

VOX STELLARUM:
OR, A LOYAL
ALMANACK

FOR THE YEAR OF HUMAN REDEMPTION
1812,

Being the Bissextile or LEAP-YEAR,

IN WHICH ARE CONTAINED

ALL THINGS fitting for such a WORK; As,

A TABLE of TERMS and Their RETURNS;

The Full, Changes, and Quarters of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS,
and other Fixed Stars of Note; The MOON's Age, and

A TIDE TABLE fitted to the Saine;

The Rising and Setting of the SUN; The Rising, Southing, and
Setting of the MOON; Mutual Aspects; Monthly
Observations; and many other Things, useful and profitable.

UNTO WHICH ARE ADDED

Astrological Observations on the Four Quarters of the Year;

A remarkable CHRONOLOGY; The ECLIPSES;

And other MATTERS both profitable and curious;

Observations on the WEATHER and Weather Glasses, RAIN, &c.
And an HIEROGLYPHIC adapted to the TIMES.

By **FRANCIS MOORE**, Physician.

LONDON:

Printed for the **COMPANY of STATIONERS,**

By **Linke Hansard & Sons**, near **Lincoln's-Inn Fields;**

And Sold by **GEORGE GREENHILL**, at their Hall in **Ludgate Street.**

[Price One Shilling and Ten Pence bound.]

2 JANUARY XXXI Days.

JUST at the Entrance of this Year, we see
 The two Superiors in opposition be:
 Something they mean; you'll soon see their Intent,
 The strength of Fate is from these causes sent.
 I see with scorn, and laugh to see 'em wait:
 Mad Men and Fools are useful Things for Fate.

Monthly Observations.

RAIN fallen in January 1810, at Bristol, was about Nine Tenths of an Inch in Depth.

As usual, I here add, from the influence of the Planets, &c. some particular Times in the Month, when there is a great probability of RAIN or SNOW (more or less) within the compass of Three Days, naming always the middle Day; which are as follow:

Rain or Snow, more or less, may

NEW Moon, 14 day, at 8 morn.

be expected about the 2d, 12th, 15th, and 28th Days of this Month. Let the curious notice how the BAROMETERS may be affected, at these times, as I expect they will be in a

FIRST Quar. 21 day, at 2 morn.

falling state for the most part, though it may not always come Rain.

COURTEOUS READER,

YOU will find, this year, that I have

FULL Moon, 28 day, at 12 noon.

given under the Monthly Observations

Look back, my Muse, and view that wholesome care
Of English Patriots, who did prepare
That just harmonious Model of our Law,
Whereby both KING and People jointly draw;
Whereby their Goods are so commix'd together,
One can't be blest but it must reach the other.

Rain fallen in March 1810, at Bristol, was only Six-Tenths of an Inch in Depth. A dry March.

Rain or Snow, more or less, may be expected about the 4th, 13th, 20th,

LAST Quar. 6 day, at 10 morn.
22d and 28th Days of this Month;
the Day before or the Day after.

Now follow my Astrological Observations and Predictions, relating to the Affairs of the World. I do not mean

NEW Moon, 13 day, at 6 morn.

they always will be exactly fulfilled in the same Month.

COURTEOUS READER,

The Planetary Configurations at

FIRST Quar. 19 day, at 11 night.

the entrance of the Winter Quarter, and those in the following Months, shew that the Affairs of many of the European Kingdoms and States are yet in a deplorable Condition; the Wars and want of Trade will not only ruin many Individuals, but bring

FULL Moon, 27 day, at 12 night.
into great distress whole States and Kingdoms.

And when they do those goodly Maxims steer,
 Triumphant Peace and Plenty doth appear
 In every corner with a cheerful Grace,
 And blest Contentment sparkles in each Face;
 The KING unrivall'd in his Power stands,
 And willing Subjects follow his commands.

Rain fallen in May 1810, at Bristol, was Two Inches and Six-Tenths in Depth.

LAST Quar. 4 day, at 9 morn.

Rain, more or less, may be expected about the 1st, 10th, 13th, 21st and 26th Days of this Month; the Day before or the Day after.

NEW Moon, 10 day, at 12 night.

of Europe go on heavily; I wish all may be well in Ireland; for the People there are much dissatisfied, and are full of fears and complaints. Spain, it is to be feared, will soon

FIRST Quar. 18 day, at 4 morn.

have her Glory buried in oblivion, as well as that of Portugal; the People there are full of troubles and tumults. The opposition of Jupiter and Saturn, this Month, will incline Men's minds to violent and dangerous enterprizes. These are fatal

FULL Moon, 26 day, at 8 morn

Times for some Countries.

