23'$

Note.—H. O. an Horizontal Line.

The second is a total and central Eclipse of the Sun, on Midlent Sunday, the 24th Day of March, at 12 min. past our 2 in the Afternoon; but the Moon, at that Time, having South Latitude, and that will be increased by her Parallax in Latitude, will cause this Eclipse to be invisible both to us, and to all Europe, notwithstanding the Sun may be shining all the Time. The Sun will be totally and centrally eclipsed on the Meridian in 39 deg. 35 min. South Latitude, in 26 deg. 10 min. West Longitude from London; which Place falls in the Great Southern Ocean. This Eclipse will be visible, more or less, at the Cape of Good

Good of Hope in Africa, at the Island of St. Helena, also in South America, even as far as Cape Horn.

The third is another partial Eclipse of the *Moon*, on *Monday* the 2d Day of *September*, at near 11 o'Clock at Night, visible here, if the Air prove clear. At the beginning the *Moon* will be vertical in 7 deg. 33 min. South Latitude, and in 38 deg. 11 min. of East Longitude from *London*, which Place falls on the Eastern Coast of *Zanquebar* in Africa, the Inhabitants of which are Mahometans and Pagans, most of them. At the middle of this Eclipse, the *Moon* will be vertical or directly over Head at Midnight, in Latitude 7 deg. 20 min. South, and in 19 deg. 23 min. East Longitude from *London*; which Place falls on the Eastern Coast of Congo Proper, which is on the Western Coast of Africa. In this Country the Seasons are the reverse of ours; during our Summer, they have Rain almost every Day, and this is called the Winter Season; but, during their Summer, the Weather is constantly fair and serene. At the End of this Eclipse, the *Moon* will be vertical or over Head, in 7 deg. 5 min. of South Latitude, and in only 33 min. of a degree East of the Meridian of *London*; this Place falls in the Ehipic Ocean. Hence it appears, that this Eclipse will be visible at the Beginning in the Bay of Bengal, in the Island of Borneo, and Southward to the Western Coast of New Holland. The *Moon* rises eclipsed on the Eastern Coast of South America. This Eclipse will be visible to all Europe, most Part of Asia, in China, the East Indies, Africa, the Island of Madagascar, throughout the Indian and Eastern Ocean, and the Sandwich Islands also. But the *Moon* will rise eclipsed at Newfoundland, to the West India Islands, and the Eastern Coast of North America, and it will be visible, more or less, to all South America.

The Time and Manner of Appearance, in respect to us in *Great Britain*, it is hoped, will not greatly derogate from the under-written Type and Calculations.

	<i>London.</i>			<i>York.</i>			<i>Edinburgh.</i>			
	h.	m.	f.	h.	m.	f.	h.	m.	f.	
Beginning	9	23	30	9	19	3	9	10	41	App. Time. Night.
Ecliptic δ	10	34	45	10	30	18	10	21	56	
Middle - -	10	41	45	10	37	18	10	28	56	
End - - -	12	0	0	11	55	33	11	47	11	

Digits eclipsed $7^{\circ} 21'$.

The Type for *London*, which will tolerably well serve the whole Kingdom at large.

Note.—H. O. an Horizontal Line.

The fourth and last of these Eclipses, is another central one of the *Sun*, upon *Tuesday* the 17th of *September*, in the Evening, with respect to us, but so late as to be invisible; for the *Ecliptical* Conjunction happens at 57 min. past 6 o'Clock, which is some Time after the *Sun* is set. This Eclipse is not only central, but annular also, and its Appearance will be at Noon day, in 95 deg. 40 min. of West Longitude from *London*, under 47 deg. 49 min. of North Latitude, which Place falls near the Southern Parts of *Canada*, near the Lake of the Woods, &c. in North America, where the Spectator will be entertained with a beautiful Ring of Light quite round the *Moon's* dark Body on every Side. This Eclipse will be seen, more or less, throughout North America; and may, very properly, be called an American Eclipse.

For the Sake of my Readers, especially the curious, I shall here give an Account of a notable Occultation or wo, which will be visible to us, if the Air prove clear; calculated

calculated from very correct Tables, for the Meridian and Latitude of *London*, according to App. Time.

