Merlinus Liberatus.

AN

ALMANACK

For the Year of our Redemption,

1810,

Being the Second after *Bissextile*, or *Leap-Year*;
And from the Creation of the World, according
to the best History, 5757,

And the 121st of our Deliverance by *K. William*

From Popery and Arbitrary Government;

But the 115th from the

Horrid, Popish, Jacobite Plot

Wherein are contained all Things fitting and useful for such a Work; as
an Ephemeris of the daily Motions of the Planets, with their various
Configurations, Aspects, Conjunctions; Lunations, Eclipses, Astrono-
mical, Astrological Meteorological Observations, the rising and setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and daily Equation of Clocks; Length and Break,
Increase and Decrease of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes; a Chronology; Remarks on the Divisions of the
Heavens, with Judgments of the Eclipses of the Planets, handled ac-
cording to the Rules of the Ptolomæan Astrology, with many other
Things relating to the Truth of Astrology.

Calculated for the Meridian of  LONDON.

By **JOHN PARTRIDGE.**

— *Etiā Mortuus loquitur.* —

L O N D O N.

Printed for the **COMPANY of STATIONERS.**

By **WILLIAM THORNE**, Red Lion Court, Fleet Street.

And Sold by **GEORGE GREENHILL**, at their Hall, Ludgate Street.

[Price stitched One Shilling and Ten Pence.]

2 January hath XXXI Days.

The Chimney Corner and a Pot of Ale,
Are Things which still this Month doth never fail :
But those who have no Money, can't afford
To have their Vaults so plentifully stor'd.

4 February hath XXVIII Days.

Now blust'ring Boreas loud makes roaring Billows,
As loud as Noise of swearing drunken Fellows,
His Nature and his Office to proclaim,
For February Fill-dike is his Name.

VENUS is a Morning Star till March 15; then an Evening Star till the End of the Year.

6 March hath XXXI Days.

The Sun into the Ram doth run his Race,
 Days lengthen, and Nights shorten now apace.
 Beer brew'd this Month, as learned Poets sing,
 Doth cheer the Heart, and make the Nose cry T'wing.

Now comes the Cuckow, singing of his Ditty,
Which to the Fields invites Men of the City.
The Countrymen do also walk the Fields,
To hear the Musick that this rare Bird yields.

Hot Summer now doth of the Dog-Star boast,
Of angry Constellations, honour'd most;
From whose strong Heat, Egyptians first begun
To mark the turning Cycle of the Sun.

Now *Phæbus* sends forth his hot scorching Rays,
 The Nights are short, and very long the Days;
 Men seek for Places cool to sit and tipple in,
 Until both Wit and Legs do go a Crippling.

The Reaper panting now with Heat and Pain,
 With crooked Razor shaves the tufted Plain;
 The humble Ears devote their loaded Top,
 And crown his Labour with a grateful Crop.

18 September hath XXX Days.

Of all the Callings which in this World doth fall,
A Landlord is this Month the best of all;
For it must needs be true, what all Men say,
Better have Money to Receive than Pay.

20 October hath XXXI Days.

Lawyer's Fourth Harvest, when the Term begins ;

Rich, hold your Guiseas fast ; Poor, 'ware your Skins ;

For oft-time such a Blow is given, the same

Makes Clients black, and Purse for ever lame.

22 November hath XXX Days.

Let Papists now with blushing Cheeks remember,
What they were doing in the Month *November*;
When they design'd a Blow, to give the lat,
To Lords and Commons, at one fatal Blast.

24 December hath XXXI Days.

Now, hey for *Christmas*, let the Spits go round,
 Let Cauldrons boil, and Pies i'th' Oven be found.
 May they who now deny themselves good Cheer,
 Against their Wills, keep strict *Lent* all the Year.

A TABLE of TERMS and RETURNS.

Hilary Term begins *January 23*, ends *February 12*.

Returns or Effoign Days.	Exc.	Ret	App.	W. D.
In eight Days of St. Hilary, - - <i>January 20</i>	21	22	23	<i>Tuesd.</i>
In fifteen Days of St. Hilary, - - - <i>27</i>	28	29	30	<i>Tuesd.</i>
On the Morrow of the Purif. of bl. V. M. <i>Feb. 3</i>	4	5	6	<i>Tuesd.</i>
In eight Days of the Purif. of bl. V. Mary, <i>9</i>	10	11	12	<i>Monday</i>

Easter Term begins *May 9*, ends *June 4*.