Know, then, you poor mistaken Sots, that strive
 To keep those Quarrels in our Bowels alive,
 You neither are your King's, nor Country's Friends,
 But basely serve your Party's private Ends;
 Since for Contention's sake you pelt each other,
 And for mere Trifles raise such hideous pother.

Rain fallen in November 1810, at Bristol, was near Seven Inches in Depth! A very wet Month.

NEW Moon, 4 day, at 6 morn.

Rain or snow, more or less, may be expected about the 4th, 11th, 19th, and 24th of this Month; the Day before or the Day after.

The square of Saturn and Mars last
FIRST Quart. 12 day, at 3 morn.

Month, will set some Military Preparations on foot; perhaps the Siege of some Town is undertaken. Lawsuits and Religious Contro-

FULL Moon, 18 day, at 6 aftern.
versies are about this time too much in vogue.

A Gownman suffers; and a Lady of no mean Birth meets Sorrow and Affliction, perhaps a Divorce, near this time.

LAST Quart. 25 day, at 7 aftern.

Scurrilous Libels are about this time also dispersed abroad, and a noted Clerk, a sinner or Accountant, meets disgrace.

Thou great Preserver of all mortal Things,
 Within whose Hands are plac'd the Hearts of Kings,
 By whom all Kingdoms stand, and Princes reign,
 Preserve thy GEORGE, our rightful Sovereign —
 Let Traitors' Plots like wand'ring Atoms fly,
 And on their Heads pay tenfold Usury.

* Sextile		
		□ Quartile.

Upon the TWELVE SIGNS.

- ♈ The Head and Face the RAM doth always rule:
 ♉ The Neck and Throat are govern'd by the BULL.
 ♊ O'er the Arms and Shoulders still the TWINS preside:
 ♋ Breast, Stomach, Ribs, the crooked CRAB doth guide.
 ♌ The noble LION rules the Back and Heart:
 ♍ The bashful VIRGIN claims the Belly Part.
 ♎ The Reins and Loins the equal BALANCE weigh:
 ♏ The SCORPION o'er the Secret Parts doth sway.
 ♐ The curious ARCHER doth the Thighs affect:
 ♑ So doth the GOAT our bended Knees protect.
 ♒ The Legs unto AQUARIUS' Lot do fall:
 ♓ The FISH our active Feet their Portion call.

Common Notes for the Year 1812.

Lunar Cycle, or Golden Numb. 8	Lent begins - - -	Feb. 12.
Epact - - - - - 17	Easter Day - - -	Mar. 29.
Dominical Letters - - - - ED	Rogation Sunday - -	May 3.
Cycle of the Sun - - - - 1	Ascension Day - - -	May 7.
Sundays after Epiphany - - 2	Whit Sunday - - -	May 17.
Number of Direction - - - 9	Sundays after Trinity - -	26.
Septuagesima Sunday - Jan. 26	Advent Sunday - - -	Nov. 29.

A TABLE of Terms and Returns for the Year 1812

Hilary Term *begins* January 23, *ends* February 12.

RETURNS, or ESSOIGN Days.	Ex.	Re.	Ap.	W. D.
In eight Days of St. Hilary - - Jan. 20	21	22	23	Thursday.
In fifteen Days of St. Hilary - - - 27	28	29	30	Thursday.
On the Mor. of the Purif. of the Bl. V. M. Feb. 3	4	5	6	Thursday.
In eight Days of the Purif. of the Bl. V. M. 9	10	11	12	Wednesd.

Easter Term *begins* April 15, *ends* May 11.

In fifteen Days of Easter - - - April 12	13	14	15	Wednesd.
From Easter Day in three Weeks - - - 19	20	21	22	Wednesd.
From Easter Day in one Month - - - 26	27	28	29	Wednesd.
From Easter Day in Five Weeks - May 3	4	5	6	Wednesd.
On the Mor. of the Ascen. of our Lord - 8	9	10	11	Monday.

Trinity Term *begins* May 29, *ends* June 17.

On the Morrow of the Holy Trinity May 25	26	27	29	Friday.
In eight Days of the Holy Trinity - - 31	1	2	3	Wednesd.
In fifteen Days of the Holy Trinity June 7	8	9	10	Wednesd.
From the Day of Holy Trin. in 3 weeks - 14	15	16	17	Wednesd.