On *Friday Evening*, the 1st day of *March*, the *Moon* will cover or Eclipse from our Sight, that notable fixed Star, called *Aldebaran*; the *Moon's* upper Limb will take the Star at 31 min. past 7 o'Clock; and the *Moon's* lower Limb will leave the Star again at 46 min. past 8 o'Clock; after having been hid 1 hour and 15 minutes. The *Moon* will be near the first Quarter, within a few Hours, so that the Star and the *Moon* will make a pretty Appearance through a good Achromatic Telescope.

The *Moon* again eclipses *Aldebaran*, on *Saturday Morning*, the 30th day of *November*, and visible to us. The *Moon's* Limb will take the Star at 3 min. past 6 o'Clock; and the Star will come out from behind the *Moon* again, at 48 min. past 6 o'Clock. The *Moon* now being at the Full, her Light will obscure the Brightness of the Star; but it will appear very conspicuous through a Telescope, as the *Moon* is going down in the West.

GENETHLIACAL ASTROLOGY.

PICUS, EARL of MIRANDULA, was the most potent Adversary that Astrology ever had whilst he was living; and who for his fiery Zeal in Writing against Astrologers, was termed *Flagellum Astrologorum*; the Scourge of Astrologers.—This Man (like some now-a-days) contemned the Power of the Stars, disdained Astrological Predictions, and wrote reproachful Calumniations; flattering himself he could wrangle away Death, by Writing against Astrology: but his Death gave the greatest Conviction of the Truth and Verity of Astrology that could possibly be; for, being foretold by *Lucius Ballantius* (a famous Astrologer of *Siena*) that he, the *Earl of Mirandula*, would not live past the 34th Year of his Age: and behold! while he sought to prove the Art vain, his own Death concurring exactly with the Time foretold by the Astrologer, confirmed it to be true; and more actually confuted what he had written against it, than if all the World had conspired to Answer him. And here, for the Satisfaction of the Curious, I will insert his Nativity, with some Observations upon it; and shew the Directions that proved the *Atropos* of his Life.

Here

Here follows the Scheme of his Nativity, as it has been handed down to us.

R. A. M. C. 112. 43.

I OBSERVE, the Direction that *Lucius Ballantius* and other Astrologers in those Times, grounded their Predictions of his Death from, was only the House: *Ad corpus Martis*, without giving any other Reason, which, in my Opinion, was a very bold Prediction, though attended with Success. And whoever makes the same Prediction on only that Direction, or the same in other Nativities, is very likely to be deceived; for I can in several Nativities show (both Ancient and Modern) where the Ascendant ad ♂ of *Mars* (only) did not kill, and yet the Ascendant *Apheta*, as in this Example.—For there are several Things to be considered, before any one can judge Death positive, on such a Direction as they did in *Picus's* Case; and I think I am able to show when such a Direction will, and when it will not Kill. A Specimen in this Kind I will here give you, as an Example in this Nativity. See the following Table.

	D.	M.	Y.	M.	A. D.	
Ascend ad □ ♃ in Mundo -	30	29	33	5	1496	died.
Ascend ad ♂ ♂ in Mundo -	31	55	34	7	1497	
Ascend ad □ ♀ in Mundo -	34	35	—	—	—	
Ascend ad ♂ ♃ in Mundo -	43	34	—	—	—	

If you observe the short Table above, you will find there was a Train of Directions to complete the Work, and no good One that intervenes or helps to save Life, or remit or break the Train; and I am bold to assert, whenever you find the Ascend or any of the Hilegial Points that is really Apheta (in other Nativities) truly directed to the Body of *Mars*, with a Train of Directions attending, as in this Example, it shall always prove fatal, be the Nativity never so vital or strong. It was not the Ascend ad ♄ of *Mars* only. the Ascend ad □ of *Saturn* in *Mundo* came up first, but *Mars* was *Poisshanatos* in this Case. Yet the Mundane □ of *Mercury*, and Rays of the Moon did greatly assist, and in particular did specificate the Disorder. I have no Account of what Disease he died of, but judge by the Directions, it was a hectic delirious Fever, attended with Nephritic Disorders.

Judicium Astrologicum, pro Anno 1811.

Or an Astrological Judgment upon the Four Quarterly Ingresses of the present Year; and First, of the Brumal Ingress, or Winter Quarter.