In 15 Days of Easter, - - - <i>May 6</i>	7	8	9	<i>Wednesf.</i>
From the Day of Easter in 3 Weeks, - - <i>13</i>	14	15	16	<i>Wednesf.</i>
From the Day of Easter in 1 Month, - - <i>20</i>	21	22	23	<i>Wednesf.</i>
From the Day of Easter in 5 Weeks, - - <i>27</i>	28	29	30	<i>Wednesf.</i>
On the Morrow of the Ascension, - - <i>June 1</i>	2	3	4	<i>Monday</i>

Trinity Term begins *June 22*, ends *July 11*.

On the Morrow of the holy Trinity, <i>June 18</i>	19	20	22	<i>Friday.</i>
In eight Days of the holy Trinity, - - <i>24</i>	25	26	27	<i>Wednesf.</i>
In fifteen Days of the holy Trinity, <i>July 1</i>	2	3	4	<i>Wednesf.</i>
From the holy Trinity in 3 Weeks, - - <i>8</i>	9	10	11	<i>Wednesf.</i>

Michaelmas Term begins *Nov. 6*, ends *Nov. 28*.

On the Morrow of All Souls, - - - <i>Nov. 3</i>	4	5	6	<i>Tuesd.</i>
On the Morrow of St. Martin, - - - <i>12</i>	13	14	15	<i>Thurs.</i>
In eight Days of St. Martin, - - - <i>18</i>	19	20	21	<i>Wednesf.</i>
In fifteen Days of St. Martin, - - - <i>25</i>	26	27	28	<i>Wednesf.</i>

N. B. No Sittings in *Westminster-Hall* on the 2d of February, *Ascension Day*, and *Midsummer Day*.

The Exchequer opens Eight Days before any Term begins, except Trinity, before which it opens but Four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

OXFORD and CAMBRIDGE TERMS.

OXFORD TERMS.

Lent Term - begins <i>January 14</i> , - - - ends <i>April 14</i> .	
Easter Term - begins <i>May 2</i> , - - - ends <i>June 9</i> .	
Trinity Term - begins <i>June 14</i> , - - - ends <i>July 7</i> .	
Michaelmas Term begins <i>October 10</i> , - - - ends <i>Dec. 17</i> .	

The Act is *July 3*.

CAMBRIDGE TERMS.

Lent Term - - begins <i>January 13</i> , - - - ends <i>April 13</i> .	
Easter Term - - begins <i>May 2</i> , - - - ends <i>July 6</i> .	
Michaelmas Term begins <i>October 10</i> , - - - ends <i>Dec. 16</i> .	

The Commencement will be *July 3*.

A Table of the Moon's Age for every Day throughout this Year, whereby, with the Help of the next General Tide Table, the Times of High Water at all the Places mentioned above it are shewn by Inspection.

An Explanation of this and the following Table:

First find the Month on the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Column is the Time of High Water at all the Places above mentioned, by Inspection.—*Example, Feb. 17, I find the Moon to be 13 Days old, and over against 13 in the 1st Column I find 9 h. 14 m. in the 2d Column, 11 h. 6 m. in the 3d; which are the Times of High Water at all those Places mentioned above in the 2d and 3d Columns on that Day. Et sic de cæteris.*

N. B. In the Calendar Part you will find the Planets Southing inferted to several Days in each Month; and by this Table you may easily find their Rising and Setting. First, find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of South- ing, gives the Setting, but subtracted the Rising.

A Compendious Chronology of the most principal Epochs and Æras, with their Beginnings, reduced and fixed to the Years of the Julian Period, the Creation of the World, and to the Years before and after Christ.

	Julian Period	Anno Mund	Ante Christ
T HE Creation of the World after the Jews - - -	952	1	3760
The Common Epocha of the Creation	765	1	3950

Prs. Elizabeth, May 22, - 1770	Dfs. of Brunswick, Aug. 11, 1737

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
Russia	Alexander	Dec. 28, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Maria	Dec. 17, 1734	Feb. 24, 1777
Prussia	Fred.-Wm. III.	Aug. 6, 1773	Nov. 16, 1797
Denmark & Norway	Friederick VI.	Jan. 27, 1768	Mar. 13, 1808
Sweden	Charles XIII.		June 6, 1809
Austria	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Papedom.	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor-Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Mahomet	1782	July 28, 1808
Two Sicilies,	Ferdinand IV.	Jan. 12, 1751	Oct. 6, 1759
France, &c.	Napoleon	Aug. 15, 1769	Dec. 15, 1799

The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to pass of the Gold Coin.