Michaelmas Term *begins* Nov. 6, *ends* Nov. 28.

On the Morrow of All Souls - - - Nov. 3	4	5	6	Friday.
On the Morrow of St. Martin - - - 12	13	14	16	Monday.
In eight Days of St. Martin - - - 18	19	20	21	Saturday.
In fifteen Days of St. Martin - - - 25	26	27	28	Saturday.

N. B. No Sittings in Westminster Hall on the Second of February, Ascension Day, and Midsummer Day.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, The first and last Days of every Term are the first and last Days of Appearance.

KINGS and QUEENS, from the CONQUEST.

KINGS Names.	Began their Reign.	Reigned Y. M. D.	Since their Reign.	Buried at

BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III. 4 June 1733 = Q. CHARLOTTE - 19 May 1744

Prince of Wales - 12 Aug. 1762	Duke of Cambridge 24 Feb. 1774
Duke of York - - 16 Aug. 1763	Princess Mary - - 25 April 1776
Duke of Clarence 21 Aug. 1765	Princess Sophia - - 3 Nov. 1777
Ds. of Wirtemberg 29 Sept. 1766	
Duke of Kent - - 2 Nov. 1767	Ds. of Brunswick - 11 Aug. 1737
Prs. Augusta Sophia 8 Nov. 1768	Princess of Wales 17 May 1768
Prs. Elizabeth. - - 22 May 1770	Duchess of York - 7 May 1767
Duke of Cumberland 5 June 1771	Prs Charlotte of Wales 7 Jan. 1796
Duke of Sussex - - 27 Jan. 1773	

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject	When born.	Began to reign
England, &c. - - - -	GEORGE III. - -	June 4, 1738	Oct. 25, 1760
France, &c. - - - -	Napoleon - - -	Aug. 15, 1769	Dec. 15, 1799
Russia - - - - -	Alexander - - -	Dec. 23, 1777	Mar. 24, 1801
Spain - - - - -	Ferdinand VII. -	- - - - -	- - - - 1808
Portugal - - - - -	Mary - - - - -	Dec. 17, 1734	Feb. 24, 1777
Prussia - - - - -	Frederic Wm. III.	Aug. 3, 1770	Nov. 16, 1797
Denmark & Norway	Frederic VI. - -	Jan. 27, 1768	Mar. 13, 1808
Sweden - - - - -	Charles XIII. - -	Oct. 7, 1743	June 6, 1809
Austria - - - - -	Francis II. - - -	Feb. 12, 1767	Mar. 1, 1792
Papedom - - - - -	Pius VII. - - -	Aug. 11, 1742	Mar. 14, 1800
Sardinia - - - - -	Victor Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire - -	Mahmud - - - -	July 20, 1785	July 28, 1808

The FULL WEIGHT of the COINS,

With the LEAST WEIGHT allowed to PASS of the GOLD COIN.

Wt. allowed.		Full Wt.	Full Wt.	
GOLD dwt. gr.	dwt. gr.		SILVER.	dwt. gr.
Guinea - - - - 5 8	5 9 $\frac{3}{8}$		A Crown - - - - -	19 8 $\frac{1}{2}$
Half Guinea - 2 16	2 16 $\frac{6}{8}$		Half Crown - - - -	9 16 $\frac{3}{4}$
Seven Shillings 1 19	1 19 $\frac{13}{8}$		Shilling - - - - -	3 20 $\frac{2}{3}$
			Six Pence - - - - -	1 22 $\frac{1}{4}$

According to the above Proportions, it appears that the Value of a lb. of Silver is 62s. or 3l. 2s. and of a lb. of Gold is 44 Guineas & $\frac{1}{2}$, or 46l. 14s 6d. Also that the oz. of Silver is 5s. 2d. and the oz. of Gold 3l. 17s. 10 $\frac{1}{2}$ d. So that the Value of the Standard Gold is 15 times that of the Silver, and 1-14th more.

THE PAPER BY B 3

Handwritten notes in the right margin, including "The full weight of the coins" and other illegible text.

A plain and easy TABLE, shewing the Time of HIGH WATER.

NOTE, That the Moon's Age being taken notice of, in the TABLE, you have the Time of HIGH WATER at all the under-named Places:—

15 30	10	50	12 42	2 0	4 42	5 20	6 45	10 0	8 45					

NOTE — That the Moon's Age being observed in the first Column, you find the Time of HIGH WATER at all the Places above mentioned, in the respective Column of Numbers immediately below them. Thus, when the Moon is One, or Sixteen, Days old, it is HIGH WATER at Beachy, Candado, Dover, &c. at 38 Minutes past 11 o'Clock. And so of the rest.—As to the Moon's AGE, you find it in the sixth Column on every left-hand Page of the Calendar.

