EVERY New Invention, when found to be of real utility, needs no other recommendation than to be known, to merit the general approbation of the public.—J. GARTON's PATENT COTTON THREAD, so much admired for beauty and neatness in winding, as also for strength and durability, for the purpose of sewing, knitting, netting of veils, and making of lace. His coloured Cotton Thread, so universally used for the purpose of making up Ladies and Gentlemen's wearing-apparel.—Marking Cotton Thread, superior to silk, warranted to keep the colour, having had a fair trial, for nearly two years, without a complaint, it would be much lamented, so useful an article should get in bad repute, by selling a spurious sort; to prevent which, J. G. has procured a fine straw-coloured paper, with the words, "Garton's Patent Cotton," in the water-mark, the same as in bank notes, which will be easily discovered by shining the papef against the light. The public may rely on the Cotton Thread being genuine, when wrapped up in the straw-coloured paper. Merchants, Shopkeepers, and others, can be regularly supplied to any amount, having the largest assortment in the kingdom, at his Warehouse, No. 97, Cheapside, corner of Lawrence-lane, London.—N. B. The situation desired is from Leicester-square to Berkeley-square, and from Fitzroy-square to Portman-square, from East to West, in any pleasant and airy street situated in the space contained in those given points. Direct to L. G. to be left at Mr. Thomas's, Tailor and Man's Mercer, in St. James's-street. No letters that are not post-paid will be so much as taken in; and none but such as contain proper particulars, with real name and address, will be attended to.

MANNING's POWDER for the TEETH and GUMS.—It is almost needless to observe, that fine Teeth are the most engaging feature even in a beautiful face, and that bad ones are the most forbidding and offensive; the effects of either have and ever will be advantageous or detrimental to the youth of both sexes, in proportion as they produce disgusting or attractive sensations. The Powders now offered to the Public are prepared by a Gentleman of eminent medical abilities, who has long lamented the use of pernicious compositions, made up of pumice-stone, emery, scuttle-fish, and other harsh and destructive ingredients, more applicable to the manufacturing of scowering paper than a salutary dentifrice for the teeth, the enamel of which they inevitably sacrifice to a momentary whiteness. This trash is obtruded on the public under the empty pomp of those fabulous titles which entrap the unwary, and prey upon the credulous. The Proprietors of Manning's Powders have so high an opinion of the understanding of the Public, to insult common sense with any such bombastical description of their Powders, but leave them to acquire that reputation, which cannot fail in pronouncing them eminently superior to most others. The Proprietors, therefore, take the freedom only to recommend a fair trial of their efficacy, which will manifest itself, by putting a beautiful polish upon the teeth, and cleansing the gums of all scorbutic affections, giving them a healthy, ruddy complexion, not to be produced by any other.

These excellent Powders are sold by Manning, Mason, and Co. No. 116, Pall-Mall, next door to the Prince of Wales's Palace; with which is given a Treatise, not only on their peculiar virtues, but on the pernicious effects of the destructive rubbish before described. To Ladies and Gentlemen wishing for a more satisfactory confirmation of their efficacy, the Treatise will be delivered gratis previous to the use of them.