Wt. allowed.		Full Wt.		SILVER.		Full Wt.	
GOLD.	dwt. gr.	dwt. gr.			dwt.	gr.	
Guinea -	5 8	5 9 ³ / ₈	A Crown, - - - -	19	8 ¹ / ₂		
Half Guinea, 2	16	2 16 ⁶ / ₈	Half Crown, - - -	9	16 ³ / ₄		
Third of Guin. 1	19	1 19 ¹ / ₈	Shilling, - - - -	3	20 ² / ₃		
			Six Pence, - - -	1	22 ¹ / ₄		

According to the above proportions it appears, that the value of a *lb.* of silver is 62s. or 31. 2s. and of a *lb.* of gold is 44¹/₂ guineas, or 461. 14s. 6d. Also that the *oz.* of silver is 5s. 2d. and the *oz.* of gold 31. 17s. 10¹/₂d. So that the value of the standard gold is 15 times that of the silver, and 1-14 more.

OF THE
ECLIPSES

That will happen this Year, 1810.

In the Course of this Year there will be only Two Eclipses, and they both of the SUN, and central, the one before his Apogee and the other after it; consequently, we cannot expect the MOON to be Eclipsed at all until the Year following.

THE first of these Solar Eclipses is on *Wednesday* the 4th Day of *April*, at 37 min. past our 1 o'Clock in the Morning, consequently invisible to us.

In the great South Pacific Ocean, where it is visible, it will be a very great Eclipse, both central and annular; and in 11 degrees 20 min. North Latitude, and Longitude East, 154 deg. 41 min. from *London*, the *Sun* will be centrally eclipsed on the Meridian, or precisely at Noon-Day; when a most beautiful Ring of Light will appear quite round the *Moon's* opaque Body on every Side; and this will be about 41 min. past our 1 o'Clock in the Morning; hence it appears, that this Eclipse will be visible, more or less, at the Sandwich Islands, the Friendly Islands, the New Hebrides, New Caledonia, the Northern Coasts of New Holland, New Ireland, New Guinea, the Ladrone Islands, and to the Northward, as far as the Island of Japan; and also Westward, as far as the Philippine Islands, and it is expected as far as the Island of Borneo, and some other Islands thereabout.

The Second of these Solar Eclipses happens on *Friday*, the 28th Day of *September*, at 46 min. past 4 o'Clock in the Afternoon, and notwithstanding the *Sun* is not then set, it will be invisible to us (as well as to all Europe) by reason of the *Moon's* true Latitude being South, and this augmented by her Parallax, which will depress the visible Place of the *Moon's* Centre, more than is the Space taken up by the Semidiameters of the *Sun* and *Moon*.

It will be a very great Eclipse in the Southern Parts of the

the Globe; for in that large and extensive Country of *PERU*, in South America, the *Sun* will be centrally eclipsed, and annular, as the apparent Diameter of the *Sun* is larger than that of the *Moon*, so that there will be a beautiful bright Ring of Light round the *Moon's* dark Body on every Side. This curious Appearance will be precisely at 12 o'Clock at Noon, under 6 deg. 7 min. South Latitude, and in 72 deg. 19 min. of West Longitude from *London*; and this will be at 49 min. past our 4 o'Clock in the Afternoon. Hence, I observe that this Eclipse will be visible in a partial Degree (more or less) to the greatest Part of South America; and it also will extend itself to the Island of *Jamaica*, to the Island of *St. Domingo*, and all the rest of the West India Islands.

Note.—No Eclipses of the *Sun* can be seen by us here in *England*, wherein the *Moon* hath South Latitude; nay, though her Latitude be North, unless it be pretty large to counterbalance her Parallax, (which is always South with us) we can have no Eclipse of the *Sun*; which is the principal Reason why Solar Eclipses are more rare than Lunar Ones, in any particular Place; though, in general, the former are more frequent than the latter.