A TABLE of the EQUATION of TIME, for regulating Clocks and Watches for 1812.—*Note*, fa. Clock too fast; that is, your Clock, to be set right, must be so much faster than the Sun Dial.—slo. Clock too slow; that is, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table.—*For Example*, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Min. 33 Seconds faster than a Sun Dial; therefore I set it so much faster accordingly. And so of the rest. Twelve o'Clock is the best Time to set a Clock or a Watch by a Dial.

Note, A Sun Dial shews Solar or Apparent Time; but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

Handwritten note: In the first column of the Table, the numbers 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, are the days of the month.

A TABLE of the Rising, Southing, and Setting of the
PLEIADES, or SEVEN STARS, for every 5th Day in the
Year; of excellent Use to find the Hour of the Night.

1811	Battle of Busaco;—Battle of Albuera	1

AN ACCOUNT OF THE
ECLIPSES OF THE SUN AND MOON,
AND OTHER
APPEARANCES IN THE HEAVENS,
IN THE YEAR 1812:

Calculated from New and Improved Solar and Lunar Tables,
Founded on the Newtonian System of Gravitation,
And agreeing with Observations to a surprising Exactness.

THERE will be Six Luminarian Eclipses this year, to be seen in one part or other of this Terraqueous Globe; and of these Six, only One will be visible to the Inhabitants of Great Britain and parts adjacent. The particulars of these Eclipses, which were calculated from new and very accurate Tables of the SUN and MOON, founded on the NEWTONIAN principles of Gravitation, take as follows:

The First will be a small one of the SUN, on Wednesday the 12th of February, at our 8 o'Clock at Night; consequently invisible to us, not only on account of the Time; but had it been at noon-day, it would have been

the same, as the *Moon* has great North Latitude; therefore cannot be but very small where greatest, and that will be in the Northern Parts of the Earth, where the *SUN* is up.

The Second is a great and total Eclipse of the *MOON*, and if the Air prove favourable it will be visible for the most part here, but not all of it, as the *Moon* will set eclipsed. It happens on *Thursday* the 27th of *February* in the Morning. At the beginning of this Eclipse the *Moon* will be vertical, or directly over-head at midnight, in 8 deg. 58 min. North Latitude, in Longitude 59 deg. 29 min. West from *London*; which Place falls near the Island of *Trinidad*, discovered by *Columbus* in 1498. It is in South *America*, in the gulf of *Mexico*, separated from *Paria*, in *Terra Firma*, by a strait 8 iniles over, called by the Spaniards *La Boca del Drago*. At the middle of the Eclipse, the *Moon* will be vertical in 8 deg. 41 min. North Latitude, and 88 deg. 2 min. West from *London*, which Place is not far from *Cape Blanco* on the Western Coast of New Spain in North *America*. At the end of this Eclipse, the *Moon* will be vertical in 8 deg. 25 min. of North Latitude, and 116 deg. 35 min. of West Longitude from *London*; which Place falls in the Great Southern Ocean, a little to the South of *Captain Clipperton's Island*. Hence it appears, that the beginning of this Eclipse will be visible to all the Northern and Eastern Parts of *Europe*, as *Sweden*, *Poland*, *Germany*, *Italy*, *France*, *Spain*, and the Western parts of *Africa*; but the end will not be visible in any part of *Europe* or *Africa*, except at the *Azores* and *Cape Verd* Islands. The *Moon* will set with us on the Eastern parts of our Island totally eclipsed, but to the Western parts thereof, I expect the *Moon* will be coming out of total darkness before she sets. The *Moon* will rise eclipsed at the *Sandwich* and *Society* Islands; and the end will extend itself as far as the *Friendly* Islands, and the New *Hebrides*, New *Zealand*, all situated in the Great South Sea. This Eclipse may very properly be called an *American* Eclipse, as it will be visible from the beginning to the end in every part of that great Continent, and also to all our West *India* Islands. In these Kingdoms of Great Britain,

the

the Time and Manner of its Appearance may be expected nearly to correspond with the following Type and Times:

<i>Feb. 27th in the Morning.</i>	London.			York.			Edinburgh.			App. Time
	h.	m.	s.	h.	m.	s.	h.	m.	s.	
Eclipse begins - -	3	54	0	3	49	33	3	41	11	
Total darkness beg.	4	59	30	4	55	3	4	46	41	
Middle of Eclipse	5	52	0	5	47	33	5	39	11	
Total darkness ends	6	44	30	6	40	3	6	31	41	
End of the Eclipse	7	50	0	7	45	33	7	37	11	

Digits eclipsed at middle, $20^{\circ} 40'$.