THIS Quarter begins when the *Sun* enters the Tropical Sign *Capricorn* which will take Place on *Saturday*, the 22d Day of *December*, 1810, at 34 min. past 10 o'Clock in the Morning; at which Time the 14th degree of ♋ is ascending in the East, and 10 deg. of ♁ are on the Mid-heaven. The ♃ ab * ♄ ad * ♀ et ♁ ♃. The Planet *Saturn* has but just left the *Sun* Beams, and the *Moon* soon after this Ingress passes the Body of *Saturn*, and next she passes the Planets *Venus* and *Mercury*; and next after comes to a Conjunction of the *Sun*, the New *Moon* falling on the 26th Day at 7 in the Morning. All the Planets are above the Earth, *Jupiter* excepted; *Venus* and *Mercury* are in Conjunction in the 11th House, and not far from the Body of the *Sun*. The *Moon* and *Mars*, in the South-west Quarter, going towards the Horizon. These are the principal Configurations at this Winter Solstice, and they will in general influence this Quarter; though in giving Judgment, I generally take in a View of the whole Year; so that my Readers must

must observe, that when I give Judgment on the Quarters, I do not mean to confine the Events solely to this or that Quarter, as the Events spoken of may fall out sooner or later, according to Circumstances.—But to return: In considering the Planetary Positions of this Ingress, I find they portend Wars, Tumults, and great Discontent in most Parts of *Europe*, from which, I am sorry to say, our own Country will not be free; and this may be the Case, as long as the present War continues; which War will still create Troubles and Broils in the Northern and Eastern Parts of *Europe*, and in the Southern Parts of *Europe* also; for the French Emperor is still likely to be successful in various Places on the Continent, and is extending his Power and Authority far and wide, to the great Mortification of the surrounding Nations. *Holland* begins to be more tranquil and united, after being a little perplexed with Internal Divisions. As to *Spain* and *Portugal*, they are still suffering Broils and Afflictions, both in a Religious and Civil Sense. Between this Country and *America*, Things put on a better Face, and I am very glad of it. The late Conjunction of the *Sun* and *Saturn*, I fear, will cause a cold and backward Spring, if the mild Beams of *Venus* and *Mercury* do not alleviate, which I hope will, in some Degree, be the Case.

Now shiv'ring Winds the naked Trees surround,
 And nipping Blasts now sweep the barren Ground;
 Driving the woolly Snow upon the Plain,
 And little Hopes of Pleasure doth remain;
 Now in the Fields we find no fragrant Flowers,
 Boreas makes Huts far pleasanter than Bowers.
 Give me a merry Heart, and honest Wife,
 The Grace of God; also a quiet Life;
 Grant me besides a trusty Friend in Store,
 Having enough of Wealth, I'll ask no more;
 Nor envy the rich Miser, or the Sot,
 That takes Delight in nought but Pipe and Pot,
 Whose Hands dare feed no other but his Mouth,
 That can't see Virtue though the Sun be South;
 Who the Church-Way can seldom ever find,
 And when he's there as little doth it mind;
 That seldom speaks but he prophanely swears;
 And by his Lies sets others by the Ears:
 His Ears are shut against the crying Poor,
 But he can hear his Dogs a Mile or more.

THE SPRING QUARTER,

Or, *The Sun's Transit through ♈, ♄, and ♀.*

THE Spring, or Vernal Quarter, begins when the *Sun* hath made his Revolution through the Twelve Celestial Signs of the Zodiac, and then beginning his Journey again at the first Scruple of *ARIES*, which happens this Year on *Thursday* the 21st day of *March*, at 5 min. past 12 o'Clock at Noon; at which Time the first degree of *Aries* is on the Meridian, and 28 deg. of *Cancer* ascend in the East; all the Planets are above the Earth, except *Saturn* and *Mars*, now within Orbs of their Conjunction in ♄.—The ♃ ab * ♃ et ♄ ♀, et ad ☐ ♃—These are the Configurations of the Planets at this Ingress. In looking over the Figure, I find there is a Mixture of Influences, both good and bad; some portend Concord, Peace and Prosperity, whilst others portend Discord, Sickness, War, and Adversity; and, therefore, I expect we shall still hear of fresh Ruptures; Inroads made by Armies to spoil and destroy, kill and take Captives. Great Disturbances of some Sort or other, seem likely to break out in *Italy*, in *Switzerland*, in *Sweden*, and *Denmark*; *Russia* also seems not quite satisfied. The *Turkish* Dominions are much out of Order, for great Tribulations are likely to come upon them, and also upon the Church of *Rome*, and the Romish Clergy, as they will be much bridled, and their temporary Estates will be mightily impaired. The Emperor of *Austria* is gaining Ground again, and is in much Favour with Bonaparte; these two great Continental Powers now act together, to the no small Mortification of the rest of *Europe*. Some Changes in *Germany*, and in some other Countries near at hand. The Configurations of the Planets at this and the next Ingress, give too much Ground to suspect that divers Nations are still embroiled with Rapines, Wars, and the like, even so, that should a Negotiation for a general Peace be set on Foot, I think it would miscarry. The *Sun* in *Aries*, on the Cusp of the 10th House, and the *Sun's* Exaltation, seem to be a good Position for the Arms of *Great-Britain*, so that by Sea, if not by Land, we shall, as usual, be successful and victorious. We have seen in our Day, one Prince set up, and another pulled down; one