For the Sake of many of my Readers, especially the Curious, I shall here give an Account of a Notable Occultation or two, which will be visible to us; calculated from very correct Astronomical Tables, for the Meridian and Latitude of *London*, according to app. Time.

On *Thursday*, the 8th Day of *February*, at Night, there happens a beautiful Occultation of the Planet *Jupiter* by the *Moon*; the Immersion of which will be at 4 min. past 8 o'Clock, when the Eastern dark Edge of the *Moon* will take *Jupiter*, as at I, in the annexed Type. And *Jupiter* will again emerge from behind the bright Edge of the *Moon*, 12 min. South of her Centre, as at E, at 40 min.

min. past 8 o'Clock, as is shown in the Type; after being hid 36 Minutes. This will make a beautiful Appearance through a good Telescope, as all *Jupiter's* Satellites will be visible; two of them will appear on the Left, and the other two to the Right Hand of *Jupiter*.

On *Tuesday*, the 18th of *September*, at Night, the *Moon*

will Eclipse a notable fixed Star, called *Aldebaran*, a Star of the first Magnitude. The bright Edge of the *Moon* will take the Star, and the Immersion will take Place at 4 min past 10 at Night, as at I, in the annexed Type; and *Aldebaran* will come out from behind

the *Moon*, as at E, at 59 min. past 10 o'Clock; after being hid from Sight 55 Minutes.

On *Friday*, *December* the 21st, early in the Morning, soon after the *Moon* is risen, she will eclipse the Planet *Mars*; the Immersion takes Place, according to my Numbers, at 6 min. past 2 o'Clock; when the Planet will be seen to immerge behind the bright Edge of the *Moon*. *Mars* will come out from behind the dark Edge of the *Moon*, at 36 min. past 2 in the Morning, 13 min. North of the *Moon's* Centre, after being hid 30 Minutes.

Note.—The Stars immerging into Obscurity, behind the dark Part of the *Moon* in the Occultation of *Jupiter*, and the emerging of *Aldebaran* out of Obscurity, from behind the dark Part of the *Moon*, at a Distance from those Parts that appear to us, may in some sort convince the unlearned Reader, that the *Moon* is a solid Globe of Matter like our Earth, and that her Increase and Decrease of Light is not owing to an Augmentation or Diminution of the Matter whereof she is composed; but by her enlightened Parts, gradually inclining to, and reclining from, this Globe of Earth whereon we live.

GENETHLIACAL ASTROLOGY.

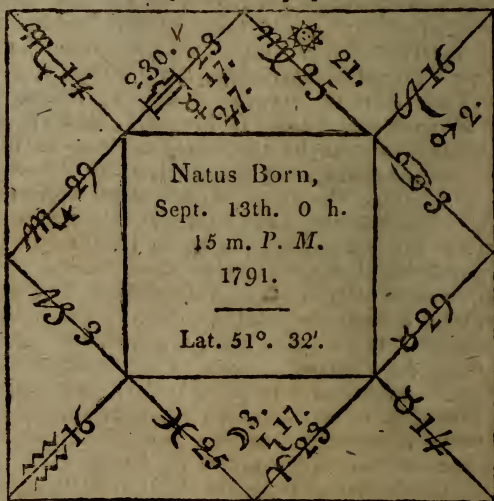

The Introduction.

ASTROLOGY in all Ages has had its Champions, as well as its Opposers; and I presume so it will in future Ages. We all know there is no Art yet arrived to Perfection, and that the best of Men are subject to Errors; the Philosophers, the Physicians, the Lawyers; nay, the Divines themselves, are none of them free; why then should they expect an Astrologer less subject to Errors and Frailties, ever attendant upon Human Nature? God has been pleased in every Age to illuminate particular Persons, above the Standard of other Men; but still there is a *plus ultra* behind: so in the Science of Astrology, there is a certain *Arcanum* almost equal to Prophecy; and yet it is so distributed to Man by the Almighty Disposer of all Things, that he cannot easily communicate his Knowledge therein to another. We know that in general Accidents of the World, the Astrologer ought rather to judge by the Strength of his own Reason, assisted by the Rules of Art, upon any Celestial Appearance or Configuration of the Planets, than wholly to depend upon some ill digested Aphorisms laid down by Authors; which, if not judiciously applied, are rarely verified; whereby the Art and Artist fall under Censure. Many of the Antagonists of Astrology, suppose that Astrologers believe and maintain a fatal Necessity, or that Things contingent must necessarily come to pass according to their Predictions, which is a very great Mistake in them, for all honest Astrologers own such Contingencies to be the Will and Pleasure of the Almighty; and that all Mundane Vicissitudes are the Effects of an all-ruling Providence; which yet, however, seldom Acts but by secondary or natural Causes; Time is the Parent of Truth, and must consummate all Things; yet we cannot but admire the great Creator of all Things, who hath so linked Effects to their Causes, that many ingenious Men have been able to discover in a natural Way several Contingencies, which have happened in the World, and also to particular Persons. Never was there yet any Empire, Kingdom, State, or Sect, had a Beginning, but they were ushered in by some remarkable Congress of the celestial