The Moon will set that Morning, at *London* and parts adjacent, at 49 min. past 6 o'Clock.

Note.—*H. O.* an Horizontal Line.

The Third is another small Eclipse of the SUN, on *Friday* the 13th of *March*, at 22 min. past 6 o'Clock in the Morning, with respect to us; but the *Moon* having great South Latitude at the time of this Eclipse, it will be invisible to us, and not to us only, but even to all *Europe*. It will be but a very small Eclipse where greatest, and that will be in the remote Southern parts of the *Earth*.

The

The Fourth is another small Eclipse of the Sun, on *Friday* the 7th of *August*, at 54 min. past 4 in the Morning, with respect to us; but the places of the Luminaries at this conjunction lie so far from the Lunar Node, that her Latitude is too large, and that south too, to afford us a sight of the Eclipse. It will be visible only in high Southern Latitudes, where the Sun is up, and there but very small.

The Fifth is another total Eclipse of the Moon, upon *Saturday* the 22d of *August*, in the Afternoon; it begins at 10 min. after our One o'Clock; the middle will be at 59 min. after 2, and the end will be at 47 min. after 4, consequently invisible in these parts. At the beginning of this Eclipse, the Moon is vertical (or directly over-head) in Latitude 12 deg. 2 min. South, in Longitude 161 deg. 35 min. East from London, which Place falls near the Islands called Queen Charlotte's Isles, in the Great South Sea. At the middle of this Eclipse the Moon will be vertical, or directly over-head, at Midnight, in Latitude 11 deg. 44 min. South, in Longitude 135 deg. 11 min. East from London; which Place falls on the Northern Coast of New Holland, near Arnheim's Land, about 120 Leagues to the west of Endeavour Straits, in the same great Ocean. At the end of this Eclipse the Moon will be vertical in Latitude 11 deg. 27 min. South, in Longitude 109 deg. 15 min. East from London; which Place falls about 80 Leagues to the South of the Island of Great Java, in the same great Ocean. From the above statements, it appears that this Eclipse will be visible in Eastern Tartary, in China, the Philippine Islands, New Guinea, those of Malacca, Borneo, Sunda, the New Hebrides, and the Friendly Islands, to New Holland, and New Zealand; it also will be visible to all the unknown Southern parts of the World, quite round the Pole to the extent of 11 deg. or more. It will also be seen at the Society and Sandwich Islands, where the Moon will set before the Eclipse is over; it will also extend itself Westward as far as the Island of Madagascar, and to the Eastern parts of Africa, where the Moon will rise eclipsed.

Digits eclipsed at the middle, will be about 22° , from the South side of the Earth's Shadow.

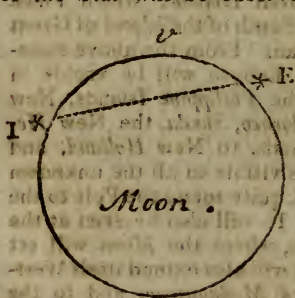

The Sixth and last of these Eclipses is another small one of the *Sun*; it happens on *Saturday* the 5th of *September*, at 22 min. past our 7 o'Clock at Night, therefore invisible to us; it will be visible only in high Northern Latitudes, where the *Sun* is up, and there very small, as the *Moon* at that time has great North Latitude.

Other Appearances in the Heavens.

IN this Year there will be several near Appulses of the *Moon* to that notable Star of the first Magnitude, called *Aldebaran*; at some of these Appulses the Star will be quite hid behind the *Moon* for some time, in these Kingdoms, some of which, worthy of notice, happen in the following Order:

1. On *Thursday* the 23d of *January*, the *Moon* will make a near Appulse to *Aldebaran*, between 7 and 8 o'Clock in the Evening.