one Kingdom and another transferred, and exchanged, and the Civil Government altered; therefore, as sure as these Things have been, so sure will *Spain* and *Portugal*, and the *Turkish* Empire, be revolutionized and altered.

Behold, the jovial Season of the Year,
 Like mounted Phœbus, brightly doth appear;
 Now the cold Snow and frozen Ice retreat,
 And shiv'ring Blasts are overcome by Heat;
 The pretty Lark mounts early in the Morn,
 And various Herbs and Flow'rs the Fields adorn:
 The Cuckoo doth her wonted Notes display,
 And Maids are merry in the Month of May,
 Walking the Fields, the Lawns and Valleys low,
 Where Violets and Cowslips sweetly grow:
 To gather of these Flowers as they spring,
 And, like the Birds, amongst the Bushes sing.

THE SUMMER QUARTER,

Or, the Sun's Transit through ϖ , Ω , and ϖ .

THIS Quarter takes its Beginning at the Time of the Sun's Appearance in the Northern Tropic, viz. the first Point of *Cancer*, affording us our greatest Portion of Day, when by consequence our Nights are the shortest. The Time, this Year, is on *Saturday*, the 22d of *June*, at 34 min. past 9 o'Clock in the Morning; at which Time 4 deg. of ϖ possesseth the Horoscope, and 26 deg. of γ cut the Mid-heaven. The Δ ad Δ δ . At this Ingress, the Planet *Saturn* is located in the lower Angle of the Figure, *Jupiter* and *Venus* are the same in the upper Angle of this Figure; but the most potent Aspect of the Planets at this Time, is the approaching 8 of **JUPITER** and **SATURN**, from Π and \uparrow , which Opposition takes place the 9th of *July*, and is an Aspect of great Consequence; as it will stir up the Influence of the Conjunction of these Planets in 1801, and also that of the **COMET**, that appeared in the Autumn of 1807; its evil Tendency will cause unhappy Divisions amongst the prime and sovereign Councils of Nations, both Ecclesiastical and Civil, with much disagreeing amongst one another; dissolving of Friendships and Societies, Leagues, Covenants,

nants, Articles, Dissentions, &c. it also intimates Storms and Tempests, both by Sea and Land. Many will be tossed sufficiently upon the Waves of Trouble and Vexation before the End of this Year.

THE AUTUMNAL QUARTER,

Or, *The Sun's Transit through φ , η , and \uparrow .*

THIS Quarter makes its Approach, when the *Sun*, according to Appearance, enters the Equinoctial Sign *Libra*, which will be on *Monday, September the 23d.* at 26 min. past 11 o'Clock at Night; at which Time 20 deg. of φ ascend, and 21 deg. \times , will be on the Meridian; the Υ ad * φ et \odot η et \odot δ . At this Ingress, *Saturn* and *Mars* are near their Conjunction in \uparrow ; besides being under the Influence of the late δ of Υ and η . These Aspects of the Planets will excite the Populace to Murmurings, Uneasiness, and much Discontent; in a Word, some Matters of no small Moment are now upon the Anvil, which seem to be prosecuted with uncommon Ardour and Resolution.

Some stir up Wars (whilst other are for Peace)
 And suffer for their Pride, without Release;
 Contentious Spirits never wanted Woe,
 'Tis grand Ambition works their Overthrow.

FINIS.