celestial Bodies, or the Appearance of Comets. To be satisfied of this, it is but looking back into History, and we shall meet with Examples sufficient to convince any rational Man, that such Things have (under God) their Originals from the Configurations of the celestial Bodies.

OBSERVATIONS, AND REMARKS ON AN EXTRAORDINARY NATIVITY.

A Scheme of the Horoscope at Birth.

THE Positions and Configurations of the Celestial Bodies in this Geniture are of so important a Nature, that a Variety of Observations thereon would be of little Consequence, as by the Position alone it is easy to discover that the Native will rise to an uncommon Degree of Honour and Dignity in this Life, for we find *Saturn*, the *Moon*, *Jupiter*, *Mercury*, and *Venus*, all posited in such a Manner as to produce Immortal Dignity and Reputation. This Native was born in London, and is a Person well known, and about the same Time of the Day, another was born in the Latitude of 53 Degrees North. The latter will rise in the World and become famous as well as the former, saving a few Exceptions relative to the Mun-

dane Aspects, &c. But among all the above illustrious Configurations (which I need not here mention) we must allow the Sun as the Apheta, or Giver of Life in both Genitures; and the first violent Encounter he meets with, is the Zodiacal Parallel of Saturn, about 20 Years of Age, and that followed by the Body of Mercury, Opposition of Saturn in Mundo, and Zodiacal Parallel of Mercury; here we find four powerful and malevolent Directions to the Sun Hyleg, all operating without any Assistance from the Benevolents to oppose their destructive Fury. When these Directions shew their Effects, I judge it will be very dangerous and hard to Escape; but I have not wrought any of the Directions, as to the correct Time when they will consequently shew their Effects. Yet it must be observed in all Cases, that the Bodies, and other violent Rays of the Maleficks, are not always killing, but only in those Genitures where they operate in full Force without any Thing to operate against them of a contrary Nature. How often have we observed the Giver of Life pass the most dangerous Directions without being scarcely observed? And yet it is no Matter of Astonishment that Subjects of this Nature so frequently occur. I am well aware of the absurd Ideas of many, who consider every violent Direction to the Sun, Moon, or Ascendant, of a violent Power and Influence;—however, in my Work which I intend to publish by Subscription, every Thing is rendered easy and plain to the Understanding of the meanest Capacity.

The next Example I shall exhibit (to shew the Power of the Stars, and Verity of Astrology) shall be in the Nativity of *Johannes Baptista Cardanus*, the Son of the great *Cardanus*, which Nativity was printed by his Father *Hieronymus Cardanus*, and examined by him, *Naibod*, and *Maginus*, three of the greatest Masters of Astrology in the two last Centuries, who could give no sufficient Astrological Reasons for his violent Death; and therefore was brought by *Sextus ab Heminga* and *Alexander de Angelis* to abuse the Astrologers with, and as an Argument to shew the Vanity of the Art. But in this Example, you may see that Ignorance was the Cause of Calumnation. In short, the Story is thus; this *Baptista Cardanus* was brought up to Learning, and employed himself in the Study and Practice of Physick, but being involved in
Misfortune

Misfortunes and Perturbations of Mind, he committed an unlawful Action, and for it was brought to the Bar of Justice, and condemned for his Crime, (which was poisoning his Wife) for which he was beheaded, the Way of Execution (of those that were guilty of Blood) in those Parts; and this at the Age of almost 26 Years, in the Year 1560. See the Figure.