2. On *Thursday* the 22d of *October*, the *Moon* will eclipse *Aldebaran*, and it will make a pretty appearance through the Telescope, should the Air prove favourable, for the Star will be observed to immerge behind the

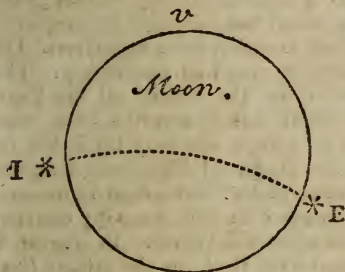

Edge of the *Moon*, at 57 min. past 11 o'Clock at Night, and will again appear to emerge from behind the Western Edge of the *Moon* at 51 min. after 12 o'Clock, apparent Time at *London*, after having been hid by the *Moon* 54 min. The annexed Type shews the appearance where the *Moon's* Limb takes the star, as at I; and the Star will appear again as at E; *r*, the *Moon's* upper

Sarah Limb Sarah Limb

upper Limb. The Star passes to the North of the Moon's centre in this Occultation, as the Type shews.

3. The *Moon* will again eclipse *Aldebaran* on *Wednesday* Night the 16th Day of *December*, and, like the former, visible here, should the Air be clear; and will

make a pretty appearance through a good Telescope, for as the *Moon* will be near the Full, her light will rather obscure the brightness of the Star, which by the Telescope will appear very bright and conspicuous...

The Star immerge's behind the Edge of

the *Moon* at I, at 48 min. past 9 o'Clock; and will again appear to emerge from behind the Western Edge of the *Moon* at E, at 59 min. past 10 o'Clock, apparent Time at *London*, after having been covered by the *Moon*, one hour and 11 minutes. The annexed Type will shew the manner of Appearance—*v*, the *Moon*'s upper Limb.

Note, The beautiful Planet *Venus* will set late at Night during the Months of *April*, *May*, and *June*, of this Year, and will gild our Evenings with her refulgent Beams; long after the *Sun* is set.

METEOROLOGICAL OBSERVATIONS, &c.

Relating to the Year 1810;

With some Remarks on the BAROMETER or
Weather-Glass.

THE Year 1810. was remarkable for a very cold and backward Spring, which was attended with continual sharp North-easterly Winds; all the Fruit in most places was

was entirely cut off, and the Walnut Trees so damaged, that scarce a leaf was to be seen upon them, the beginning of *June*, even so, that in general a Nut was not to be found upon them that Year; and also all sorts of young Trees in Plantations, were so damaged by blasting Winds and Frosts, that the like I believe was not known in the memory of Man; this also was followed by much dry weather, so that Grass was in most places very short. The Barometer all the time kept very high and steady. The Month of *May* was cold for the Season of the Year, so that on the 28th, at Night, was so severe a Frost, with the wind North-East, that there was very thick Ice on Ponds, &c. the 29th in the Morning! This Frost did great damage. *June* was in general dry, with a high Barometer all the Month. The weather in *July* was very changeable, attended at times with cold Winds. In *August*, a Thunder-Storm, attended with Hail, on the 4th, at *Royston*, and on the 16th much Rain; and on the 19th the Hygrometer changed to very moist, but the Barometer kept up, and even rose, while some Rain was falling, which was only from some low Clouds, and shewed that the weather was about to change, and become fine for the Harvest, as it was wet and showery before. This was a pleasing sight to a Farmer. But then this could not have been noticed without a good Weather-Glass; I say *good* ones, for there are many bad ones about the Country, not worth House-room. The 10th of *November* 1810, will long be remembered by many, for the melancholy effects of very heavy Rains, accompanied with a very strong Wind from the East, which caused great floods at *Boston* in *Lincolnshire*, and along the Coast to *Fosdike*, &c. attended with a very high Tide at 7 in the Evening, so that the Salt Water and Freshes overflowed the Country, dreadful to behold; and also at *Bristol* and the Western Coast much damage was done; indeed, the effects of this tremendous Storm were experienced almost in all parts of the Kingdom, especially along the Eastern and Western Coasts. The Barometer sunk suddenly from 29,3 to 28,5 at *Royston*, at that time.

I am sorry to observe, by the Bills of Mortality for 1810, in *London*, that about Twelve hundred of our fellow-creatures were victims to the Small-Pox during the last Twelve Months, and this through prejudices which have been unjustly excited against the Cow-Pox Inoculation, by the Ignorant and Designing!! I once more recommend the Vaccine Inoculation, not only from my own knowledge, but from a Testimonial of its perfect safety, mildness, and security from the Small Pox (that Scourge of Nations) signed by One hundred and eighty Physicians and Surgeons, resident in *London*: It is never fatal, or even dangerous; it produces no bad disorders; it requires no preparatory Medicines; it may be performed upon old or young, at all Seasons of the year, with perfect safety; and what is still more, it can only be given by Inoculation, so that no one can catch it by breathing in the same Room, or sleeping in the same Bed with a vaccinated Person; and therefore it is not to be regarded in the light of a serious disease, but as an inestimable blessing to the whole Human Race! *Embrace then the Blessing Heaven hath sent!*

Judicium Astrologicum pro Anno 1812.

Vox Cælorum, Vox Dei: The Voice of the Heavens is the Voice of God.—He speaks in all the Changes of the Seasons, and of the Times.

COURTEOUS READER,

I HOPE ENGLAND will never meet with that overwhelming Blow that some of the surrounding Nations and Countries are now labouring under; though, I am sorry to say, we are still groaning under the pressure of very heavy Taxes, and other burdens, never before known; her Manufactures and her Commerce at this time greatly crippled, and her Streets are filled with great Complaints, so that every Mouth is extended to execrate the War, and all its dreadful Miseries, and suffering Thousands sigh for the return of Peace.

I NOW

I NOW again present my Readers with another
 HIEROGLYPHIC,
 Alluding to these eventful Times.

The above *Hieroglyphic* represents *Virgo* weeping, and relates to Mundane affairs ; and I make no doubt but most of my Readers will easily construe what it means in a Political sense, as I shall leave it to Time and the Curious, as I did that of last Year, which is nearly allied to this.

Observations on the Four Quarters of the Year, deduced from Observations of Planetary Influx and Influences, operating therein.

Of the Brumal Ingress, or Winter Quarter.

THIS Quarter begins when the Sun touches the first Scruple of the Tropical Sign *Capricorn*, and that will be on *Sunday* the 22d of *December* 1811, at 25 min. past 4 o'Clock in the Afternoon ; at which time 4 degrees of

of \times culminate, and the 8th degree of \ominus will be ascending in the East. The Δ ab \square \hbar ad vac. \square γ , et \square \odot , from the 6th, 10th and 11th Houses of the Figure of the Heavens set for that time. The *Moon* then has but just past a square aspect of *Saturn*, and next applying to a square aspect of the *Sun* and *Jupiter*, from Equinoctial and Tropical Signs; the *Moon* entering her first Quarter at 30 min. past 5 that afternoon. But what is still more remarkable, there will directly follow this Ingress, an Opposition of the two Superiors, *Jupiter* and *Saturn*, and that from Tropical Signs, which take place at the entrance of the new Year; viz. the 1st of *January*; and on the 2d of *February* following, the Planet *Mars* comes to a square aspect of the Planet *Saturn* also. Indeed, the Portents of this Ingress shew great ambiguity in the Councils of Princes, and in the political affairs of the World; and many things portended by the Planets will not as yet be brought to light. This opposition of *Jupiter* and *Saturn*, will, I think, according to the current of second Causes, put forward the effects of the late Comet, whose influence we are still under; whence remarkable accidents, and actions of War and warlike stratagems, will follow in the course of this Year, in many Kingdoms in *Europe*, unless the God of all Power and Mercy avert his Judgments impending. This Position of the two grand Superiors, *Jupiter* and *Saturn*, will help little to the tranquillity of *Ireland*, whose affairs will still meet with broils, troubles, and disappointments; and indeed their influence will often frustrate designs for the Public good, if not the death of some great Man. There seems by this Ingress to be still great Impediments to a general Peace, and these configurations of the Planets rather fix than remove our Complaints.

When fiery COMETS o'er these Nations rise,
 And splendid Lightning gilds the upper Skies;
 When round their vortex they in fury roll,
 They fright with dire alarm each guilty Soul;
 As Omens certain of a labouring State,
 Of bloody Battles, and a hostile Fate.
 They shake with dreadful awe the pond'rous mass,
 And Desolation make, where once bless'd Order was.

A Scheme of the Grand Radix of the Year's Revolution, or the SUN'S ENTRANCE into ARIES, for the Year 1812.

Vernal, or Spring Quarter.