In this Example, the *Moon* is certainly *Hyleg*, or Giver of Life, by being Light of the Time and in an aphetical Place, and therefore must be directed for Death, and from her Direction only we shall find Cause sufficient to put a Period to his Life, which at that Time it did; and the principal Direction which destroyed it was the *Moon* (*Hyleg*) *ad parallelum* ☉ in *Zodiaco*, and followed by the parallel *Mars* in *Mundo*, &c. and Parallel of *Jupiter* in *Zodiaco*, and Body of *Saturn*. The *Moon* past the Parallel of the *Sun* in 14 Degrees of *Cancer*, and the Ark of Direction is 26 d. 26 m. which gives in Time 25 Years and 10 Months, at which Time he fell into that unhappy Misfortune. See the following Tablet,

	o	1	Y. M	A.C.	
☉ ad parel. ♂ in mun. dd	19	24	18 10	1553	Sick and
☽ ad parel. ♀ in mun. dc	24	14	21 8	1556	disordered.
M. C. ad Δ Venus	24	15	23 8	1558	Married.
☽ ad parel. ☉ in Zodiaco	26	26	25 10	1560	Beheaded.
☽ ad parel. ♂ in mun. dc	29	2	28 5	1562	
☽ ad parel. ♀ in Zodiaco	30	56	30 4	1564	
☽ ad corpus Saturni	34	14	33 8	1568	

Thus you may see there is a strong Train of Directions to the true *Hyleg*, that compleated that fatal and dreadful Sentence, and which are sufficient to kill in any Nativity. 'Tis true ♄'s Rays fall in the Train, but unable to save by being evil affected, and therefore in Part specificates the Quality of Death.

Perhaps it may be required, for what Reason was it a violent Death? Why, this is very plain, if the Positions and Configurations of the Planets in this Nativity be compared with *Ptolomy's* Rules, in his *Quadripartite*, B. IV. Chap. IX. where he discourseth about natural and violent Deaths. Those that please to examine the Figure (and have got the Book) may find the Rules there laid down, exactly verified, and may be convinced, there is an *Astrology* in being, able to justify its Truth, and bid Defiance to all the scurrilous Invectives of the ignorant Antagonists of this laudable and useful Science, ASTROLOGY. *Vive, vale—*

*Si quid novisti rectius istis
Candidus imperti; si non, his utere mecum.*

Judicium Astrologicum, pro Anno 1810.

C, an Astrological Judgement upon the Four Quarterly Ingresses of the present Year; and First, of the Brumal Ingress, or Winter Quarter.

THIS Quarter begins at such Time as the Sun apparently enters the first Scruple of Capricorn, which happens under the Meridian of London, December the 22d, 1809, at 38 min. past 4 in the Morning; when 7 Degrees of *Virgo* culminate, and 18 Degrees of *Scorpio* ascend

cend the Horizontal Angle, *Mars* Lord thereof in the 3d, and in a Sextile Aspect with *Saturn* and *Venus*. The ♃ in the 9th, separating from an 8 of the *Sun*, and applying to the Square of ♃, from Tropical and Equinoctial Signs. But this is not all, for the Planet *Mars*, before the End of January, will be in a Square Aspect of *Saturn*, which Aspect will be repeated again in *February*. These Configurations will principally Influence this Quarter, but yet they may go for several Months beyond, for Planetary Influences may act, and often do act at a Distance from that Time, and so the Events signified thereby, may fall out sooner or later.—But to return, I therefore say, these Positions of the Planets shew much Strife and Debates amongst Privy Counsellors and Senators, in the various Courts of *Europe*, as well as in our own Country, about Rights, Privileges, War, Peace, &c. And, after a Year's more Fighting and Bloodshed between the hostile Powers of the Earth, the Political Affairs of the World stand yet in as much unsettled State, and in somewhat uncertain Posture, as heretofore. That revolutionizing Spirit that has been working in various Parts of the Continent, is still active. *Spain* and *Portugal*, and some other Parts of *Europe* feel and have Tumults and warlike Noises, with a falling away of the People with much Treachery and Deceit. I see in the East, the *Turkish* Empire decaying; the Luxury of their Sultans occasions their being often deposed, as well as their frequent Defeats, and evidently weaken their once mighty Power, which will not cease until the whole *Turkish* Empire is divided and nearly destroyed.