The Sun now begins to display his genial influence of light and heat on the Earth; and this Quarter begins, this Year, on *Friday* the 20th of *March*, at 52 min. past 5 o'Clock in the Afternoon, when 28 degrees of Π culminate, and 28 degrees of *Virgo* ascend; and the Planetary Positions are exhibited in the above Scheme. There are several remarkable Positions at this Ingress: the *Moon* separating from an opposition of *Saturn*, from Angles and Tropical Signs, and also, *Jupiter* and *Saturn* keeping within Orbs, and repeating again their Opposition in the Month of *May* following; these Configurations, I fear, are not very friendly to *England*, as well as some other Kingdoms and Places I could name; they portend Wars and Bloodshed; dissolving of Friendship and Alliances: but *Mars* with *Venus* in the 8th House, in a Sex-

tile

tile Aspect of the *Moon*, in her own House, strong and potent, gives hopes that the good Angel of God will direct His Majesty and Counsellors, so that by their Wisdom and Prudence many things to the hurt of these Realms may be prevented or meliorated; for the Flames of War are not yet quenched, but still flashing at a distance. May Heaven protect my native Land, and bless the Councils of the King with Unanimity of Spirit, and sound Judgment! The French *EMPEROR*, and also *Great Britain*, appear very formidable to the surrounding Nations, for War is still the Fashion of the Day, to the great concern of many, which will cause great Oppressions for want of Trade, and murmuring at the great Burden of Taxes, &c. Many eminent and great Events and Alterations will in the course of this Year take place and come to pass in *France*, *Germany*, *Italy*, *Spain*, and *Portugal*; in *Turkey*, and amongst the Northern Powers also, to which, I fear, I must add, *Great Britain* and *Ireland*; and, indeed, most of the *European* Powers seem to be concerned in one shape or other, for there is yet a strange Spirit of Discord amongst Mankind, and the revolutionizing Spirit of a certain *EMPEROR* is still hard at work. The United States of *America* will not be free from Troubles and Discontents, yet that People will act with some Caution and Prudence. In divers Nations there will be Strife and Contentions, with mischievous Stratagems, Rebellions, Seditions, with Armies marching and countermarching, making inroads to plunder and pillage defenceless Towns and Places. *Be wise now, therefore, O ye Kings; be instructed, ye Judges of the Earth, &c. See Psal. ii. 10, 11. 12.*

Of the Estival, or Summer Quarter.

This Quarter begins when the *Sun* enters the first point of the Tropic of *Cancer*, which this year happens on *Sunday* the 21st of *June*, at 28 min. past 3 o'Clock in the Afternoon, when 7 degrees of *Scorpio* possess the Horoscope, and 20 degrees of *Leo* cut the Mid-heaven. The *Moon* is angular in the Ascendant, departing from a ☐ of ♀, and Δ of ♂ and ♀, and just before this Ingress there happened an Opposition of *Saturn* and *Mars* from Tropical Signs, and also soon after this Ingress, before

June

June is out, *Jupiter* and *Mars* will be in *Conjunction*, and the *Sun* will come to an *Opposition* of *Saturn*; but this is not all, for *Jupiter* and *Saturn* are still within Orbs of their *Opposition*. These, most of them, are very untoward *Positions*, and denote great *Changes* and *Vicissitudes* in *Kingdoms* and *States*, both in reference to *Religion*, and other matters; for *History* abundantly informs, that such *Configurations* of the *Planets* do so much influence the *Spirits* of *Mén*, that *Wars* and *Tumults*, *Broils* and *Seditions*, naturally proceed. The *Affairs* of *Spain* and *Portugal*, with some other *Countries*, are in a bad *Situation*; *Russia*, and other *Northern Powers*, are not very well off. Indeed, methinks I behold all or most of the *States* of *Europe* still involved in *Contentions*, *Wars*, and *Tribulations*. There will be a great *Retrogradation* of *Affairs* in divers *Popish Countries*; and I fear our famous *City* of *London* will meet with great *Disappointments*, &c.

Of the Autumnal Quarter.

This *Quarter* takes place when the *Sun* enters the equinoctial Sign *Libra*, making again our *Days* and *Nights* equal, which this year falls on *Wednesday* the 23d of *September*, at 22 min. past 5 in the *Morning*, when 21 deg. of Π culminate, and 23 deg. of m is on the *Horoscope*, \S Lord of the *Ascendant* in 6 of 8, in the 12th. The *Moon*, in the 8th, applying to a *Time Aspect* of *Saturn*, and *Square* of *Jupiter*. The *Sun* and *Saturn* are both angular, and under the *Earth* at this time also. Hence the *Planetary Aspects* at this *Ingress*, and following *Months*, imply miserable *Complaints* among the *People* in general, on many accounts, for I fear our *Work* is not yet finished, nor the *Sword* put into its *Scabbard*; pacific measures seem to advance with very short and tardy paces.

FINIS.