THE SPRING QUARTER,

Or, *The Sun's Transit through ♈, ♉, and ♊.*

THIS Quarter begins on *Wednesday* the 21st of *March*, at 12 min. past 6 in the Morning, when the *Sun* enters the Equinoctial Sign *Aries*; at which Time, 3 Deg. of ♈ will culminate, and 8 Deg. of *Aries* will ascend the Eastern Horizon. The ♃ ab 8 ☉, et 8 ♀; et ad * of ♈; et 8 of ♂, Cardinal Signs, possess the Four Angles of the Figure, with a ♂ of ♃ and ♁ in the Ascendant, in

in *Aries*, the reputed Ascendant of *England*. These are but untoward Positions, and denote Sadness, Death, Wars, and Effusion of Human Blood; and this, when we take into Consideration the Opposition of *Saturn* and *Mars* soon to follow, *Mars* being posited in a human Sign. Hence, we must not flatter ourselves that this will be a Time of Cessation from Troubles; for, some farther Undertakings must be first attempted, and many Alterations in the different States of *Europe*, remain yet to be produced, before that desirable Time takes Place. The *Roman* Sceptre seems to be departing from the House of *Austria*, and that Emperor greatly weakened; and the Northern Powers are distressed and almost ruined by *French* and other Councils, in consequence of a Continuance of the War; though it appears that some Overtures will be offered this Year for a Peace; but I fear without Effect with respect to us. The Fleets of *England* will still ride Triumphant to all Parts of the Globe, so that we have nothing to Fear from our most inveterate Enemies, if we are but just and true to ourselves. The *French* Emperor, I see, is yet like to be successful, in a great Measure, upon the Continent; and though pressed hard on every Side with many Difficulties, is yet determined to brave all Opposition. Our *West-India* Islands are very well off, so is *America*; but if they should meet with Difficulties, it will be brought on by their own internal Broils and Discontents.

THE SUMMER QUARTER,

Or, the Sun's Transit through ϖ , Ω , and \cap .

THIS Quarter begins on *Friday*, the 22d of *June*, at 54 min. past 3 in the Morning; when the first Degree of *Cancer* ascends, and 26 Deg. of ϖ are on the Medium Cœli; the Υ is in 7 Degrees of \mathcal{H} , and applying to the \square of \mathfrak{h} , and next to the \square of \mathfrak{d} ; all which will help on the Effects of former Influences; the *Sun* has but just past an 8 of \mathfrak{h} , and 8 of \mathfrak{d} , in the Ascendant of *London*; I hope that City, as well as other Places, may be preserved from the violent Effects of the *Small-Pox*, which is like to be very rife. I earnestly recommend to the People of *England* the VACCINE INOCULATION, as the

the best and safest Mode of preventing that violent Scourge of the Human Race. Though the Inoculation of the *Cow-Pock* is a novel Practice, yet the Disease in its natural State, has been known for Time immemorial, and its Power of preventing the *Small-Pox* has been long acknowledged; and there are many well authenticated Instances upon Record, of Persons who were afflicted with the casual *Cow-Pox* in their Youth, to whom the *Small-Pox* could never afterwards be communicated, and who lived to an advanced old Age, in perfect Health, and perfectly secure from the *Small-Pox* Contagion—But to return, it appears that various States and Kingdoms in *Europe* are still much divided, and the *French* as well as the *English* will be still very active, and that both by their Swords and in their Councils; for on these two great Governments hang all the Politics of the whole World.

THE AUTUMNAL QUARTER,

Or, *The Sun's Transit through ♄, ♀, and ♄.*

THIS Quarter begins on the 23d of *September*, at 43 min. past 5 in the Afternoon; when 20 Deg. of ♄ ascend, and 26 Deg. of ♄ culminate; the ♀ is departing from the * of ♄, and next applying to the Δ of ♄ and □ of ♀. Hence, we may expect to hear of Discontents, Depressions, and Impediments in Public Affairs, with great Complaints, as usual, of heavy Taxations, Murmurs and Repining against Men in Authority. The morbid Effluvia of these Rays seem also to point at *Persia, Turkey in Europe, Arabia, Dalmatia, Italy, Hungary, and Flanders.*
